
Section 1

Population

This section presents statistics on the growth, distribution, and characteristics of the U.S. population. The principal source of these data is the U.S. Census Bureau, which conducts a decennial census of population, a monthly population survey, a program of population estimates and projections, and a number of other periodic surveys relating to population characteristics. For a list of relevant publications, see the Guide to Sources of Statistics in Appendix I.

Decennial censuses—The U.S. Constitution provides for a census of the population every 10 years, primarily to establish a basis for apportionment of members of the House of Representatives among the states. For over a century after the first census in 1790, the census organization was a temporary one, created only for each decennial census. In 1902, the Census Bureau was established as a permanent federal agency, responsible for enumerating the population and also for compiling statistics on other population and housing characteristics.

Historically, the enumeration of the population has been a complete count. That is, an attempt is made to account for every person, for each person's residence, and for other characteristics (sex, age, family relationships, etc.). Since the 1940 census, in addition to the complete count information, some data have been obtained from representative samples of the population. In the 1990 and 2000 censuses, variable sampling rates were employed. For most of the country, 1 in every 6 households (about 17 percent) received the long form or sample questionnaire; in governmental units estimated to have fewer than 2,500 inhabitants, every other household (50 percent) received the sample questionnaire to enhance the reliability of sample data for small areas. Exact agreement is not to be expected between sample data and the 100-percent count. Sample data may be used with confidence where large

numbers are involved and assumed to indicate trends and relationships where small numbers are involved.

Current Population Survey (CPS)—This is a monthly nationwide survey of a scientifically selected sample representing the noninstitutional civilian population. The sample is located in 754 areas with coverage in every state and the District of Columbia and is subject to sampling error. At the present time, about 60,000 occupied households are eligible for interview every month; of these between 6 and 7 percent are, for various reasons, unavailable for interview.

While the primary purpose of the CPS is to obtain monthly statistics on the labor force, it also serves as a vehicle for inquiries on other subjects. Using CPS data, the Bureau issues a series of publications under the general title of *Current Population Reports*, which cover population characteristics (P20), consumer income (P60), special studies (P23), and other topics.

Estimates of population characteristics based on the CPS will not agree with the counts from the census because the CPS and the census use different procedures for collecting and processing the data for racial groups, the Hispanic population, and other topics. Caution should also be used when comparing estimates for various years because of the periodic introduction of changes into the CPS. Beginning in January 1994, a number of changes were introduced into the CPS that effect all data comparisons with prior years. These changes included the results of a major redesign of the survey questionnaire and collection methodology and the introduction of 1990 census population controls, adjusted for the estimated undercount. Beginning with the 2001 CPS Annual Demographic Supplement the independent estimates used as control totals for the CPS are based on civilian population benchmarks consistent with Census 2000. In March 2002, the sample size of the Annual Demographic Supplement was increased to approximately

78,000. In 2003 the name of the March supplement was changed to Annual Social and Economic Supplement. These changes in population controls had relatively little impact on derived measures such as means, medians, and percent distribution, but did have a significant impact on levels.

Population estimates and projections—Estimates of the United States population are derived by updating the resident population enumerated in Census 2000 with information on the components of population change: births, deaths, and net international migration. The April 1, 2000, population used in these estimates reflects modifications to the Census 2000 population as documented in the Count Question Resolution program.

Registered births and deaths are estimated from data supplied by the National Center for Health Statistics. The net international migration component in the population estimates includes: legal immigration to the United States, emigration of foreign born and native people from the United States, net movement between the United States and Puerto Rico, estimates of temporary migrants, and estimates of net residual foreign-born population, which include unauthorized migration.

For the first time, the estimates of the international migration component incorporated data available from the Census 2000 Supplementary Survey (C2SS) and the 2001 Supplementary Survey (SS01) along with estimates developed from the Demographic Analysis and Population Estimates (DAPE) project (See Deardorff and Blumerman, 2001, "Evaluation Components of International Migration: Estimates of the Foreign-Born Population by Migrant Status in 2000," Population Division Working Paper Series, No. 58).

Estimates for state and county areas are based on the same components of change data and sources as the national estimates with the addition of net internal migration. School enrollment statistics from state departments of education and parochial school systems, federal income tax returns from the Internal Revenue Service, group quarters data from the Federal-State Cooperative Program, and medicare data from the Centers of Medicare and Medicaid Services are also included.

The population by age for April 1, 1990, (shown in Table 11) reflects modifications to the 1990 census data counts. The review of detailed 1990 information indicated that respondents tended to report age as of the date of completion of the questionnaire, not as of April 1, 1990. In addition, there may have been a tendency for respondents to round up their age if they were close to having a birthday. A detailed explanation of the age modification procedure appears in 1990 Census of Population and Housing, Data Paper Listing CPH-L74.

Population estimates and projections are available on the Census Bureau Internet site <<http://www.census.gov>>. These estimates and projections are consistent with official decennial census figures with no adjustment for estimated net census coverage. However, the categories for these estimates and projections by race have been modified and are not comparable to the census race categories (see section below under "Race"). For details on methodology, see the sources cited below the individual tables.

Immigration—Immigration (migration to a country) is one component of international migration; the other component is emigration (migration *from* a country). In its simplest form, international migration is defined as any movement across a national border. In the United States, federal statistics on international migration are produced primarily by the U.S. Census Bureau and the Office of Immigration Statistics (located in the Department of Homeland Security).

The Census Bureau collects data used to estimate international migration through its decennial censuses and numerous surveys of the U.S. population. The Office of Immigration Statistics publishes immigration data in the *Yearbook of Immigration Statistics* and collects these data from several administrative records such as the Immigrant Visa and Alien Registration (OF-155, U.S. State Department) for new arrivals, and the Memorandum of Creation of Record of Lawful Permanent Residence (I-181, INS) for persons adjusting migrant status. Immigrants are aliens admitted for legal permanent residence in the United States. The category, immigrant, includes persons who may have entered the United States as nonimmigrants or refugees, but

who subsequently changed their status to that of a permanent resident. Nonresident aliens admitted to the United States for a temporary period are nonimmigrants. Refugees are considered nonimmigrants when initially admitted into the United States but are not included in nonimmigrant admission data. A refugee is an alien outside the United States who is unable or unwilling to return to his or her country of nationality because of persecution or a well-founded fear of persecution.

U.S. immigration law gives preferential immigration status to persons with a close family relationship with a U.S. citizen or legal permanent resident, persons with needed job skills, or persons who qualify as refugees. Immigration to the United States can be divided into two general categories: (1) those subject to the annual worldwide limitation and (2) those exempt from it. Numerical limits are imposed on visas issued and not on admissions. The maximum number of visas allowed to be issued under the preference categories in 2002 was 368,632—226,000 for family-sponsored immigrants and 142,632 for employment-based immigrants. There are nine categories among which the family-sponsored and employment-based immigrant visas are distributed, beginning in fiscal year 1992. Within the overall limitations the per-country limit for independent countries is set to 7 percent of the total family-sponsored and employment-based limits, while dependent areas are limited to 2 percent of the total. The 2002 limit allowed no more than 25,804 preference visas for any independent country and 7,373 for any dependency. Those exempt from the worldwide limitation include immediate relatives of U.S. citizens, refugees and asylees adjusting to permanent residence, and other various classes of special immigrants (see Table 6).

The Refugee Act of 1980 provides for a uniform admission procedure for refugees of all countries, based on the United Nations' definition of refugees. Authorized admission ceilings are set annually by the President in consultation with Congress. After 1 year of residence in the United States, refugees are eligible for immigrant status.

Metropolitan Areas—The United States Office of Management and Budget (OMB) defines metropolitan and micropolitan statistical areas according to published standards that are applied to Census Bureau data. The general concept of a metropolitan or micropolitan statistical area is that of a core area containing a substantial population nucleus, together with adjacent communities having a high degree of economic and social integration with that core. Currently defined metropolitan and micropolitan statistical areas are based on application of 2000 standards to 2000 decennial census data. The term “metropolitan area” (MA) was adopted in 1990 and referred collectively to metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs). The term “core based statistical area” (CBSA) became effective in 2000 and refers collectively to metropolitan and micropolitan statistical areas. Over time, new statistical areas are created and the components of others change. Because of historical changes in geographic definitions, users must be cautious in comparing data for these statistical areas from different dates. For some purposes, comparisons of data for areas as defined at given dates may be appropriate; for other purposes, it may be preferable to maintain consistent area definitions. For descriptive details and a listing of titles and components of metropolitan and micropolitan areas, see Appendix II.

Urban and rural—For Census 2000, the Census Bureau classified as urban all territory, population, and housing units located within urbanized areas (UAs) and urban clusters (UCs). A UA consists of densely settled territory that contains 50,000 or more people, while a UC consists of densely settled territory with at least 2,500 people but fewer than 50,000 people. (UCs are a new type of geographic entity for Census 2000.) Prior to Census 2000—from the 1950 census through the 1990 census—the urban population consisted of all people living in UAs and most places outside of UAs with a census population of 2,500 or more.

UAs and UCs encompass territory that generally consists of:

- A cluster of one or more block groups or census blocks each of which has a population density of at least 1,000 people per square mile at the time.
- Surrounding block groups and census blocks each of which has a population density of at least 500 people per square mile at the time.
- Less densely settled blocks that form enclaves or indentations, or are used to connect discontinuous areas with qualifying densities.

They also may include an airport located adjacent to qualifying densely settled area if it has an annual enplanement (aircraft boarding) of at least 10,000 people.

“Rural” for Census 2000 consists of all territory, population, and housing units located outside of UAs and UCs. Prior to Census 2000, rural consisted of all territory, population, and housing outside of UAs and outside of other places designated as “urban.” For Census 2000, many more geographic entities, including metropolitan areas, counties, county subdivisions, and places, contain both urban and rural territory, population, and housing units.

Residence—In determining residence, the Census Bureau counts each person as an inhabitant of a usual place of residence (i.e., the place where one usually lives and sleeps most of the time). While this place is not necessarily a person’s legal residence or voting residence, the use of these different bases of classification would produce the same results in the vast majority of cases.

Race—For the 1990 census, the Census Bureau collected and published racial statistics as outlined in Statistical Policy Directive No. 15 issued by the U.S. Office of Management and Budget (OMB). This directive provided standards on ethnic and racial categories for statistical reporting to be used by all federal agencies. According to the directive, the basic racial categories were American Indian or Alaskan Native, Asian or Pacific Islander, Black, and White. (The directive identified Hispanic origin as an ethnicity.) The question on race for Census 2000 was different from the one for the 1990 census in

several ways. Most significantly, respondents were given the option of selecting one or more race categories to indicate their racial identities. Because of these changes, the Census 2000 data on race are not directly comparable with data from the 1990 census or earlier censuses. Caution must be used when interpreting changes in the racial composition of the U.S. population over time. Census 2000 adheres to the federal standards for collecting and presenting data on race and Hispanic origin as established by OMB in October 1997. Starting with Census 2000, the OMB requires federal agencies to use a minimum of five race categories: White, Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian or Other Pacific Islander. For respondents unable to identify with any of these five race categories, OMB approved and included a sixth category—“Some other race” on the Census 2000 questionnaire. The Census 2000 question on race included 15 separate response categories and three areas where respondents could write in a more specific race group. The response categories and write-in answers can be combined to create the five minimum OMB race categories plus “Some other race.” People who responded to the question on race by indicating only one race are referred to as the *race alone* population, or the group that reported only one race category. Six categories make up this population: White alone, Black or African American alone, American Indian and Alaska Native alone, Asian alone, Native Hawaiian and Other Pacific Island alone, and Some other race alone. Individuals who chose more than one of the six race categories are referred to as the *Two or more races* population, or as the group that reported more than one race. Additionally, respondents who reported one race together with those who reported the same race plus one or more other races are combined to create the *race alone or in combination* categories. For example, the *White alone or in combination group* consists of those respondents who reported White combined with one or more other race groups, such as “White and Black or African American,” or “White and Asian and American Indian and Alaska Native.” Another way to think of the group who reported White alone or in combination is

as the total number of people who identified entirely or partially as White. This group is also described as people who reported White, whether or not they reported any other race.

The *alone or in combination* categories are tallies of *responses* rather than *respondents*. That is, the alone or in combination categories are not mutually exclusive. Individuals who reported two races were counted in two separate and distinct alone or in combination race categories, while those who reported three races were counted in three categories, and so on. Consequently, the sum of all alone or in combination categories equals the number of races reported (i.e., responses) which exceeds the total population.

The concept of race, as used by the Census Bureau, reflects self-identification by people according to the race or races with which they most closely identify. These categories are sociopolitical constructs and should not be interpreted as being scientific or anthropological in nature. Furthermore, the race categories include both racial and national-origin groups.

Data for the population by race for April 1, 2000, (shown in Tables 13 through 15) are modified counts and are not comparable to Census 2000 race categories. These numbers were computed using Census 2000 data by race that had been modified to be consistent with the 1997 Office of Management and Budget's, "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity," (Federal Register Notice, Vol. 62, No 210, October 1997). A detailed explanation of the race modification procedure appears on the Census Web page, <http://eire.census.gov/popest/data/national/tables/files/mod_race.php>.

In the CPS and other household sample surveys in which data are obtained through personal interview, respondents are asked to classify their race as: (1) White; (2) Black, African American or Negro; (3) American Indian or Alaska Native; (4) Asian; (5) Native Hawaiian or Other Pacific Islander. Beginning January 2003, respondents were allowed to report more than one race to indicate their mixed racial heritage.

Hispanic population—The Census Bureau collected data on the Hispanic origin population in the 2000 census by using a self-identification question. Persons of Spanish/Hispanic origin are those who classified themselves in one of the specific Hispanic origin categories listed on the questionnaire— Mexican, Puerto Rican, Cuban, as well as those who indicated that they were of Other Spanish/Hispanic origin. Persons of Other Spanish/Hispanic origin are those whose origins are from Spain, the Spanish-speaking countries of Central or South America, or the Dominican Republic.

In the CPS information on Hispanic persons is gathered by using a self-identification question. Persons classify themselves in one of the Hispanic categories in response to the question: "What is the origin or descent of each person in this household?" Hispanic persons in the CPS are persons who report themselves as Mexican-American, Chicano, Mexican, Puerto Rican, Cuban, Central or South American (Spanish countries), or other Hispanic origin.

Traditional and current data collection and classification treat race and Hispanic origin as two separate and distinct concepts in accordance with guidelines from the OMB. Race and Hispanic origin are two separate concepts in the federal statistical system. People who are Hispanic may be of any race and people in each race group may be either Hispanic or Not Hispanic. Also, each person has two attributes, their race (or races) and whether or not they are Hispanic. The overlap of race and Hispanic origin is the main comparability issue. For example, Black Hispanics (Hispanic Blacks) are included in both the number of Blacks and in the number of Hispanics. For further information, see Census Web page, <<http://www.census.gov/population/www/socdemo/compraceho.html>>.

Foreign-born and native populations—The Census Bureau separates the U.S. resident population into two groups based on whether or not a person was a U.S. citizen at the time of birth. Anyone born in the United States or a U.S. Island Area (such as Puerto Rico) or born abroad to a U.S. citizen parent is a U.S. citizen at the time of birth and consequently included in the *native population*. The

term *foreign-born population* refers to anyone who is not a U.S. citizen at birth. This includes naturalized U.S. citizens, legal permanent resident aliens (immigrants), temporary migrants (such as students), humanitarian migrants (such as refugees), and people illegally present in the United States. The Census Bureau provides a variety of demographic, social, economic, geographic, and housing information on the foreign-born population in the United States. More information on the foreign-born population collected from censuses and surveys is available at the Foreign-Born Population page, <<http://www.census.gov/population/www/socdemo/foreign.html>>.

Mobility status—The U.S. population is classified according to mobility status on the basis of a comparison between the place of residence of each individual at the time of the survey or census and the place of residence at a specified earlier date. Nonmovers are all persons who were living in the same house or apartment at the end of the period as at the beginning of the period. Movers are all persons who were living in a different house or apartment at the end of the period than at the beginning of the period. Movers are further classified as to whether they were living in the same or different county, state, or region or were movers from abroad. Movers from abroad include all persons, either U.S. citizens or noncitizens, whose place of residence was outside the United States at the beginning of the period; that is, in Puerto Rico, another U.S. Island Area, or a foreign country.

Living arrangements—Living arrangements refer to residency in households or in group quarters. A “household” comprises all persons who occupy a “housing unit,” that is, a house, an apartment or other group of rooms, or a single room that constitutes “separate living quarters.” A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone or a group of unrelated persons sharing the same

housing unit is also counted as a household. See text, Section 20, Construction and Housing, for definition of housing unit.

All persons not living in housing units are classified as living in group quarters. These individuals may be institutionalized, e.g., under care or custody in juvenile facilities, jails, correctional centers, hospitals, or nursing homes; or they may be residents in noninstitutional group quarters such as college dormitories, group homes, or military barracks.

Householder—The householder is the person in whose name the home is owned or rented. If a home is owned or rented jointly by a married couple, either the husband or the wife may be listed first. Prior to 1980, the husband was always considered the householder in married-couple households.

Family—The term family refers to a group of two or more persons related by birth, marriage, or adoption and residing together in a household. A family includes among its members the householder.

Subfamily—A subfamily consists of a married couple and their children, if any, or one parent with one or more never-married children under 18 years old living in a household. Subfamilies are divided into “related” and “unrelated” subfamilies. A related subfamily is related to, but does not include, the householder. Members of a related subfamily are also members of the family with whom they live. The number of related subfamilies, therefore, is not included in the count of families. An unrelated subfamily may include persons such as guests, lodgers, or resident employees and their spouses and/or children; none of whom is related to the householder.

Married couple—A married couple is defined as a husband and wife living together in the same household, with or without children and other relatives.

Statistical reliability—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

No. 1. Population and Area: 1790 to 2000

[Area figures represent area on indicated date including in some cases considerable areas not then organized or settled, and not covered by the census. Total area figures for 1790 to 1970 have been recalculated on the basis of the remeasurement of states and counties for the 1980 census, but not on the basis of the 1990 census. The land and water area figures for past censuses have not been adjusted and are not strictly comparable with the total area data for comparable dates because the land areas were derived from different base data, and these values are known to have changed with the construction of reservoirs, draining of lakes, etc. Density figures are based on land area measurements as reported in earlier censuses]

| Census date | Resident population | | | | Area (square miles) | | |
|----------------|--------------------------|------------------------------|--------------------------------|---------|------------------------|------------------------|----------------------|
| | Number | Per square mile of land area | Increase over preceding census | | Total | Land | Water ¹ |
| | | | Number | Percent | | | |
| 1790 (Aug. 2) | 3,929,214 | 4.5 | (X) | (X) | 891,364 | 864,746 | 24,065 |
| 1800 (Aug. 4) | 5,308,483 | 6.1 | 1,379,269 | 35.1 | 891,364 | 864,746 | 24,065 |
| 1810 (Aug. 6) | 7,239,881 | 4.3 | 1,931,398 | 36.4 | 1,722,685 | 1,681,828 | 34,175 |
| 1820 (Aug. 7) | 9,638,453 | 5.5 | 2,398,572 | 33.1 | 1,792,552 | 1,749,462 | 38,544 |
| 1830 (June 1) | 12,866,020 | 7.4 | 3,227,567 | 33.5 | 1,792,552 | 1,749,462 | 38,544 |
| 1840 (June 1) | 17,069,453 | 9.8 | 4,203,433 | 32.7 | 1,792,552 | 1,749,462 | 38,544 |
| 1850 (June 1) | 23,191,876 | 7.9 | 6,122,423 | 35.9 | 2,991,655 | 2,940,042 | 52,705 |
| 1860 (June 1) | 31,443,321 | 10.6 | 8,251,445 | 35.6 | 3,021,295 | 2,969,640 | 52,747 |
| 1870 (June 1) | ² 39,818,449 | ² 11.2 | 8,375,128 | 26.6 | 3,612,299 | 3,540,705 | 52,747 |
| 1880 (June 1) | 50,189,209 | 14.2 | 10,370,760 | 26.0 | 3,612,299 | 3,540,705 | 52,747 |
| 1890 (June 1) | 62,979,766 | 17.8 | 12,790,557 | 25.5 | 3,612,299 | 3,540,705 | 52,747 |
| 1900 (June 1) | 76,212,168 | 21.5 | 13,232,402 | 21.0 | 3,618,770 | 3,547,314 | 52,553 |

No. 3. Resident Population Projections: 2004 to 2050

[292,801 represents 292,801,000. As of July 1. The projections are based on assumptions about future childbearing, mortality, and migration. The level of childbearing among women is assumed to remain close to present levels, with differences by race and Hispanic origin diminishing over time. Mortality is assumed to decline gradually with less variation by race and Hispanic origin than at present. International migration is assumed to vary over time and decrease generally relative to the size of the population]

No. 7. Estimated Unauthorized Immigrants by Selected States and Countries of Origin: 2000

[In thousands (7,000 represents 7,000,000). As of January. Unauthorized immigrants refer to foreign-born persons who entered without inspection or who violated the terms of a temporary admission and who have not acquired legal permanent resident status or gained temporary protection against removal by applying for an immigration benefit. The estimates were derived using the residual technique: the legally resident population was estimated and then subtracted from the census-based foreign-born population, leaving estimated unauthorized residents as a residual. The estimates rely primarily on data from two sources: 1) annual INS statistics (immigrants admitted, deportable aliens removed, and nonimmigrant residents admitted); and 2) data for the foreign-born population from the 2000 Census. Estimates were derived separately for: (1) unauthorized residents who entered the United States in the 1990s; and (2) those who entered before 1990 and still lived here illegally in January 2000]

| State | Number | Country | Number |
|---|--------------|------------------------------------|--------------|
| United States, total¹ | 7,000 | Total¹ | 7,000 |
| California | 2,209 | Mexico | 4,808 |
| Texas | 1,041 | El Salvador | 189 |
| New York | 489 | Guatemala | 144 |

¹ Total population count has been revised since the 1980 census publications. Numbers by age and sex have not been corrected. ² The data shown have been modified from the official 1990 census counts. See text of this section for explanation. The April 1, 1990, estimates base (248,790,925) includes count resolution corrections processed through August 1997. It generally does not include adjustments for census coverage errors. However, it includes adjustments estimated for the 1995 Test Census in various localities in California, New Jersey, and Louisiana; and the 1998 census dress rehearsals in localities in California and Wisconsin. These adjustments amounted to a total of 81,052 persons.

No. 12. Resident Population Projections by Sex and Age: 2005 to 2050

[In thousands, except as indicated (295,507 represents 295,507,000). As of July. Data shown are for middle series; for assumptions, see Table 3. For definition of median, see Guide to Tabular Presentation]

| Age | 2005 | | | 2010 | | | Percent distribution | | | | | | | | | | | | | |

Figure 1.1
Center of Population: 1790 to 2000

[Prior to 1960, excludes Alaska and Hawaii. The median center is located at the intersection of two median lines, a north-south line constructed so that half of the nation's population lives east and half lives west of it, and an east-west line selected so that half of the nation's population lives north and half lives south of it. The mean center of population is that point at which an imaginary, flat, weightless, and rigid map of the United States would balance if weights of identical value were placed on it so that each weight represented the location of one person on the date of the census]

| Year | Median center | | Mean center | | | |

No. 21. Resident Population by Race, Hispanic or Latino Origin, and State: 2003

[In thousands (290,810 represents 290,810,000). As of July. Persons of Hispanic or Latino origin may be of any race. Due to the complexities associated with the production of detailed characteristics estimates at the state and county levels, the values of the estimates at lower levels of geography may not necessarily sum to estimates at higher levels of geography. In addition, further complications arise when producing characteristics estimates for the District of Columbia. Due to its unique status, the population total presented here is the sum of the characteristics for the District of Columbia and does not match the official population total previously released]

No. 35. American Indian and Alaska Native Population by Tribe: 2000

[As of April. This table shows data for American Indian and Alaska Native tribes alone or in combination of tribes or races. Respondents who identified themselves as American Indian or Alaska Native were asked to report their enrolled or principal tribe. Therefore, data shown here reflect the written tribal entries reported on the questionnaire. Some of the entries (for example, Iroquois, Sioux, Colorado River, and Flathead) represent nations or reservations. The information on tribe is based on self-identification and includes federally- or state-recognized tribes, as well as bands and clans]

| American Indian and Alaska Native tribe | Number | American Indian and Alaska Native tribe | Number |
|---|------------------|---|---------|
| Total persons ¹ | 4,119,301 | Osage | 15,897 |
| Apache | 96,833 | Ottawa | 10,677 |

¹ Includes persons of other races, not shown separately. ² The 2003 Current Population Survey (CPS) allowed respondents to choose more than one race. Beginning 2003 data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years only allowed respondents to report one race group. See also comments on race in the text for this section. ³ Hispanic persons may be of any race.

X Not applicable. ¹ Includes other races not shown separately. ² The 2003 Current Population Survey (CPS) allowed respondents to choose more than one race. Beginning 2003 data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years only allowed respondents to report one race group. See also comments on race in the text for this section. ³ Persons of Hispanic origin may be of any race. ⁴ No spouse present.

No. 67. Self-Described Religious Identification of Adult Population: 1990 and 2001

[In thousands (175,440 represents 175,440,000). The American Religious Identification Survey (ARIS) 2001 was based on a random digit-dialed telephone survey of 50,281 American residential households in the continental U.S.A (48 states). Respondents were asked to describe themselves in terms of religion with an open-ended question. Interviewers did not prompt or offer a suggested list of potential answers. Moreover, the self-description of respondents was not based on whether established religious bodies, institutions, churches, mosques, or synagogues considered them to be members. Quite the contrary, the survey sought to determine whether the respondents themselves regarded themselves as adherents of a religious community. Subjective rather than objective standards of religious identification were tapped by the surveys]

| Religious group | 1990 | 2001 | Religious group | 1990 | 2001 |
|--|---------|---------|------------------------------|--------|--------|
| Adult population, total ¹ | 175,440 | 207,980 | Fundamentalist | 27 | 61 |

| Quaker | 67 | 217 | Secular | (NA) | 53 |
| Full Gospel | 51 | 168 | No religion | 13,116 | 27,486 |
| Christian Reform | 40 | 79 | | | |
| Foursquare Gospel | 28 | 70 | Refused to reply to question | 4,031 | 11,246 |

NA Not available. ¹ Refers to the total number of adults in all fifty states. All other figures are based on projections from surveys conducted in the continental United States (48 states). ² Because of the subjective nature of replies to open-ended question, these categories are the most unstable as they do not refer to clearly identifiable denominations as much as underlying feelings about religion. Thus they may be the most subject to fluctuation over time.

No. 69. Christian Church Adherents, 2000, and Jewish Population, 2002—States

[133,377 represents 133,377,000. Christian church adherents were defined as "all members, including full members, their children and the estimated number of other regular participants who are not considered as communicant, confirmed or full members." The Jewish population includes Jews who define themselves as Jewish by religion as well as those who define themselves as Jewish in cultural terms. Data on Jewish population are based primarily on a compilation of individual estimates made by local Jewish federations. Additionally, most large communities have completed Jewish demographic surveys from which the Jewish population can be determined]

Vital Statistics

This section presents vital statistics data on births, deaths, abortions, fetal deaths, fertility, life expectancy, marriages, and divorces. Vital statistics are compiled for the country as a whole by the National Center for Health Statistics (NCHS) and published in its annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, and in the *National Vital Statistics Reports* (formerly *Monthly Vital Statistics Report*). Reports in this field are also issued by the various state bureaus of vital statistics. Data on fertility, on age of persons at first marriage, and on marital status and marital history are compiled by the U.S. Census Bureau from its Current Population Survey (CPS; see text, Section 1) and published in *Current Population Reports*, P20 Series. Data on abortions are published by the Alan Guttmacher Institute, New York, NY, in selected issues of *Family Planning Perspectives*.

Registration of vital events—The registration of births, deaths, fetal deaths, and other vital events in the United States is primarily a state and local function. The civil laws of every state provide for a continuous and permanent birth- and death-registration system. Many states also provide for marriage- and divorce-registration systems. Vital events occurring to U.S. residents outside the United States are not included in the data.

Births and deaths—The live-birth, death, and fetal-death statistics prepared by NCHS are based on vital records filed in the registration offices of all states, New York City, and the District of Columbia. The annual collection of death statistics on a national basis began in 1900 with a national death-registration area of ten states and the District of Columbia; a similar annual collection of birth statistics for a national birth-registration area began in 1915, also with ten reporting states and the District of Columbia. Since 1933, the birth- and death-registration areas have comprised the entire United States, including Alaska

(beginning 1959) and Hawaii (beginning 1960). National statistics on fetal deaths were first compiled for 1918 and annually since 1922.

Prior to 1951, birth statistics came from a complete count of records received in the Public Health Service (now received in NCHS). From 1951 through 1971, they were based on a 50-percent sample of all registered births (except for a complete count in 1955 and a 20- to 50-percent sample in 1967). Beginning in 1972, they have been based on a complete count for states participating in the Vital Statistics Cooperative Program (VSCP) (for details, see the technical appendix in *Vital Statistics of the United States*) and on a 50-percent sample of all other areas. Beginning in 1986, all reporting areas participated in the VSCP. Mortality data have been based on a complete count of records for each area (except for a 50-percent sample in 1972). Beginning in 1970, births to and deaths of nonresident aliens of the United States and U.S. citizens outside the United States have been excluded from the data. Fetal deaths and deaths among Armed Forces abroad are excluded. Data based on samples are subject to sampling error; for details, see annual issues of *Vital Statistics of the United States*.

Mortality statistics by cause of death are compiled in accordance with World Health Organization regulations according to the *International Classification of Diseases* (ICD). The ICD is revised approximately every 10 years. The tenth revision of the ICD was employed beginning in 1999. Deaths for prior years were classified according to the revision of the ICD in use at the time. Each revision of the ICD introduces a number of discontinuities in mortality statistics; for a discussion of those between the ninth and tenth revisions of the ICD, see *National Vital Statistics Reports*, Vol. 49, Nos. 2 and 8. Preliminary mortality data are based on a percentage of death records weighted up to the total number of deaths reported for the given

year; for a discussion of preliminary data, see *National Vital Statistics Reports*, Vol. 49, No. 3. Information on tests of statistical significance, differences between death rates, and standard errors can also be found in the reports mentioned above.

Some of the tables present age-adjusted death rates in addition to crude death rates. Age-adjusted death rates shown in this section were prepared using the direct method, in which age-specific death rates for a population of interest are applied to a standard population distributed by age. Age adjustment eliminates the differences in observed rates between points in time or among compared population groups that result from age differences in population composition.

Fertility and life expectancy—The total fertility rate, defined as the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year, is compiled and published by NCHS. Other data relating to social and medical factors that affect fertility rates, such as contraceptive use and birth expectations, are collected and made available by both NCHS and the Census Bureau. NCHS figures are based on information in birth and fetal death certificates and on the periodic National Surveys of Family Growth; Census Bureau data are based on decennial censuses and the CPS.

Data on life expectancy, the average remaining lifetime in years for persons who attain a given age, are computed and published by NCHS. For details, see *National Vital Statistics Reports*, Vol. 52, No. 3.

Marriage and divorce—The compilation of nationwide statistics on marriages and divorces in the United States began in 1887-88, when the National Office of Vital Statistics prepared estimates for the years 1867-86. Although periodic updates took place after 1888, marriage and divorce statistics were not collected and published annually until 1944 by that office. In 1957 and 1958, respectively, the same office established marriage- and divorce-registration areas. Beginning in 1957, the marriage-registration area comprised 30 states, plus Alaska, Hawaii, Puerto Rico,

and the Virgin Islands; it currently includes 42 states and the District of Columbia. The divorce-registration area, starting in 1958 with 14 states, Alaska, Hawaii, and the Virgin Islands, currently includes a total of 31 states and the Virgin Islands. Procedures for estimating the number of marriages and divorces in the registration states are discussed in *Vital Statistics of the United States*, Vol. III—Marriage and Divorce. Total counts of events for registration and nonregistration states are gathered by collecting already summarized data on marriages and divorces reported by state offices of vital statistics and by county offices of registration. The collection and publication of detailed marriage and divorce statistics (for example: by age and race) was suspended beginning in January 1996. For additional information contact the National Center for Health Statistics online at <<http://www.cdc.gov/nchs/releases/96facts/mardiv.htm>>.

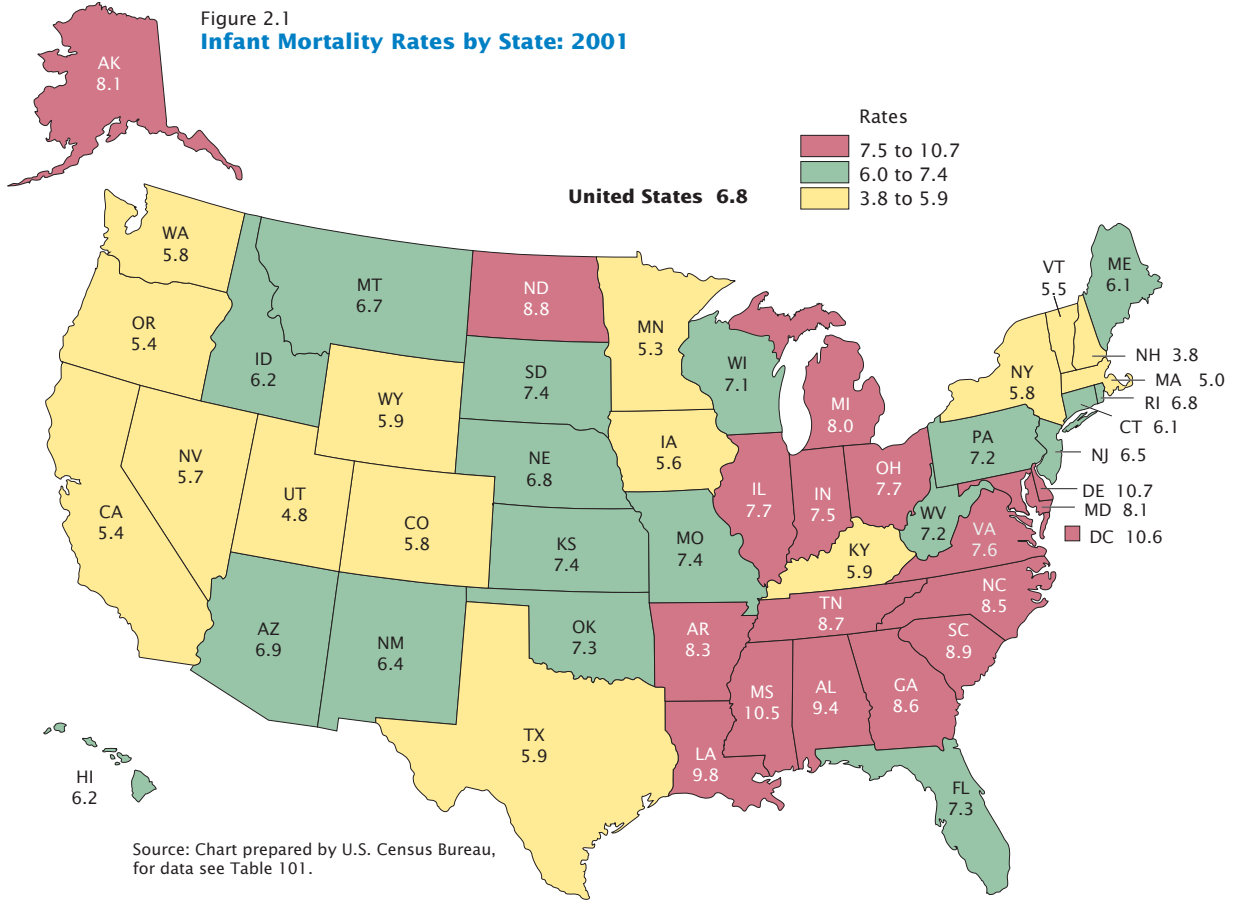

Vital statistics rates—Except as noted, vital statistics rates computed by NCHS are based on decennial census population figures as of April 1 for 1940, 1950, 1960, 1970, 1980, and 1990; and on mid-year population figures for other years, as estimated by the Census Bureau (see text, Section 1).

Race—Data by race for births, deaths, marriages, and divorces from NCHS are based on information contained in the certificates of registration. The Census Bureau's Current Population Survey obtains information on race by asking respondents to classify their race as (1) White, (2) Black, (3) American Indian, Eskimo, or Aleut, or (4) Asian or Pacific Islander.

Beginning with the 1989 data year, NCHS is tabulating its birth data primarily by race of the mother. In 1988 and prior years, births were tabulated by race of the child, which was determined from the race of the parents as entered on the birth certificate.

Trend data by race shown in this section are by race of mother beginning with the 1980 data. Hispanic origin of the mother is reported and tabulated independently of race. Thus, persons of Hispanic origin may be of any race. In 1994, 91 percent of women of Hispanic origin were reported as White.

No. 75. Total Fertility Rate by Race: 1970 to 2002

[Based on race of child and registered births only, thru 1979. Beginning 1980, based on race of mother. Excludes births to nonresidents of United States. The *total fertility rate* is the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year. A total fertility rate of 2,110 represents "replacement level" fertility for the total population under current mortality conditions (assuming no net immigration). See also Appendix III]

| Year | Total ¹ | White | Black ² | Year | Total ¹ | White | Black ² |
|------|--------------------|-------|--------------------|------|--------------------|-------|--------------------|
| 1970 | 2,480 | 2,385 | 3,067 | 1987 | 1,872 | 1,805 | 2,198 |

No. 86. Characteristics of Women Who Have Had a Child in the Last Year: 2000 and 2002

[As of June. Covers civilian noninstitutional population. Since the number of women who had a birth during the 12-month period was tabulated and not the actual numbers of births, some small underestimation of fertility for this period may exist due to the omission of: (1) Multiple births, (2) Two or more live births spaced within the 12-month period (the woman is counted only once), (3) Women who had births in the period and who did not survive to the survey date, (4) Women who were in institutions and therefore not in the survey universe. These losses may be somewhat offset by the inclusion in the CPS of births to immigrants who did not have their children born in the United States and births to nonresident women. These births would not have been recorded in the vital registration system. Based on Current Population Survey (CPS) The 2003 Current Population Survey (CPS) allowed respondents to choose more than one race. Beginning 2003 data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1, Population and Appendix III]

| Characteristic | 2000 | | | 2002 | | |
|---|-------------------------|---|------------------------------|-------------------------|---|------------------------------|
| | Number of women (1,000) | Women who have had a child in the last year | | Number of women (1,000) | Women who have had a child in the last year | |

¹ Live births are those which occurred from July 1 of year shown through June 30 of the following year (to match time of conception with abortions). Births are classified by race of child 1972-1988, and by race of mother after 1988. ² Total numbers of abortions in 1983 and 1986 have been estimated by interpolation; 1989, 1990, 1993, and 1994 have been estimated using trends in CDC data.

No. 90. Abortions by Selected Characteristics: 1990 to 2000

[Number of abortions from surveys conducted by source; characteristics from the U.S. Centers for Disease Control's (CDC) annual abortion surveillance summaries, with adjustments for changes in states reporting data to the CDC each year. Total number of abortions in 1990 have been estimated using trends in CDC data.]

¹ Based on the proportion of the cohort who are alive at the beginning of an indicated age interval who will die before reaching the end of that interval. For example, out of every 1,000 people alive and exactly 50 years old at the beginning of the period, between 4 and 5 (4.44) will die before reaching their 51st birthdays.

No. 95. Deaths and Death Rates by Sex and Race: 1970 to 2002

[1,921 represents 1,921,000. Rates are per 1,000 population for specified groups. Excludes deaths of nonresidents of the United States and fetal deaths. For explanation of age-adjustment, see text, this section. The standard population for age-adjustment is the projected year 2000 population of the United States. See Appendix III. Data for Hispanic origin and specified races other than white and black should be interpreted with caution because of inconsistencies between reporting Hispanic origin and race on death certificates and censuses and surveys.]

- Represents zero or rounds to less than half the unit of measurement shown. B Base figure too small to meet statistical standards for reliability of a derived figure. ¹ Includes deaths of persons who were not residents of the 50 States and the District of Columbia. ² Starting with 1999 data, cause of death is coded according to ICD-10. For explanation, see text, this section.

Health and Nutrition

This section presents statistics on health expenditures and insurance coverage, including medicare and medicaid, medical personnel, hospitals, nursing homes and other care facilities, injuries, diseases, disability status, nutritional intake of the population, and food consumption. Summary statistics showing recent trends on health care and discussions of selected health issues are published annually by the U.S. National Center for Health Statistics (NCHS) in *Health, United States*. Data on national health expenditures, medical costs, and insurance coverage are compiled by the U.S. Centers for Medicare & Medicaid Services (CMS) (formerly Health Care Financing Administration), and appear on the CMS Web site at <http://www.cms.hhs.gov/statistics/nhe> and in the annual *Medicare and Medicaid Statistical Supplement to the Health Care Financing Review*. Statistics on health insurance are also collected by NCHS and are published in Series 10 of *Vital and Health Statistics*. U.S. Census Bureau also publishes data on utilization of insurance coverage. Statistics on hospitals are published annually by the Health Forum, L.L.C., an American Hospital Association Company, in *Hospital Statistics*. Primary sources for data on nutrition is the annual *Food Consumption, Prices, and Expenditures*, issued by the U.S. Department of Agriculture. NCHS also conducts periodic surveys of nutrient levels in the population, including estimates of food and nutrient intake, overweight and obesity, hypercholesterolemia, hypertension, and clinical signs of malnutrition.

National health expenditures—CMS compiles estimates of national health expenditures (NHE) to measure spending for health care in the United States. The NHE accounts are structured to show spending by type of expenditure (i.e., hospital care, physician and clinical care, dental care, and other professional care; home health care; retail sales of prescription drugs; other medical nondurables; vision products and other medical

durables; nursing home care and other personal health expenditures; plus non-personal health expenditures for such items as public health, research, construction of medical facilities, administration, and the net cost of private health insurance) and by source of funding (e.g., private health insurance, out-of-pocket payments, and a range of public programs including medicare, medicaid, and those operated by the Department of Veterans Affairs (VA)).

Data used to estimate health expenditures come from existing sources, which are tabulated for other purposes. The type of expenditure estimates rely upon statistics produced by such groups as the American Hospital Association, the Census Bureau, and the Department of Health and Human Services (HHS). Source of funding estimates are constructed using administrative and statistical records from the medicare and medicaid programs, the Department of Defense and VA medical programs, the Social Security Administration, Census Bureau's *Governmental Finances*, state and local governments, other HHS agencies, and other nongovernment sources. More information and detailed descriptions of sources and methods are available on the CMS home page at <http://cms.hhs.gov/statistics/nhe/default.asp>.

Medicare and medicaid—Since July 1966, the federal medicare program has provided two coordinated plans for nearly all people age 65 and over: (1) A hospital insurance plan, which covers hospital and related services and (2) a voluntary supplementary medical insurance plan, financed partially by monthly premiums paid by participants, which partly covers physicians' and related medical services. Such insurance also applies, since July 1973, to disabled beneficiaries of any age after 24 months of entitlement to cash benefits under the social security or railroad retirement programs and to persons with end stage renal disease.

Medicaid is a health insurance program for certain low-income people. These include: certain low-income families with children; aged, blind, or disabled people on supplemental security income; certain low-income pregnant women and children; and people who have very high medical bills. Medicaid is funded and administered through a state-federal partnership. Although there are broad federal requirements for Medicaid, states have a wide degree of flexibility to design their program. States have authority to establish eligibility standards, determine what benefits and services to cover, and set payment rates. All states, however, must cover these basic services: inpatient and outpatient hospital services, laboratory and X-ray services, skilled nursing and home health services, doctor's services, family planning, and periodic health checkups, diagnosis and treatment for children.

Health resources—Hospital statistics based on data from the American Hospital Association's yearly survey are published annually in *Hospital Statistics* and cover all hospitals accepted for registration by the Association. To be accepted for registration, a hospital must meet certain requirements relating to number of beds, construction, equipment, medical and nursing staff, patient care, clinical records, surgical and obstetrical facilities, diagnostic and treatment facilities, laboratory services, etc. Data obtained from NCHS cover all U.S. hospitals that meet certain criteria for inclusion. The criteria are published in *Vital and Health Statistics* reports, Series 13. NCHS defines a hospital as a nonfederal short-term general or special facility with six or more inpatient beds with an average stay of less than 30 days.

Statistics on the demographic characteristics of persons employed in the health occupations are compiled by the U.S. Bureau of Labor Statistics and reported in *Employment and Earnings* (monthly) (see Table 597, Section 12, Labor Force, Employment, and Earnings). Data based on surveys of health personnel and utilization of health facilities providing long-term care, ambulatory care, and hospital

care are presented in NCHS Series 13, *Data on Health Resources Utilization and Advance Data from Vital and Health Statistics*. Statistics on patient visits to health care providers, as reported in health interviews, appear in NCHS Series 10, *National Health Interview Survey Data*.

The CMS's *Health Care Financing Review* and its annual *Medicare and Medicaid Statistical Supplement* present data for hospitals and nursing homes as well as extended care facilities and home health agencies. These data are based on records of the Medicare program and differ from those of other sources because they are limited to facilities meeting federal eligibility standards for participation in Medicare.

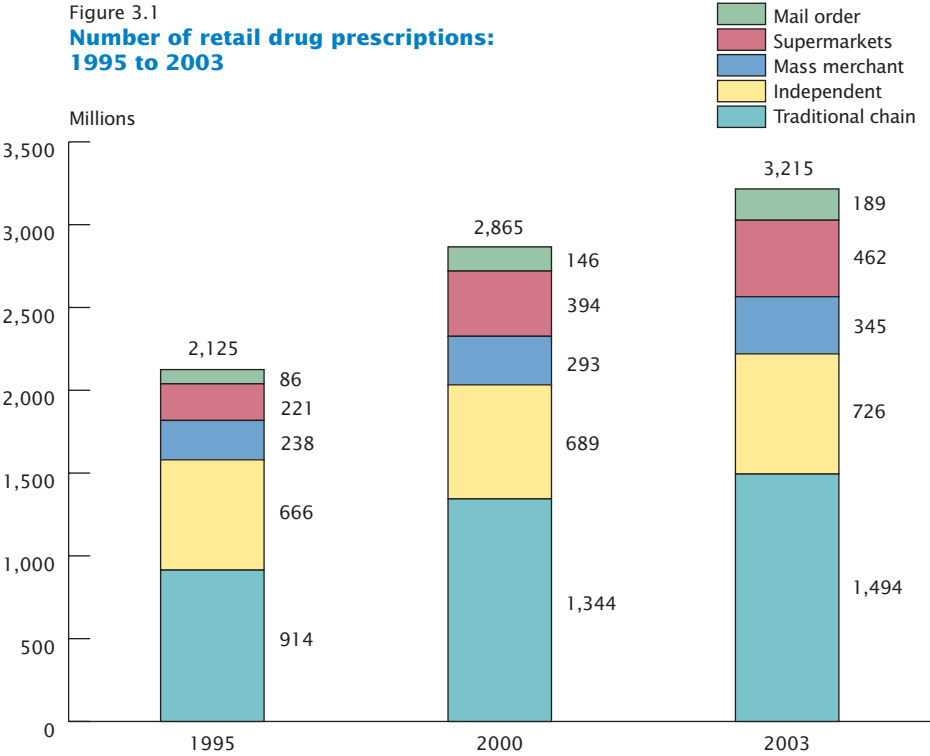

Disability and illness—General health statistics, including morbidity, disability, injuries, preventive care, and findings from physiological testing are collected by NCHS in its National Health Interview Survey and its National Health and Nutrition Examination Surveys and appear in *Vital and Health Statistics*, Series 10 and 11, respectively. The Department of Labor compiles statistics on occupational injuries (see Section 12, Labor Force, Employment, and Earnings). Annual incidence data on notifiable diseases are compiled by the Public Health Service (PHS) at its Centers for Disease Control and Prevention in Atlanta, Georgia, and are published as a supplement to its *Morbidity and Mortality Weekly Report*. The list of diseases is revised annually and includes those which, by mutual agreement of the states and PHS, are communicable diseases of national importance.

Nutrition—Statistics on annual per capita consumption of food and its nutrient value are estimated by the U.S. Department of Agriculture and published quarterly in *National Food Review*. Historical data can be found in *Food Consumption, Prices, and Expenditures*, and online at <<http://www.ers.usda.gov/data/foodconsumption>>. Statistics on food insufficiency and food and nutrient intake are collected by NCHS to estimate the diet of the nation's population. NCHS also collects physical examination data to assess the population's nutritional status,

including growth, overweight/obesity, nutritional deficiencies, and prevalence of nutrition-related conditions, such as hypertension, hypercholesterolemia, and diabetes.

Statistical reliability—For discussion of statistical collection, estimation, and sampling procedures and measures of reliability applicable to data from NCHS and CMS, see Appendix III.

No. 123. Personal Health Care Expenditures by State: 1990 to 1998

[In millions of dollars (612,245 represents \$612,245,000,000). This series of State Health Expenditures (SHE) uses the same definitions and, to the extent possible, the same data sources as does the national health expenditures series. For health services, this structure clusters spending according to the establishment providing those services. For retail purchases of medical products, it groups spending according to product classification. Thus, SHE is establishment-based, grouping services together according to place of service or of product sale rather than according to type of service. Establishment-based expenditures are those in which spending is located in the state of the provider rather than in the beneficiary's state of residence. Because people are able to cross state borders to receive health care services, health care spending by provider location is not necessarily an accurate reflection of spending on behalf of persons residing in that state]

NA Not available. ¹ Persons who had payments made on their behalf at any time during the fiscal year. ² Payments are for fiscal year and reflect federal and state contribution payments. Data exclude disproportionate hospital share payments. Disproportionate share hospitals receive higher Medicaid reimbursement than other hospitals because they treat a disproportionate share of Medicaid patients.

No. 135. State Children's Health Insurance Program (SCHIP)-Enrollment and Expenditures by State: 2000 and 2003

[3,334 represents 3,334,000. For year ending September 30. This program provides health benefits coverage to children living in families whose incomes exceed the eligibility limits for Medicaid. Although it is generally targeted to families with incomes at or below 200 percent of the federal poverty level, each state may set its own income eligibility limits, within certain guidelines. States have three options: they may expand their Medicaid programs, develop a separate child health program that functions independently of Medicaid, or do a combination of both]

No. 137. Health Maintenance Organizations (HMOs): 1990 to 2003

[As of January 1 (33.0 represents 33,000,000)]. An HMO is a prepaid health plan delivering comprehensive care to members through designated providers, having a fixed periodic payment for health care services, and requiring members to be in a plan for a specified period of time (usually 1 year). A group HMO delivers health services through a physician group that is controlled by the HMO unit or contracts with one or more independent group practices to provide health services. An individual practice association (IPA) HMO contracts directly with physicians in independent practice, and/or contracts with one or more associations of physicians in independent practice, and/or contracts with one or more multispecialty group practices. Data are based on a census of HMO's]

| Household income: | | | | | | | | | | | |
| Less than \$25,000 | 63.0 | 48.2 | 23.7 | 15.3 | 18.0 | 18.7 | 14.8 | 76.5 | 37.7 | 29.6 | 23.3 |
| \$25,000-\$49,999 | 75.9 | 61.3 | 49.8 | 43.0 | 11.5 | 9.2 | 14.6 | 80.7 | 65.6 | 12.2 | 19.5 |
| \$50,000-\$74,999 | 58.6 | 51.7 | 47.7 | 44.0 | 4.5 | 3.0 | 6.9 | 88.2 | 81.3 | 5.2 | 11.8 |
| \$75,000 or more | 88.4 | 81.2 | 77.8 | 72.9 | 4.4 | 2.3 | 7.3 | 91.8 | 88.0 | 2.6 | 8.2 |
| Persons below poverty | 34.6 | 24.1 | 8.7 | 5.6 | 5.0 | 14.0 | 10.5 | 69.7 | 25.3 | 40.5 | 30.4 |

¹ Includes other government insurance, not shown separately. Persons with coverage counted only once in total, even though they may have been covered by more than one type of policy. ² Related to employment of self or other family members. ³ Beginning 1997 persons with no coverage other than access to Indian Health Service are no longer considered covered by health insurance; instead they are considered to be uninsured. The effect of this change on the overall estimates of health insurance coverage is negligible; however, the decrease in the number of people covered by Medicaid may be partially due to this change. ⁴ Estimates reflect results of follow-up verification questions. ⁵ Implementation of Census 2000 based population controls. Sample expanded by 28,000 households. ⁶ Persons of Hispanic origin may be of any race.

No. 140. Persons With and Without Health Insurance Coverage by State: 2002

[242,360 represents 242,360,000. Based on the Current Population Survey and subject to sampling error; see text, Section 1, Population, and Appendix III]

No. 142. Percent of Workers Participating in Health Care Benefit Programs and Percent of Participants Required to Contribute: 2003

[Based on National Compensation Survey, a sample survey of 2,924 private industry establishments of all sizes, representing nearly 102.2 million workers; see Appendix III. See also Table 630]

| Characteristic | Percent of workers participating— | | | Single coverage medical care | | | Family coverage medical care | | |
|--------------------------|-----------------------------------|--------------|-------------|---|---|--|---|---|--|
| | Med-ical care | Den-tal care | Vision care | Employee contributions not required (percent) | Employee contributions required (percent) | Average monthly contribution ¹ (dol.) | Employee contributions not required (percent) | Employee contributions required (percent) | Average monthly contribution ¹ (dol.) |
| | | | | | | | | | |
| Total | 45 | 32 | 19 | 22 | 78 | 60.24 | 10 | 90 | 228.98 |
| White-collar occupations | 50 | 37 | 21 | 20 | 80 | 61.95 | 8 | 92 | 236.17 |
| Blue-collar occupations | 51 | 33 | 20 | 27 | 73 | 55.22 | 13 | 87 | 208.18 |
| Service occupations | 22 | 15 | 9 | (NA) | (NA) | (NA) | (NA) | (NA) | (NA) |
| Full time ² | 56 | 40 | 23 | 22 | 78 | 59.63 | 10 | 90 | 227.52 |
| Part time ² | 9 | 6 | 5 | (NA) | (NA) | (NA) | (NA) | (NA) | (NA) |
| Union ³ | 60 | 51 | 37 | 41 | 59 | 49.40 | 31 | 69 | 174.60 |
| Nonunion ³ | 44 | 30 | 17 | (NA) | (NA) | (NA) | (NA) | (NA) | (NA) |

NA Not available. ¹ The average is presented for all covered workers and excludes workers without the plan provision. Averages are for plans stating a flat monthly cost. ² Employees are classified as working either a full-time or part-time schedule based on the definition used by each establishment. ³ Union workers are those whose wages are determined through collective bargaining.

No. 145. Annual Receipts/Revenue for Health Care Industries: 1998 to 2002

[In millions of dollars (399,518 represents \$399,518,000,000). Based on the North American Industry Classification System, 1997 (NAICS); see text, Section 15. All firms in NAICS 6211, 6212, 6213, and 6215 are defined as taxable. Estimates for the non-employer portion are derived from administrative records data provided by other federal agencies. These data are available only at the total revenue level. Estimates for tax-exempt firms are derived only from a sample of employer firms. See Appendix III]

| Kind of business | NAICS code | Total, all firms ¹ | | | Employer firms | | |

| White only | 15.9 | 15.6 | 45.7 | 45.1 | 24.8 | 25.4 | 13.5 | 13.8 |
| Black only | 16.4 | 15.3 | 46.4 | 45.8 | 24.0 | 26.0 | 13.2 | 13.0 |
| American Indian or Alaska Native only | 21.4 | 18.1 | 36.4 | 43.7 | 25.4 | 21.7 | 16.9 | 16.6 |
| Asian only | 20.8 | 21.2 | 48.3 | 49.7 | 22.3 | 20.3 | 8.6 | 8.8 |
| Two or more races | 18.0 | 13.5 | 41.2 | 43.7 | 23.5 | 27.3 | 17.3 | 15.4 |
| Race and Hispanic origin:¹ | | | | | | | | |
| Hispanic | 27.0 | 25.7 | 40.2 | 41.5 | 20.7 | 21.1 | 12.0 | 11.7 |
| White, non-Hispanic | 14.3 | 14.0 | 46.4 | 45.8 | 25.4 | 26.1 | 13.9 | 14.2 |
| Black, non-Hispanic | 16.4 | 15.3 | 46.4 | 45.7 | 24.0 | 26.0 | 13.1 | 13.1 |

¹ Estimates are age adjusted to the year 2000 standard using six age groups: Under 18 years, 18-44 years, 45-54 years, 55-64 years, 65-74 years, and 75 years and over. ² Estimates by race and Hispanic origin are tabulated using the 1997 Standards for Federal data on race and ethnicity. Estimates for specific race groups are shown when they meet requirements for statistical reliability and confidentiality. The categories "White only," "Black or African American only," "American Indian and Alaska Native (AI/AN) only," and "Asian only" include persons who reported only one racial group; and the category "2 or more races" includes persons who reported more than one of the five racial groups in the 1997 Standards or one of the five racial groups and "Some other race."

| CAT scan ⁷ | 736 | 473 | 345 | 324 | 6.1 | 3.7 | 2.5 | 2.3 |
| Female, total⁵ | 10,077 | 10,016 | 9,772 | 10,030 | 78.5 | 74.6 | 68.8 | 68.4 |
| Manual assisted delivery | 750 | 866 | 898 | 993 | 5.9 | 6.5 | 6.3 | 6.8 |
| Fetal EKG and fetal monitoring | 1,377 | 935 | 750 | 797 | 10.8 | 7.0 | 5.5 | 5.4 |
| Diagnostic ultrasound | 941 | 682 | 501 | 427 | 7.3 | 5.1 | 3.5 | 2.9 |

¹ Based on U.S. Census Bureau estimated civilian population as of July 1. Beginning in 1997 population figures are adjusted for net underenumeration in the 1990 Census using the 1990 National Population Adjustment Matrix from the Census Bureau. Since population estimates for the 2000 Census were not available when the 2000 hospital data were released, the population estimates used to compute hospital rates for this year were based on the 1990 Census. Beginning with the 2001 hospital data, rates were calculated using the 2000 Census. ² Includes other types of surgical procedures not shown separately. ³ Beginning 1999 includes separately coded "insertion of stent". ⁴ Excluding skull, nose, and jaw. ⁵ Includes other nonsurgical procedures not shown separately. ⁶ Using contrast material. ⁷ Computerized axial tomography.

No. 166. Hospital Utilization Measures for HIV Patients: 1985 to 2002

[HIV represents human immunodeficiency virus. See headnote, Table 161]

| Measure of utilization | Unit | 1985 | 1990 | 1995 | 2000 | 2001 | 2002 |
|--|-------|------|-------|-------|-------|-------|-------|
| Number of patients discharged ¹ | 1,000 | 23 | 146 | 249 | 173 | 185 | 189 |
| Rate of patient discharges ² | Rate | 1.0 | 5.8 | 9.4 | 6.2 | 6.5 | 6.6 |
| Number of days of care | 1,000 | 387 | 2,188 | 2,326 | 1,257 | 1,435 | 1,322 |
| Rate of days of care ² | Rate | 16.3 | 86.9 | 87.6 | 45.2 | 50.6 | 46.0 |
| Average length of stay | Days | 17.1 | 14.9 | 9.3 | 7.3 | 7.8 | 7.0 |

¹ Comparisons beginning 1990 with data for earlier years should be made with caution as estimates of change may reflect improvements in the 1988 sample design rather than true changes in hospital use. ² Per 10,000 population. Based on Census Bureau estimated civilian population as of July 1. Population estimates for the 1980's do not reflect revised estimates based on the 1990 Census of Population. Beginning 1998, rates are based on civilian population estimates that have been adjusted for net underenumeration in the 1990 census. Population estimates for the 2000 Census were first used to calculate rates in 2001. The 2000 population estimates were based on the 1990 Census.

No. 173. Mental Health Facilities—Summary by Type of Facility: 2000

[Beds: 215.2 represents 215,200. Facilities, beds and inpatients as of year-end; Excludes private psychiatric office practice and psychiatric service modes of all types in hospitals or outpatient clinics of federal agencies other than U.S. Dept. of Veterans Affairs. Excludes data from Puerto Rico, Virgin Islands, Guam, and other territories]

| Type of facility | Number of facilities | Inpatient beds | | Inpatients | | Inpatient care episodes ² (1,000) |
|--|----------------------|----------------|-------------------|---------------|-------------------|--|
| | | Total (1,000) | Rate ¹ | Total (1,000) | Rate ¹ | |
| Total | 4,546 | 215.2 | 76.7 | 182.8 | 65.2 | 2,339 |
| Mental hospitals: | | | | | | |
| State and county | 220 | 59.4 | 21.2 | 54.8 | 19.6 | 278 |
| Private ³ | 743 | 60.2 | 21.5 | 48.3 | 17.3 | 595 |
| General hospitals ⁴ | 1,373 | 37.7 | 13.4 | 25.8 | 9.2 | 1,052 |
| Veterans Administration ⁵ | 142 | 13.0 | 4.6 | 11.8 | 4.2 | 198 |
| Other ⁶ | 2,068 | 44.9 | 16.0 | 42.1 | 15.0 | 197 |

¹ Rate per 100,000 population. Based on U.S. Census Bureau estimated civilian population as of July 1. ² "Inpatient care episodes" is defined as the number of residents in inpatient facilities at the beginning of the year plus the total additions to inpatient facilities during the year. ³ Includes residential treatment centers for emotionally disturbed children. ⁴ Non-federal hospitals with separate psychiatric services. ⁵ Includes U.S. Department of Veterans Affairs (VA) neuropsychiatric hospitals, VA general hospitals with separate psychiatric settings and VA freestanding psychiatric outpatient clinics. ⁶ Includes other multiservice mental health facilities with two or more settings, which are not elsewhere classified, as well as freestanding partial care facilities which only provide psychiatric partial care services. Number of facilities, expenditures, and staff data also include freestanding psychiatric partial care facilities.

Source: U.S. Substance Abuse and Mental Health Services Administration, Center for Mental Health Services, unpublished data.

No. 174. Injury and Poisoning Episodes and Conditions by Age and Sex: 2002

[23,661 represents 23,661,000. Covers all medically attended injuries and poisonings occurring during the 3-month period prior to the survey interview. Data were age-adjusted by the direct method to the 2000 projected population. Age adjustment is used to adjust for differences in the age distribution of populations being compared. The NCHS standard for age adjustment was recently changed from the 1940 standard to a 2000 standard. There may be more than one condition per episode. Based on the redesigned National Health Interview Survey, a sample survey of the civilian noninstitutionalized population; see Appendix III]

| External cause and nature of injury | Both sexes | | | | | | | Male, total | Female, total |
|--|------------|----------------------------------|--------------------|--------------------|--------------------|--------------------|-----------------------|-------------|---------------|

No. 175. Injuries Associated With Consumer Products: 2001

[For products associated with more than 20,000 injuries in 2001. Estimates calculated from a representative sample of hospitals with emergency treatment departments in the United States. Data are estimates of the number of emergency room treated cases nationwide associated with various products. Product involvement does not necessarily mean the product caused the accident. Products were selected from the U.S. Consumer Product Safety Commission's National Electronic Injury Surveillance System]

| Product | Number | Product | Number |
|-------------------------------------|-----------|--|---------|
| Home workshop equipment: | | Other doors (excl. garage) | 349,679 |
| Saws (hand or power) | 93,872 | Ceilings and walls | 319,011 |
| Hammers | 43,055 | Household cabinets, racks, and shelves | 262,407 |
| Household packaging and containers: | | Nails, screws, tacks, or bolts | 179,757 |
| Household containers and packaging | 220,118 | Porches, balconies, open side floors | 142,872 |

- Represents zero. ¹ Acquired immunodeficiency syndrome was not a notifiable disease until 1984. Figures are shown for years in which cases were reported to the CDC. Beginning 1995, based on revised classification system and expanded surveillance case definition. ² Disease was not notifiable. ³ Includes foodborne, infant, wound, and unspecified cases. ⁴ Chickenpox was taken off the nationally notifiable list in 1991 but many states continue to report. ⁵ Includes some persons positive for antibody to hepatitis C virus who do not have hepatitis. ⁶ Whooping cough. ⁷ Revised. ⁸ Data subject to annual revisions. ⁹ German measles. Excludes rubella, congenital syndrome. ¹⁰ Excludes typhoid fever. ¹¹ Bacillary dysentery. ¹² Newly reported active cases.

No. 182. Persons with Limitation of Activity Caused by Chronic Conditions: 2000 to 2002

[In percent. Limitation of activity is assessed by asking respondents a series of questions about limitations in their ability to perform activities usual for their age group because of a physical, mental, or emotional problem. Respondents are asked about limitations in activities of daily living, or instrumental activities of daily living, play, school, work, difficulty walking or remembering, and any other activity limitations. For reported limitations the causal health conditions are determined and respondents are considered limited if one or more of these conditions is chronic. Based on the National Health Interview Survey, a sample survey of the civilian noninstitutionalized population; see Appendix III]

| Characteristic | 2000 | 2001 | 2002 | Characteristic | 2000 | 2001 | 2002 |
|-------------------|-------------|-------------|-------------|----------------------------------|------|------|------|
| Total 1 2 | 11.7 | 12.1 | 12.4 | Male ² | 11.7 | 12.2 | 12.3 |
| Under 18 years | 6.0 | 6.7 | 7.1 | Female ² | 11.5 | 11.9 | 12.3 |
| 18 to 44 years | 5.8 | 6.1 | 6.3 | White, non-Hispanic ² | 11.5 | 11.8 | 12.1 |
| 45 to 54 years | 12.4 | 13.1 | 13.7 | Black, non-Hispanic ² | 14.3 | 15.6 | 14.9 |
| 55 to 64 years | 19.7 | 20.7 | 21.1 | Hispanic ^{2 3} | 10.3 | 10.6 | 10.7 |
| 65 to 74 years | 26.1 | 26.0 | 25.2 | Mexican | 10.4 | 10.3 | 10.8 |
| 75 years and over | 45.1 | 44.7 | 45.1 | | | | |

¹ Includes all other races not shown separately. ² Estimates for all persons are age adjusted to the year 2000 standard using six age groups: Under 18 years, 18-44 years, 45-54 years, 55-64 years, 65-74 years, and 75 years and over. ³ Persons of Hispanic origin may be of any race.

No. 183. Persons 65 Years Old and Over With Limitation of Activity Caused by Chronic Conditions: 2000 to 2002

[In percent. Covers noninstitutionalized persons 65 years old and over. To determine activities of daily living (ADL) limitations respondents were asked "Because of a physical, mental, or emotional problem, does (this person) need the help of other persons with personal care needs, such as eating, bathing, dressing, or getting around inside this home?" Instrumental activities of daily living (IADL) were determined by asking respondents "Because of a physical, mental, or emotional problem, does (this person) need the help of other persons in handling routine needs, such as everyday household chores, doing necessary business, shopping, or getting around for other purposes?" See also headnote, Table 182]

| Characteristic | Percent with ADL limitation | | | Percent with IADL limitation | | |
|-------------------------------------|-----------------------------|------------|------------|------------------------------|-------------|-------------|
| | 2000 | 2001 | 2002 | 2000 | 2001 | 2002 |

No. 184. Disability Status of Population by State: 2000

[In thousands except percent (64,689 represents 64,689,000). As of April. Covers civilian noninstitutionalized population. A disability is a long-lasting physical, mental, or emotional condition. This condition can make it difficult for a person to do activities such as walking, climbing stairs, dressing, bathing, learning, or remembering. This condition can also impede a person from being able to go outside the home alone or to work at a job or business. Based on sample data from the 2000 Census of Population and Housing; see text, Section 1 and Appendix III]

| State | Population 5 to 20 years | | | Population 21 to 64 years | | | Population 65 years and over | | |

| 1999 | 15,239 | 2000 | 1,000,896 | | |
| 2000 | 13,428 | 2002 | 1,136,287 | | |
| 2002 | 13,720 | | | | |
| 2003 total | 13,690 | 2003 total | 1,091,816 | Drug only | 358,165 |
| Substance abuse treatment services | 8,386 | Substance abuse treatment services | 743,971 | Alcohol only | 221,800 |
| Mental health services | 1,168 | Mental health services | 56,159 | Both alcohol & drug | 511,851 |
| General health care | 249 | General health care | 17,766 | Total with a drug problem ² | 870,016 |
| Both substance abuse and mental health | 3,614 | Both substance abuse and mental health | 254,986 | Total with an alcohol problem ³ | 733,651 |
| Other | 273 | Other | 18,934 | | |

¹ Includes clients at facilities that did not provide data on type of substance abuse problem treated. ² The sum of clients with a drug problem and clients with both diagnoses. ³ The sum of clients with an alcohol problem and clients with both diagnoses.

Source: U.S. Substance Abuse and Mental Health Services Administration, *Uniform Facility Data Set (UFDS): Annual surveys for 1995 - 1999 and National Survey of Substance Abuse Treatment Services (N-SSATS) 2000, 2002 and 2003.*

No. 186. Drug Use by Type of Drug and Age Group: 2000 and 2002

[In percent. The 2002 Survey changed names from the National Household Survey on Drug Abuse to National Household Survey on Drug Use and Health (NSDUH). Due to the impact of Survey improvements, 2002 data should not be compared with data collected in 2001 or earlier years. Current users are those who used drugs at least once within month prior to this study. Based on a representative sample of the U.S. population age 12 and older, including persons living in households and in some group quarters such as dormitories and homeless shelters. Estimates are based on computer-assisted interviews of about 72,000 respondents. Subject to sampling variability; see source]

No. 187. Estimated Use of Selected Drugs by State: 2002

[19,522 represents 19,522,000. The 2002 Survey changed names from the National Household Survey on Drug Abuse to National Household Survey on Drug Use and Health (NSDUH). Due to the impact of Survey improvements, 2002 data should not be compared with data collected in 2001 or earlier years. Current users are those persons 12 years old and over who used drugs at least once within month prior to this study. Based on national sample of respondents (see also headnote, Table 186). The state estimates were produced by combining the prevalence rate based on the state sample data and the prevalence rate based on a national regression model applied to local-area county and census block group/tract-level estimates from the state. The parameters of the regression model are estimated from the entire national sample. For comparison purposes, the data shown here display estimates for all 50 States and the District of Columbia utilizing the modeled estimates for all 51 areas]

| WY. | 29 | 21 | 15 | 117 | 97 | 6.9 | 5.2 | 3.7 | 28.3 | 23.4 |

¹ Any illicit drug indicates use at least once of marijuana/hashish, cocaine (including crack), inhalants, hallucinogens (including PCP and LSD), heroin, or any prescription-type psychotherapeutic used nonmedically. Any illicit drug other than marijuana indicates use at least once of any of these listed drugs, regardless of marijuana/hashish use; marijuana/hashish users who also have used any of the other listed drugs are included. ² Binge use is defined as drinking five or more drinks on the same occasion on at least one day in the past 30 days. By "occasion" is meant at the same time or within a couple hours of each other.

No. 191. Cancer—Estimated New Cases, 2004, and Survival Rates, 1980-1982 to 1995-2000

[1,368 represents 1,368,000. The 5-year relative survival rate, which is derived by adjusting the observed survival rate for expected mortality, represents the likelihood that a person will not die from causes directly related to their cancer within 5 years. Survival data shown are based on those patients diagnosed while residents of an area listed below during the time periods shown. Data are based on information collected as part of the National Cancer Institute's Surveillance, Epidemiology and End Results (SEER) program, a collection of population-based registries in Connecticut, New Mexico, Utah, Iowa, Hawaii, Atlanta, Detroit, Seattle-Puget Sound, and San Francisco-Oakland]

No. 194. Age-adjusted Percent Distributions of Body Mass Index (BMI) Among Persons 18 Years Old and Over, by Selected Characteristics: 2002

[Body Mass Index (BMI) is a measure that adjusts body weight for height. It is calculated as weight in kilograms divided by height in meters squared. For both men and women, underweight is indicated by a BMI under 18.5; healthy weight is indicated by a BMI greater than or equal to 18.5 and less than 25; overweight is indicated by those who have a BMI equal to 25 and less than 30. Percent who are obese represent those who have a BMI equal to or above 30. These estimates are based on definitions provided in the *Dietary Guidelines for Americans*, published by the U.S. Dept. of Agriculture and the U.S. Dept. of Health and Human Services. Based on the National Health Interview Survey; for details, see Appendix III]

| Selected characteristic | | | Above healthy weight | | |
|--|------------------|----------------|----------------------|-------------|-------------------|
| | Under-weight | Healthy weight | Total | Over-weight | Obese |
| Total ¹ (age-adjusted) | 2.1 | 39.6 | 58.4 | 35.0 | 23.4 |
| Total ² (unadjusted) | 2.0 | 39.4 | 58.5 | 35.0 | 23.5 |
| Age: | | | | | |
| 18 to 44 years | 2.5 | 44.2 | 53.3 | 31.9 | 21.4 |
| 45 to 64 years | 1.1 | 32.1 | 66.9 | 39.1 | 27.8 |
| 65 to 74 years | 1.7 | 31.7 | 66.6 | 39.3 | 27.3 |
| 75 years and over | 3.5 | 45.4 | 51.0 | 35.1 | 15.9 |
| Sex: | | | | | |
| Male | 1.1 | 32.0 | 66.9 | 43.1 | 23.8 |
| Female | 3.0 | 46.9 | 50.0 | 27.1 | 22.9 |
| Race: | | | | | |
| White alone ⁴ | 2.0 | 40.5 | 57.5 | 35.3 | 22.2 |
| Black or African American alone ⁴ | 1.7 | 29.4 | 68.9 | 34.1 | 34.8 |
| American Indian or Alaska Native alone ⁴ | ³ 2.2 | 36.1 | 61.7 | 30.4 | 31.3 |
| Asian alone ⁴ | 5.6 | 59.9 | 34.5 | 27.5 | 7.0 |
| Native Hawaiian or other Pacific Islander alone ⁴ | - | 33.2 | 66.8 | 36.4 | ³ 30.4 |
| 2 or more races ⁵ | ³ 2.6 | 39.1 | 58.3 | 30.9 | 27.4 |
| Hispanic or Latino origin status ⁶ : | | | | | |
| Hispanic or Latino | 1.4 | 33.4 | 65.2 | 39.8 | 25.4 |

No. 196. Households and Persons Having Problems With Access to Food: 1999 to 2002

[104,684 represents 104,684,000. Food secure means that a household had access at all times to enough food for an active healthy life for all household members, with no need for recourse to socially unacceptable food sources or extraordinary coping behaviors to meet their basic food needs. Food insecure households had limited or uncertain ability to acquire acceptable foods in socially acceptable ways. Food insecure households with hunger were those with one or more household members who were hungry at least sometime during the period due to inadequate resources for food. The omission of homeless persons may be a cause of underreporting. The severity of food insecurity and hunger in households is measured through a series of questions about experiences and behaviors known to characterize households that are having difficulty meeting basic food needs. These experiences and behaviors generally occur in an ordered sequence as the severity of food insecurity increases. As resources become more constrained, adults in typical households first worry about having enough food, then they stretch household resources and juggle other necessities, then decrease the quality and variety of household members' diets, then decrease the frequency and quantity of adults' food intake, and finally decrease the frequency and quantity of children's food intake. All questions refer to the previous 12 months and include a qualifying phrase reminding respondents to report only those occurrences that resulted from inadequate financial resources. Restrictions to food intake due to dieting or busy schedules are excluded. Data are from the Food Security Supplement to the Current Population Survey (CPS); for details about the CPS, see text, Section 1 and Appendix III]

| Household food security level | Number (1,000) | | | | Percent distribution | | | |
|---|----------------|----------------|----------------|----------------|----------------------|--------------|--------------|--------------|

No. 197. Nutrition—Nutrients in Foods Available for Civilian Consumption Per Capita Per Day: 1970 to 2000

[Computed by the Center for Nutrition Policy and Promotion (CNPP). Based on Economic Research Service (ERS) estimates of per capita quantities of food available for consumption from "Food Consumption, Prices, and Expenditures", on imputed consumption data for foods no longer reported by ERS, and on CNPP estimates of quantities of produce from home gardens. Food supply estimates do not reflect loss of food or nutrients from further marketing or home processing. Enrichment and fortification levels of iron, zinc, thiamin, riboflavin, niacin, folate, vitamin A, vitamin B₆, vitamin B₁₂, and Vitamin C are included]

Section 4

Education

This section presents data primarily concerning formal education as a whole, at various levels, and for public and private schools. Data shown relate to the school-age population and school enrollment, educational attainment, education personnel, and financial aspects of education. In addition, data are shown for charter schools, computer usage in schools, distance education, and adult education. The chief sources are the decennial census of population and the Current Population Survey (CPS), both conducted by the U.S. Census Bureau (see text, Section 1, Population); annual, biennial, and other periodic surveys conducted by the National Center for Education Statistics (NCES), a part of the U.S. Department of Education; and surveys conducted by the National Education Association.

The censuses of population have included data on school enrollment since 1840 and on educational attainment since 1940. The CPS has reported on school enrollment annually since 1945 and on educational attainment periodically since 1947.

The NCES is continuing the pattern of statistical studies and surveys conducted by the U.S. Office of Education since 1870. The annual *Digest of Education Statistics* provides summary data on pupils, staff, finances, including government expenditures, and organization at the elementary, secondary, and higher education levels. It is also a primary source for detailed information on federal funds for education, projections of enrollment, graduates, and teachers. *The Condition of Education*, issued annually, presents a summary of information on education of particular interest to policymakers. NCES also conducts special studies periodically.

The census of governments, conducted by the Census Bureau every 5 years (for the years ending in “2” and “7”), provides data on school district finances and state and local government expenditures for education. Reports published by the

Bureau of Labor Statistics contain data relating civilian labor force experience to educational attainment (see also Tables 573, 600, and 608 in Section 12, Labor Force, Employment, and Earnings).

Types and sources of data—The statistics in this section are of two general types. One type, exemplified by data from the Census Bureau, is based on direct interviews with individuals to obtain information about their own and their family members’ education. Data of this type relate to school enrollment and level of education attained, classified by age, sex, and other characteristics of the population. The school enrollment statistics reflect attendance or enrollment in any regular school within a given period; educational attainment statistics reflect the highest grade completed by an individual, or beginning 1992, the highest diploma or degree received.

Beginning in 2001, the CPS used Census 2000 population controls. From 1994 to 2000, the CPS used 1990 census population controls plus adjustment for undercount. Also the survey changed from paper to computer assisted technology. For years 1981 through 1993, 1980 census population controls were used; 1971 through 1980, 1970 census population controls had been used. These changes had little impact on summary measures (e.g., medians) and proportional measures (e.g., enrollment rates); however, use of the controls may have significant impact on absolute numbers.

The second type, generally exemplified by data from the NCES and the National Education Association, is based on reports from administrators of educational institutions and of state and local agencies having jurisdiction over education. Data of this type relate to enrollment, attendance, staff, and finances for the nation, individual states, and local areas.

Unlike the NCES, the Census Bureau does not regularly include specialized vocational, trade, business, or correspondence schools in its surveys. The NCES includes nursery schools and kindergartens that are part of regular grade schools in their enrollment figures. The Census Bureau includes all nursery schools and kindergartens. At the higher education level, the statistics of both agencies are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges.

School attendance—All states require that children attend school. While state laws vary as to the ages and circumstances of compulsory attendance, generally they require that formal schooling begin by age 6 and continue to age 16.

Schools—The NCES defines a school as “a division of the school system consisting of students composing one or more grade groups or other identifiable groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant.”

Regular schools are those which advance a person toward a diploma or degree. They include public and private nursery schools, kindergartens, graded schools, colleges, universities, and professional schools.

Public schools are schools controlled and supported by local, state, or federal governmental agencies; private schools are those controlled and supported mainly by religious organizations or by private persons or organizations.

The Census Bureau defines *elementary* schools as including grades 1 through 8; *high* schools as including grades 9 through 12; and *colleges* as including junior or community colleges, regular 4-year colleges, and universities and graduate or professional schools. Statistics reported by the NCES and the National Education Association by type of organization, such as elementary level and secondary level, may not be strictly comparable with those from the Census Bureau because the grades included at the two levels vary, depending on the level assigned to the middle or junior high school by the local school systems.

School year—Except as otherwise indicated in the tables, data refer to the school year which, for elementary and secondary schools, generally begins in September of the preceding year and ends in June of the year stated. For the most part, statistics concerning school finances are for a 12-month period, usually July 1 to June 30. Enrollment data generally refer to a specific point in time, such as fall, as indicated in the tables.

Statistical reliability—For a discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to the Census Bureau and the NCES data, see Appendix III.

No. 202. School Enrollment: 1970 to 2012

[In thousands (59,838 represents 59,838,000). As of fall. Based on survey of state education agencies; see source for details.]

No. 203. School Expenditures by Type of Control and Level of Instruction in Constant (2001-2002) Dollars: 1960 to 2002

[In millions of dollars (144,699 represents \$144,699,000,000). For school years ending in year shown. Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt and capital outlay. Data deflated by the Consumer Price Index, wage earners, and clerical workers through 1975; thereafter, all urban consumers, on a school year basis (supplied by the National Center for Education Statistics). See also Appendix III. Based on survey of state education agencies; see source for details.]

No. 224. Public Charter and Traditional Schools—Selected Characteristics: 1999-2000

[45,100 represents 45,100,000. A public charter school is a public school that, in accordance with an enabling state statute, has been granted a charter exempting it from selected state and local rules and regulations. All schools open as public charter schools during 1998-99 and still open in the 1999-2000 school year were surveyed. Based in the School and Staffing Survey; see source for details]

| Characteristic | All schools | | Elementary | | Secondary | | Combined | |
|--|-------------|----------------|-------------|----------------|-------------|----------------|-------------|----------------|
| | Traditional | Public charter | Traditional | Public charter | Traditional | Public charter | Traditional | Public charter |

No. 229. Students Who Are Homeschooled by Selected Characteristics: 1999

[As of spring. (50,188 represents 50,188,000). For students 5 to 17 with a grade equivalent of K-12. Homeschoolers are students whose parents reported them to be schooled at home instead of a public or private school. Excludes students who were enrolled in school for more than 25 hours a week or were homeschooled due to a temporary illness. Based on the Parent and Family Involvement Survey of the National Household Education Surveys Program; see source and Appendix III for details]

| Characteristic | Number of students | | | Percent distribution | | |

No. 231. Public School Districts With Alternative Schools or Programs for at-Risk Students: 2000-2001

[For the school year. Alternative schools and programs are designed to address the needs of students that typically cannot be met in regular schools. The schools and programs in data shown here serve students who are typically at risk for educational failure (as indicated by poor grades or truancy, for example). Alternative schools are usually housed in a separate facility where students are removed from regular schools. Alternative programs are usually housed within regular schools. Based on the Fast Response Survey System; see source for details]

| District characteristic | Percent of districts with schools or programs | Percent distribution of districts with schools or programs by— | | | | | | |
|-----------------------------------|---|--|-----------|---------------|---------------------------------------|-------------------|-------------------|-------------------|
| | | Number of schools or programs | | | Percent of district students enrolled | | | |

NA Not available. ¹ Number of institutions includes count of branch campuses. Due to revised survey procedures, data beginning 1990 are not comparable with previous years. Beginning 1997 data reflect a new classification of institutions; this classification includes some additional, primarily 2-year, colleges than before and excludes a few institutions that did not award degrees. Includes institutions that were eligible to participate in Title IV federal financial aid programs. ² Due to revised survey methods, data beginning 1990 not comparable with previous years. ³ Branch campuses counted according to actual status, e.g., 2-year branch in 2-year category. ⁴ Includes unclassified students. (Students taking courses for credit, but are not candidates for degrees.) ⁵ Includes items not shown separately. ⁶ Includes schools accredited by the National Association of Trade and Technical Schools. See footnote 1 for information pertaining to data beginning 1997.

Law Enforcement, Courts, and Prisons

This section presents data on crimes committed, victims of crimes, arrests, and data related to criminal violations and the criminal justice system. The major sources of these data are the Bureau of Justice Statistics (BJS), the Federal Bureau of Investigation (FBI), and the Administrative Office of the U.S. Courts. BJS issues several reports, including *Sourcebook of Criminal Justice Statistics*, *Criminal Victimization in the United States*, *Prisoners in State and Federal Institutions*, *Census of State Correctional Facilities and Survey of Prison Inmates*, *Census of Jails and Survey of Jail Inmates*, *Parole in the United States*, *Capital Punishment*, and the annual *Expenditure and Employment Data for the Criminal Justice System*. The Federal Bureau of Investigation's major annual reports are *Crime in the United States*, *Law Enforcement Officers Killed and Assaulted*, annual, and *Hate Crimes*, annual, which presents data on reported crimes as gathered from state and local law enforcement agencies.

Legal jurisdiction and law enforcement—Law enforcement is, for the most part, a function of state and local officers and agencies. The U.S. Constitution reserves general police powers to the states. By act of Congress, federal offenses include only offenses against the U.S. government and against or by its employees while engaged in their official duties and offenses which involve the crossing of state lines or an interference with interstate commerce. Excluding the military, there are 52 separate criminal law jurisdictions in the United States: 1 in each of the 50 states, 1 in the District of Columbia, and the federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. While the systems of law enforcement are quite similar among the states, there are often substantial differences in the penalties for like offenses.

Law enforcement can be divided into three parts: Investigation of crimes and

arrests of persons suspected of committing them; prosecution of those charged with crime; and the punishment or treatment of persons convicted of crime.

Crime—There are two major approaches taken in determining the extent of crime. One perspective is provided by the FBI through its Uniform Crime Reporting Program (UCR). The FBI receives monthly and annual reports from law enforcement agencies throughout the country, currently representing 94 percent of the national population. Each month, city police, sheriffs, and state police file reports on the number of index offenses, hate crimes and law enforcement assaults that become known to them. Additionally, data are collected for officers killed in the line of duty.

The FBI Crime Index offenses are as follows: *Murder and nonnegligent manslaughter* is based on police investigations, as opposed to the determination of a medical examiner or judicial body, includes willful felonious homicides and excludes attempts and assaults to kill, suicides, accidental deaths, justifiable homicides, and deaths caused by negligence; *forcible rape* includes forcible rapes and attempts; *robbery* includes stealing or taking anything of value by force or violence or threat of force or violence and includes attempted robbery; *aggravated assault* includes assault with intent to kill; *burglary* includes any unlawful entry to commit a felony or a theft and includes attempted burglary and burglary followed by larceny; *larceny* includes theft of property or articles of value without use of force and violence or fraud and excludes embezzlement, “con games,” forgery, etc.; *motor vehicle theft* includes all cases where vehicles are driven away and abandoned but excludes vehicles taken for temporary use and returned by the taker. Arson was added as the eighth Index offense in April 1979 following a Congressional mandate. *Arson* includes any willful or malicious burning

or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The monthly Uniform Crime Reports also contain data on crimes cleared by arrest and on characteristics of persons arrested for all criminal offenses. In summarizing and publishing crime data, the FBI depends primarily on the adherence to the established standards of reporting for statistical accuracy, presenting the data as information useful to persons concerned with the problem of crime and criminal law enforcement.

National Crime Victimization Survey (NCVS)—A second perspective on crime is provided by this survey of the Bureau of Justice Statistics. Details about the crimes come directly from the victims. No attempt is made to validate the information against police records or any other source.

The NCVS measures rape, robbery, assault, household and personal larceny, burglary, and motor vehicle theft. The NCVS includes offenses reported to the police, as well as those not reported.

Police reporting rates (percent of victimizations) varied by type of crime. In 1994, for instance, 32 percent of the rapes/sexual assaults were reported; 55 percent of the robberies; 40 percent of assaults; 33 percent of personal thefts; 51 percent of the household burglaries; and 78 percent of motor vehicle thefts.

Murder and kidnaping are not covered. Commercial burglary and robbery were dropped from the program during 1977. The so-called victimless crimes, such as drunkenness, drug abuse, and prostitution, also are excluded, as are crimes for which it is difficult to identify knowledgeable respondents or to locate data records.

Crimes of which the victim may not be aware also cannot be measured effectively. Buying stolen property may fall into this category, as may some instances of embezzlement. Attempted crimes of many types probably are under recorded

for this reason. Events in which the victim has shown a willingness to participate in illegal activity also are excluded.

In any encounter involving a personal crime, more than one criminal act can be committed against an individual. For example, a rape may be associated with a robbery or a household offense, such as a burglary, can escalate into something more serious in the event of a personal confrontation. In classifying the survey-measured crimes, each criminal incident has been counted only once—by the most serious act that took place during the incident and ranked in accordance with the seriousness classification system used by the Federal Bureau of Investigation. The order of seriousness for crimes against persons is as follows: Rape, robbery, assault, and larceny. Personal crimes take precedence over household offenses.

A *victimization*, basic measure of the occurrence of crime, is a specific criminal act as it affects a single victim. The number of victimizations is determined by the number of victims of such acts. Victimization counts serve as key elements in computing rates of victimization. For crimes against persons, the rates are based on the total number of individuals age 12 and over or on a portion of that population sharing a particular characteristic or set of traits. As general indicators of the danger of having been victimized during the reference period, the rates are not sufficiently refined to represent true measures of risk for specific individuals or households.

An *incident* is a specific criminal act involving one or more victims; therefore the number of incidents of personal crimes is lower than that of victimizations.

Courts—Statistics on criminal offenses and the outcome of prosecutions are incomplete for the country as a whole, although data are available for many states individually. The only national compilations of such statistics were made by the Census Bureau for 1932 to 1945 covering a maximum of 32 states and by the Bureau of Justice Statistics for 1986, 1988, 1990, and 1992 based on a nationally representative sample survey.

The bulk of civil and criminal litigation in the country is commenced and determined in the various state courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the federal courts may civil or criminal litigation be heard and decided by them. Generally, the federal courts have jurisdiction over the following types of cases: Suits or proceedings by or against the United States; civil actions between private parties arising under the Constitution, laws, or treaties of the United States; civil actions between private litigants who are citizens of different states; civil cases involving admiralty, maritime, or prize jurisdiction; and all matters in bankruptcy. The Administrative Office of the United States Courts has compiled statistics on the caseload of the federal courts annually since 1940.

There are several types of courts with varying degrees of legal jurisdiction. These jurisdictions include original, appellate, general, and limited or special. A court of original jurisdiction is one having the authority initially to try a case and pass judgment on the law and the facts; a court of appellate jurisdiction is one with the legal authority to review cases and hear appeals; a court of general jurisdiction is a trial court of unlimited original jurisdiction in civil and/or criminal cases, also called a "major trial court"; a court of limited or special jurisdiction is a trial court with legal authority over only a particular class of cases, such as probate, juvenile, or traffic cases.

The 94 federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every state and one each in the District of Columbia, Puerto Rico, the Virgin Islands, the Northern Mariana Islands, and Guam. Appeals from the district courts are taken to intermediate appellate

courts of which there are 13, known as U.S. courts of appeals and the United States Court of Appeals for the Federal Circuit. The Supreme Court of the United States is the final and highest appellate court in the federal system of courts.

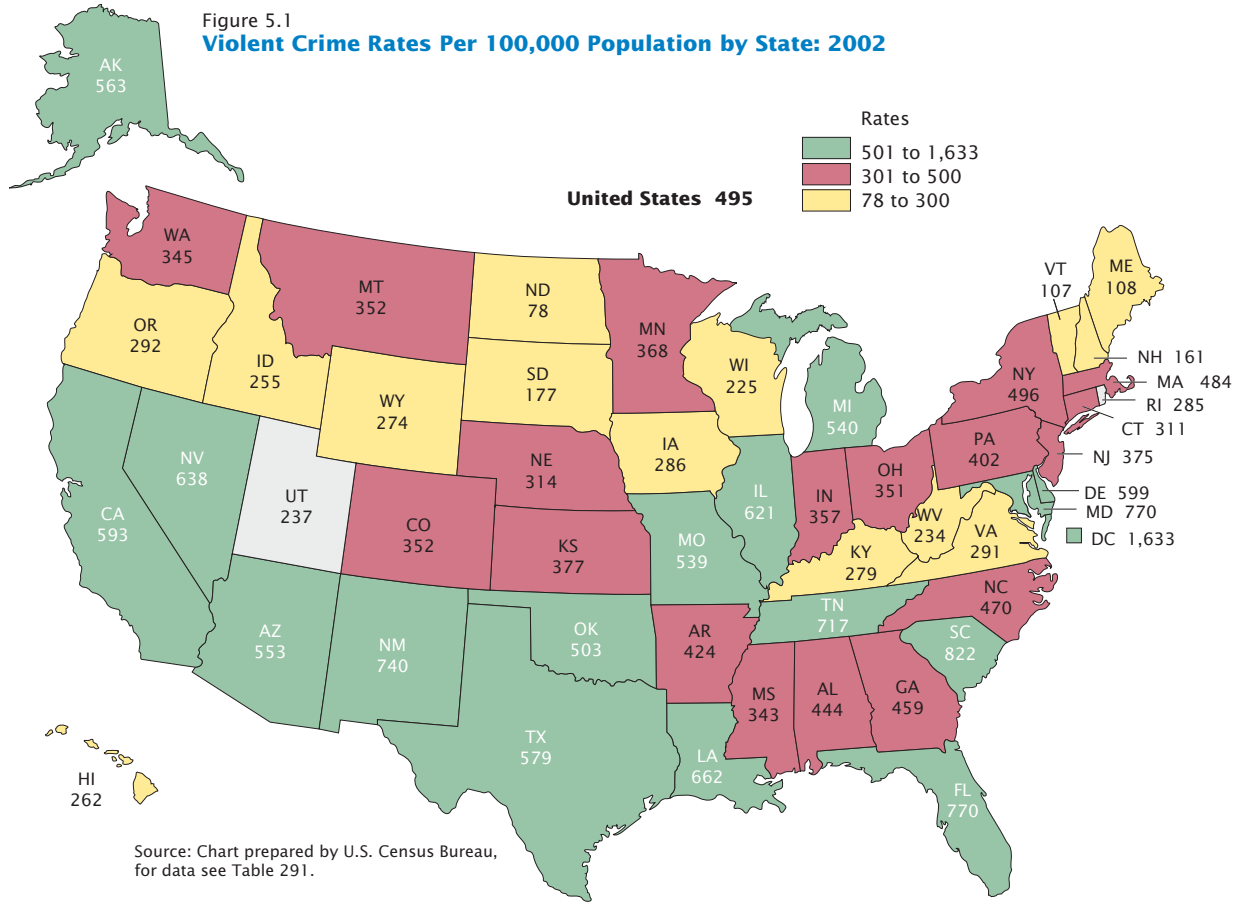

Juvenile offenders—For statistical purposes, the FBI and most states classify as juvenile offenders persons under the age of 18 years who have committed a crime or crimes.

Delinquency cases are all cases of youths referred to a juvenile court for violation of a law or ordinance or for seriously "anti-social" conduct. Several types of facilities are available for those adjudicated delinquent, ranging from the short-term physically unrestricted environment to the long-term very restrictive atmosphere.

Prisoners—Data on prisoners in federal and state prisons and reformatories were collected annually by the Census Bureau until 1950, by the Federal Bureau of Prisons until 1971, transferred then to the Law Enforcement Assistance Administration, and, in 1979, to the Bureau of Justice Statistics. Adults convicted of criminal activity may be given a prison or jail sentence. A *prison* is a confinement facility having custodial authority over adults sentenced to confinement of more than 1 year. A *jail* is a facility, usually operated by a local law enforcement agency, holding persons detained pending adjudication and/or persons committed after adjudication to 1 year or less. Nearly every state publishes annual data either for its whole prison system or for each separate state institution.

Statistical reliability—For discussion of statistical collection, estimation and sampling procedures, and measures of statistical reliability pertaining to the National Crime Victimization Survey and Uniform Crime Reporting Program, see Appendix III.

Figure 5.1
Violent Crime Rates Per 100,000 Population by State: 2002

Source: Chart prepared by U.S. Census Bureau, for data see Table 291.

No. 289. Crimes and Crime Rates by Type of Offense: 1980 to 2002

[13,408 represents 13,408,000. Data refer to offenses known to the police. Rates are based on Census Bureau estimated resident population as of July 1; 1980, 1990 and 2000, enumerated as of April 1. See source for details. For definitions of crimes, see text, this section.]

| Item and year | Violent crime | | | | | | Property crime | | | |
|------------------------------|---------------|-------|-----------------------|---------------|---------|--------------------|----------------|----------|---------------|---------------------|
| | Total | Total | Murder ^{1 2} | Forcible rape | Robbery | Aggravated assault | Total | Burglary | Larceny/theft | Motor vehicle theft |
| Number of offenses (1,000): | | | | | | | | | | |
| 1980 | 13,408 | 1,345 | 23 | 83 | 566 | 673 | 12,064 | 3,795 | 7,137 | 1,132 |

¹ Includes races not shown separately. ² Rate based on enumerated population figures as of April 1 for 1980, 1990 and 2000; July 1 estimates for other years. ³ Effective with data for 1999, causes of death are classified by The Tenth Revision International Classification of Diseases (ICD-10), replacing the Ninth Revision (ICD-9) used for 1979-98 data. Breaks in the comparability of some cause of death statistics result from changes in category titles, changes in the structure and content of the classification, and changes in coding rules used to select the underlying cause of death. In ICD-9, the category Homicide also includes death as a result of legal intervention. ICD-10 has two separate categories for these two causes of death. Some caution should be used in comparing data between 1998 and 1999.

No. 301. Hate Crimes—Number of Incidents, Offenses, Victims, and Known Offenders by Bias Motivation: 2002

[The FBI collected statistics on hate crimes from 12,073 law enforcement agencies representing over 247 million inhabitants in 2002. Hate crime offenses cover incidents motivated by race, religion, sexual orientation, ethnicity/national origin, and disability]

| Bias motivation | Incidents reported | Offenses | Victims ¹ | Known offenders ² |
|---|--------------------|--------------|----------------------|------------------------------|
| Total | 7,462 | 8,832 | 9,222 | 7,314 |
| Race, total | 3,642 | 4,393 | 4,580 | 4,011 |
| Anti-White | 719 | 888 | 910 | 1,064 |
| Anti-Black | 2,486 | 2,967 | 3,076 | 2,510 |
| Anti-American Indian/Alaskan native | 62 | 68 | 72 | 52 |
| Anti-Asian/Pacific Islander | 217 | 268 | 280 | 242 |
| Anti-multi-racial group | 158 | 202 | 242 | 143 |
| Ethnicity/national origin, total | 1,102 | 1,345 | 1,409 | 1,247 |
| Anti-Hispanic | 480 | 601 | 639 | 656 |
| Anti-other ethnicity/national origin | 622 | 744 | 770 | 591 |
| Religion, total | 1,426 | 1,576 | 1,659 | 568 |
| Anti-Jewish | 931 | 1,039 | 1,084 | 317 |
| Anti-Catholic | 53 | 58 | 71 | 21 |
| Anti-Protestant | 55 | 57 | 58 | 34 |
| Anti-Islamic | 155 | 170 | 174 | 103 |
| Anti-other religious group | 198 | 217 | 237 | 73 |
| Anti-multireligious group | 31 | 32 | 32 | 18 |
| Anti-atheism/agnosticism/etc | 3 | 3 | 3 | 2 |
| Sexual orientation, total | 1,244 | 1,464 | 1,513 | 1,438 |
| Anti-male homosexual | 825 | 957 | 984 | 1,022 |
| Anti-female homosexual | 172 | 207 | 221 | 172 |
| Anti-homosexual | 222 | 259 | 267 | 225 |
| Anti-heterosexual | 10 | 26 | 26 | 6 |
| Anti-bisexual | 15 | 15 | 15 | 13 |
| Disability, total | 45 | 47 | 50 | 47 |
| Anti-physical | 20 | 20 | 20 | 21 |
| Anti-mental | 25 | 27 | 30 | 26 |
| Multiple bias | 3 | 7 | 11 | 3 |

¹ The term "victim" may refer to a person, business, institution, or a society as a whole. ² The term "known offender" does not imply that the identity of the suspect is known, but only that an attribute of the suspect is identified which distinguishes him/her from an unknown offender.

No. 320. General Purpose Law Enforcement Agencies—Number and Employment: 2000

[Includes both full-time and part-time employees. State police data are based on the 49 primary law enforcement agencies; Excludes agencies that perform primarily court-related duties.]

| Type of Agency | Number of agencies ¹ | Number of employees | | | | | |
|-----------------------------|---------------------------------|---------------------|----------------|----------------|---------------|---------------|---------------|
| | | Full-time | | | Part-time | | |
| | | Total | Sworn | Civilian | Total | Sworn | Civilian |
| 2000 Total | 15,785 | 946,766 | 661,979 | 284,787 | 86,039 | 37,872 | 48,174 |
| Local police | 12,666 | 565,915 | 440,920 | 124,995 | 62,197 | 27,351 | 34,853 |
| Sheriff | 3,070 | 293,823 | 164,711 | 129,112 | 23,025 | 10,426 | 12,599 |
| State police | 49 | 87,028 | 56,348 | 30,680 | 817 | 95 | 722 |

¹ The number of agencies reported here is the result of a weighted sample and not an exact enumeration.

No. 321. Casework Loads in DNA Laboratories: 1997 and 2000

[Based on the National Study of DNA (deoxyribonucleic acid) Laboratories' Survey, which obtained data from 110 of the approximately 120 known public forensic DNA laboratories]

| Case status | 1997 | 2000 | Percent Change | Case status | 1997 | 2000 | Percent Change |
|---|---------|---------|----------------|------------------------------------|---------|---------|----------------|
| | | | | | | | |
| Convicted offender ² | 115,681 | 177,184 | 53 | Backlog of work Casework | 6,800 | 15,981 | 135 |
| Work analyzed Casework ¹ | 14,289 | 24,790 | 73 | Convicted offender | 286,819 | 265,329 | -7 |
| | | | | Full-time employees | 672 | 893 | 33 |

¹ Casework refers to cases received by forensic crime laboratories which involve criminal incident under investigation. ² Convicted offender samples are DNA samples collected from persons convicted of a crime, normally a violent crime or felony. The samples are to be analyzed, and the results are to be included in a DNA database.

No. 331. Child Abuse and Neglect Cases Substantiated and Indicated—Victim Characteristics: 1990 to 2002

[Based on reports alleging child abuse and neglect that were referred for investigation by the respective child protective services agency in each state. The reporting period may be either calendar or fiscal year. The majority of states provided duplicated counts. Children are counted each time they were subjects of an investigation report. In 2001, the data are from 51 States. Victims are children whose alleged maltreatments have been substantiated, indicated, or assessed as maltreatments. A substantiated case represents a type of investigation disposition that determines that there is sufficient evidence under State law to conclude that maltreatment occurred or that the child is at risk of maltreatment. An indicated case represents a type of disposition that concludes that there was a reason to suspect maltreatment had occurred, but the level of evidence does not reach the State standard. An alternative response-victim case represents a type of disposition that identifies child as a victim within the alternative response system.]

NA Not available. ¹ The number of investigations includes assessments. The number of investigations is based on the total number of investigations that received a disposition in 2001. ² The number of Children Subject of an Investigation of Assessment is based on the total number of children for whom an alleged maltreatment was substantiated, indicated, or assessed to have occurred or the child was at risk of occurrence. ³ Victims are defined as children subject of a substantiated, indicated, or alternative response-victim maltreatment. ⁴ Includes estimates for States that did not report.

No. 334. Jail Inmates by Sex, Race, and Hispanic Origin: 1990 to 2001

[As of June 30. Excludes federal and state prisons or other correctional institutions; institutions exclusively for juveniles; state-operated jails in Alaska, Connecticut, Delaware, Hawaii, Rhode Island, and Vermont; and other facilities which retain persons for less than 48 hours. Data based on the Annual Survey of Jails, which is a sample survey and subject to sampling variability. Due to rounding, inmates may not add to total]

NA Not available. ¹ State-level data excludes Federal inmates. ² Includes both jail and prison inmates (State has combined jail and prison system). ³ Numbers are for custody rather than jurisdiction counts. ⁴ The transfer of responsibility for sentenced felons from the District of Columbia to the Federal System was completed by the year end 2001. Since June 30, 2000, the inmate population in the District of Columbia has dropped by 5,825 inmates. Approximately 58% of the growth in the Federal System in the last 6 months of 2001 was the result of this transfer of responsibility. ⁵ 1980 and 1990, data are for custody counts; thereafter, jurisdiction counts are reported.

Source: U.S. Bureau of Justice Statistics, *Prisoners in 2002*, Series NCJ 195189; and earlier reports.

Geography and Environment

This section presents a variety of information on the physical environment of the United States, starting with basic area measurement data and ending with climatic data for selected weather stations around the country. The subjects covered between those points are mostly concerned with environmental trends but include related subjects such as land use, water consumption, air pollutant emissions, toxic releases, oil spills, hazardous waste sites, municipal waste and recycling, threatened and endangered wildlife, and the environmental industry.

The information in this section is selected from a wide range of federal agencies that compile the data for various administrative or regulatory purposes, such as the Environmental Protection Agency (EPA), U.S. Geological Survey (USGS), National Oceanic and Atmospheric Administration (NOAA), Natural Resources Conservation Service (NRCS), and General Services Administration (GSA). New information on pollution abatement expenditures may be found in Tables 370 and 371 produced by the U.S. Census Bureau.

Area—For the 2000 census, area measurements were calculated by computer based on the information contained in a single, consistent geographic database, the Topologically Integrated Geographic Encoding & Referencing system (TIGER) database, rather than relying on historical, local, and manually calculated information. Information from the 2000 census may be found in Table 346.

Geography—The USGS conducts investigations, surveys, and research in the fields of geography, geology, topography, geographic information systems, mineralogy, hydrology, and geothermal energy resources as well as natural hazards. The USGS provides United States cartographic

data through the Earth Sciences Information Center, water resources data through the National Water Data Exchange (NAWDEX), and a variety of research and Open-File reports which are announced monthly in *New Publications of the USGS*.

In a joint project with the U.S. Census Bureau, during the 1980s, the USGS provided the basic information on geographic features for input into a national geographic and cartographic database prepared by the Census Bureau, called TIGER database. Since then, using a variety of sources, the Census Bureau has updated these features and their related attributes (names, descriptions, etc.) and inserted current information on the boundaries, names, and codes of legal and statistical geographic entities; very few of these updates added aerial water features. Maps prepared by the Census Bureau using the TIGER database show the names and boundaries of entities and are available on a current basis.

The U.S. Census Bureau uses the Boundary and Annexation Survey to maintain a current inventory of government units and their legal boundaries. The information is available to the public on line. There are also several series of maps for Census 2000: P.L. County Block Maps, Census Tract Outline Maps, and Voting District/State Legislative District Outline Maps. These maps can be obtained online via the American Fact-Finder.

An inventory of the nation's land resources by type of use/cover was conducted by the National Resources Inventory Conservation Service (formerly the Soil Conservation Service) every 5 years beginning in 1977. The most recent survey results, which were published in the 1997 National Resources Inventory, cover

all nonfederal land in Puerto Rico, the Virgin Islands, and the United States except Alaska. Tables 361 and 362 provide results from the survey. Beginning with the release of the 2001 estimates (tentatively scheduled for fall 2003), this program will shift to become an annual release of land use data.

Environment—The principal federal agency responsible for pollution abatement and control activities is the Environmental Protection Agency (EPA). It is responsible for establishing and monitoring national air quality standards, water quality activities, solid and hazardous waste disposal, and control of toxic substances. Many of these series now appear in the Envirofacts portion of the EPA Web site at <<http://www.epa.gov/enviro/>>. In 2003, EPA released a major compilation of environmental indicators, entitled *Draft Report on the Environment: 2003*, found at <<http://www.epa.gov/indicators/>>.

National Ambient Air Quality Standards (NAAQS) for suspended particulate matter, sulfur dioxide, photochemical oxidants, carbon monoxide, and nitrogen dioxide were originally set by the EPA in April 1971. Every 5 years, each of the NAAQS is reviewed and revised to include any additional or new health or welfare data. The standard for photochemical oxidants, now called ozone, was revised in February 1979. Also, a new NAAQS for confining lead was promulgated in October 1978 and for suspended particulate matter in 1987. Table 359 gives some of the health related standards for the six air pollutants having NAAQS. Data gathered from state networks are periodically submitted to EPA's National Aerometric Information Retrieval System (AIRS) for summarization in annual reports on the nationwide status and trends in air quality. For details, see *National Air Quality and Emissions Trends Report*. More current information on emissions may be found on the EPA Web site at <<http://www.epa.gov/ttn/chief/trends>>.

The Toxics Release Inventory (TRI), published by the EPA, is a valuable source of information regarding toxic chemicals that are being used, manufactured, treated, transported, or released into the

environment. Sections 313 of the Emergency Planning and Community Right-To-Know Act (EPCRA) and 6607 of the Pollution Prevention Act (PPA), mandate that a publicly accessible toxic chemical database be developed and maintained by EPA. This database, known as the TRI, contains information concerning waste management activities and the release of toxic chemicals by facilities that manufacture, process, or otherwise use said materials. Data on the release of these chemicals are collected from manufacturing facilities and facilities added in 1998 that have the equivalent of 10 or more full-time employees and meet the established thresholds for manufacturing, processing, or "other use" of listed chemicals. Facilities must report their releases and other waste management quantities. Since 1994 federal facilities have been required to report their data regardless of industry classification. In May 1997, EPA added seven new industry sectors that reported to the TRI for the first time in July 1999 for the 1998 reporting year.

Climate—NOAA, through the National Weather Service and the National Environmental Satellite, Data, and Information Service, is responsible for climate data. NOAA maintains about 11,600 weather stations, of which over 3,000 produce autographic precipitation records, about 600 take hourly readings of a series of weather elements, and the remainder record data once a day. These data are reported monthly in the Climatological Data and Storm Data, published monthly and annually in the Local Climatological Data (published by location for major cities).

The normal climatological temperatures, precipitation, and degree days listed in this publication are derived for comparative purposes and are averages for the 30-year period, 1971-2000. For stations that did not have continuous records for the entire 30 years from the same instrument site, the normals have been adjusted to provide representative values for the current location. The information in all other tables is based on data from the beginning of the record at that location through 2001.

No. 346. Land and Water Area of States and Other Entities: 2000

[One square mile=2.59 square kilometers. Area is calculated from the specific boundary recorded for each entity in the U.S. Census Bureau's geographic TIGER database]

No. 352. U.S. Wetland Resources and Deepwater Habitats by Type: 1986 and 1997

[In thousands of acres (144,673.3 represents 144,677,300). Wetlands and deepwater habitats are defined separately because the term wetland does not include permanent water bodies. Deepwater habitats are permanently flooded land lying below the deepwater boundary of wetlands. Deepwater habitats include environments where surface water is permanent and often deep, so that water, rather than air, is the principal medium within which the dominant organisms live, whether or not they are attached to the substrate. As in wetlands, the dominant plants are hydrophytes; however, the substrates are considered nonsoil because the water is too deep to support emergent vegetation. In general terms, wetlands are lands where saturation with water is the dominant factor determining the nature of soil development and the types of plant and animal communities living in the soil and on its surface. The single feature that most wetlands share is soil or substrate that is at least periodically saturated with or covered by water. Wetlands are lands transitional between terrestrial and aquatic systems where the water table is usually at or near the surface or the land is covered by shallow water]

| Wetland or deepwater category | | | Change, 1986 to 1997 |
|---|------------------|------------------|-------------------------|
| | 1986 | 1997 | |
| All wetlands and deepwater habitats, total | 144,673.3 | 144,136.8 | -536.5 |
| All deepwater habitats, total | 38,537.6 | 38,645.1 | 107.5 |
| Lacustrine ¹ | 14,608.9 | 14,725.3 | 116.4 |
| Riverine ² | 6,291.1 | 6,255.9 | -35.2 |
| Estuarine Subtidal ³ | 17,637.6 | 17,663.9 | 26.3 |
| All wetlands, total. | 106,135.7 | 105,491.7 | -644 |

| Marine intertidal | 133.1 | 130.9 | -2.2 |
| Estuarine intertidal non-vegetated. | 580.4 | 580.1 | -0.3 |
| Estuarine intertidal vegetated. | 4,623.1 | 4,615.2 | -7.9 |
| Freshwater wetlands | 100,799.1 | 100,165.5 | -633.6 |
| Freshwater non-vegetated. | 5,251.0 | 5,914.3 | 663.3 |
| Freshwater vegetated. | 95,548.1 | 94,251.2 | -1,296.9 |
| Freshwater emergent ⁵ | 26,383.3 | 25,157.1 | -1,226.2 |
| Freshwater forested ⁶ | 51,929.6 | 50,728.5 | -1,201.1 |
| Freshwater shrub ⁷ | 17,235.2 | 18,365.6 | 1,130.4 |

¹ The lacustrine system includes deepwater habitats with all of the following characteristics: (1) situated in a topographic depression or a dammed river channel; (2) lacking trees, shrubs, persistent emergents, emergent mosses or lichens with greater than 30 percent coverage; (3) total area exceeds 20 acres. ² The riverine system includes deepwater habitats contained within a channel, with the exception of habitats with water containing ocean derived salts in excess of 0.5 parts per thousand. ³ The estuarine system consists of deepwater tidal habitats and adjacent tidal wetland that are usually semi-enclosed by land but have open, partly obstructed, or sporadic access to the open ocean, and in which ocean water is at least occasionally diluted by freshwater runoff from the land. Subtidal is where the substrate is continuously submerged by marine or estuarine waters. ⁴ Intertidal is where the substrate is exposed and flooded by tides. Intertidal includes the splash zone of coastal waters. ⁵ Emergent wetlands are characterized by erect, rooted, herbaceous hydrophytes, excluding mosses and lichens. This vegetation is present for most of the growing season in most years. These wetlands are usually dominated by perennial plants. ⁶ Forested wetlands are characterized by woody vegetation that is 20 feet tall or taller. ⁷ Shrub wetlands include areas dominated by woody vegetation less than 20 feet tall. The species include true shrubs, young trees, and trees or shrubs that are small or stunted because of environmental conditions.

- Represents zero. ¹ From source to mouth. ² Drainage area includes both the United States and Canada. ³ The length from the source of the Missouri River to the Mississippi River and thence to the Gulf of Mexico is about 3,710 miles. ⁴ Includes about 167,000 cubic ft. per second diverted from the Mississippi into the Atchafalaya River but excludes the flow of the Red River. ⁵ Excludes the drainage areas of the Red and Atchafalaya Rivers. ⁶ In east-central Louisiana, the Red River flows into the Atchafalaya River, a distributary of the Mississippi River. Data on average discharge, length, and drainage area include the Red River, but exclude all water diverted into the Atchafalaya from the Mississippi River.

No. 357. U.S. Water Quality Conditions by Type of Waterbody: 2000

[Section 305(b) of the Clean Water Act requires states and other jurisdictions to assess the health of their waters and the extent to which their waters support water quality standards. Section 305(b) requires that states submit reports describing water quality conditions to the Environmental Protection Agency every two years. Water quality standards have three elements (designated uses, criteria developed to protect each use, and an antidegradation policy). For information on survey methodology and assessment criteria, see report]

- Represents zero. NA Not available. ¹ Includes waterbodies accessed as not attainable for one or more uses. Most states do not assess all their waterbodies during the 2-year reporting cycle, but use a "rotating basin approach" whereby all waters are monitored over a set period of time. ² Based on assessment of available data, water quality supports all designated uses. Water quality meets narrative and/or numeric criteria adopted to protect and support a designated use. ³ Although all assessed uses are currently met, data show a declining trend in water quality. Projections based on this trend indicate water quality will be impaired in the future, unless action is taken to prevent further degradation. ⁴ Impaired or not attainable. The reporting state or jurisdiction has performed a "use-attainability analysis" and demonstrated that support of one or more designated beneficial uses is not attainable due to specific biological, chemical, physical, or economic/social conditions. ⁵ Excludes unknown and natural sources.

No. 359. National Ambient Air Pollutant Concentrations: 1992 to 2001

[Data represent annual composite averages of pollutant based on daily 24-hour averages of monitoring stations, except carbon monoxide is based on the second-highest, non-overlapping, 8-hour average; ozone, the second-highest daily maximum 1-hour value or the fourth-highest maximum 8-hour value; and lead, the maximum quarterly average of ambient lead levels. Based on data from the Air Quality System. $\mu\text{g}/\text{m}^3$ =micrograms of pollutant per cubic meter of air; ppm=parts per million]

| Pollutant | Unit | Monitoring stations, number | Air quality standard ¹ | 1992 | 1995 | 1997 | 1998 | 1999 | 2000 | 2001 |
|--------------------------------|------------------------------------|-----------------------------|-----------------------------------|---------------------------|---------------|--------|----------------|--------|--------|--------|
| | | | | Carbon monoxide | ppm | 387 | ² 9 | 5.2 | 4.6 | 4.1 |
| Ozone | ppm | 785 | ³ .12 | 0.104 | 0.111 | 0.104 | 0.110 | 0.107 | 0.1 | 0.101 |
| Ozone | ppm | 785 | ⁴ 0.08 | 0.081 | 0.087 | 0.082 | 0.087 | 0.086 | 0.08 | 0.081 |
| Sulfur dioxide | ppm | 449 | .03 | 0.0075 | 0.0057 | 0.0055 | 0.0055 | 0.0053 | 0.0051 | 0.0049 |
| Particulates (PM-10) | $\mu\text{g}/\text{m}^3$ | 770 | ⁵ 50 | 27.7 | 25.7 | 24.6 | 24.3 | 24.8 | 24.4 | 23.9 |
| Nitrogen dioxide | ppm | 250 | ⁶ .053 | 0.019 | 0.018 | 0.017 | 0.018 | 0.018 | 0.017 | 0.017 |
| Lead | $\mu\text{g}/\text{m}^3$ | 96 | ⁶ 1.5 | 0.08 | 0.06 | 0.05 | 0.05 | 0.05 | 0.05 | 0.06 |

¹ Refers to the primary National Ambient Air Quality Standard that protects the public health. ² Based on 8-hour standard of 9 ppm. ³ Based on 1-hour standard of .12 ppm. ⁴ Based on 8-hour standard of .08 ppm. ⁵ The particulates (PM-10) standard replaced the previous standard for total suspended particulates in 1987. ⁶ Based on 3-month standard of 1.5 $\mu\text{g}/\text{m}^3$.

No. 360. National Air Pollutant Emissions: 1970 to 2001

[In thousands of tons (13,042 represents 13,042,000), except as indicated. PM-10=Particulate matter of less than ten microns; PM-2.5=particulate matter of less than 2.5 microns effective diameter. Methodologies used to estimate data for 1970 to 1980 period and 1985 to present emissions differ. Beginning with 1985, the methodology for more recent years is described in the document available at <<http://www.epa.gov/ttn/chieftrends/trends99/neiproc99.pdf>>]

No. 362. Emissions of Greenhouse Gases by Type and Source: 1990 to 2002

[6,156.0 represents 6,156,000,000 tons. Emission estimates were mandated by Congress through Section 1605(a) of the Energy Policy Act of 1992 (Title XVI). Gases that contain carbon can be measured either in terms of the full molecular weight of the gas or just in terms of their carbon dioxide equivalent. Both measures are utilized below]

| Type and source | Unit | 1990 | 1995 | 1999 | 2000 | 2001 | 2002 |
|----------------------------------|--------------------|------------------|------------------|------------------|------------------|------------------|------------------|
| CARBON DIOXIDE EQUIVALENT | | | | | | | |
| Total emissions | Mil. metric tons. | 6,156.0 | 6,470.0 | 6,795.0 | 6,957.0 | 6,829.0 | 6,862.0 |
| Carbon dioxide, total | Mil. metric tons. | 5,006.1 | 5,318.5 | 5,686.1 | 5,854.0 | 5,748.3 | 5,795.6 |
| Energy sources | Mil. metric tons . | 4,988.6 | 5,255.8 | 5,630.5 | 5,798.6 | 5,691.7 | 5,729.3 |
| C02 in natural gas | Mil. metric tons . | 14.0 | 16.7 | 17.8 | 18.2 | 18.6 | 18.1 |
| Cement production | Mil. metric tons . | 33.3 | 36.9 | 40.1 | 41.3 | 41.4 | 43.3 |
| Gas flaring | Mil. metric tons . | 9.1 | 17.2 | 6.7 | 5.5 | 5.2 | 5.1 |

No. 366. Toxic Chemical Releases and Transfers by Media: 1988 to 2001

[In millions of pounds (3,153.7 represents 3,153,700,000), except as indicated. Based on reports filed as required by section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA, or Title III of the Superfund Amendments and Reauthorization Act of 1986), Public Law 99-499. Owners and operators of facilities that are classified within Standard Classification Code groups 20 through 39, have 10 or more full-time employees, and that manufacture, process, or otherwise uses any listed toxic chemical in quantities greater than the established threshold in the course of a calendar year are covered and required to report.]

| Media | Core chemicals ¹ | | | | |
|--|-----------------------------|----------------|----------------|----------------|----------------|

No. 370. Pollution Abatement Capital Expenditures and Operating Costs by Media and Industry: 1999

[In millions of dollars. (5,809.9 represents 5,809,900,000). Based on probability sample of about 21,000 manufacturing, mining, and electric utility plants. Pollution abatement is the reduction of elimination of pollution that is created by the production process and has the potential to produce undesirable environmental and/or health effects. Capital expenditures include installation and retrofit that occurred for separately identifiable methods, techniques, or process technologies installed exclusively for the purpose of removing pollutants. Operating costs include all costs for operating and maintaining all pollution abatement technology]

No. 375. Major U.S. Weather Disasters: 1990 to 2003

[5.0 represents \$5,000,000,000. Covers only weather related disasters costing \$1 billion or more]

| Event | Description | Time period | Estimated cost | Deaths |
|--|--|-----------------------|----------------|----------|
| | | | (bil. dol.) | |
| Southern California wildfires | Dry weather, high winds, and resulting wildfires in southern CA burned 743,000 acres & destroyed 3700 homes | Oct.-early Nov. 2003 | 2.5 | 22 |
| Hurricane Isabel | Category 2 hurricane makes landfall in eastern NC, causing damage along coasts of NC, VA, and MD with wind damage and flooding in NC, VA, MD, DE, WV, NJ, NY and PA. | September 2003 | over 4 | 47 |
| Midwest severe storms and tornadoes | Numerous tornadoes over the midwest, MS River valley, and OH/TN River valleys with record 400 tornadoes in one week | Early May 2003 | over 3.1 | 41 |
| Storms and hail | Sever storms and large hail over southern plains, lower MS River valley, and TX | Early April 2003 | over 1.6 | - |
| Widespread drought | Moderate to extreme drought over large portions of 30 states | Spring to fall 2002 | over 10 | - |
| Western fire season | Major fires over 11 western states from Rockies to west coast | Spring to fall 2002 | over 2 | 21 |
| Tropical Storm Allison | Tropical storm produced rainfall and severe flooding in coastal portions of TX & LA & damage in MS, FL, VA, and PA | June 2001 | 5.0 | 43 |
| Midwest and Ohio Valley hail and tornadoes | Storms, tornadoes, and hail in TX, OK, KS, NE, IA, MO, IL, IN, WI, MI, OH, KY, and PA | April 2001 | 1.7 | 3 |
| Southern drought/heat wave | Severe drought and heat over south-central and southeast states cause significant losses in agriculture and related industries | Spring-summer 2000 | over 4.0 | 140 |
| Western fire season | Severe fire season in western states | Spring-summer 2000 | over 2.0 | - |
| Hurricane Floyd | Category 2 hurricane in NC, causing severe flooding in NC and some flooding in SC, VA, MD, PA, NY, NJ, DE, RI, CT, MA, and VT | September 1999 | 6.0 | 75 |
| Drought/heat wave | Drought/heatwave over eastern U.S. | Summer 1999 | 1.0 | 256 |
| Oklahoma-Kansas tornadoes | Category F4-F5 tornados hit OK, KS, TX, and TN | May 1999 | 1.0 | 55 |
| Arkansas-Tennessee tornados | Two outbreaks of tornadoes in 6-day period | January 1999 | 1.3 | 31 |
| Texas flooding | Severe flooding in southeast Texas from 2 heavy rain events with 10-20 in. totals | Oct.-Nov. 1998 | 1.0 | 31 |
| Hurricane Georges | Category 2 hurricane in Puerto Rico, Florida Keys, and Gulf coasts of LA, MS, AL, and FL | September 1998 | 3-4 | 16 |
| Hurricane Bonnie | Category 3 hurricane in eastern NC and VA | August 1998 | 1.0 | 2 |
| Southern drought/heat wave | Severe drought and heat wave from TX/OK to the Carolinas | Summer 1998 | 6.0 | 200 |
| Minnesota severe storms/hail | Very damaging severe thunderstorms with large hail over wide areas of Minnesota | May 1998 | 1.5 | 1 |
| Southeast severe weather | Tornadoes and flooding related to strong El Nino in the southeast | Winter/Spring 1998 | 1.0 | Over 130 |
| Northeast ice storm | Intense ice storm hits ME, NH, VT, and NY | January 1998 | 1.4 | 16 |
| Northern plains flooding | Severe flooding in Dakotas and Minnesota due to heavy spring snowmelt | April-May 1997 | 2.0 | 11 |
| MS and OH valleys flooding and tornadoes | Tornadoes and severe flooding hit the states of AR, MO, MS, TN, IL, IN, KY, OH, and WV | March 1997 | 1.0 | 67 |
| West Coast flooding | Flooding from rains and snowmelt in CA, WA, OR, ID, NV, & MT | Dec. 1996-Jan. 1997 | 2-3 | 36 |
| Hurricane Fran | Category 3 hurricane in NC and VA | Sept. 1996 | 5.0 | 37 |
| Southern Plains severe drought | Drought in agricultural areas of TX & OK | Fall 1995-summer 1996 | Over 4 | (NA) |
| Pacific Northwest severe flooding | Flooding from heavy rain & snowmelt in OR, WA, ID, and MT. | Feb. 1996 | 1.0 | 9 |
| Blizzard of '96 followed by flooding | Heavy snowstorm followed by severe flooding in Appalachians, Mid-Atlantic, and Northeast | Jan. 1996 | 3.0 | 187 |
| Hurricane Opal | Category 3 hurricane in FL, AL, parts of GA, TN, & Carolinas. | Oct. 1995 | Over 3 | 27 |
| Hurricane Marilyn | Category 2 hurricane in Virgin Islands | Sept. 1995 | 2.1 | 13 |
| TX/OK/LA/MS severe weather and flooding | Flooding, hail, & tornadoes across TX, OK, parts of LA, MS, Dallas & New Orleans hardest hit | May 1995 | 5-6 | 32 |
| California flooding | Flooding from frequent winter storms across much of CA | Jan.-Mar. 1995 | 3.0 | 27 |
| Western Fire Season | Severe fire season in western states due to dry weather | Summer-Fall 1994 | 1.0 | (NA) |
| Texas flooding | Flooding from torrential rain & thunderstorms across southeast TX | Oct. 1994 | 1.0 | 19 |
| Tropical Storm Alberto | Flooding due to 10 to 25 inch rain across GA, AL, part of FL | July 1994 | 1.0 | 32 |
| Southeast ice storm | Intense ice storm in pts of TX, OK, AR, LA, MS, AL, TN, GA, SC, NC, & VA | Feb. 1994 | 3.0 | 9 |
| California wildfires | Out-of-control wildfires over southern CA | Fall 1993 | 1.0 | 4 |
| Midwest flooding | Extreme flooding across central U.S. | Summer 1993 | 15-20 | 48 |
| Drought/heat wave | Extreme drought/heatwave across southeastern U.S. | Summer 1993 | 1.0 | (NA) |
| Storm/blizzard | "Storm of the Century" hits entire eastern seaboard | Mar. 1993 | 3-6 | 270 |
| Nor'easter of 1992 | Slow-moving storm batters northeast U.S. coast, New England. | Dec. 1992 | 1-2 | 19 |
| Hurricane Iniki | Category 4 hurricane hit Hawaiian island of Kauai | Sept. 1992 | 1.8 | 7 |
| Hurricane Andrew | Category 4 hurricane hit FL & LA | Aug. 1992 | 27.0 | 58 |
| Oakland Firestorm | Oakland, CA firestorm due to low humidity & high winds | Oct. 1991 | 1.5 | 25 |
| Hurricane Bob | Category 2 hurricane—mainly coastal NC, Long Island, & New England | Aug. 1991 | 1.5 | 18 |
| TX/OK/LA/AR Flooding | Torrential rains cause flooding along Trinity, Red, and Arkansas rivers | May 1990 | 1.0 | 13 |

Section 7

Elections

This section relates primarily to presidential, congressional, and gubernatorial elections. Also presented are summary tables on congressional legislation; state legislatures; Black, Hispanic, and female officeholders; population of voting age; voter participation; and campaign finances.

Official statistics on federal elections, collected by the Clerk of the House, are published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. Federal and state elections data appear also in *America Votes*, a biennial volume published by CQ Press (a division of Congressional Quarterly, Inc.), Washington, DC. Federal elections data also appear in the U.S. Congress, *Congressional Directory*, and in official state documents. Data on reported registration and voting for social and economic groups are obtained by the U.S. Census Bureau as part of the Current Population Survey (CPS) and are published in Current Population Reports, Series P20 (see text, Section 1).

Almost all federal, state, and local governmental units in the United States conduct elections for political offices and other purposes. The conduct of elections is regulated by state laws or, in some cities and counties, by local charter. An exception is that the U.S. Constitution prescribes the basis of representation in Congress and the manner of electing the President and grants to Congress the right to regulate the times, places, and manner of electing federal officers. Amendments to the Constitution have prescribed national criteria for voting eligibility. The 15th Amendment, adopted in 1870, gave all citizens the right to vote regardless of race, color, or previous condition of servitude. The 19th Amendment, adopted in 1919, further extended the right to vote to all citizens regardless of sex. The payment of poll taxes as a prerequisite to voting in federal elections was banned by the 24th Amendment in

1964. In 1971, as a result of the 26th Amendment, eligibility to vote in national elections was extended to all citizens, 18 years old and over.

Presidential election—The Constitution specifies how the President and Vice President are selected. Each state elects, by popular vote, a group of electors equal in number to its total of members of Congress. The 23d Amendment, adopted in 1961, grants the District of Columbia three presidential electors, a number equal to that of the least populous state. Subsequent to the election, the electors meet in their respective states to vote for President and Vice President. Usually, each elector votes for the candidate receiving the most popular votes in his or her state. A majority vote of all electors is necessary to elect the President and Vice President. If no candidate receives a majority, the House of Representatives, with each state having one vote, is empowered to elect the President and Vice President, again, with a majority of votes required.

The 22nd Amendment to the Constitution, adopted in 1951, limits presidential tenure to two elective terms of 4 years each or to one elective term for any person who, upon succession to the Presidency, has held the office or acted as President for more than 2 years.

Congressional election—The Constitution provides that Representatives be apportioned among the states according to their population, that a census of population be taken every 10 years as a basis for apportionment, and that each state have at least one Representative. At the time of each apportionment, Congress decides what the total number of Representatives will be. Since 1912, the total has been 435, except during 1960 to 1962 when it increased to 437, adding one Representative each for Alaska and Hawaii. The total reverted to 435 after

reapportionment following the 1960 census. Members are elected for 2-year terms, all terms covering the same period. The District of Columbia, American Samoa, Guam, and the Virgin Islands each elect one nonvoting Delegate, and Puerto Rico elects a nonvoting Resident Commissioner.

The Senate is composed of 100 members, 2 from each state, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were originally chosen by the state legislatures. The 17th Amendment to the Constitution, adopted in 1913, prescribed that Senators be elected by popular vote.

Voter eligibility and participation—The Census Bureau publishes estimates of the population of voting age and the

percent casting votes in each state for Presidential and congressional election years. These voting-age estimates include a number of persons who meet the age requirement but are not eligible to vote, (e.g. aliens and some institutionalized persons). In addition, since 1964, voter participation and voter characteristics data have been collected during November of election years as part of the CPS. These survey data include noncitizens in the voting age population estimates but exclude members of the Armed Forces and the institutional population.

Statistical reliability—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Figure 7.1
**Vote Cast for President by Major Political Party:
1992 to 2000**

¹ Candidates with 1 million or more votes: 1992 - Independent, Ross Perot; 1996 - Reform, Ross Perot; 2000 - Green, Ralph Nader.

No. 390. Apportionment of Membership in House of Representatives by State: 1790 to 2000

[Total membership includes Representatives assigned to newly admitted states after the apportionment acts. Population figures used for apportionment purposes are those determined for states by each decennial census. No reapportionment based on 1920 population census. For method of calculating apportionment and a short history of apportionment, see House Report 91-1314, 91st Congress, 2d session, The Decennial Population Census and Congressional Apportionment]

No. 391. Vote Cast for United States Representatives by Major Political Party—States: 1998 to 2002

[In thousands (65,897 represents 65,897,000), except percent. R=Republican, D=Democrat, and I=Independent. In each state, totals represent the sum of votes cast in each Congressional District or votes cast for Representative at Large in states where only one member is elected. In all years there are numerous districts within the state where either the Republican or Democratic party had no candidate. In some states the Republican and Democratic vote includes votes cast for the party candidate by endorsing parties]

| VT | (1) | (1) | Meub | 32.29 | | | | | |

X Not applicable. 1 No candidate. 2 According to state law, it is not required to tabulate votes for unopposed candidates. 3 Louisiana holds an open-primary election with candidates from all parties running on the same ballot. Any candidate who receives a majority is elected; if no candidate receives 50 percent, there is a run off election in November between the top two finishers. 4 Sanders, an Independent, was elected with 64.26 percent of the vote. 5 Lucas withdrew after the primary election. Republican candidate, Forbes, took office in her place.

No. 401. Composition of State Legislatures by Political Party Affiliation: 2002 and 2003

[Data reflect election results in year shown for most states; and except as noted, results in previous year for other states. Figures reflect immediate results of elections, including holdover members in state houses which do not have all of their members running for re-election. Dem.=Democrat, Rep.=Republican, Vac.=Vacancies. In general, Lower House refers to body consisting of state Representatives; Upper House, of state Senators]

No. 402. Political Party Control of State Legislatures by Party: 1981 to 2004

[As of beginning of year. Nebraska has a nonpartisan legislature]

| Year | Legislatures under— | | | Year | Legislatures under— | | | Year | Legislatures under— | | |
|-------------------------|----------------------------|----------------------------|----------------------------|------------|----------------------------|----------------------------|----------------------------|------------|----------------------------|----------------------------|----------------------------|
| | Democ- ratic control | Split control or tie | Re- publican control | | Democ- ratic control | Split control or tie | Re- publican control | | Democ- ratic control | Split control or tie | Re- publican control |
| 1981 . . . | 28 | 6 | 15 | 1992 . . . | 29 | 14 | 6 | 1999 . . . | 20 | 12 | 17 |
| 1983 ¹ . . . | 34 | 4 | 11 | 1993 . . . | 25 | 16 | 8 | 2000 . . . | 16 | 15 | 18 |
| 1985 . . . | 27 | 11 | 11 | 1994 . . . | 24 | 17 | 8 | 2001 . . . | 16 | 15 | 18 |
| 1987 . . . | 28 | 12 | 9 | 1995 . . . | 18 | 12 | 19 | 2002 . . . | 17 | 15 | 17 |
| 1989 ² . . . | 28 | 13 | 8 | 1996 . . . | 16 | 15 | 18 | 2003 . . . | 16 | 12 | 21 |
| 1990 . . . | 29 | 11 | 9 | 1997 . . . | 20 | 11 | 18 | 2004 . . . | 17 | 11 | 21 |

¹ Two 1984 midterm recall elections resulted in a change in control of the Michigan State Senate. At the time of the 1984 election, therefore, Democrats controlled 33 legislatures. ² A party change during the year by a Democratic representative broke the tie in the Indiana House of Representatives, giving the Republicans control of both chambers.

State and Local Government Finances and Employment

This section presents data on revenues, expenditures, debt, and employment of state and local governments. Nationwide statistics relating to state and local governments, their numbers, finances, and employment are compiled primarily by the U.S. Census Bureau through a program of censuses and surveys. Every fifth year (for years ending in “2” and “7”) the Census Bureau conducts a census of governments involving collection of data for all governmental units in the United States. In addition, the Census Bureau conducts annual surveys which cover all the state governments and a sample of local governments.

Annually, the Census Bureau releases information on the Internet which presents financial data for the federal government, nationwide totals for state and local governments, and state-local data by states. Also released annually is a series on state, city, county, and school finances and on state and local public employment. There is also a series of quarterly data releases covering tax revenue and finances of major public employee retirement systems.

Basic information for Census Bureau statistics on governments is obtained by mail canvass from state and local officials; however, financial data for each of the state governments and for many of the large local governments are compiled from their official records and reports by Census Bureau personnel. In over two-thirds of the states, all or part of local government financial data are obtained through central collection arrangements with state governments. Financial data on the federal government are primarily based on the *Budget* published by the Office of Management and Budget (see text, Section 9, Federal Government Finances and Employment).

Governmental units—The governmental structure of the United States includes, in addition to the federal government and

the states, thousands of local governments—counties, municipalities, townships, school districts, and many “special districts.” In 2002, 87,525 local governments were identified by the census of governments (see Tables 417-419). As defined by the census, governmental units include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities and numerous local irrigation, power, and other types of districts—are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The count of governments excludes semi-autonomous agencies through which states, cities, and counties sometimes provide for certain functions—for example, “dependent” school systems, state institutions of higher education, and certain other “authorities” and special agencies which are under the administrative or fiscal control of an established governmental unit.

Finances—The financial statistics relate to government fiscal years ending June 30 or at some date within the 12 previous months. The following governments are exceptions and are included as though they were part of the June 30 group; ending September 30, the state governments of Alabama and Michigan, the District of Columbia, and Alabama school districts; and ending August 31, the state government of Texas and Texas school districts. New York State ends its fiscal year on March 31. The federal government ended the fiscal year June 30 until 1976 when its fiscal year, by an act of Congress, was revised to extend from Oct. 1 to Sept. 30. A 3-month quarter (July 1 to Sept. 30, 1976) bridged the transition.

Nationwide government finance statistics have been classified and presented in

terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure utilized by individual governments.

Statistics on governmental finances distinguish among general government, utilities, liquor stores, and insurance trusts. *General government* comprises all activities except utilities, liquor stores, and insurance trusts. Utilities include government water supply, electric light and power, gas supply, and transit systems. Liquor stores are operated by 17 states and by local governments in 6 states. Insurance trusts relate to employee retirement, unemployment compensation, and other social insurance systems administered by the federal, state, and local governments.

Data for cities or counties relate only to municipal or county and their dependent agencies and do not include amounts for other local governments in the same geographic location. Therefore, expenditure figures for “education” do not include spending by the separate school districts which administer public schools within most municipal or county areas. Variations in the assignment of governmental responsibility for public assistance, health, hospitals, public housing, and

other functions to a lesser degree also have an important effect upon reported amounts of city or county expenditure, revenue, and debt.

Employment and payrolls—These data are based mainly on mail canvassing of state and local governments. Payroll includes all salaries, wages, and individual fee payments for the month specified, and employment relates to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (unless otherwise specified) part-time as well as full-time personnel. Beginning 1986, statistics for full-time equivalent employment have been computed with a formula using hours worked by part-time employees. A payroll based formula was used prior to 1985. Full-time equivalent employment statistics were not computed for 1985. Figures shown for individual governments cover major dependent agencies such as institutions of higher education, as well as the basic central departments and agencies of the government.

Statistical reliability—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

No. 456. State and Local Governments—Full-Time Employment and Salary by Sex and Race/Ethnic Group: 1980 to 2001

[As of June 30. (2,350 represents 2,350,000). Excludes school systems and educational institutions. Based on reports from state governments (42 in 1980; 47 in 1983; 49 in 1981 and 1984 through 1987; and 50 in 1989 through 1991) and a sample of county, municipal, township, and special district jurisdictions employing 15 or more non-elected, nonappointed full-time employees. Beginning 1993, only for state and local governments with 100 or more employees. Data for 1992, 1994, 1996, 1998 2000 and 2002 are not available. For definition of median, see Guide to Tabular Presentation]

Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the federal government. The fiscal data cover taxes, other receipts, outlays, and debt. The principal sources of fiscal data are the *Budget of the United States Government* and related documents, published annually by the Office of Management and Budget (OMB), and the Department of the Treasury's *United States Government Annual Report* and its *Appendix*. Detailed data on tax returns and collections are published annually by the Internal Revenue Service. The personnel data relate to staffing and payrolls. They are published by the Office of Personnel Management and the Bureau of Labor Statistics. The primary source for data on public lands is *Public Land Statistics*, published annually by the Bureau of Land Management, Department of the Interior. Data on federally owned land and real property are collected by the General Services Administration and presented in its annual *Inventory Report on Real Property Owned by the United States Throughout the World*.

Budget concept—Under the unified budget concept, all federal monies are included in one comprehensive budget. These monies comprise both federal funds and trust funds. Federal funds are derived mainly from taxes and borrowing and are not restricted by law to any specific government purpose. Trust funds, such as the Unemployment Trust Fund, collect certain taxes and other receipts for use in carrying out specific purposes or programs in accordance with the terms of the trust agreement or statute. Fund balances include both cash balances with Treasury and investments in U.S. securities. Part of the balance is obligated, part unobligated. Prior to 1985, the budget totals, under provisions of law, excluded some federal activities—including the Federal Financing Bank, the Postal Service, the Synthetic Fuels Corporation, and the lending activities of the Rural Electrification Administration. The Balanced Budget

and Emergency Deficit Control Act of 1985 (P.L.99-177) repealed the off-budget status of these entities and placed social security (federal old-age and survivors insurance and the federal disability insurance trust funds) off-budget. Though social security is now off-budget and, by law, excluded from coverage of the congressional budget resolutions, it continues to be a federal program.

Receipts arising from the government's sovereign powers are reported as governmental receipts; all other receipts; i.e., from business-type or market-oriented activities, are offset against outlays. Outlays are reported on a checks-issued (net) basis (i.e., outlays are recorded at the time the checks to pay bills are issued).

Debt concept—For most of U.S. history, the total debt consisted of debt borrowed by the Treasury (i.e., public debt). The present debt series, includes both public debt and agency debt. The *gross federal debt* includes money borrowed by the Treasury and by various federal agencies; it is the broadest generally used measure of the federal debt. *Total public debt* is covered by a statutory debt limitation and includes only borrowing by the Treasury.

Treasury receipts and outlays—All receipts of the government, with a few exceptions, are deposited to the credit of the U.S. Treasury regardless of ultimate disposition. Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress.

The day-to-day cash operations of the federal government clearing through the accounts of the U.S. Treasury are reported in the *Daily Treasury Statement*. Extensive detail on the public debt is published in the *Monthly Statement of the Public Debt of the United States*.

Budget receipts such as taxes, customs duties, and miscellaneous receipts, which are collected by government agencies,

and outlays represented by checks issued and cash payments made by disbursing officers as well as government agencies are reported in the *Daily Treasury Statement of Receipts and Outlays of the United States Government* and in the Treasury's *United States Government Annual Report* and its *Appendix*. These deposits in and payments from accounts maintained by government agencies are on the same basis as the unified budget.

The quarterly *Treasury Bulletin* contains data on fiscal operations and related Treasury activities, including financial statements of government corporations and other business-type activities.

Income tax returns and tax collections—Tax data are compiled by the Internal Revenue Service of the Treasury Department. The annual *Internal Revenue Service Data Book* gives a detailed account of tax collections by kind of tax and by regions, districts, and states. The agency's annual *Statistics of Income* reports present detailed data from individual income tax returns and corporation income tax returns. The quarterly *Statistics of Income Bulletin* has, in general, replaced the supplemental *Statistics of Income* publications which presented data on such diverse subjects as tax-exempt organizations, unincorporated businesses, fiduciary income tax and estate tax returns, sales of capital assets by individuals, international income and taxes reported by corporations and individuals, and estate tax wealth.

Employment and payrolls—The Office of Personnel Management collects employment and payroll data from all departments and agencies of the federal government, except the Central Intelligence Agency, the National Security Agency, and the Defense Intelligence Agency. Employment figures represent the number of persons who occupied civilian

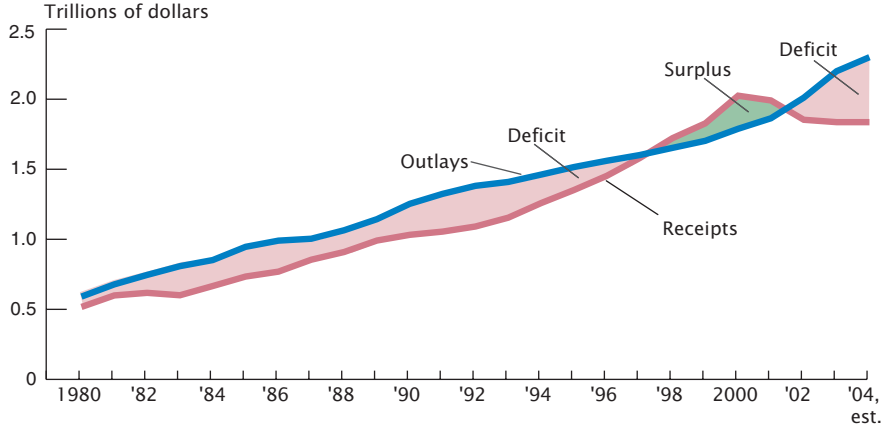

positions at the end of the report month shown and who are paid for personal services rendered for the federal government, regardless of the nature of appointment or method of payment. Federal payrolls include all payments for personal services rendered during the report month and payments for accumulated annual leave of employees who separate from the service. Since most federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap.

Federal employment and payroll figures are published by the Office of Personnel Management in its *Federal Civilian Workforce Statistics—Employment and Trends*. It also publishes biennial employment data for minority groups, data on occupations of white- and blue-collar workers, and data on employment by geographic area; reports on salary and wage distribution of federal employees are published annually. General schedule is primarily white-collar; wage system primarily blue-collar. Data on federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review* and in *Employment and Earnings* and by the U.S. Census Bureau in its annual *Public Employment*.

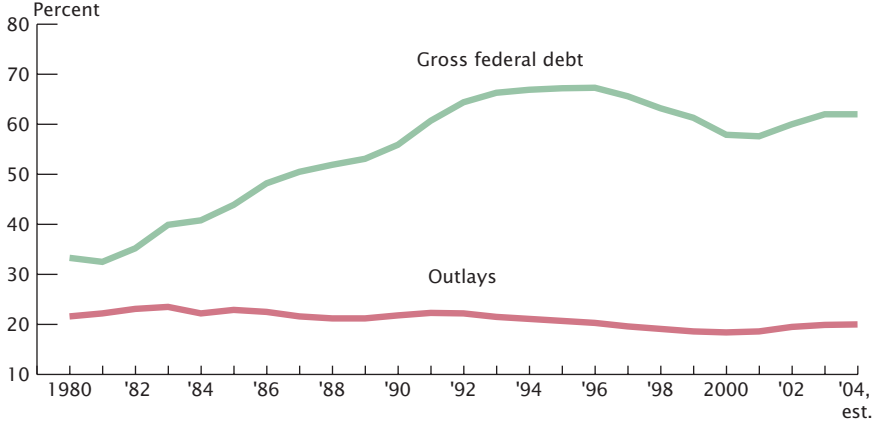

Public lands—The data on applications, entries, selections, patents, and certifications refer to transactions that involve the disposal, under the public land laws (including the homestead laws), of federal public lands to nonfederal owners. In general, original entries and selections are applications to secure title to public lands that have been accepted as properly filed (i.e., allowed). Some types of applications, however, are not reported until issuance of the final certificate, which passes equitable title to the land to the applicant.

Figure 9.1
Federal Budget Summary: 1980 to 2004

Receipts, outlays, and surplus or deficit

Outlays and federal debt as a percent of gross domestic product

Gross federal debt

No. 463. Federal Budget Outlays in Constant (1996) Dollars: 1990 to 2004

[Dollar amounts in billions of dollars (1,483.6 represents \$1,483,600,000,000). For fiscal year ending in year shown; see text, Section 8. Given the inherent imprecision in deflating outlays, the data shown in constant dollars present a reasonable perspective—not precision. The deflators and the categories that are deflated are as comparable over time as feasible. Minus sign (-) indicates offset]

No. 473. Tax Returns Filed—Examination Coverage: 1990 to 2003

[In thousands (109,868 represents 109,868,000, except as indicated. Return classification as Schedule C or C-EZ (nonfarm sole proprietorships) or Schedule F (farm proprietorships) for audit examination purposes was based on the largest source of income on the return and certain other characteristics. Therefore, some returns with business activity are reflected in the nonbusiness individual income tax return statistics in the table below (and vice versa), so that the statistics for the number of returns with Schedule C is not comparable to the number of nonfarm sole proprietorship returns in Table 719]

| Year and type of return | Returns examined | | | | | | Average tax and penalty per return (dollars) | | |
|---|----------------------------|------------|------------------|----------------|--------------|------------------------------|--|--------------|-----------------|
| | Returns filed ¹ | By— | | | | | Revenue agents ³ | Tax auditors | Service centers |

No. 480. Federal Individual Income Tax—Tax Liability and Effective and Marginal Tax Rates for Selected Income Groups: 1990 to 2001

[Refers to income after exclusions. Effective rate represents tax liability divided by stated income. The marginal tax rate is the percentage of the first additional dollar of income which would be paid in income tax. Computations assume the low income allowance, standard deduction, zero bracket amount, or itemized deductions equal to 10 percent of adjusted gross income, whichever is greatest. Excludes self-employment tax]

National Defense and Veterans Affairs

This section presents data on national defense and its human and financial costs; active and reserve military personnel; ships, equipment, and aircraft; and federally sponsored programs and benefits for veterans. The principal sources of these data are the annual *Selected Manpower Statistics* and the *Atlas/Data Abstract for the United States* and *Selected Areas* issued by the Office of the Secretary of Defense; *Annual Report of Secretary of Veterans Affairs*, *Department of Veterans Affairs*, and *The Budget of the United States Government*, Office of Management and Budget. For more data on expenditures and personnel, see Section 30.

Department of Defense (DOD)—The Department of Defense is responsible for providing the military forces of the United States. It includes the Office of the Secretary of Defense, the Joint Chiefs of Staff, the Army, the Navy, the Air Force, and the defense agencies. The President serves as Commander in Chief of the Armed Forces; from him, the authority flows to the Secretary of Defense and through the Joint Chiefs of Staff to the commanders of unified and specified commands (e.g., U.S. Strategic Command).

Reserve components—The Reserve Components of the Armed Forces consist of the Army National Guard of the United States, Army Reserve, Naval Reserve, Marine Corps Reserve, Air National Guard, Air Force Reserve, and Coast Guard Reserve. The National Guard has dual federal-state responsibilities and uses jointly provided equipment, facilities, and budget support. The President is empowered to mobilize the National Guard and to use such of the Armed Forces as he considers necessary to enforce federal authority in any state. There is in each Armed Force a Ready Reserve, a Standby Reserve, and a Retired Reserve. The Ready Reserve includes the Selected Reserve, which provides trained and

ready units and individuals to augment the active forces during times of war or national emergency, or at other times when required; and the Individual Ready Reserves, which is a manpower pool, that can be called to active duty during times of war or national emergency and would normally be used as individual fillers for active, guard and reserve units, and as a source of combat replacements. Most of the Ready Reserve serves in an active status. The Standby Reserve cannot be called to active duty, other than for training, unless authorized by Congress under “full mobilization,” and a determination is made that there are not enough qualified members in the Ready Reserve in the required categories who are readily available. The Retired Reserve represents a lower potential for involuntary mobilization.

Department of Veterans Affairs (VA)—The Department of Veterans Affairs administers laws authorizing benefits for eligible former and present members of the Armed Forces and for the beneficiaries of deceased members. Veterans benefits available under various acts of Congress include compensation for service-connected disability or death; pensions for nonservice-connected disability or death; vocational rehabilitation, education, and training; home loan insurance; life insurance; health care; special housing and automobiles or other conveyances for certain disabled veterans; burial and plot allowances; and educational assistance to families of deceased or totally disabled veterans, servicemen missing in action, or prisoners of war. Since these benefits are legislated by Congress, the dates they were enacted and the dates they apply to veterans may be different from the actual dates the conflicts occurred.

VA estimates of veterans cover all persons discharged from active U.S. military service under conditions other than dishonorable.

¹ Military awards for supplies, services, and construction. Net value of contracts of over \$25,000 for work in each state and DC. Figures reflect impact of prime contracting on state distribution of defense work. Often the State in which a prime contractor is located in is not the State where the subcontracted work is done. See also headline, Table 495. Undistributed civilians and military personnel, their payrolls, and prime contract awards for performance in classified locations are excluded.

No. 508. Military Reserve Personnel: 1990 to 2003

[As of September 30. The Ready Reserve includes the Selected Reserve which is scheduled to augment active forces during times of war or national emergency, and the Individual Ready Reserve which, during times of war or national emergency, would be used to fill out Active, Guard and Reserve units, and which would also be a source for casualty replacements; Ready Reservists serve in an active status (except for the Inactive National Guard - a very small pool within the Army National Guard). The Standby Reserve cannot be called to active duty except in situations where those members are the only available assets with specific required specialties. The Retired Reserve is categorized into three groups, based on age and length of retirement, prioritized for mobilization purposes.]

- Represents or rounds to zero. NA Not available. ¹ Force levels shown are for the ends of the fiscal years in question. The actual force levels for FY 2000 and FY 2001 will depend on future decisions. ² Number of operational missiles. Not in maintenance or overhaul status. ³ PAI=Primary aircraft inventory. PAI excludes backup and attrition reserve aircrafts as well as aircraft in depot maintenance. Total inventory counts will be higher than the PAI figures given here. ⁴ B-1 are accountable under START I but will not be accountable under START II. ⁵ PMAI = Primary mission aircraft inventory for active and reserve components. The numbers shown reflect only combat support and industrial funded PMAI aircraft and not developments/test or training aircraft. ⁶ Includes 37 KC-10s allocated to an airlift code. ⁷ Does not include Department of the Navy aircraft. ⁸ Includes fast sea lift (FSS), afloat prepositioning, and common-user (charter) ships, plus (through FY 1998) aviation support ships. For FY 1999 on, includes large medium-speed roll-on/roll-off (LMSR) and ready reserve force (RRF) ships tendered to the Military sealift command (MSC). FSS and LMSR vessels are maintained in a reserve, four-day ready status.

No. 512. Veterans by Sex, Period of Service, and State: 2003

[In thousands (24,909 represents 24,909,000). As of September 30. Estimated starting with veteran's place of residence as of April 1, 2000, based on 2000 census of population data, extended to later years on the basis of estimates of veteran interstate migration, separations from the Armed Forces, and mortality; not directly comparable with earlier estimates previously published by the VA. Also excludes a small number of National Guard personnel or reservists who incurred service-connected disabilities while on an initial tour of active duty for training only. Veterans who served both in wartime and peacetime are only counted as serving in wartime.]

Social Insurance and Human Services

This section presents data related to governmental expenditures for social insurance and human services; governmental programs for old-age, survivors, disability, and health insurance (OASDHI); governmental employee retirement; private pension plans; government unemployment and temporary disability insurance; federal supplemental security income payments and aid to the needy; child and other welfare services; and federal food programs. Also included here are selected data on workers compensation and vocational rehabilitation, child support, child care, charity contributions, and philanthropic trusts and foundations.

The principal source for these data is the Social Security Administration's *Annual Statistical Supplement to the Social Security Bulletin* which presents current data on many of the programs.

Social insurance under the Social Security Act—Programs established by the Social Security Act provide protection against wage loss resulting from retirement, prolonged disability, death, or unemployment, and protection against the cost of medical care during old age and disability. The federal OASDI program provides monthly benefits to retired or disabled insured workers and their dependents and to survivors of insured workers. To be eligible, a worker must have had a specified period of employment in which OASDI taxes were paid. The age of eligibility for full retirement benefits has been 65 years old for many years. However, for persons born in 1938 or later that age will gradually increase until it reaches age 67 for those born after 1959. Reduced benefits may be obtained as early as age 62. The worker's spouse is under the same limitations. Survivor benefits are payable to dependents of deceased insured workers. Disability benefits are payable to an insured worker under full retirement age with a prolonged disability and to the disabled worker's dependents on the same basis as

dependents of retired workers. Disability benefits are provided at age 50 to the disabled widow or widower of a deceased worker who was fully insured at the time of death. Disabled children, aged 18 or older, of retired, disabled, or deceased workers are also eligible for benefits. A lump sum benefit is generally payable on the death of an insured worker to a spouse or minor children. For information on the medicare program, see Section 3, Health and Nutrition.

Retirement, survivors, disability, and hospital insurance benefits are funded by a payroll tax on annual earnings (up to a maximum of earnings set by law) of workers, employers, and the self-employed. The maximum taxable earnings are adjusted annually to reflect increasing wage levels (see Table 525). Effective January 1994, there is no dollar limit on wages and self-employment income subject to the hospital insurance tax. Tax receipts and benefit payments are administered through federal trust funds. Special benefits for uninsured persons; hospital benefits for persons aged 65 and over with specified amounts of social security coverage less than that required for cash benefit eligibility; and that part of the cost of supplementary medical insurance not financed by contributions from participants are financed from federal general revenues.

Unemployment insurance is presently administered by the U.S. Employment and Training Administration and each state's employment security agency. By agreement with the U.S. Secretary of Labor, state agencies also administer unemployment compensation for eligible ex-military personnel and federal employees. Under state unemployment insurance laws, benefits related to the individual's past earnings are paid to unemployed eligible workers. State laws vary concerning the length of time benefits are paid and their amount. In most states, benefits are payable for 26 weeks and, during periods

of high unemployment, extended benefits are payable under a federal-state program to those who have exhausted their regular state benefits. Some states also supplement the basic benefit with allowances for dependents.

Unemployment insurance is funded by a federal unemployment tax levied on the taxable payrolls of most employers. Taxable payroll under the federal act and 12 state laws is the first \$7,000 in wages paid each worker during a year. Forty-one states have taxable payrolls above \$7,000. Employers are allowed a percentage credit of taxable payroll for contributions paid to states under state unemployment insurance laws. The remaining percent of the federal tax finances administrative costs, the federal share of extended benefits, and advances to states. About 97 percent of wage and salary workers are covered by unemployment insurance.

Retirement programs for government employees—The Civil Service Retirement System (CSRS) and the Federal Employees' Retirement System (FERS) are the two major programs providing age and service, disability, and survivor annuities for federal civilian employees. In general, employees hired after December 31, 1983, are covered under FERS and the social security program (OASDHI), and employees on staff prior to that date are members of CSRS and are covered under Medicare. CSRS employees were offered the option of transferring to FERS during 1987 and 1998. There are separate retirement systems for the uniformed services (supplementing OASDHI) and for certain special groups of federal employees. State and local government employees are covered for the most part by state and local retirement systems similar to the federal CSRS. In many jurisdictions these benefits supplement OASDHI coverage.

Workers' compensation—All states provide protection against work-connected injuries and deaths, although some states exclude certain workers (e.g., domestic workers). Federal laws cover federal employees, private employees in the District of Columbia, and longshoremen and harbor workers. In addition, the Department of Labor administers "black lung"

benefits programs for coal miners disabled by pneumoconiosis and for specified dependents and survivors. Specified occupational diseases are compensable to some extent. In most states, benefits are related to the worker's salary. The benefits may or may not be augmented by dependents' allowances or automatically adjusted to prevailing wage levels.

Income support—Income support programs are designed to provide benefits for persons with limited income and resources. The Supplemental Security Income (SSI) program and Temporary Assistance for Needy Families (TANF) program are the major programs providing monthly payments. In addition, a number of programs provide money payments or in-kind benefits for special needs or purposes. Several programs offer food and nutritional services. Also, various federal-state programs provide energy assistance, public housing, and subsidized housing to individuals and families with low incomes. General assistance may also be available at the state or local level.

The SSI program, administered by the Social Security Administration, provides income support to persons aged 65 or older and blind or disabled adults and children. Eligibility requirements and federal payment standards are nationally uniform. Most states supplement the basic SSI payment for all or selected categories of persons.

The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 contained provisions that replaced the Aid to Families With Dependent Children (AFDC), Job Opportunities and Basic Skills (JOBS), and Emergency Assistance programs with the Temporary Assistance for Needy Families block grant program. This law contains strong work requirements, comprehensive child support enforcement, support for families moving from welfare to work, and other features. The TANF became effective as soon as each state submitted a complete plan implementing TANF, but no later than July 1, 1997. The AFDC program provided cash assistance based on need, income, resources, and family size.

Federal food stamp program—Under the food stamp program, single persons and those living in households meeting nationwide standards for income and assets may receive coupons redeemable for food at most retail food stores or provides benefits through electronic benefit transfer. The monthly amount of benefits or allotments a unit receives is determined by household size and income. Households without income receive the determined monthly cost of a nutritionally adequate diet for their household size. This amount is updated to account for food price increases. Households with income receive the difference between the amount of a nutritionally adequate diet and 30 percent of their income, after certain allowable deductions.

To qualify for the program, a household must have less than \$2,000 in disposable assets (\$3,000 if one member is aged 60 or older), gross income below 130 percent of the official poverty guidelines for the household size, and net income below 100 percent of the poverty guidelines. Households with a person aged 60 or older or a disabled person receiving SSI, social security, state general assistance, or veterans' disability benefits may have gross income exceeding 130 percent of the poverty guidelines. All households in which all members receive TANF or SSI are categorically eligible for food stamps without meeting these income or resource criteria. Households are certified for varying lengths of time, depending on their income sources and individual circumstances.

Health and welfare services—

Programs providing health and welfare services are aided through federal grants to states for child welfare services, vocational rehabilitation, activities for the aged, maternal and child health services, maternity and infant care projects, comprehensive health services, and a variety of public health activities. For information about the medicaid program, see Section 3, Health and Nutrition.

Noncash benefits—The U.S. Census Bureau annually collects data on the characteristics of recipients of noncash (in-kind) benefits to supplement the collection of annual money income data in the Current Population Survey (see text, Section 1, Population, and Section 14, Prices). Noncash benefits are those benefits received in a form other than money which serve to enhance or improve the economic well-being of the recipient. As for money income, the data for noncash benefits are for the calendar year prior to the date of the interview. The major categories of noncash benefits covered are public transfers (e.g., food stamps, school lunch, public housing, and medicaid) and employer or union-provided benefits to employees.

Statistical reliability—For discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to HHS and Census Bureau data, see Appendix III.

No. 518. Government Transfer Payments to Individuals—Summary: 1970 to 2002

[In billions of dollars (69.5 represents \$69,500,000,000)]

| Year | Total | Retirement & disability insurance benefits | Medical payments | Income maintenance benefits | Unemployment insurance benefits | Veterans benefits | Federal education & training assistance payments ¹ | Other ² |

| Other payments to individuals ¹⁰ | 1,770 | 1,384 | 1,769 | 1,945 | 2,391 | 3,219 | 2,703 |

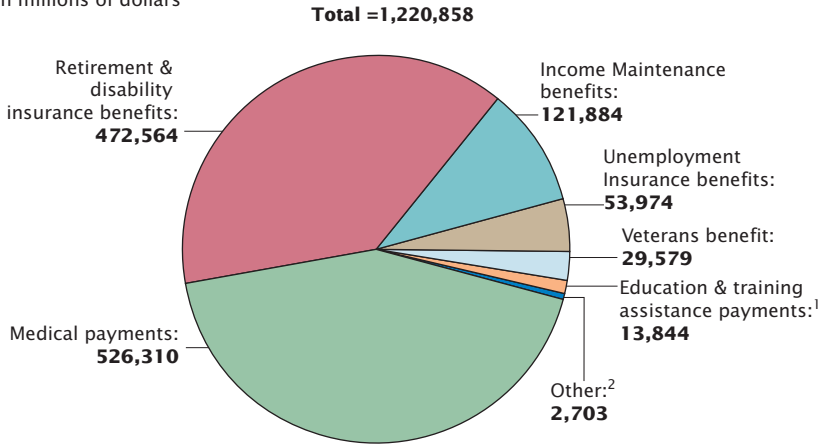

¹ Consists largely of temporary disability payments, pension benefit guaranty payments, and black lung payments.
² Consists of medicaid and other medical vendor payments. ³ Consists of payments made under the TriCare Management Program (formerly called CHAMPUS) for the medical care of dependents of active duty military personnel and of retired military personnel and their dependents at nonmilitary medical facilities. ⁴ Through 1995, consists of emergency assistance and aid to families with dependent children. Beginning with 1998, consists of benefits—generally known as temporary assistance for needy families—provided under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996. ⁵ Consists largely of general assistance, expenditures for food under the supplemental program for women, infants, and children; refugee assistance; foster home care and adoption assistance; earned income tax credits; and energy assistance. ⁶ Consists of trade readjustment allowance payments, Redwood Park benefit payments, public service employment benefit payments, and transitional benefit payments. ⁷ Consists largely of veterans' readjustment benefit payments, educational assistance to spouses and children of disabled or deceased veterans, payments to paraplegics, and payments for autos and conveyances for disabled veterans. ⁸ Consists largely of State and local government payments to veterans. ⁹ Excludes veterans. Consists largely of federal fellowship payments (National Science Foundation fellowships and traineeships, subsistence payments to state maritime academy cadets, and other federal fellowships), interest subsidy on higher education loans, basic educational opportunity grants, and Job Corps payments. ¹⁰ Consists largely of Bureau of Indian Affairs payments, education exchange payments, Alaska Permanent Fund dividend payments, compensation of survivors of public safety officers, compensation of victims of crime, disaster relief payments, compensation for Japanese internment, and other special payments to individuals.

- Represents or rounds to zero. ¹ The 2003 CPS asked respondents to choose one or more races. For example, "White Alone" refers to people who reported White and did not report any other race category. The use of this single-race population does not imply that it is the preferred method of presenting or analyzing data. Information on people who reported more than one race, such as "Asian and Black or African American," is available from Census 2000 through American Factfinder. ² Persons of Hispanic origin may be of any race. ³ TANF=Temporary assistance for needy families program; AFDC=Aid to Families with Dependent Children program. ⁴ Includes estates and trusts reported as survivor benefits.

No. 522. Households Receiving Means-Tested Noncash Benefits: 1980 to 2002

[In thousands (82,368 represents 82,368,000), except percent. Households as of March of following year. Covers civilian noninstitutional population, including persons in the Armed Forces living off post or with their families on post. A means-tested benefit program requires that the household's income and/or assets fall below specified guidelines in order to qualify for benefits. There are general trends toward underestimation of noncash beneficiaries. Households are classified according to poverty status of family or nonfamily householder; for explanation of poverty level, see text, Section 13. Data for 1980 and 1990 based on 1980 census population controls; 1995 and 2000, based on 1990 census population controls; 2002, based on 2000 census population controls and a 28,000 household sample expansion to 78,000 households. Based on Current Population Survey; see text, Section 1 and Appendix III]

| Type of benefit received | 2002 | | | | | | | |

Means-Tested Noncash Benefits Received by Households, by Selected Household Characteristics, Race and Hispanic Origin, and Poverty Status: 2002"; May 2004; <<http://ferret.bls.census.gov/macro/032002/noncash/toc.htm>> and *Current Population Reports*, P-60 reports.

No. 523. Government Expenditures for Income-Tested Benefits by Type of Benefit: 1980 to 2002

[In millions of dollars (106,036 represents \$106,036,000,000). For years ending September 30. Programs covered provide cash, goods, or services to persons who make no payment and render no service in return. In case of many programs, including family cash welfare, food and housing programs, job and training programs and some educational programs, some recipients must work or study. Most of the programs base eligibility on individual, household, or family income, but some use group or area income tests; and a few offer help on the basis of presumed need. Constant dollar figures are based on the Consumer Price Index for all Urban Consumers]

No. 532. Private Pension Plans—Summary by Type of Plan: 1990 to 1999

[712.3 represents 712,300. "Pension plan" is defined by the Employee Retirement Income Security Act (ERISA) as "any plan, fund, or program which was heretofore or is hereafter established or maintained by an employer or an employee organization, or by both, to the extent that such plan (a) provides retirement income to employees, or (b) results in a deferral of income by employees for periods extending to the termination of covered employment or beyond, regardless of the method of calculating the contributions made to the plan, the method of calculating the benefits under the plan, or the method of distributing benefits from the plan." A defined benefit plan provides a definite benefit formula for calculating benefit amounts - such as a flat amount per year of service or a percentage of salary times years of service. A defined contribution plan is a pension plan in which the contributions are made to an individual account for each employee. The retirement benefit is dependent upon the account balance at retirement. The balance depends upon amounts contributed, investment experience, and, in the case of profit sharing plans, amounts which may be allocated to the account due to forfeitures by terminating employees. Employee Stock Ownership Plans (ESOP) and 401(k) plans are included among defined contribution plans. Data are based on Form 5500 series reports filed with the Internal Revenue Service]

| Item | Unit | Total | | | | Defined contribution plan | | | | Defined benefit plan | | | |

¹ Excludes all plans covering only one participant. ² Includes double counting of workers in more than one plan. ³ Total participants include active participants, vested separated workers, and retirees. ⁴ Any workers currently in employment covered by a plan and who are earning or retaining credited service under a plan. Includes any nonvested former employees who have not yet incurred breaks in service. ⁵ Asset amounts shown exclude funds held by life insurance companies under allocated group insurance contracts for payment of retirement benefits. These excluded funds make up roughly 10 to 15 percent of total private fund assets. ⁶ Includes both employer and employee contributions. ⁷ Benefits paid directly from trust and premium payments made from plan to insurance carriers. Excludes benefits paid directly by insurance carriers.

No. 533. Percent Of Workers Participating In Retirement Benefits by Worker Characteristics: 2003

[Based on National Compensation Survey, a sample survey of 3,168 private industry establishments of all sizes, representing over 107 million workers; see Appendix III. Survey covers all 50 States and the District of Columbia. See also Table 630]

| Characteristic | Total ¹ | Defined benefit | Defined contribution | Characteristic | Total ¹ | Defined benefit | Defined contribution |
|------------------------------------|--------------------|-----------------|----------------------|------------------------|--------------------|-----------------|----------------------|
| | | | | | | | |
| Total | 49 | 20 | 40 | Full time ² | 58 | 24 | 48 |
| White-collar occupations | 59 | 22 | 51 | Part time ² | 18 | 8 | 14 |
| Blue-collar occupations | 50 | 24 | 38 | Union ³ | 83 | 72 | 39 |
| Service occupations | 21 | 7 | 16 | Nonunion ³ | 45 | 15 | 40 |

¹ Total is less than the sum of the individual retirement items because many employees participated in both types of plans. ² Employees are classified as working either a full-time or part-time schedule based on the definition used by each establishment. ³ Union workers are those whose wages are determined through collective bargaining.

No. 534. Defined Benefit Retirement Plans—Selected Features: 2000

[In percent, except as indicated (19,225 represents 19,225,000). Covers full-time employees in private industry. Based on National Compensation Survey, a sample survey of 1,436 private industry establishments of all sizes, representing over 107 million workers; see Appendix III. See also Table 630]

| Feature | All employees | Professional, technical, and related | Clerical and sales | Blue-collar and service |
|---|---------------|--------------------------------------|--------------------|-------------------------|
| Full-time employees with defined benefit plan (1,000) | 19,225 | 5,794 | 5,179 | 8,252 |
| Plan provisions: | | | | |
| Benefits based on earnings | 61 | 59 | 67 | 60 |
| Early retirement benefits available | 77 | 69 | 78 | 81 |
| Availability of lump sum benefits at retirement | 43 | 44 | 51 | 37 |
| Benefit formula: | | | | |
| Percent of terminal earnings | 48 | 47 | 48 | 50 |
| Percent of career earnings | 13 | 12 | 19 | 10 |
| Dollar amount formula | 14 | 9 | 9 | 21 |
| Percent of contribution formula | (Z) | - | - | 1 |
| Cash account ¹ | 23 | 31 | 23 | 18 |
| Other | 1 | 1 | 2 | 1 |
| Requirements for normal retirement ² | | | | |
| No age requirement | 11 | 15 | 10 | 8 |
| Less than 20 years of service | 5 | 11 | 3 | 1 |
| 30 years of service | 6 | 4 | 7 | 7 |
| At age 55 | 4 | 5 | 7 | 2 |
| At age 60 | 10 | 16 | 7 | 8 |
| At age 62 | 21 | 18 | 16 | 26 |
| At age 65 | 49 | 41 | 55 | 51 |
| Sum of age plus service ³ | 3 | 4 | 5 | 2 |

- Represents no employees in this category or data do not meet publication criteria. Z Less than 0.5 percent. ¹ Cash balance retirement plans are a defined benefit plan in which an account is maintained for each participant, with employer contributions based on employee earnings, plus interest, being credited to that account. Cash balance plans generally do not have provisions for many of the features found in traditional defined benefit plans. Due to the increase in the incidence of cash balance plans, the prevalence of some defined benefit plan provisions has declined from earlier surveys. ² Normal retirement is defined as the point at which the participant could retire and immediately receive all accrued benefits by virtue of service and earnings, without reduction due to age. If a plan had alternative age and service requirements, the earliest age and associated service were tabulated; if one alternative did not specify an age, it was the requirement tabulated. Some age and service requirements are not shown separately. ³ In some plans, participants must also satisfy a minimum age or service requirement.

| Under 65 years old | 33,808 | 28,942 | 2,999 | 2,726 | 43.7 | 44.6 | 40.4 | 24.9 |
| 15 to 24 years old | 1,630 | 1,363 | 190 | 224 | 13.2 | 13.2 | 15.0 | 10.1 |
| 25 to 44 years old | 17,251 | 14,593 | 1,589 | 1,643 | 45.6 | 46.7 | 41.3 | 25.2 |
| 45 to 64 years old | 14,926 | 12,986 | 1,220 | 859 | 55.0 | 55.6 | 52.9 | 38.3 |
| 65 years old and over | 794 | 694 | 46 | 32 | 24.9 | 24.4 | 24.2 | 17.6 |
| Female | 29,165 | 23,878 | 3,602 | 2,046 | 40.8 | 41.2 | 40.0 | 26.9 |
| Under 65 years old | 28,509 | 23,312 | 3,548 | 2,019 | 41.3 | 41.8 | 40.3 | 26.9 |
| 15 to 24 years old | 1,377 | 1,115 | 184 | 149 | 12.1 | 12.0 | 13.2 | 10.3 |
| 25 to 44 years old | 14,282 | 11,414 | 1,930 | 1,241 | 43.7 | 44.3 | 41.6 | 29.2 |
| 45 to 64 years old | 12,850 | 10,783 | 1,433 | 629 | 51.7 | 52.0 | 51.9 | 35.1 |
| 65 years old and over | 656 | 565 | 55 | 27 | 26.2 | 25.6 | 27.9 | 25.2 |

¹ Includes other races, not shown separately. ² The 2003 CPS asked respondents to choose one or more races. White alone refers to people who reported White and did not report any other race category. Black alone refers to people who reported Black and did not report any other race category. The use of this single-race population does not imply that it is the preferred method of presenting or analyzing data. The Census Bureau uses a variety of approaches. Information on people who reported more than one race, such as "White and American Indian and Alaska Native" or "Asian and Black or African American," is available from Census 2000 through American FactFinder. About 2.6 percent of people reported more than one race in Census 2001. ³ Hispanic persons may be of any race.

Source: U.S. Census Bureau, Table NC8. Pension Plan Coverage of Workers by Selected Characteristics, Gender, Race and Hispanic Origin, and Poverty Status: 2002"; published May 2004; <<http://ferret.bls.census.gov/macro/032003/noncash/toc.htm>>.

No. 536. U.S. Households Owning IRAs: 2001 to 2003

[In millions (43.0 represents 43,000,000). Incidence of IRA ownership is based on an annual tracking survey of 3,000 randomly selected, representative U.S. households conducted in July 2003]

| Type of IRA | Number (mil.) | | | Percent of U.S. households | | |
|---|-------------------|-------------------|-------------------|----------------------------|-------------------|-------------------|
| | 2001 ¹ | 2002 ² | 2003 ³ | 2001 ¹ | 2002 ² | 2003 ³ |
| Any type of IRA ⁴ | 43.0 | 43.2 | 45.2 | 39.7 | 39.5 | 41.4 |
| Traditional IRA | 35.1 | 35.7 | 36.4 | 32.4 | 32.7 | 33.3 |
| Roth IRA | 12.2 | 13.2 | 16.0 | 11.3 | 12.1 | 14.6 |
| SIMPLE IRA, SEP-IRA, or SAR-SEP IRA | 8.3 | 8.5 | 8.2 | 7.7 | 7.8 | 7.5 |

¹ The number of U.S. households owning IRAs in 2001 is based on the U.S. Census Bureau's revised estimate of 108.2 million total U.S. households in 2001. ² The number of U.S. households owning IRAs in 2002 is based on the U.S. Census Bureau's revised estimate of 109.3 million total U.S. households in 2002. ³ The number of U.S. households owning IRAs in 2003 is based on the U.S. Census Bureau's most recent estimate of 109.3 million total U.S. households. ⁴ Excludes ownership of Coverdell Education Savings Accounts, which were referred to as Education IRAs before July 2001.

No. 537. 401(k) Plans—Selected Features: 2000

[In percent, except as indicated (30,178 represents 30,178,000). Covers full-time employees in private industry. Based on National Compensation Survey, a sample survey of private industry establishments of all sizes, representing millions of workers; see Appendix III. See also Table 630]

| Feature | Professional, technical, and related | | | |
|---|--------------------------------------|--------------------|-------------------------|--------|
| | All employees | Clerical and sales | Blue-collar and service | |
| Full-time employees with 401(k) plan (1,000) | 30,178 | 9,969 | 9,061 | 11,147 |
| Transfers/rollovers allowed ¹ | 70 | 73 | 68 | 69 |
| MAXIMUM PRETAX EMPLOYEE CONTRIBUTIONS ² | | | | |
| Percent of employee earnings | 84 | 85 | 83 | 85 |
| Specified dollar amount | 1 | 1 | 1 | 1 |
| Up to the Internal Revenue Code limit | 15 | 14 | 16 | 14 |
| Average maximum pretax contribution as percent of earnings ³ | 15.3 | 15.0 | 15.1 | 15.7 |
| INVESTMENT CHOICES | | | | |
| Employee permitted to choose investments for employee contributions | 88 | 89 | 88 | 89 |
| Employee permitted to choose investments for employer contributions | 64 | 65 | 62 | 63 |

¹ Participants are allowed to transfer/rollover contributions and earnings from a previous employer's plan. ² Includes contributions that are not matched by the employer. If maximum contributions vary, such as by length of service, the highest possible contribution was tabulated. ³ The average is presented for all covered workers; averages exclude workers without the plan provision.

No. 540. Persons With Work Disability by Selected Characteristics: 2003

[In thousands, except percent (18,058 represents 18,058,000). As of March. Covers civilian noninstitutional population and members of Armed Forces living off post or with their families on post. Persons are classified as having a work disability if they: (1) have a health problem or disability which prevents them from working or which limits the kind or amount of work they can do; (2) have a service-connected disability or ever retired or left a job for health reasons; (3) did not work in survey reference week or previous year because of long-term illness or disability; or (4) are under age 65, and are covered by medicare or receive supplemental security income. Based on Current Population Survey; see text, Section 1, and Appendix III]

| Age and participation status in assistance programs | Total ¹ | Male | Female | White ² | Black ² | Hispanic ³ |
|---|--------------------|--------------|--------------|--------------------|--------------------|-----------------------|
| Persons with work disability | 18,058 | 8,751 | 9,308 | 13,541 | 3,515 | 1,998 |
| 16 to 24 years old | 1,395 | 724 | 671 | 962 | 344 | 185 |
| 25 to 34 years old | 2,173 | 992 | 1,181 | 1,516 | 515 | 334 |
| 35 to 44 years old | 3,708 | 1,791 | 1,917 | 2,752 | 736 | 408 |
| 45 to 54 years old | 5,010 | 2,480 | 2,530 | 3,739 | 1,007 | 515 |
| 55 to 64 years old | 5,772 | 2,764 | 3,009 | 4,572 | 913 | 557 |
| Percent work disabled of total population | | | | | | |
| 16 to 24 years old | 3.9 | 4.0 | 3.8 | 3.4 | 6.7 | 3.1 |
| 25 to 34 years old | 5.6 | 5.1 | 6.0 | 4.9 | 10.4 | 4.5 |

| 45 to 54 years old | 12.5 | 12.7 | 12.3 | 11.3 | 22.0 | 14.1 |
| 55 to 64 years old | 21.1 | 21.0 | 21.1 | 19.6 | 34.8 | 26.5 |
| Percent of work disabled— | | | | | | |
| Receiving social security income | 33.4 | 33.6 | 33.2 | 34.7 | 30.3 | 27.2 |
| Receiving food stamps | 17.1 | 13.0 | 21.0 | 14.5 | 26.1 | 21.8 |
| Covered by medicaid | 65.7 | 69.0 | 62.5 | 69.1 | 53.5 | 56.6 |
| Residing in public housing | 6.9 | 5.0 | 8.7 | 4.9 | 14.6 | 8.9 |
| Residing in subsidized housing | 3.9 | 3.3 | 4.5 | 3.1 | 6.6 | 4.5 |

¹ Includes other races not shown separately. ² The 2003 Current Population Survey asked respondents to choose one or more races. White alone refers to people who reported White and did not report any other race category. The use of this single-race population does not imply that it is the preferred method of presenting or analyzing data. The Census Bureau uses a variety of approaches. Information on people who reported more than one race, such as "White and American Indian and Alaska Native" or "Asian and Black or African American," is available from Census 2001 through American FactFinder. About 2.6 percent of people reported more than one race in 2000. ³ Hispanic persons may be of any race.

¹ Data for year 1980 not comparable with later years. ² Premium and benefit amounts include estimated payments under insurance policy deductible provisions. Deductible benefits are allocated to private carriers and state funds. ³ Years 1980-1996 includes federal employer compensation program and that portion of federal black lung benefits program financed from employer contributions. Years 1997-2001 includes federal employer compensation program only due to changes in reporting methods. ⁴ Net cash and medical benefits paid by competitive and exclusive state funds and by federal workers' compensation programs. ⁵ Cash and medical benefits paid by self-insurers, plus value of medical benefits paid by employers carrying workers' compensation policies that exclude standard medical coverage. ⁶ Premiums written by private carriers and state funds, and benefits paid by self-insurers increased by 5-10 percent from 1980 to 1990 and by 11 percent for 1994-2000 for administrative costs. Also includes benefits paid and administrative costs of federal system for government employees. ⁷ Excludes programs financed from general revenue—black lung benefits and supplemental pensions in some states.

No. 545. Temporary Assistance for Needy Families (TANF)—Families and Recipients: 1980 to 2003

[In thousands (3,712 represents 3,712,000). Average monthly families and recipients for calendar year. Prior to TANF, the cash assistance program to families was called Aid to Families with Dependent Children (1980-1996). Under the new welfare law (Personal Responsibility and Work Opportunity Reconciliation Act of 1996), the program became TANF. See text, this section. Includes Puerto Rico, Guam, and Virgin Islands]

| Year | Families | Recipients | Year | Families | Recipients | Year | Families | Recipients |
|------|----------|------------|------|----------|------------|------|----------|------------|
| 1980 | 3,712 | 10,774 | 1988 | 3,749 | 10,915 | 1996 | 4,434 | 12,321 |
| 1981 | 3,835 | 11,079 | 1989 | 3,799 | 10,993 | 1997 | 3,740 | 10,376 |
| 1982 | 3,542 | 10,258 | 1990 | 4,057 | 11,695 | 1998 | 3,050 | 8,347 |
| 1983 | 3,686 | 10,761 | 1991 | 4,467 | 12,930 | 1999 | 2,554 | 6,824 |
| 1984 | 3,714 | 10,831 | 1992 | 4,829 | 13,773 | 2000 | 2,215 | 5,778 |
| 1985 | 3,701 | 10,855 | 1993 | 5,012 | 14,205 | 2001 | 2,104 | 5,359 |
| 1986 | 3,763 | 11,038 | 1994 | 5,033 | 14,161 | 2002 | 2,048 | 5,069 |
| 1987 | 3,776 | 11,027 | 1995 | 4,791 | 13,418 | 2003 | 2,025 | 4,932 |
