- Represents or rounds to zero. <sup>1</sup> Beginning with the 2003 CPS respondents could choose one or more races. For example, "White" refers to people who reported White and did not report any other race category. The use of this single-race population does not imply that it is the preferred method of presenting or analyzing data. Information on people who reported more than one race, such as "Asian and Black or African American," is available from Census 2000 through American FactFinder. <sup>2</sup> "Black" refers to people who reported Black and did not report any other race category. <sup>3</sup> Persons of Hispanic origin may be any race. <sup>4</sup> TANF—Temporary Assistance for Needy Families program; AFDC—Aid to Families with Dependent Children program. <sup>5</sup> Includes estates and trusts reported as survivor benefits.

**Table 529. Households Receiving Means-Tested Noncash Benefits: 1980 to 2002**

[In thousands (82,368 represents 82,368,000), except percent. Households as of March of following year. Covers civilian noninstitutional population, including persons in the Armed Forces living off post or with their families on post. A means-tested benefit program requires that the household's income and/or assets fall below specified guidelines in order to qualify for benefits. There are general trends toward underestimation of noncash beneficiaries. Households are classified according to poverty status of family or nonfamily household; for explanation of poverty level, see text, Section 13. Data for 1980 and 1990 based on 1980 census population controls; 1995 and 2000 based on 1990 census population controls; beginning 2002, based on Census 2000 population controls and a 28,000 household sample expansion to 78,000 households. Based on Current Population Survey; see text, Section 1 and Appendix III]

| Type of benefit received                                |               |               |               |                | 2002           |                     |                  |                     |

**Table 538. Private Pension Plans—Summary by Type of Plan: 1990 to 2001**

[712.3 represents 712,300. "Pension plan" is defined by the Employee Retirement Income Security Act (ERISA) as "any plan, fund, or program which was heretofore or is hereafter established or maintained by an employer or an employee organization, or by both, to the extent that such plan (a) provides retirement income to employees, or (b) results in a deferral of income by employees for periods extending to the termination of covered employment or beyond, regardless of the method of calculating the contributions made to the plan, the method of calculating the benefits under the plan, or the method of distributing benefits from the plan." A defined benefit plan provides a definite benefit formula for calculating benefit amounts—such as a flat amount per year of service or a percentage of salary times years of service. A defined contribution plan is a pension plan in which the contributions are made to an individual account for each employee. The retirement benefit is dependent upon the account balance at retirement. The balance depends upon amounts contributed, investment experience, and, in the case of profit sharing plans, amounts which may be allocated to the account due to forfeitures by terminating employees. Employee Stock Ownership Plans (ESOP) and 401(k) plans are included among defined contribution plans. Data are based on Form 5500 series reports filed with the Department of Labor]

| Item   | Unit          | Total |       |       |       | Defined contribution plan |       |       |       | Defined benefit plan |       |       |       |

<sup>1</sup> Excludes all plans covering only one participant. <sup>2</sup> Includes double counting of workers in more than one plan. <sup>3</sup> Total participants include active participants, vested separated workers, and retirees. <sup>4</sup> Any workers currently in employment covered by a plan and who are earning or retaining credited service under a plan. Includes any nonvested former employees who have not yet incurred breaks in service. <sup>5</sup> Asset amounts shown exclude funds held by life insurance companies under allocated group insurance contracts for payment of retirement benefits. These excluded funds make up roughly 10 to 15 percent of total private fund assets. <sup>6</sup> Includes both employer and employee contributions. <sup>7</sup> Benefits paid directly from trust and premium payments made from plan to insurance carriers. Excludes benefits paid directly by insurance carriers.

| At age 65 . . . . .                                       | 73          | 76           | 68          | 71      | 75              | 71                | 61      | 77              | 59    | 80        |
| Sum of age plus service <sup>2</sup> . . . . .            | 5           | 4            | 8           | (S)     | 9               | 4                 | (S)     | 7               | 8     | 4         |

S Represents no employees in this category or data do not meet publication criteria. Z Less than 0.5 percent. <sup>1</sup> Normal retirement is defined as the point at which the participant could retire and immediately receive all accrued benefits by virtue of service and earnings, without reduction due to age. If a plan had alternative age and service requirements, the earliest age and associated service were tabulated; if one alternative did not specify an age, it was the requirement tabulated. Some age and service requirements are not shown separately. <sup>2</sup> In some plans, participants must also satisfy a minimum age or service requirement.

<sup>1</sup> Includes other races, not shown separately. <sup>2</sup> Beginning with the 2003 CPS, respondents could choose one or more races. For example, White refers to people who reported White and did not report any other race category; Black refers to people who reported Black and did not report any other race category. The use of this single-race population does not imply that it is the preferred method of presenting or analyzing data. The Census Bureau uses a variety of approaches. Information on people who reported more than one race, such as "White and American Indian and Alaska Native" or "Asian and Black or African American," is available from Census 2000 through American FactFinder<sup>®</sup>. About 2.6 percent of people reported more than one race in Census 2000. <sup>3</sup> Hispanic persons may be of any race.

**Table 542. U.S. Households Owning IRAs: 2002 to 2005**

[43.2 represents 43,200,000. Incidence of IRA ownership is based on an annual tracking survey of 3,000 randomly selected, representative U.S. households; see source for details]

| Type of IRA                         | Number (mil.) <sup>1</sup> |      |      |      | Percent of U.S. households |      |      |      |
|-------------------------------------|----------------------------|------|------|------|----------------------------|------|------|------|
|                                     | 2002                       | 2003 | 2004 | 2005 | 2002                       | 2003 | 2004 | 2005 |
| Any type of IRA <sup>2</sup>        | 43.2                       | 46.1 | 45.2 | 46.8 | 39.5                       | 41.4 | 40.4 | 41.4 |
| Traditional IRA                     | 35.7                       | 37.1 | 36.7 | 37.6 | 32.7                       | 33.3 | 32.8 | 33.2 |
| Roth IRA                            | 13.2                       | 16.2 | 14.3 | 16.1 | 12.1                       | 14.6 | 12.8 | 14.2 |
| SIMPLE IRA, SEP-IRA, or SAR-SEP IRA | 8.5                        | 8.3  | 9.6  | 8.8  | 7.8                        | 7.5  | 8.6  | 7.8  |

<sup>1</sup> The number of U.S. households owning IRAs in 2002 through 2005 is based on the following U.S. Census Bureau's total U.S. household estimates: 109.3 million in 2002, 111.3 million in 2003, 112.0 million in 2004, and 116.5 million in 2005 (U.S. Bureau of the Census, Current Population Reports, P60-226, August 2004). <sup>2</sup> Excludes ownership of Coverdell Education Savings Accounts, which were referred to as Education IRAs before July 2001.

**Table 543. 401(k) Plans—Selected Features: 2003**

[In percent. Covers full-time employees in private industry. Based on National Compensation Survey, a sample survey of private industry establishments of all sizes, representing millions of workers; see Appendix III. See also Table 637]

| Feature  | All employees | White Collar | Blue Collar | Service |
|--|---------------|--------------|-------------|---------|
| <b>MAXIMUM PRETAX EMPLOYEE CONTRIBUTIONS<sup>1</sup></b> |               |              |             |         |
| Percent of employee earnings                             | 59            | 57           | 63          | 66      |
| Specified dollar amount                                  | 1             | 1            | 1           | (Z)     |
| Up to the Internal Revenue code limit                    | 39            | 41           | 37          | 31      |
| Average maximum pretax contribution <sup>2</sup>         | 17.2          | 17.2         | 17.4        | 16.9    |
| <b>INVESTMENT CHOICES</b>                                |               |              |             |         |
| Employee permitted to choose investments                 | 86            | 88           | 81          | 80      |
| Employee not permitted to choose investments             | 2             | 2            | 2           | 4       |

Z Less than 0.5 percent. <sup>1</sup> Includes contributions that are not matched by the employer. If maximum contributions vary, such as by length of service, the highest possible contribution was tabulated. <sup>2</sup> The average is presented for all covered workers; averages exclude workers without the plan provision.

**Table 546. Persons With Work Disability by Selected Characteristics: 2004**

[In thousands, except percent (19,016 represents 19,016,000). As of March. Covers civilian noninstitutional population and members of Armed Forces living off post or with their families on post. Persons are classified as having a work disability if they: (1) have a health problem or disability which prevents them from working or which limits the kind or amount of work they can do; (2) have a service-connected disability or ever retired or left a job for health reasons; (3) did not work in survey reference week or previous year because of long-term illness or disability; or (4) are under age 65 and are covered by medicare or receive supplemental security income. Based on Current Population Survey; see text, Section 1, Population, and Appendix III]

<sup>1</sup> Includes other races not shown separately. <sup>2</sup> The 2003 Current Population Survey asked respondents to choose one or more races. White alone refers to people who reported White and did not report any other race category. The use of this single-race population does not imply that it is the preferred method of presenting or analyzing data. The Census Bureau uses a variety of approaches. Information on people who reported more than one race, such as "White and American Indian and Alaska Native" or "Asian and Black or African American," is available from Census 2001 through American FactFinder<sup>®</sup>. About 2.6 percent of people reported more than one race in 2000. <sup>3</sup> Black alone refers to people who reported Black and did not report any other race category. <sup>4</sup> Hispanic persons may be of any race.

| Workers' compensation costs <sup>5, 6</sup> | 2.18        | 1.82        | 1.66        | 1.49        | 1.38        | 1.33        | 1.32        | 1.42        | 1.59        | 1.72        |
| Benefits <sup>6</sup> compensation costs    | 1.57        | 1.38        | 1.26        | 1.18        | 1.11        | 1.10        | 1.04        | 1.07        | 1.15        | 1.16        |

<sup>1</sup> Premium and benefit amounts include estimated payments under insurance policy deductible provisions. Deductible benefits are allocated to private carriers and state funds. <sup>2</sup> Years 1990–1996 include federal employer compensation program and that portion of federal black lung benefits program financed from employer contributions. Years 1997–2002 include federal employer compensation program only due to changes in reporting methods. <sup>3</sup> Net cash and medical benefits paid by competitive and exclusive state funds and by federal workers' compensation programs. <sup>4</sup> Cash and medical benefits paid by self-insurers, plus value of medical benefits paid by employers carrying workers' compensation policies that exclude standard medical coverage. <sup>5</sup> Premiums written by private carriers and state funds, and benefits paid by self-insurers increased by 5–10 prior to 1992 and by 11 percent for 1992–2002 for administrative costs. Also includes benefits paid and administrative costs of federal system for government employees. <sup>6</sup> Excludes programs financed from general revenue—black lung benefits and supplemental pensions in some states.

**Table 551. Temporary Assistance for Needy Families (TANF)—Families and Recipients: 1980 to 2005**

[In thousands (3,712 represents 3,712,000). Average monthly families and recipients for calendar year. Prior to TANF, the cash assistance program to families was called Aid to Families with Dependent Children (1980–1996). Under the new welfare law (Personal Responsibility and Work Opportunity Reconciliation Act of 1996), the program became TANF. See text, this section. Includes Puerto Rico, Guam, and Virgin Islands]

| Year | Families | Recipients | Year | Families | Recipients | Year | Families | Recipients |

**Table 554. Child Support—Award and Reciprocity Status of Custodial Parent: 2001**

[In thousands except as noted (13,383 represents 13,383,000). Custodial parents 15 years and older with own children under 21 years of age present from absent parents as of spring 2002. Covers civilian noninstitutional population. Based on Current Population Survey; see text, section 1 and Appendix III. For definition of mean, see Guide to Tabular Presentation]

| Award and reciprocity status                    | All custodial parents |                      |               |              | Custodial parents below the poverty level |                      |              |            |

**Table 555. Child Support Enforcement Program—Caseload and Collections: 1990 to 2005**

[For years ending Sept. 30 (12,796 represents 12,796,000). Includes Puerto Rico, Guam, and the Virgin Islands. The child support enforcement program locates absent parents, establishes paternity of children born out of wedlock, and establishes and enforces support orders. By law, these services are available to all families that need them. The program is operated at the state and local government level, but 66 percent of administrative costs are paid by the federal government. Child support collected for families not receiving Temporary Assistance for Needy Families (TANF) goes to the family to help it remain self-sufficient. Most of the child support collected on behalf of TANF families goes to federal and state governments to offset TANF payments. Some states pass-through a portion of the CS collections to help families become self-sufficient. Based on data reported by state agencies. Minus sign (–) indicates net outlay]

<sup>1</sup> Passage of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA) mandated new categories in 1999 and cases were no longer double counted resulting in a 2 million case reduction. <sup>2</sup> Does not include in-hospital paternalities. <sup>3</sup> Includes modifications to orders. <sup>4</sup> Collections for current assistance cases where the children are: (1) recipients of TANF under title IV-A of the Social Security Act or (2) entitled to Foster Care (FC) maintenance under title IV-E of the Social Security Act plus collections distributed as assistance reimbursements. Includes medical support and payments to families of current assistance not shown separately. Assistance reimbursements are collections that will be divided between the state and federal governments to reimburse their respective shares of either Title IV-A assistance payments or Title IV-E Foster Care maintenance payments. <sup>5</sup> Prior to fiscal year 2002, incentives were paid out of the federal share of collections and the net federal share was reported.

**Table 556. Federal Food Programs: 1990 to 2005**

[20.0 represents 20,000,000, except as noted. For years ending September 30. Program data include Puerto Rico, Virgin Islands, Guam, American Samoa, Northern Marianas, and the former Trust Territory when a federal food program was operated in these areas. Participation data are average monthly figures except as noted. Participants are not reported for the commodity distribution programs. Cost data are direct federal benefits to recipients; they exclude federal administrative payments and applicable state and local contributions. Federal costs for commodities and cash-in-lieu of commodities are shown separately from direct cash benefits for those programs receiving both]

<sup>1</sup> Average monthly participation (excluding summer months of June through August). Includes children in public and private elementary and secondary schools and in residential child care institutes. <sup>2</sup> WIC serves pregnant and postpartum women, infants, and children up to age five. <sup>3</sup> CACFP provides year-round subsidies to feed preschool children in child care centers and family day care homes. Certain care centers serving disabled or elderly adults also receive meal subsidies. <sup>4</sup> Average quarterly daily attendance at participating institutions. <sup>5</sup> Includes the federal cost of commodity entitlements, cash-in-lieu of commodities, and bonus foods. <sup>6</sup> Provides free commodities to needy persons for home consumption through food banks, hunger centers, soup kitchens, and similar nonprofit agencies. Includes the Emergency Food Assistance Program, the commodity purchases for soup kitchens/food banks program (FY 1989-96), and commodity disaster relief.

<sup>1</sup> Persons 60 years old and over. <sup>2</sup> Beginning 1995, disabled households are defined as households with at least one member under age 65 who received SSI, or at least one member age 18 to 61 who received social security, veterans benefits, or other government benefits as a result of a disability. For 1990, disabled households are defined as households with SSI but no members over age 59. The substantial increase in the percentage of households with a disabled member between 1994 and 1995 is due in part to the change in the definition of disabled households. Using the previous definition, 13.3 percent of households included a disabled person in fiscal year 1995.

**Table 565. Licensed Child Care Centers and Family Child Care Providers by State and Other Areas: 2005**

[Centers as of February; family child care providers as of August. Licensed programs are required to have permission from the state to operate and must meet specified family child care or center standards. Some states may call their regulatory processes certification or registration. Family child care providers are programs that operate in the licensee's residence with at least one provider]

**Table 567. Private Philanthropy Funds by Source and Allocation: 1990 to 2004**

[In billions of dollars (101.4 represents \$101,400,000,000). Estimates for sources of funds based on U.S. Internal Revenue Service reports of individual charitable deductions and household surveys of giving by Independent Sector and the Center on Philanthropy at Indiana University. For corporate giving, data are corporate charitable deductions from the U.S. Internal Revenue Service and the contributions made by corporate foundations as reported by the Foundation Center. Data about foundation donations are based upon surveys of foundations and data provided by the Foundation Center. Estimates of the allocation of funds were derived from surveys of nonprofits conducted by various sources]

**Table 568. Foundations—Number and Finances: 1990 to 2004**

[142.5 represents \$142,500,000,000. Covers nongovernmental nonprofit organizations with funds and programs managed by their own trustees or directors, whose goals were to maintain or aid social, educational, religious, or other activities deemed to serve the common good. Excludes organizations that make general appeals to the public for funds, act as trade associations for industrial or other special groups, or do not currently award grants. Constant dollar figures based on Consumer Price Index, all urban consumers, supplied by U.S. Bureau of Labor Statistics. Minus sign (-) indicates decrease]

## Labor Force, Employment, and Earnings

---

This section presents statistics on the labor force; its distribution by occupation and industry affiliation; and the supply of, demand for, and conditions of labor. The chief source of these data is the Current Population Survey (CPS) conducted by the U.S. Census Bureau for the Bureau of Labor Statistics (BLS). Comprehensive historical and current data are available from the BLS Internet site <<http://www.bls.gov/cps/>>. These data are published on a current basis in the BLS monthly publication *Employment and Earnings*. Detailed data on the labor force are also available from the Census Bureau's decennial census of population.

**Types of data**—Most statistics in this section are obtained by two methods: household interviews or questionnaires and reports of establishment payroll records. Each method provides data that the other cannot suitably supply. Population characteristics, for example, are readily obtainable only from the household survey, while detailed industrial classifications can be readily derived only from establishment records.

Household data are obtained from a monthly sample survey of the population. The CPS is used to gather data for the calendar week including the 12th of the month and provides current comprehensive data on the labor force (see text, Section 1, Population). The CPS provides information on the work status of the population without duplication since each person is classified as employed, unemployed, or not in the labor force. Employed persons holding more than one job are counted only once, according to the job at which they worked the most hours during the survey week.

Monthly, quarterly, and annual data from the CPS are published by the Bureau of Labor Statistics in *Employment and Earnings*. Data presented include national totals of the number of persons in the civilian labor force by sex, race, Hispanic

or Latino origin, and age; the number employed; hours of work; industry and occupational groups; and the number unemployed, reasons for, and duration of unemployment. Annual data shown in this section are averages of monthly figures for each calendar year, unless otherwise specified. Historical national CPS data are available on the Web site <<http://www.bls.gov/cps/>>.

The CPS also produces annual estimates of employment and unemployment for each state, 50 large metropolitan statistical areas, and selected cities. These estimates are published by BLS in its annual *Geographic Profile of Employment and Unemployment* available at <<http://www.bls.gov/opub/gp/laugp.htm>>. More detailed geographic data (e.g., for counties and cities) are provided by the decennial population censuses.

Data based on establishment records are compiled by BLS and cooperating state agencies as part of an ongoing Current Employment Statistics program. Survey data, gathered monthly from a sample of employers through electronic interviewing (including electronic data interchange, touchtone data entry, and computer-assisted telephone interviewing) or by mail, fax, on magnetic tape or computer diskette, are supplemented by data from other government agencies and adjusted at intervals to data from government social insurance program reports. The estimates exclude self-employed persons, private household workers, unpaid family workers, agricultural workers, and the Armed Forces. In March 2005, reporting establishments employed 4.3 million manufacturing workers (30 percent of the total manufacturing employment at the time), 21.0 million workers in private non-manufacturing industries (22 percent of the total in private nonmanufacturing), and 15.6 million federal, state, and local government employees (70 percent of total government).

The establishment survey counts workers each time they appear on a payroll during the reference period (the payroll period that includes the 12th of the month). Thus, unlike the CPS, a person with two jobs is counted twice. The establishment survey is designed to provide detailed industry information for the nation, states, and metropolitan areas on non-farm wage and salary employment, average weekly hours, and average hourly and weekly earnings. Establishment survey data also are published in *Employment and Earnings*. Historical national data are available on the Web site <<http://www.bls.gov/ces/>>. Historical data for states and metropolitan areas are available on the Web site <<http://www.bls.gov/sae/>>.

In June 2003, BLS completed a comprehensive sample redesign of the establishment survey begun in June 2000, changing from a quota-based sample to a probability-based sample. Also in June 2003, all establishment survey employment, hours, and earnings series were converted from being classified by the 1987 Standard Industrial Classification (SIC) system to being classified by the 2002 North American Industry Classification System (NAICS). The NAICS conversion resulted in major definitional changes to many of the previously published SIC-based series. All establishment survey historical time series were reconstructed as part of the NAICS conversion process and all published series have a NAICS-based history extending back to at least 1990. For total nonfarm industries and other high-level aggregates, NAICS history was reconstructed back to the previously existing start date for the series, 1939 in most cases. More information on the sample redesign, the conversion to NAICS, and other changes to the establishment survey implemented in June 2003 appears in "Revisions to the Current Employment Statistics National Estimates Effective May 2003" in the June 2003 issue of *Employment and Earnings*, as well as the Establishment Data portion of the Explanatory Notes and Estimates of Error section of *Employment and Earnings*.

The completion of the sample redesign and the conversion to NAICS for state and metropolitan area establishment survey

data was implemented in March 2003 with the release of January 2003 estimates. For a discussion of the changes to the state and area establishment survey data, see "Revisions to the Current Employment Statistics State and Area Estimates Effective January 2003" in the March 2003 issue of *Employment and Earnings*.

**Labor force**—According to the CPS definitions, the civilian labor force comprises all civilians in the noninstitutionalized population 16 years and over classified as "employed" or "unemployed" according to the following criteria: Employed civilians comprise (a) all civilians, who, during the reference week, did any work for pay or profit (minimum of an hour's work) or worked 15 hours or more as unpaid workers in a family enterprise and (b) all civilians who were not working but who had jobs or businesses from which they were temporarily absent for noneconomic reasons (illness, weather conditions, vacation, labor-management dispute, etc.) whether they were paid for the time off or were seeking other jobs. Unemployed persons comprise all civilians who had no employment during the reference week, who made specific efforts to find a job within the previous 4 weeks (such as applying directly to an employer or to a public employment service or checking with friends) and who were available for work during that week, except for temporary illness. Persons on layoff from a job and expecting recall also are classified as unemployed. All other civilian persons, 16 years old and over, are classified as "not in the labor force."

Various breaks in the CPS data series have occurred over time due to the introduction of population adjustments and other changes. For details on these breaks in series and the effect that they had on the CPS data, see the section on noncomparability of labor force levels in the Household Data portion of the Explanatory Notes and Estimates of Error section of *Employment and Earnings* available on the site <[http://www.bls.gov/cps/eetech\\_methods.pdf](http://www.bls.gov/cps/eetech_methods.pdf)>.

Beginning in January 2005, the CPS data reflect the introduction of revised population controls. The effect of the revised

population controls on the monthly CPS estimates was to decrease the December 2004 employment level by 45,000 and the civilian noninstitutional population by 49,000. The updated controls had little or no effect on unemployment rates and other ratios. For additional information on the effects of the revised population controls on estimates from the CPS, see "Adjustments to Household Survey Population Estimates in January 2005" in the February 2005 issue of *Employment and Earnings*, available on the Internet at <<http://www.bls.gov/cps/cps05adj.pdf>>.

**Hours and earnings**—Average hourly earnings, based on establishment data, are gross earnings (i.e., earnings before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those for which pay was received. Wages and salaries from the CPS consist of total monies received for work performed by an employee during the income year. It includes wages, salaries, commissions, tips, piece-rate payments, and cash bonuses earned before deductions were made for taxes, bonds, union dues, etc. Persons who worked 35 hours or more are classified as working full-time.

**Industry and occupational groups**—Industry data derived from the CPS for 1983–91 utilize the 1980 census industrial classification developed from the 1972 SIC. CPS data from 1971 to 1982 were based on the 1970 census classification system, which was developed from the 1967 SIC. Most of the industry categories were not affected by the change in classification.

The occupational classification system used in the 1980 census and in the CPS for 1983–91, evolved from the 1980 Standard Occupational Classification (SOC) system, first introduced in 1977. Occupational categories used in the 1980 census classification system are so radically different from the 1970 census system used in the CPS through 1982, that their implementation represented a break in historical data series. In cases where data have not yet been converted to the 1980 classifications and still reflect the 1970 classifications (e.g., Table 634), comparisons between the two systems should not be made.

Beginning in January 1992, the occupational and industrial classification systems used in the 1990 census were introduced into the CPS. (These systems were largely based on the 1980 Standard Occupational Classification and the 1987 Standard Industrial Classification Systems, respectively.)

Beginning in 2003, the 2002 Census Bureau occupational and industrial classification systems were introduced into the CPS. These systems were derived from the 2000 Standard Occupational Classification (SOC) and the 2002 North American Industry Classification System (NAICS). The composition of detailed occupational and industrial classifications in the new classification systems was substantially changed from the previous systems in use, as was the structure for aggregating them into broad groups. Consequently, the use of the new classification systems created breaks in existing data series at all levels of aggregation. CPS data using the new classification systems are available beginning 2000. Additional information on the 2002 Census Bureau occupational and industrial classifications systems appears in "Revisions to the Current Population Survey Effective in January 2003" in the February 2003 issue of *Employment and Earnings*, available on the BLS Web site <<http://www.bls.gov/cps/rvcp03.pdf>>.

For details on the changes over time in the industrial and occupational classification systems used in the CPS, see the section on changes in the occupational and industrial classification systems in the Household Data portion of the Explanatory Notes and Estimates of Error section of *Employment and Earnings* available on the site <[http://www.bls.gov/cps/eetech\\_methods.pdf](http://www.bls.gov/cps/eetech_methods.pdf)>.

Establishments responding to the establishment survey are classified according to the 2002 North American Industrial Classification System (NAICS). Previously they were classified according to the Standard Industrial Classification Manual (SIC). See text, Section 15, Business Enterprise, for information about the SIC manual and NAICS.

**Productivity**—BLS publishes data on productivity as measured by output per hour (labor productivity), output per combined unit of labor and capital input (multifactor productivity), and, for manufacturing industries, output per combined unit of capital, labor, energy, materials, and purchased service inputs. Labor productivity and related indexes are published for the business sector as a whole and its major subsectors: nonfarm business, manufacturing, and nonfinancial corporations, and for over 200 detailed industries. Labor productivity data have been converted to a NAICS classification from the SIC classification. Data for the business and non-farm business sectors were reconstructed back to 1947; data for nonfinancial corporations back to 1958, and data for the detailed industry measures and the manufacturing sectors were reconstructed back to 1987. Multifactor productivity and related measures for the private business sector and its major subsectors are also available on a NAICS basis. Productivity indexes that take into account capital, labor, energy, materials, and service inputs are published for the 20 major industry groups that comprise the manufacturing sector, the utility services industry group, for 140 3-digit SIC manufacturing industries, and railroad transportation and air transportation. The major sector data are published in the BLS quarterly news release, *Productivity and Costs* and in the annual *Multifactor Productivity Trends* release. Industry productivity measures are updated and published annually in the news releases *Productivity and Costs by Industry*. The latest data are available at the BLS productivity and costs Web site <<http://www.bls.gov/lpc/home.htm>>. Detailed information on methods, limitations, and data sources appears in the BLS *Handbook of Methods*, BLS Bulletin 2490 (1997), Chapters 10 and 11.

**Unions**—As defined here, unions include traditional labor unions and employee associations similar to labor unions. Data

on union membership status provided by BLS are for employed wage and salary workers and relate to their principal job. Earnings by union membership status are usual weekly earnings of full-time wage and salary workers. The information is collected through the Current Population Survey.

**Work stoppages**—Work stoppages include all strikes and lockouts known to BLS that last for at least 1 full day or shift and involve 1,000 or more workers. All stoppages, whether or not authorized by a union, legal or illegal, are counted. Excluded are work slowdowns and instances where employees report to work late or leave early to attend mass meetings or mass rallies.

**Seasonal adjustment**—Many economic statistics reflect a regularly recurring seasonal movement that can be estimated on the basis of past experience. By eliminating that part of the change which can be ascribed to usual seasonal variation (e.g., climate or school openings and closings), it is possible to observe the cyclical and other nonseasonal movements in the series. However, in evaluating deviations from the seasonal pattern—that is, changes in a seasonally adjusted series—it is important to note that seasonal adjustment is merely an approximation based on past experience. Seasonally adjusted estimates have a broader margin of possible error than the original data on which they are based, since they are subject not only to sampling and other errors, but also are affected by the uncertainties of the adjustment process itself.

**Statistical reliability**—For discussion of statistical collection, estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau and BLS data, see Appendix III.

**Table 573. Civilian Population—Employment Status: 1970 to 2005**

[In thousands (137,085 represents 137,085,000), except as indicated. For the civilian noninstitutional population 16 years old and over. Annual averages of monthly figures. Based on Current Population Survey; see text, Section 1, and Appendix III]

| Year              | Civilian noninstitutional population | Civilian labor force |                       |          |  |        | Unemployed             |        | Not in labor force    |  |
|-------------------|--------------------------------------|----------------------|-----------------------|----------|--|--------|------------------------|--------|-----------------------|--|
|                   |                                      | Total                | Percent of population | Employed | Employment/population ratio <sup>1</sup> | Number | Percent of labor force | Number | Percent of population |  |
|                   |                                      |                      |                       |          |  |        |                        |        |                       |  |
| 1970              | 137,085                              | 82,771               | 60.4                  | 78,678   | 57.4                                     | 4,093  | 4.9                    | 54,315 | 39.6                  |  |
| 1980              | 167,745                              | 106,940              | 63.8                  | 99,303   | 59.2                                     | 7,637  | 7.1                    | 60,806 | 36.2                  |  |
| 1985              | 178,206                              | 115,461              | 64.8                  | 107,150  | 60.1                                     | 8,312  | 7.2                    | 62,744 | 35.2                  |  |
| 1988              | 184,613                              | 121,669              | 65.9                  | 114,968  | 62.3                                     | 6,701  | 5.5                    | 62,944 | 34.1                  |  |
| 1989              | 186,393                              | 123,869              | 66.5                  | 117,342  | 63.0                                     | 6,528  | 5.3                    | 62,523 | 33.5                  |  |
| 1990 <sup>2</sup> | 189,164                              | 125,840              | 66.5                  | 118,793  | 62.8                                     | 7,047  | 5.6                    | 63,324 | 33.5                  |  |
| 1991              | 190,925                              | 126,346              | 66.2                  | 117,718  | 61.7                                     | 8,628  | 6.8                    | 64,578 | 33.8                  |  |
| 1992              | 192,805                              | 128,105              | 66.4                  | 118,492  | 61.5                                     | 9,613  | 7.5                    | 64,700 | 33.6                  |  |
| 1993              | 194,838                              | 129,200              | 66.3                  | 120,259  | 61.7                                     | 8,940  | 6.9                    | 65,638 | 33.7                  |  |
| 1994 <sup>2</sup> | 196,814                              | 131,056              | 66.6                  | 123,060  | 62.5                                     | 7,996  | 6.1                    | 65,758 | 33.4                  |  |

**Table 574. Civilian Labor Force and Participation Rates With Projections: 1980 to 2014**

[106.9 represents 106,900,000. For civilian noninstitutional population 16 years old and over. Annual averages of monthly figures. Rates are based on annual average civilian noninstitutional population of each specified group and represent proportion of each specified group in the civilian labor force. Based on Current Population Survey; see text, Section 1, and Appendix III]

NA Not available. <sup>1</sup> See footnote 2, Table 573. <sup>2</sup> Includes other races, not shown separately. <sup>3</sup> The 2003 Current Population Survey (CPS) allowed respondents to choose more than one race. Beginning 2003, data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years only allowed respondents to report one race group. See also comments on race in the text for Section 1. <sup>4</sup> Prior to 2004, includes Pacific Islanders. <sup>5</sup> Persons of Hispanic or Latino origin may be any race.

**Table 579. Characteristics of the Civilian Labor Force by State: 2004**

[In thousands (147,401 represents 147,401,000), except ratio and rate. For civilian noninstitutional population, 16 years old and over. Annual averages of monthly figures. Because of separate processing and weighting procedures, the totals for the United States may differ from results obtained by aggregating totals for states]

**Table 591. Self-Employed Workers by Industry and Occupation: 2000 to 2005**

[In thousands (10,214 represents 10,214,000). For civilian noninstitutional population 16 years old and over. Annual averages of monthly figures. Data represent the unincorporated self-employed; the incorporated self-employed are considered wage and salary workers. Based on the occupational and industrial classification derived from those used in the 2000 census and are not comparable to those used in the 1990 census. See text, this section. Based on the Current Population Survey; see text, Section 1, and Appendix III]

**Table 602. Employed Civilians by Occupation, Sex, Race, and Hispanic Origin: 2005—Con.**

[141,730 represents 141,730,000. For civilian noninstitutional population 16 years old and over. Annual average of monthly figures. Based on Current Population Survey; see text, Section 1, and Appendix III. Occupational classifications are those used in the 2000 Census and are not comparable to those used in the 1990 census]

| Occupation   | Total employed (1,000) | Percent of total |                    |                    |                       |
|--|------------------------|------------------|--------------------|--------------------|-----------------------|
|  |                        | Female           | Black <sup>1</sup> | Asian <sup>1</sup> | Hispanic <sup>2</sup> |
| <b>Professional and related occupations—Con.</b>   |                        |                  |                    |                    |                       |

— Represents or rounds to zero. <sup>1</sup> The 2003 Current Population Survey (CPS) allowed respondents to choose more than one race. Data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years only allowed respondents to report one race group. See also comments on race in the text for Section 1. <sup>2</sup> Persons of Hispanic or Latino ethnicity may be of any race. <sup>3</sup> Includes other occupations, not shown separately.

<sup>1</sup> Quartile ranks based on the Occupational Employment Statistics annual earnings. VH = very high (\$43,600 and over), H = high (\$28,580 to \$43,590), L = low (\$20,190 to \$28,570), and VL = very low (up to \$20,180). The rankings were based on quartiles using one-fourth of total employment to define each quartile. Earnings are for wage and salary workers.

**Table 612. Unemployment by Occupation, 2000 to 2005, and by Sex, 2005**

[5,692 represents 5,692,000. For civilian noninstitutional population 16 years old and over. Annual averages of monthly data. Rate represents unemployment as a percent of the labor force for each specified group. Based on Current Population Survey; see text, Section 1, and Appendix III. See also headnote, Table 591 regarding occupations]

<sup>1</sup> Total unemployment as percent of civilian labor force. <sup>2</sup> See footnote 2, Table 573. <sup>3</sup> Source: U.S. Employment and Training Administration, *Unemployment Insurance, Financial Handbook*, annual updates. <sup>4</sup> Insured unemployment as percent of average covered employment in the previous year. <sup>5</sup> Includes 49,800 in Puerto Rico and the Virgin Islands in 2000; and 41,900 in 2004.

Source: Except as noted, U.S. Bureau of Labor Statistics, *Geographic Profile of Employment and Unemployment*, annual. See Internet site <<http://www.bls.gov/gps/>>.

Table 616. **Nonfarm Establishments—Employees, Hours, and Earnings by Industry: 1990 to 2005**

[Annual averages of monthly data. (109,487 represents 109,487,000). Based on data from establishment reports. Includes all full- and part-time employees who worked during, or received pay for, any part of the pay period reported. Excludes proprietors, the self-employed, farm workers, unpaid family workers, private household workers, and Armed Forces. Establishment data shown here conform to industry definitions in the 2002 North American Industry Classification System (NAICS) and are adjusted to March 2005 employment benchmarks. Based on the Current Employment Statistics Program; see source and Appendix III]

**Table 617. Employees in Nonfarm Establishments—States: 2005**

[In thousands (133,463 represents 133,463,000). For coverage, see headnote, Table 616. National totals differ from the sum of the state figures because of differing benchmarks among states and differing industrial and geographic stratification. Based on North American Industry Classification System, 2002; see text, this section]

**Table 629. Average Annual Wage by State: 2003 and 2004**

[In dollars, except percent change. For workers covered by state unemployment insurance laws and for federal civilian workers covered by unemployment compensation for federal employees, approximately 97 percent of employees on nonfarm payrolls in 2004. Excludes most agricultural workers on small farms, all Armed Forces, elected officials in most states, railroad employees, most domestic workers, most student workers at school, employees of certain nonprofit organizations, and most self-employed individuals. Pay includes bonuses, stock options, cash value of meals and lodging, and tips and other gratuities]

<sup>1</sup> Employees may have access to both defined benefit and defined contribution plans. Total excludes duplication. <sup>2</sup> Employees are classified as working either a full-time or part-time schedule based on the definition used by each establishment. <sup>3</sup> Union workers are those whose wages are determined through collective bargaining. <sup>4</sup> Based on the Standard Industrial Classification Manual, 1987.

<sup>1</sup> Arrangements permitting employees to work at home several days of the workweek. <sup>2</sup> Employers subsidize employees' cost of commuting to and from work via public transportation, company-sponsored van pool, discounted subway fares, etc. <sup>3</sup> Employees are classified as working either a full-time or part-time schedule based on the definition used by each establishment. <sup>4</sup> Union workers are those whose wages are determined through collective bargaining. <sup>5</sup> For composition of divisions, see map, inside front cover.

<sup>1</sup> Per 100,000 workers. <sup>2</sup> Disabling injury defined as one which results in death, some degree of physical impairment, or renders the person unable to perform regular activities for a full day beyond the day of the injury. Due to change in methodology, data beginning 1990 not comparable with prior years. <sup>3</sup> Includes deaths where industry is not known. <sup>4</sup> Includes forestry, fishing, and hunting. <sup>5</sup> Includes oil and gas extraction. <sup>6</sup> For composition of industry, see Table 617. <sup>7</sup> Excludes public service administration.

**Table 640. Industries With the Highest Total Case Incidence Rates for Nonfatal Injuries and Illnesses: 2004**

[Rates per 100 full-time employees. Rates refer to any Occupational Safety and Health Administration recordable occupational injury or illness, whether or not it resulted in days away from work, job transfer, or restriction. Incidence rates were calculated as: Number of injuries and illnesses divided by total hours worked by all employees during the year multiplied by 200,000 as base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year)]

**Table 641. Nonfatal Occupational Injury and Illness Incidence Rates: 2004**

[Rates per 100 full-time employees. Except as noted, data refer to any Occupational Safety and Health Administration (OSHA) recordable occupational injury or illness, whether or not it resulted in days away from work, job transfer, or restriction. Incidence rates were calculated as: Number of injuries and illnesses divided by total hours worked by all employees during the year multiplied by 200,000 as base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year)]

**Table 644. Work Stoppages: 1960 to 2005**

[896 represents 896,000. Excludes work stoppages involving fewer than 1,000 workers and lasting less than 1 day. Information is based on reports of labor disputes appearing in daily newspapers, trade journals, and other public sources. The parties to the disputes are contacted by telephone, when necessary, to clarify details of the stoppages]

B Data not shown where base is less than 50,000. <sup>1</sup> Members of a labor union or an employee association similar to a labor union. <sup>2</sup> Members of a labor union or an employee association similar to a union as well as workers who report no union affiliation but whose jobs are covered by a union or an employee association contract. <sup>3</sup> For full-time employed wage and salary workers. <sup>4</sup> Includes races not shown separately. Also includes a small number of multiple jobholders whose full- and part-time status can not be determined for their principal job. <sup>5</sup> For persons in this race group only. See footnote 3, Table 574. <sup>6</sup> Persons of Hispanic or Latino ethnicity may be of any race. <sup>7</sup> For composition of industries, see Table 611.

## Income, Expenditures, and Wealth

This section presents data on gross domestic product (GDP), gross national product (GNP), national and personal income, saving and investment, money income, poverty, and national and personal wealth. The data on income and expenditures measure two aspects of the U.S. economy. One aspect relates to the National Income and Product Accounts (NIPA), a summation reflecting the entire complex of the nation's economic income and output and the interaction of its major components; the other relates to the distribution of money income to families and individuals or consumer income. New information on personal income, alternative poverty definitions, wealth, and millionaires may be found in Tables 663 and 698–700.

The primary source for data on GDP, GNP, national and personal income, gross saving and investment, and fixed reproducible tangible wealth is the *Survey of Current Business*, published monthly by the Bureau of Economic Analysis (BEA). A comprehensive revision to the NIPA was released beginning in October 1999. Discussions of the revision appeared in the January, June, August, September, and the December 2003 issues of the *Survey of Current Business*. Summary historical estimates appeared in the February 2004 issue of the *Survey of Current Business*. Detailed historical data on the NIPA are available on an interactive Web site at <http://www.bea.doc.gov/bea/dn/nipaweb/index.asp>.

Sources of income distribution data are the decennial censuses of population and the Current Population Survey (CPS), both products of the U.S. Census Bureau (see text, Section 1 and Section 4). Annual data on income of families, individuals, and households are presented in *Current Population Reports, Consumer Income*, P60 Series, in print, and many data series found on the Census Web site at <http://www.census.gov/hhes/www/income.html>. Data on the household

sector's saving and assets are published by the Board of Governors of the Federal Reserve System in the quarterly *Flow of Funds Accounts*. The Board also periodically conducts the *Survey of Consumer Finances*, which presents financial information on family assets and net worth. Detailed information on personal wealth is published periodically by the Internal Revenue Service (IRS) in *SOI Bulletin*.

**National income and product**—Gross domestic product is the total output of goods and services produced by labor and property located in the United States, valued at market prices. GDP can be viewed in terms of the expenditure categories that comprise its major components: purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. A number of inclusions, however, represent imputed values, the most important of which is rental value of owner-occupied housing. GDP, in this broad context, measures the output attributable to the factors of production located in the United States. Gross state product (GSP) is the gross market value of the goods and services attributable to labor and property located in a state. It is the state counterpart of the nation's gross domestic product.

In January 1996, BEA replaced its fixed weighted index as the featured measure of real GDP with an index based on chain-type annual weights. Changes in this measure of real output and prices are calculated as the average of changes based on weights for the current and preceding years. (Components of real output are weighted by price, and components of prices are weighted by output.) These annual changes are "chained" (multiplied) together to form a time series that allows for the effects of changes in relative prices and changes in the composition of

output over time. Quarterly and monthly changes are also based on annual weights. The new output indexes are expressed as 2000 = 100, and for recent years, in 2000 dollars; the new price indexes are based to 2000 = 100. For more information on chain-dollar indexes, see the article on this subject in the November 2003 issue of the *Survey of Current Business*.

Chained (2000) dollar estimates of most components of GDP are not published for periods prior to 1990, because during periods far from the base period, the levels of the components may provide misleading information about their contributions to an aggregate. Values are published in index form (2000 = 100) for 1929 to the present to allow users to calculate the percent changes for all components, changes that are accurate for all periods.

*Gross national product measures* the output attributable to all labor and property supplied by United States residents. GNP differs from “national income” mainly in that GNP includes allowances for depreciation consumption of fixed capital.

*National Income* includes all net incomes (net of CFC) earned in production. National income is the sum of compensation of employees, proprietors’ income with inventory valuation adjustment (IVA) and capital consumption adjustment (CCAdj), rental income of persons with CCAdj, corporate profits with IVA and CCAdj, net interest and miscellaneous payments, taxes on production and imports, business current transfer payments, current surplus of government enterprises, less subsidies.

*Capital consumption adjustment* for corporations and for nonfarm sole proprietorships and partnerships is the difference between capital consumption based on income tax returns and capital consumption measured using empirical evidence on prices of used equipment and structures in resale markets, which have shown that depreciation for most types of assets approximates a geometric pattern. The tax return data are valued at historical costs and reflect changes over time in service lives and depreciation patterns as

permitted by tax regulations. *Inventory valuation adjustment* represents the difference between the book value of inventories used up in production and the cost of replacing them.

*Personal income* is the current income received by persons from all sources minus their personal contributions for government social insurance. Classified as “persons” are individuals (including owners of unincorporated firms), non-profit institutions that primarily serve individuals, private trust funds, and private noninsured welfare funds. Personal income includes personal current transfer receipts (payments not resulting from current production) from government and business such as social security benefits, public assistance, etc., but excludes transfers among persons. Also included are certain nonmonetary types of income chiefly, estimated net rental value to owner-occupants of their homes and the value of services furnished without payment by financial intermediaries. Capital gains (net losses) are excluded.

*Disposable personal income* is personal income less personal current taxes. It is the income available to persons for spending or saving. Personal current taxes are tax payments (net of refunds) by persons (except personal contributions for government social insurance) that are not chargeable to business expense and certain personal payments to general government that are treated like taxes. Personal taxes include income, estate and gift, and personal property taxes and motor vehicle licenses. Nontax payments include passport fees, fines and forfeitures, and donations.

**Gross domestic product by industry**—The BEA also prepares estimates of value added by industry. *Value added* is a measure of the contribution of each private industry and of government to the nation’s GDP. It is defined as an industry’s gross output (which consists of sales or receipts and other operating income, commodity taxes, and inventory change) minus its intermediate inputs (which consists of energy, raw materials, semi-finished goods, and services that are purchased from domestic industries or from foreign sources). These estimates of

value added are produced for 61 private industries and for 4 government classifications—federal general government and government enterprises and state and local general government and government enterprises.

The estimates by industry are available in current dollars and are derived from the estimates of gross domestic income, which consists of three components—the compensation of employees, gross operating surplus, and taxes on production and imports, less subsidies. Real, or inflation-adjusted, estimates are also prepared.

**Regional Economic Accounts**—These accounts consist of estimates of state and local area personal income and of gross state product and are consistent with estimates of personal income and gross domestic product in the Bureau's national economic accounts. BEA's estimates of state and local area personal income provide a framework for analyzing individual state and local economies, and they show how the economies compare with each other. The *personal income* of a state and/or local area is the income received by, or on behalf of, the residents of that state or area. Estimates of labor and proprietors' earnings by place of work indicate the economic activity of business and government within that area, and estimates of personal income by place of residence indicate the income within the area that is available for spending. BEA prepares estimates for states, counties, metropolitan areas, and BEA economic areas.

*Gross state product* estimates measure the value added to the nation's production by the labor and property in each state. GSP is often considered the state counterpart of the nation's GDP. The GSP estimates provide the basis for analyzing the regional impacts of national economic trends. GSP is measured as the sum of the distributions by industry and state of the components of gross domestic income; that is, the sum of the costs incurred and incomes earned in the production of GDP. The GSP estimates are presented in current dollars and in real (chained dollars) for 63 industries.

**Consumer Expenditure Survey**—The Consumer Expenditure Survey program was begun in late 1979. The principal objective of the survey is to collect current consumer expenditure data, which provide a continuous flow of data on the buying habits of American consumers. The data are necessary for future revisions of the Consumer Price Index.

The survey conducted by the Census Bureau for the Bureau of Labor Statistics consists of two components: (1) an interview panel survey in which the expenditures of consumer units are obtained in five interviews conducted every 3 months, and (2) a diary or recordkeeping survey completed by participating households for two consecutive 1-week periods.

Each component of the survey queries an independent sample of consumer units representative of the U.S. total population. Over 52 weeks of the year, 5,000 consumer units are sampled for the diary survey. Each consumer unit keeps a diary for two 1-week periods yielding approximately 10,000 diaries a year. The interview sample is selected on a rotating panel basis, targeted at 5,000 consumer units per quarter. Data are collected in 88 urban and 16 rural areas of the country that are representative of the U.S. total population. The survey includes students in student housing. Data from the two surveys are combined; integration is necessary to permit analysis of total family expenditures because neither the diary nor quarterly interview survey was designed to collect a complete account of consumer spending.

**Distribution of money income to families and individuals**—Money income statistics are based on data collected in various field surveys of income conducted since 1936. Since 1947, the Census Bureau has collected the data on an annual basis and published them in *Current Population Reports*, P60 Series. In each of the surveys, field representatives interview samples of the population with respect to income received during the previous year. *Money income* as defined by the Census Bureau differs from the BEA concept of "personal income." Data on consumer income collected in the CPS by

the Census Bureau cover money income received (exclusive of certain money receipts such as capital gains) before payments for personal income taxes, social security, union dues, medicare deductions, etc. Therefore, money income does not reflect the fact that some families receive part of their income in the form of noncash benefits (see Section 11) such as food stamps, health benefits, and subsidized housing; that some farm families receive noncash benefits in the form of rent-free housing and goods produced and consumed on the farm; or that non-cash benefits are also received by some nonfarm residents which often take the form of the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc. These elements should be considered when comparing income levels. None of the aggregate income concepts (GDP, national income, or personal income) is exactly comparable with money income, although personal income is the closest.

**Poverty**—Families and unrelated individuals are classified as being above or below the poverty level using the poverty index originated at the Social Security Administration in 1964 and revised by Federal Interagency Committees in 1969 and 1980.

The poverty index is based solely on money income and does not reflect the fact that many low-income persons receive noncash benefits such as food stamps, medicaid, and public housing. The index is based on the Department of Agriculture's 1961 Economy Food Plan and reflects the different consumption

requirements of families based on their size and composition. The poverty thresholds are updated every year to reflect changes in the Consumer Price Index. The following technical changes to the thresholds were made in 1981: (1) distinctions based on sex of householder have been eliminated, (2) separate thresholds for farm families have been dropped, and (3) the matrix has been expanded to families of nine or more persons from the old cut-off of seven or more persons. These changes have been incorporated in the calculation of poverty data beginning with 1981. Besides the Census Bureau Web site at <<http://www.census.gov/hhes/www/poverty.html>>, information on poverty guidelines and research may be found at the U.S. Department of Human Services Web site at <<http://aspe.hhs.gov/poverty/poverty.shtml>>.

In the recent past, the Census Bureau has published a number of technical papers that presented experimental poverty estimates based on income definitions that counted the value of selected government noncash benefits. The Census Bureau has also published annual reports on aftertax income. In addition, in July 1999, the Census Bureau released a report (P60-205) that showed the effect of using experimental poverty following the recommendations of a National Academy of Sciences panel on redefining our nation's poverty measure and recently published a report entitled *Alternative Poverty Estimates in the United States: 2004*.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to Census Bureau data, see Appendix III.

Table 648. **Gross Domestic Product in Current and Real (2000) Dollars: 1960 to 2005**

[In billions of dollars (526.4 represents \$526,400,000,000). For explanation of gross domestic product and chained dollars, see text, this section]

**Table 649. Gross Domestic Product in Current and Real (2000) Dollars by Industry: 2000 to 2005**

[In billions of dollars (9,817 represents \$9,817,000,000,000). Data are based on the 1997 North American Industry Classification System (NAICS); see text, Section 15. Data include nonfactor charges (capital consumption allowances, indirect business taxes, etc.) as well as factor charges against gross product; corporate profits and capital consumption allowances have been shifted from a company to an establishment basis]

| Industry   | Current dollars |               |               |               | Chained (2000) dollars |               |               |               |

**Table 659. Personal Income in Current and Constant (2000) Dollars by State: 1990 to 2005**

[In billions of dollars (4,861.9 represents \$4,861,900,000,000). Represents a measure of income received from all sources during the calendar year by residents of each state. Data exclude federal employees overseas and U.S. residents employed by private U.S. firms on temporary foreign assignment. Totals may differ from those in Tables 654, 655, and 657]

<sup>1</sup> Includes other races not shown separately. <sup>2</sup> Data reflect implementation of Census 2000-based population controls and a 28,000 household sample expansion to 78,000 households. <sup>3</sup> Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1. <sup>4</sup> Data represents White alone, which refers to people who reported White and did not report any other race category. <sup>5</sup> Data represents Black alone, which refers to people who reported Black and did not report any other race category. <sup>6</sup> Data represents Asian alone, which refers to people who reported Asian and did not report any other race category. <sup>7</sup> People of Hispanic origin may be of any race.

<sup>1</sup> Includes other races not shown separately. <sup>2</sup> Data reflect implementation of Census 2000-based population controls and a 28,000 household sample expansion to 78,000 households. <sup>3</sup> Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2003 and later, data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1, Population. <sup>4</sup> Data represent White alone, which refers to people who reported White and did not report any other race category. <sup>5</sup> Data represent Black alone, which refers to people who reported Black and did not report any other race category. <sup>6</sup> Data represent Asian alone, which refers to people who reported Asian and did not report any other race category. <sup>7</sup> People of Hispanic origin may be of any race.

NA Not available. <sup>1</sup> Implementation of Census 2000-based population controls and sample expanded by 28,000 households. <sup>2</sup> Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1. <sup>3</sup> Includes other races not shown separately. <sup>4</sup> Beginning with 2002, data represents White alone, which refers to people who reported White and did not report any other race category. <sup>5</sup> Beginning with 2002, data represents Black alone, which refers to people who reported Black and did not report any other race category. <sup>6</sup> Beginning with 2002, data represents Asian alone, which refers to people who reported Asian and did not report any other race category. <sup>7</sup> People of Hispanic origin may be of any race.

NA Not available. <sup>1</sup> Includes other races not shown separately. <sup>2</sup> Beginning with 2002, data represents White alone, which refers to people who reported White and did not report any other race category. <sup>3</sup> Beginning with 2002, data represents Black alone, which refers to people who reported Black and did not report any other race category. <sup>4</sup> Beginning with 2002, data represents Asian alone, which refers to people who reported Asian and did not report any other race category. <sup>5</sup> People of Hispanic origin may be of any race. <sup>6</sup> Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1.

**Table 687. Household Income—Distribution by Income Level and State: 2004**

[In thousands (109,902 represents 109,902,000), except as indicated. The American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Based on a sample and subject to sampling variability; see Appendix III. For definition of median, see Guide to Tabular Presentation]

| State                          | Number of households (1,000) | Number of households by income level (1,000) |                   |                   |                   |                     |                     |                    | Median income (dol.) |

**Table 689. Household Income, Family Income, and Per Capita Income and Individual and Family Below Poverty Level by City: 2004**

[For number and percent below poverty, see headnote, Table 690. The American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Based on a sample and subject to sampling variability; see Appendix III. For definition of median, see Guide to Tabular Presentation]

| City                                | Median household income (dol.) | Median family income (dol.) | Per capita income (dol.) | Number below poverty level |          | Percent below poverty level |          |

**Table 690. Individuals and Families Below Poverty Level—Number and Rate by State: 2000 and 2004**

[In thousands (33,311 represents 33,311,000), except as indicated. Represents number and percent below poverty in the past 12 months. The American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Based on a sample and subject to sampling variability; see Appendix III]

NA Not available. <sup>1</sup> Includes other races not shown separately. <sup>2</sup> Beginning 2002, data represents White alone, which refers to people who reported White and did not report any other race category. <sup>3</sup> Beginning 2002, data represents Black alone, which refers to people who reported Black and did not report any other race category. <sup>4</sup> Beginning 2002, data represents Asian alone, which refers to people who reported Asian and did not report any other race category. <sup>5</sup> People of Hispanic origin may be of any race. <sup>6</sup> Implementation of Census 2000-based population controls and sample expanded by 28,000 households. <sup>7</sup> Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1, Population.

NA Not available. <sup>1</sup> Includes other races not shown separately. <sup>2</sup> Beginning 2002, data represents White alone, which refers to people who reported White and did not report any other race category. <sup>3</sup> Beginning 2002, data represents Black alone, which refers to people who reported Black and did not report any other race category. <sup>4</sup> Beginning 2002, data represents Asian alone, which refers to people who reported Asian and did not report any other race category. <sup>5</sup> People of Hispanic origin may be of any race. <sup>6</sup> Implementation of Census 2000-based population controls and sample expanded by 28,000 households. <sup>7</sup> Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1.

NA Not available. <sup>1</sup> Includes other races not shown separately. <sup>2</sup> Beginning 2002, data represents White alone, which refers to people who reported White and did not report any other race category. <sup>3</sup> Beginning 2002, data represents Black alone, which refers to people who reported Black and did not report any other race category. <sup>4</sup> Beginning 2002, data represents Asian alone, which refers to people who reported Asian and did not report any other race category. <sup>5</sup> People of Hispanic origin may be of any race. <sup>6</sup> Implementation of Census 2000-based population controls and sample expanded by 28,000 households. <sup>7</sup> Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1.

<sup>1</sup> Money income concept includes all money income received by individuals who are 15 years or older. It consists of income before deductions for taxes and other expenses and does not include lump-sum payments or capital gains. It also does not include the value of noncash benefits such as food stamps. This income concept is the basis for the official U.S. poverty measure.

<sup>2</sup> Market income concept includes money income except government cash transfers; includes imputed realized capital gains and losses; includes imputed rate of return on home equity; and subtracts imputed work expenses. <sup>3</sup> Post-Social insurance income concept includes money income except government means-tested cash transfers; includes imputed realized capital gains and losses; includes imputed rate of return on home equity; and subtracts imputed work expenses. <sup>4</sup> Disposable income concept includes money income; includes the value of noncash transfers (food stamps, public or subsidized housing, and free or reduced-price school lunches); includes imputed realized capital gains and losses; includes imputed rate of return on home equity; and subtracts imputed work expenses, federal payroll taxes, federal and state income taxes, and property taxes on owner-occupied homes.

<sup>5</sup> Data for American Indians and Alaska Natives, Asian, and Native Hawaiian and Other Pacific Islanders are not shown separately. <sup>6</sup> White alone refers to people who reported White and did not report any other race category. <sup>7</sup> Black alone refers to people who reported Black and did not report any other race category. <sup>8</sup> Asian alone refers to people who reported Asian and did not report any other race category. <sup>9</sup> Persons of Hispanic origin may be of any race.

**Table 700. Top Wealth Holders With Net Worth of \$1 Million or More—Number and Net Worth by State: 2001**

[3,510 represents 3,510,000. Millionaire is defined as those adults with net worth (assets minus liabilities) of \$1 million or more. Based on a sample of federal estate tax returns (Form 706). Estimates of wealth by state can be subject to significant year-to-year fluctuations and this is especially true for individuals at the extreme tail of the net worth distribution and for states with relatively small decedent populations. Based on the estate multiplier technique; for more information on this methodology, see source]

| State                | Number of millionaires (1,000) | Net worth (mil. dol.) | State                    | Number of millionaires (1,000) | Net worth (mil. dol.) |

**Table 701. Nonfinancial Assets Held by Families by Type of Asset: 2004**

[(172.9 represents \$172,900.) Median value in thousands of dollars. Constant dollar figures are based on consumer price index for all urban consumers published by U.S. Bureau of Labor Statistics. Families include one-person units and, as used in this table, are comparable to the U.S. Census Bureau household concept. For definition of family, see text, Section 1. Based on Survey of Consumer Finance; see Appendix III. For data on financial assets, see Section 25. For definition of median, see Guide to Tabular Presentation]

| Family Characteristic                      | Total <sup>1</sup>                       | Vehicles    | Primary residence | Other residential property | Equity in nonresidential property | Business equity | Other       | Any non-financial asset |

**Table 702. Family Net Worth—Mean and Median Net Worth in Constant (2004) Dollars by Selected Family Characteristics: 1995 to 2004**

[Net worth in thousands of constant (2004) dollars (260.8 represents \$260,800). Constant dollar figures are based on consumer price index for all urban consumers published by U.S. Bureau of Labor Statistics. Families include one-person units and as used in this table are comparable to the U.S. Census Bureau household concept. Based on Survey of Consumer Finance; see Appendix III. For definition of median, see Guide to Tabular Presentation]

## Prices

This section presents indexes of producer and consumer prices, actual prices for selected commodities, and energy prices. The primary sources of these data are monthly publications of the Department of Labor, Bureau of Labor Statistics (BLS), which include *Monthly Labor Review*, *Consumer Price Index, Detailed Report*, *Producer Price Indexes*, and *U.S. Import and Export Price Indexes*. The Department of Commerce, Bureau of Economic Analysis is the source for gross domestic product measures. Cost of living data for many urban and metropolitan areas are provided by the ACCRA, a private organization in Alexandria, VA. Table 710 on housing price indexes appears in this edition from the Office of Federal Housing Enterprise Oversight, *Housing Price Index*. Other commodity, housing, and energy prices may be found in the Energy and Utilities, Natural Resources, and Construction and Housing sections.

**Consumer price indexes (CPI)**—The CPI is a measure of the average change in prices over time in a “market basket” of goods and services purchased either by urban wage earners and clerical workers or by all urban consumers. In 1919, BLS began to publish complete indexes at semiannual intervals, using a weighting structure based on data collected in the expenditure survey of wage-earner and clerical-worker families in 1917–19 (BLS Bulletin 357, 1924). The first major revision of the CPI occurred in 1940, with subsequent revisions in 1953, 1964, 1978, 1987, and 1998.

Beginning with the release of data for January 1988 in February 1988, most consumer price indexes shifted to a new reference base year. All indexes previously expressed on a base of 1967 = 100, or any other base through December 1981, have been rebased to 1982–84 = 100. The expenditure weights are based upon data tabulated from the Consumer Expenditure Surveys.

BLS publishes CPIs for two population groups: (1) a CPI for all urban consumers (CPI-U), which covers approximately 80 percent of the total population; and (2) a CPI for urban wage earners and clerical workers (CPI-W), which covers 32 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups which historically have been excluded from CPI coverage, such as professional, managerial, and technical workers; the self-employed; short-term workers; the unemployed; and retirees and others not in the labor force.

The current CPI is based on prices of food, clothing, shelter, fuels, transportation fares, charges for doctors' and dentists' services, drugs, etc. purchased for day-to-day living. Prices are collected in 87 areas across the country from over 50,000 housing units and 23,000 establishments. Area selection was based on the 1990 census. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected monthly in the three largest geographic areas and every other month in other areas.

In calculating the index, each item is assigned a weight to account for its relative importance in consumers' budgets. Price changes for the various items in each location are then averaged. Local data are then combined to obtain a U.S. city average. Separate indexes are also published for regions, area size-classes, cross-classifications of regions and size-classes, and for 26 local areas, usually consisting of the Metropolitan Statistical Area (MSA); see Appendix II. Area definitions are those established by the Office of Management and Budget in 1983. Definitions do not include revisions made since 1992. Area indexes do not measure differences in the level of prices among cities; they only measure the average

change in prices for each area since the base period. For further detail regarding the CPI, see the BLS *Handbook of Methods*, Bulletin 2490, Chapter 17; the *Consumer Price Index*, and the CPI home page: <<http://www.bls.gov/cpi/>>. In January 1983, the method of measuring homeownership costs in the CPI-U was changed to a rental equivalence approach. This treatment calculates homeowner costs of shelter based on the implicit rent owners would pay to rent the homes they own. The rental equivalence approach was introduced into the CPI-W in 1985. The CPI-U was used to prepare the consumer price tables in this section.

**Producer price index (PPI)**—This index, dating from 1890, is the oldest continuous statistical series published by BLS. It is designed to measure average changes in prices received by producers of all commodities, at all stages of processing, produced in the United States.

The index has undergone several revisions (see *Monthly Labor Review*, February 1962, April 1978, and August 1988). It is now based on approximately 10,000 individual products and groups of products along with about 100,000 quotations per month. Indexes for the net output of manufacturing and mining industries have been added in recent years. Prices used in constructing the index are collected from sellers and generally apply to the first significant large-volume commercial transaction for each commodity—i.e., the manufacturer's or other producer's selling price or the selling price on an organized exchange or at a central market.

The weights used in the index represent the total net selling value of commodities produced or processed in this country. Values are f.o.b. (free on board) production point and are exclusive of excise taxes. Effective with the release of data for January 1988, many important producer price indexes were changed to a new reference base year, 1982 = 100, from 1967 = 100. The reference year of the PPI shipment weights has been taken primarily from the 1987 Census of Manufactures. For further detail regarding

the PPI, see the BLS *Handbook of Methods*, Bulletin 2490 (April 1997), Chapter 16. The PPI Web page is <<http://www.bls.gov/ppi/>>.

**BEA price indexes**—Chain-weighted price indexes, produced by the Bureau of Economic Analysis (BEA), are weighted averages of the detailed price indexes used in the deflation of the goods and services that make up the gross domestic product (GDP) and its major components. Growth rates are constructed for years and quarters using quantity weights for the current and preceding year or quarter; these growth rates are used to move the index for the preceding period forward a year or quarter at a time. All chain-weighted price indexes are expressed in terms of the reference year value 2000 = 100.

Personal consumption expenditures (PCE) price and quantity indexes are based on market transactions for which there are corresponding price measures. The price index provides a measure of the prices paid by persons for domestic purchases of goods and services, which may be a useful measure of consumer prices for some analytical purposes. PCEs are defined as market value of spending by individuals and not-for-profit institutions on all goods and services. Personal consumption expenditures also include the value of certain imputed goods and services—such as the rental value of owner-occupied homes and compensation paid in kind—such as employer-paid health and life insurance premiums. More information on this index may be found at <[http://www.bea.gov/bea/mp\\_National.htm](http://www.bea.gov/bea/mp_National.htm)>.

**Measures of inflation**—Inflation is defined as a time of generally rising prices for goods and factors of production. The Bureau of Labor Statistics samples prices of items in a representative market basket and publishes the result as the CPI. The media invariably announce the inflation rate as the percent change in the CPI from month to month. A much more meaningful indicator of inflation is the percent change from the same month of the prior year. The producer price index measures prices at the producer level only. The PPI shows the same general pattern of inflation as does

the CPI but is more volatile. The PPI can be roughly viewed as a leading indicator. It often tends to foreshadow trends that later occur in the CPI.

Other measures of inflation include the gross domestic purchases chain-weighted price index, the index of industrial materials prices; the Futures Price and Spot Market prices from the Commodity Research Bureau; the Employment Cost Index, the Hourly Compensation Index, or the Unit Labor Cost Index found in Section 12 on Labor Force, Employment, and Earnings, as a measure of the change in cost of the labor factor of production; and changes in long-term interest rates that are often used to measure changes in the cost of the capital factor of production.

**International price indexes**—The BLS International Price Program produces export and import price indexes for non-military goods traded between the United States and the rest of the world.

The export price index provides a measure of price change for all products sold by U.S. residents to foreign buyers. The

import price index provides a measure of price change for goods purchased from other countries by U.S. residents. The reference period for the indexes is 2000 = 100, unless otherwise indicated. The product universe for both the import and export indexes includes raw materials, agricultural products, semifinished manufactures, and finished manufactures, including both capital and consumer goods. Price data for these items are collected primarily by mail questionnaire. In nearly all cases, the data are collected directly from the exporter or importer, although in a few cases, prices are obtained from other sources.

To the extent possible, the data gathered refer to prices at the U.S. border for exports and at either the foreign border or the U.S. border for imports. For nearly all products, the prices refer to transactions completed during the first week of the month. Survey respondents are asked to indicate all discounts, allowances, and rebates applicable to the reported prices, so that the price used in the calculation of the indexes is the actual price for which the product was bought or sold.

**Table 705. Purchasing Power of the Dollar: 1950 to 2005**

[Indexes: PPI, 1982 = \$1.00; CPI, 1982-84 = \$1.00. Producer prices prior to 1961, and consumer prices prior to 1964, exclude Alaska and Hawaii. Producer prices based on finished goods index. Obtained by dividing the average price index for the 1982 = 100, PPI; 1982-84 = 100, CPI base periods (100.0) by the price index for a given period and expressing the result in dollars and cents. Annual figures are based on average of monthly data.]

| Year           | Annual average as measured by— |                 | Year           | Annual average as measured by— |                 |

**Table 707. Annual Percent Changes From Prior Year in Consumer Price Indexes (CPI-U)—Selected Areas: 2005**

[Represents percent changes of annual averages of monthly figures. Local area CPI indexes are by-products of the national CPI program. Each local index has a smaller sample size than the national index and is therefore subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Area definitions are those established by the Office of Management and Budget in 1983. For further detail, see the U.S. Bureau of Labor Statistics Handbook of Methods, Bulletin 2285, Chapter 19, the Consumer Price Index, and Report 736, the CPI: 1987 Revision. Minus sign (-) indicates decrease. See also text, this section and Appendix III]

**Table 709. Cost of Living Index—Selected Metropolitan Areas:  
Fourth Quarter 2005**

[Measures relative price levels for consumer goods and services in participating areas for a mid-management standard of living. The nationwide average equals 100 and each index is read as a percent of the national average. The index does not measure inflation, but compares prices at a single point in time. Excludes taxes. Metropolitan areas as defined by the Office of Management and Budget. For definitions and components of metropolitan areas, see source for details on coverage.]

| Metropolitan areas and metropolitan divisions                         | Composite index (100%) | Grocery items (13%) | Housing (29%) | Utilities (10%) | Transportation (10%) | Health care (4%) | Misc. goods and services (35%) |

**Table 709. Cost of Living Index—Selected Metropolitan Areas:  
Fourth Quarter 2005—Con.**

[Measures relative price levels for consumer goods and services in participating areas for a mid-management standard of living. The nationwide average equals 100 and each index is read as a percent of the national average. The index does not measure inflation, but compares prices at a single point in time. Excludes taxes. Metropolitan areas as defined by the Office of Management and Budget. For definitions and components of metropolitan areas, see source for details on coverage.]

| Metropolitan areas and metropolitan divisions   | Composite index (100%) | Grocery items (13%) | Housing (29%) | Utilities (10%) | Transportation (10%) | Health care (4%) | Misc. goods and services (35%) |

**Table 709. Cost of Living Index—Selected Metropolitan Areas:  
Fourth Quarter 2005—Con.**

[Measures relative price levels for consumer goods and services in participating areas for a mid-management standard of living. The nationwide average equals 100 and each index is read as a percent of the national average. The index does not measure inflation, but compares prices at a single point in time. Excludes taxes. Metropolitan areas as defined by the Office of Management and Budget. For definitions and components of metropolitan areas, see source for details on coverage.]

| Metropolitan areas and metropolitan divisions             | Composite index (100%) | Grocery items (13%) | Housing (29%) | Utilities (10%) | Transportation (10%) | Health care (4%) | Misc. goods and services (35%) |
|---|------------------------|---------------------|---------------|-----------------|----------------------|------------------|--------------------------------|

**Table 710. Single-Family Housing Price Indexes by State**

[Index 1980, 1st quarter = 100. The index reflects average price changes in repeat sales or refinancings on the same properties. The information is obtained by reviewing repeat mortgage transactions on single-family properties whose mortgages have been purchased or securitized by either Fannie Mae or Freddie Mac; for more information on methodology, see Appendix III]

**Table 722. Export Price Indexes—Selected Commodities: 1990 to 2005**

[2000 = 100. Indexes are weighted by 2000 export values according to the Schedule B classification system of the U.S. Census Bureau. Prices used in these indexes were collected from a sample of U.S. manufacturers of exports and are factory transaction prices, except as noted. n.e.s. = not elsewhere specified.]

## Business Enterprise

This section relates to the place and behavior of the business firm and to business initiative in the American economy. It includes data on the number, type, and size of businesses; financial data of domestic and multinational U.S. corporations; business investments, expenditures, and profits; and sales and inventories.

The principal sources of these data are the *Survey of Current Business*, published by the Bureau of Economic Analysis (BEA), the *Statistical Supplement to the Federal Reserve Bulletin*, issued by the Board of Governors of the Federal Reserve System, the annual *Statistics of Income (SOI)* reports of the Internal Revenue Service (IRS), and the Census Bureau's Economic Census, *County Business Patterns*, *Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations (QFR)*, *Survey of Business Owners*, and *Annual Capital Expenditures Survey*.

**Business firms**—A firm is generally defined as a business organization under a single management and may include one or more establishments. The terms firm, business, company, and enterprise are used interchangeably throughout this section. A firm doing business in more than one industry is classified by industry according to the major activity of the firm as a whole.

The IRS concept of a business firm relates primarily to the legal entity used for tax reporting purposes. A sole proprietorship is an unincorporated business owned by one person and may include large enterprises with many employees and hired managers and part-time operators. A partnership is an unincorporated business owned by two or more persons, each of whom has a financial interest in the business. A corporation is a business that is legally incorporated under state laws. While many corporations file consolidated tax returns, most corporate tax returns represent individual corporations, some

of which are affiliated through common ownership or control with other corporations filing separate returns.

**Economic census**—The economic census is the major source of facts about the structure and functioning of the nation's economy. It provides essential information for government, business, industry, and the general public. It furnishes an important part of the framework for such composite measures as the gross domestic product estimates, input/output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions. The Census Bureau takes the economic census every 5 years, covering years ending in "2" and "7."

The economic census is collected on an establishment basis. A company operating at more than one location is required to file a separate report for each store, factory, shop, or other location. Each establishment is assigned a separate industry classification based on its primary activity and not that of its parent company. Establishments responding to the establishment survey are classified into industries on the basis of their principal product or activity (determined by annual sales volume). The statistics issued by industry in the 2002 Economic Census are classified primarily on the 2002 North American Industry Classification System (NAICS), and, to a lesser extent, on the 1997 NAICS used in the previous census (see below).

More detailed information about the scope, coverage, methodology, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 2002 Economic Census* at <http://www.census.gov/econ/census02/guide/index.html>.

Data from the 2002 Economic Census were released through the Census Bureau's American FactFinder service, on

CD-ROM, in Adobe Acrobat PDF reports and in hypertext “drill-down” tables available on the Census Bureau Web site. For more information on these various media of release, see the following page on the Census Bureau Web site <<http://www.census.gov/econ/census02/>>.

**Survey of Business Owners**—The Survey of Business Owners (SBO), formerly known as the Surveys of Minority- and Women-Owned Business Enterprises (SMOBE/SWOBE), provides statistics that describe the composition of U.S. businesses by gender, Hispanic or Latino origin, and race. Data from SBO are published in a series of reports: *American Indian- and Alaska Native-Owned Firms*, *Asian-Owned Firms*, *Black-Owned Firms*, *Hispanic-Owned Firms*, *Native Hawaiian- and Other Pacific Islander-Owned Firms* and *Women-Owned Firms*. Data are presented by industry classifications and/or geographic area and size of firm (employment and receipts). The reports include totals for all U.S. businesses based on the 2002 Economic Census and estimates of business ownership by gender, Hispanic or Latino origin, and race based on the 2002 SBO. Each owner had the option of selecting more than one race and therefore is included in each race selected. For information on confidentiality protection and survey methodology, see Appendix III and the SBO Web site <<http://www.census.gov/csd/sbo/>>.

**North American Industry Classification System (NAICS)**—NAICS has replaced the previous Standard Industrial Classification (SIC) system.

NAICS 2002 is the same as NAICS 1997 for 14 of the 20 sectors. Construction and wholesale trade are substantially changed, but the revisions also modify a number of retail classifications and the organization of the information sector. Very minor boundary adjustments affect administrative and support services and mining. NAICS also reflects, in a much more explicit way, the enormous changes in technology and in the growth and

diversification of services that have marked recent decades. A key feature of NAICS is the revision for the Information sector. A few of the new and important industries created in this section include: Internet service providers and Web search portals, and Internet publishing and broadcasting. Also included in the Information sector is electronic shopping and electronic auctions.

**Quarterly Financial Report**—The Quarterly Financial Report (QFR) program publishes quarterly aggregate statistics on the financial conditions of U.S. corporations. The QFR requests companies to report estimates from their statements of income and retained earnings, and balance sheets. The statistical data are classified and aggregated by type of industry and asset size. The QFR sample includes manufacturing companies with assets of \$250 thousand and above, and mining, wholesale, and retail companies with assets of \$50 million and above. The data are available quarterly in the *Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations* on the Internet at <<http://www.census.gov/csd/qfr/>>.

**Multinational Companies**—BEA collects data on financial and operating data on U.S. multinational companies. These data provide a picture of the overall activities of foreign affiliates and U.S. parent companies, using a variety of indicators of their financial structure and operations. The data on foreign affiliates cover the entire operations of the affiliate, irrespective of the percentage of U.S. ownership. These data cover items that are needed in analyzing the characteristics, performance, and economic impact of multinational companies, such as sales, value added, employment and compensation of employees, capital expenditures, exports and imports, and research and development expenditures. Separate tabulations are available for all affiliates and for affiliates that are majority-owned by their U.S. parent(s).

**Table 724. Number of Returns, Receipts, and Net Income by Type of Business: 1980 to 2003**

[8,932 represents 8,932,000. Covers active enterprises only. Figures are estimates based on sample of unaudited tax returns; see Appendix III. Minus sign (-) indicates net loss]

| 2003 | 19,710                               | 2,375        | 5,401        | 1,050   | 2,818        | 19,755       | 230  | 301          | 780          |

<sup>1</sup> In 1980, represents individually-owned businesses, including farms; thereafter, represents only nonfarm proprietors, i.e., business owners. <sup>2</sup> Excludes investment income except for partnerships and corporations in finance, insurance, and real estate before 1998. Beginning 1998, finance and insurance, real estate, and management of companies included investment income for partnerships and corporations. Starting 1985, investment income no longer included for S corporations. <sup>3</sup> Net income (less loss) is defined differently by form of organization, basically as follows: (a) Proprietorships: Total taxable receipts less total business deductions, including cost of sales and operations, depletion, and certain capital expensing, excluding charitable contributions and owners' salaries; (b) Partnerships: Total taxable receipts (including investment income except capital gains) less deductions, including cost of sales and operations and certain payments to partners, excluding charitable contributions, oil and gas depletion, and certain capital expensing; (c) Corporations: Total taxable receipts (including investment income, capital gains, and income from foreign subsidiaries deemed received for tax purposes, except for S corporations beginning 1985) less business deductions, including cost of sales and operations, depletion, certain capital expensing, and officers' compensation excluding S corporation charitable contributions and investment expenses starting 1985; net income is before income tax.

**Table 736. Economic Census Summary (NAICS 1997 Basis): 1997 and 2002**

[25 represents 25,000. Data for 2002 are preliminary. Covers establishments with payroll. Data are based on the 1997 and 2002 economic censuses which are subject to nonsampling error. Data for the construction sector are also subject to sampling errors. For details on survey methodology and nonsampling and sampling errors, see Appendix III]

**Table 737. Nonemployer Establishments and Receipts by Industry: 2000 to 2003**

[Establishments: 16,530 represents 16,530,000. Includes only firms subject to federal income tax. Nonemployers are businesses with no paid employees. Data originate chiefly from administrative records of the Internal Revenue Service; see Appendix III. Data for 2000 based on the North American Industry Classification System (NAICS), 1997; beginning 2002 based on NAICS 2002, see text, this section]

**Table 740. Employer Firms, Establishments, Employment, and Annual Payroll by Enterprise Size: 1990 to 2003**

[In thousands except as noted (5,074 represents 5,074,000). Firms are an aggregation of all establishments owned by a parent company with some annual payroll. Establishments are locations with active payroll in any quarter. Employment is measured in March and payroll is annual leading to some enterprises with zero employment. This table illustrates the changing importance of enterprise sizes over time, not job growth, as enterprises can grow or decline and change enterprise size cells over time]

**Table 741. Firm Births and Deaths by Employment Size of Enterprise: 1990 to 2003**

[In thousands (541.1 represents 541,100). Data represent activity from March of the beginning year to March of the ending year. Establishments with no employment in the first quarter of the beginning year were excluded. This table provides the number of births and deaths of initial establishments (based on plant number) as an approximation of firm births and deaths]

| Item                      | Births (initial locations) |              |               |             | Deaths (initial locations) |              |               |             |

**Table 742. Employer Firms, Employment, and Annual Payroll by Enterprise Size and Industry: 2003**

[5,767 represents 5,767,000. A firm is an aggregation of all establishments owned by a parent company (within a geographic location and/or industry) with some annual payroll. A firm may be a single location or it can include multiple locations. Employment is measured in March and payroll is annual leading to some firms with zero employment. Numbers in parentheses represent North American Industry Classification System codes, 2002; see text, this section]

| Industry and data type   | Unit      | All industries—employment size of enterprise |     |        |        |          |          |            |               |             |

**Table 743. Employer Firms, Employment, and Payroll by Employment Size of Enterprise and State: 2000 and 2003**

[5,652.5 represents 5,652,500. A firm is an aggregation of all establishments owned by a parent company (within a state) with some annual payroll. A firm may be a single location or it can include multiple locations. Employment is measured in March and payroll is annual leading to some firms with zero employment]

**Table 744. Employer Firm Births and Deaths and Business Bankruptcies by State: 2000 to 2005**

[2004 and 2005 births and deaths data are estimated. At the state level, births represent requests for new employer codes, deaths represent the elimination of all employees, and a third category, successor firms or the rebirth of terminated firms, is not listed; so state deaths greater than state births does not necessarily indicate a loss of state employer firms]

| State                            | Births         |                |                | Deaths         |                |                | Business bankruptcies |               |               |
