## Section 1

# Population

---

This section presents statistics on the growth, distribution, and characteristics of the U.S. population. The principal source of these data is the U.S. Census Bureau, which conducts a decennial census of population, a monthly population survey, a program of population estimates and projections, and a number of other periodic surveys relating to population characteristics. For a list of relevant publications, see the Guide to Sources of Statistics in Appendix I.

**Decennial censuses**—The U.S. Constitution provides for a census of the population every 10 years, primarily to establish a basis for apportionment of members of the House of Representatives among the states. For over a century after the first census in 1790, the census organization was a temporary one, created only for each decennial census. In 1902, the Census Bureau was established as a permanent federal agency, responsible for enumerating the population and also for compiling statistics on other population and housing characteristics.

Historically, the enumeration of the population has been a complete count. That is, an attempt is made to account for every person, for each person's residence, and for other characteristics (sex, age, family relationships, etc.). Since the 1940 census, in addition to the complete count information, some data have been obtained from representative samples of the population. In the 1990 and 2000 censuses, variable sampling rates were employed. For most of the country, 1 in every 6 households (about 17 percent) received the long form or sample questionnaire; in governmental units estimated to have fewer than 2,500 inhabitants, every other household (50 percent) received the sample questionnaire to enhance the reliability of sample data for small areas. Exact agreement is not to be expected between sample data and the 100-percent count. Sample data may be

used with confidence where large numbers are involved and assumed to indicate trends and relationships where small numbers are involved.

**Current Population Survey (CPS)**—This is a monthly nationwide survey of a scientifically selected sample representing the noninstitutionalized civilian population. The sample is located in 754 areas with coverage in every state and the District of Columbia and is subject to sampling error. At the present time, about 60,000 occupied households are eligible for interview every month; of these, between 6 and 7 percent are, for various reasons, unavailable for interview.

While the primary purpose of the CPS is to obtain monthly statistics on the labor force, it also serves as a vehicle for inquiries on other subjects. Using CPS data, the Census Bureau issues a series of publications under the general title of *Current Population Reports*, which cover population characteristics (P20), consumer income (P60), special studies (P23), and other topics.

Estimates of population characteristics based on the CPS will not agree with the counts from the census because the CPS and the census use different procedures for collecting and processing the data for racial groups, the Hispanic population, and other topics. Caution should also be used when comparing estimates for various years because of the periodic introduction of changes into the CPS. Beginning in January 1994, a number of changes were introduced into the CPS that effect all data comparisons with prior years. These changes included the results of a major redesign of the survey questionnaire and collection methodology and the introduction of 1990 census population controls, adjusted for the estimated undercount. Beginning with the 2001 CPS Annual Demographic Supplement, the independent estimates used as control totals for the CPS are based on civilian population benchmarks consistent with Census 2000. In March 2002, the sample

size of the Annual Demographic Supplement was increased to approximately 78,000. In 2003 the name of the March supplement was changed to Annual Social and Economic Supplement. These changes in population controls had relatively little impact on derived measures such as means, medians, and percent distribution, but did have a significant impact on levels.

### **American Community Survey**

**(ACS)**—This is a nationwide survey to obtain data about demographic, social, economic, and housing information of people, households, and housing units. The survey collects the same type of information that has been collected every 10 years from the long-form questionnaire of the census, which the American Community Survey will replace. The estimates are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters.

### **Population estimates and projections**

—Estimates of the United States population are derived by updating the resident population enumerated in Census 2000 with information on the components of population change: births, deaths, and net international migration. The April 1, 2000, population used in these estimates reflects modifications to the Census 2000 population as documented in the Count Question Resolution program.

Registered births and deaths are estimated from data supplied by the National Center for Health Statistics. The net international migration component consists of three parts: (1) net migration of the foreign born, (2) emigration of natives, and (3) net movement from Puerto Rico to the United States (50 states and DC). Data from the American Community Survey are used to estimate the annual net migration of the foreign-born population. Estimates of native emigration and net movement between Puerto Rico and the United States are derived from the Demographic Analysis and Population Estimates (DAPE) project (see Population Division Working Paper Series, No. 63 and No. 64).

Estimates for state and county areas are based on the same components of change data and sources as the national estimates with the addition of net internal

migration. School enrollment statistics from state departments of education and parochial school systems, federal income tax returns from the Internal Revenue Service, group quarters data from the Federal-State Cooperative Program, and Medicare data from the Centers for Medicare and Medicaid Services are also included.

The population by age for April 1, 1990, (shown in Table 11) reflects modifications to the 1990 census data counts. The review of detailed 1990 information indicated that respondents tended to report age as of the date of completion of the questionnaire, not as of April 1, 1990. In addition, there may have been a tendency for respondents to round up their age if they were close to having a birthday. A detailed explanation of the age modification procedure appears in 1990 Census of Population and Housing, Data Paper Listing CPH-L74.

Population estimates and projections are available on the Census Bureau Internet site <<http://www.census.gov>>. These estimates and projections are consistent with official decennial census figures with no adjustment for estimated net census coverage. However, the categories for these estimates and projections by race have been modified and are not comparable to the census race categories (see section below under "Race"). For details on methodology, see the sources cited below the individual tables.

**Immigration**—Immigration (migration to a country) is one component of international migration; the other component is emigration (migration *from* a country). In its simplest form, international migration is defined as any movement across a national border. In the United States, federal statistics on international migration are produced primarily by the U.S. Census Bureau and the Office of Immigration Statistics (located in the Department of Homeland Security).

The Census Bureau collects data used to estimate international migration through its decennial censuses and numerous surveys of the U.S. population.

The Office of Immigration Statistics publishes immigration data in the *Yearbook of Immigration Statistics* and collects these data from several administrative records

such as the Immigrant Visa and Alien Registration (OF-155, U.S. State Department) for new arrivals, and the Memorandum of Creation of Record of Lawful Permanent Residence (I-181, INS) for persons adjusting migrant status. Immigrants are aliens admitted for legal permanent residence in the United States. The category, immigrant, includes persons who may have entered the United States as nonimmigrants or refugees, but who subsequently changed their status to that of a permanent resident. Nonresident aliens admitted to the United States for a temporary period are nonimmigrants. Refugees are considered nonimmigrants when initially admitted into the United States but are not included in nonimmigrant admission data. A refugee is an alien outside the United States who is unable or unwilling to return to his or her country of nationality because of persecution or a well-founded fear of persecution. After 1 year of residence in the United States, refugees are eligible for immigrant status.

U.S. immigration law gives preferential immigration status to persons with a close family relationship with a U.S. citizen or legal permanent resident, persons with needed job skills, or persons who qualify as refugees. Immigration to the United States can be divided into two general categories: (1) those subject to the annual worldwide limitation and (2) those exempt from it. Numerical limits are imposed on visas issued and not on admissions. The maximum number of visas allowed to be issued under the preference categories in 2005 was 374,449—226,000 for family-sponsored immigrants and 148,449 for employment-based immigrants. Those exempt from the worldwide limitation include immediate relatives of U.S. citizens, refugees and asylees adjusting to permanent residence, and other various classes of special immigrants (see Table 6).

**Metropolitan and micropolitan areas**—The United States Office of Management and Budget (OMB) defines metropolitan and micropolitan statistical areas according to published standards that are applied to Census Bureau data. The general concept of a metropolitan or micropolitan statistical area is that of a core area containing a substantial population

nucleus, together with adjacent communities having a high degree of economic and social integration with that core. Currently defined metropolitan and micropolitan statistical areas are based on application of 2000 standards to 2000 decennial census data as updated by application of those standards to more recent Census Bureau population estimates. The term “metropolitan area” (MA) was used to refer collectively to metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs) as defined according to 1980 and 1990 standards. The term “core-based statistical area” (CBSA) became effective in 2003 and refers collectively to metropolitan and micropolitan statistical areas.

Over time, new statistical areas are created and the components of others change. Because of historical changes in geographic definitions, users must be cautious in comparing data for these statistical areas from different dates. For some purposes, comparisons of data for areas as defined at given dates may be appropriate; for other purposes, it may be preferable to maintain consistent area definitions. For descriptive details and a list of titles and components of metropolitan and micropolitan statistical areas, see Appendix II.

**Urban and rural**—For Census 2000, the Census Bureau classified as urban all territory, population, and housing units located within urbanized areas (UAs) and urban clusters (UCs). A UA consists of densely settled territory that contains 50,000 or more people, while a UC consists of densely settled territory with at least 2,500 people but fewer than 50,000 people. (UCs are a new type of geographic entity for Census 2000.) From the 1950 census through the 1990 census, the urban population consisted of all people living in UAs and most places outside of UAs with a census population of 2,500 or more.

UAs and UCs encompass territory that generally consists of:

- A cluster of one or more block groups or census blocks each of which has a population density of at least 1,000 people per square mile at the time.

- Surrounding block groups and census blocks each of which has a population density of at least 500 people per square mile at the time.
- Less densely settled blocks that form enclaves or indentations, or are used to connect discontinuous areas with qualifying densities.

They also may include an airport located adjacent to qualifying densely settled area if it has an annual enplanement (aircraft boarding) of at least 10,000 people.

“Rural” for Census 2000 consists of all territory, population, and housing units located outside of UAs and UCs. Prior to Census 2000, rural consisted of all territory, population, and housing outside of UAs and outside of other places designated as “urban.” For Census 2000, many more geographic entities, including metropolitan areas, counties, county subdivisions, and places, contain both urban and rural territory, population, and housing units.

**Residence**—In determining residence, the Census Bureau counts each person as an inhabitant of a usual place of residence (i.e., the place where one lives and sleeps most of the time). While this place is not necessarily a person’s legal residence or voting residence, the use of these different bases of classification would produce the same results in the vast majority of cases.

**Race**—For the 1990 census, the Census Bureau collected and published racial statistics as outlined in Statistical Policy Directive No. 15 issued by the U.S. Office of Management and Budget (OMB). This directive provided standards on ethnic and racial categories for statistical reporting to be used by all federal agencies. According to the directive, the basic racial categories were American Indian or Alaska Native, Asian or Pacific Islander, Black, and White. (The directive identified Hispanic origin as an ethnicity.) The question on race for Census 2000 was different from the one for the 1990 census in several ways. Most significantly, respondents were given the option of selecting one or more race categories to indicate their racial identities. Because of these changes, the Census 2000 data on race are not directly comparable with data from the 1990 census or earlier censuses.

Caution must be used when interpreting changes in the racial composition of the United States population over time. Census 2000 adheres to the federal standards for collecting and presenting data on race and ethnicity as established by OMB in October 1997. Starting with Census 2000, the OMB requires federal agencies to use a minimum of five race categories: White, Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian or Other Pacific Islander. Additionally, to collect data on individuals of mixed race parentage, respondents were allowed to select one or more races. For respondents unable to identify with any of these five race categories, OMB approved and included a sixth category—“Some other race” on the Census 2000 questionnaire. The Census 2000 question on race included 15 separate response categories and three areas where respondents could write in a more specific race group. The response categories and write-in answers can be combined to create the five minimum OMB race categories plus “Some other race.” People who responded to the question on race by indicating only one race are referred to as the *race alone* population, or the group that reported only one race category. Six categories make up this population: White alone, Black or African American alone, American Indian and Alaska Native alone, Asian alone, Native Hawaiian and Other Pacific Islander alone, and Some other race alone. Individuals who chose more than one of the six race categories are referred to as the *Two or More Races* population, or as the group that reported more than one race. Additionally, respondents who reported one race together with those who reported the same race plus one or more other races are combined to create the *race alone or in combination* categories. For example, the *White alone or in combination group* consists of those respondents who reported only White or who reported White combined with one or more other race groups, such as “White and Black or African American,” or “White and Asian and American Indian and Alaska Native.” Another way to think of the group who reported White alone or in combination is as the total number of people who identified entirely or partially as White. This

group is also described as people who reported White, whether or not they reported any other race.

The *alone or in combination* categories are tallies of *responses* rather than *respondents*. That is, the alone or in combination categories are not mutually exclusive. Individuals who reported two races were counted in two separate and distinct alone or in combination race categories, while those who reported three races were counted in three categories, and so on. Consequently, the sum of all alone or in combination categories equals the number of races reported (i.e., responses) which exceeds the total population.

The concept of race, as used by the Census Bureau, reflects self-identification by people according to the race or races with which they most closely identify. These categories are sociopolitical constructs and should not be interpreted as being scientific or anthropological in nature. Furthermore, the race categories include both racial and national-origin groups. Additionally, data are available for the American Indian and Alaska Native tribes. A detailed explanation of race can be found at <<http://www.census.gov/prod/cen2000/doc/sf1.pdf>>.

Data for the population by race for April 1, 2000, (shown in Tables 13, 14, and 15) are modified counts and are not comparable to Census 2000 race categories. These numbers were computed using Census 2000 data by race that had been modified to be consistent with the 1997 Office of Management and Budget's, "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity," (Federal Register Notice, Vol. 62, No 210, October 1997). A detailed explanation of the race modification procedure appears on the Census Web page <[http://www.census.gov/popest/topics/methodology/2003\\_nat\\_char\\_meth.html](http://www.census.gov/popest/topics/methodology/2003_nat_char_meth.html)>.

In the CPS and other household sample surveys in which data are obtained through personal interview, respondents are asked to classify their race as: (1) White; (2) Black, African American, or Negro; (3) American Indian or Alaska Native; (4) Asian; (5) Native Hawaiian or Other Pacific Islander. Beginning January

2003, respondents were allowed to report more than one race to indicate their mixed racial heritage.

**Hispanic population**—The Census Bureau collected data on the Hispanic origin population in the 2000 census by using a self-identification question. Persons of Spanish/Hispanic/Latino origin are those who classified themselves in one of the specific Hispanic origin categories listed on the questionnaire—Mexican, Puerto Rican, Cuban, as well as those who indicated that they were of Other Spanish/Hispanic/Latino origin. Persons of Other Spanish/Hispanic/Latino origin are those whose origins are from Spain, the Spanish-speaking countries of Central or South America, or the Dominican Republic.

In the CPS, information on Hispanic persons is gathered by using a self-identification question. Based on a two-part question, the respondents are first asked whether or not they are of Hispanic, Spanish, or Latino origin and based on their response are further classified into the following categories: Mexican or Mexican-American or Chicano; Puerto Rican; Cuban; Central or South American; or Other Hispanic, Spanish, or Latino origin group.

Traditional and current data collection and classification treat race and Hispanic origin as two separate and distinct concepts in accordance with guidelines from the OMB. Race and Hispanic origin are two separate concepts in the federal statistical system. People who are Hispanic may be any race and people in each race group may be either Hispanic or Not Hispanic. Also, each person has two attributes, their race (or races) and whether or not they are Hispanic. The overlap of race and Hispanic origin is the main comparability issue. For example, Black Hispanics (Hispanic Blacks) are included in both the number of Blacks and in the number of Hispanics. For further information, see Census Web page <<http://www.census.gov/population/www/socdemo/compraceho.html>>.

**Foreign-born and native populations**—The Census Bureau separates the U.S. resident population into two groups based on whether or not a person was a U.S. citizen or U.S. national at the time of

birth. Anyone born in the United States, Puerto Rico, or a U.S. Island Area (such as Guam) or born abroad to a U.S. citizen parent is a U.S. citizen at the time of birth and consequently included in the *native population*. The term *foreign-born population* refers to anyone who is not a U.S. citizen or U.S. national at birth. This includes naturalized U.S. citizens, legal permanent resident aliens (immigrants), temporary migrants (such as foreign students), humanitarian migrants (such as refugees), and people illegally present in the United States. The Census Bureau provides a variety of demographic, social, economic, geographic, and housing information on the foreign-born population in the United States. More information on the foreign-born population collected from censuses and surveys is available at <http://www.census.gov/population/www/socdemo/foreign.html>.

**Mobility status**—The U.S. population is classified according to mobility status on the basis of a comparison between the place of residence of each individual at the time of the survey or census and the place of residence at a specified earlier date. Nonmovers are all persons who were living in the same house or apartment at the end of the period as at the beginning of the period. Movers are all persons who were living in a different house or apartment at the end of the period than at the beginning of the period. Movers are further classified as to whether they were living in the same or different county, state, or region or were movers from abroad. Movers from abroad include all persons, either U.S. citizens or noncitizens, whose place of residence was outside the United States at the beginning of the period; that is, in Puerto Rico, another U.S. Island Area, or a foreign country.

**Living arrangements**—Living arrangements refer to residency in households or in group quarters. A “household” comprises all persons who occupy a “housing unit,” that is, a house, an apartment or other group of rooms, or a single room that constitutes “separate living quarters.” A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children,

wards, or employees who share the housing unit. A person living alone or a group of unrelated persons sharing the same housing unit is also counted as a household. See text, Section 20, Construction and Housing, for definition of housing unit.

All persons not living in housing units are classified as living in group quarters. These individuals may be institutionalized, e.g., under care or custody in juvenile facilities, jails, correctional centers, hospitals, or nursing homes; or they may be residents in noninstitutional group quarters such as college dormitories, group homes, or military barracks.

**Householder**—The householder is the person in whose name the home is owned or rented. If a home is owned or rented jointly by a married couple, either the husband or the wife may be listed first.

**Family**—The term family refers to a group of two or more persons related by birth, marriage, or adoption and residing together in a household. A family includes among its members the householder.

**Subfamily**—A subfamily consists of a married couple and their children, if any, or one parent with one or more never-married children under 18 years old living in a household. Subfamilies are divided into “related” and “unrelated” subfamilies. A related subfamily is related to, but does not include, the householder. Members of a related subfamily are also members of the family with whom they live. The number of related subfamilies, therefore, is not included in the count of families. An unrelated subfamily may include persons such as guests, lodgers, or resident employees and their spouses and/or children; none of whom is related to the householder.

**Married couple**—A married couple is defined as a husband and wife living together in the same household, with or without children and other relatives.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

**Table 1. Population and Area: 1790 to 2000**

[Area figures represent area on indicated date including in some cases considerable areas not then organized or settled, and not covered by the census. Beginning 1870, area data include Alaska and Hawaii. Total area figures for 1790 to 1970 have been recalculated on the basis of the remeasurement of states and counties for the 1980 census, but not on the basis of the 1990 census. The land and water area figures for past censuses have not been adjusted and are not strictly comparable with the total area data for comparable dates because the land areas were derived from different base data, and these values are known to have changed with the construction of reservoirs, draining of lakes, etc. Density figures are based on land area measurements as reported in earlier censuses]

| Census date              | Resident population      |                              |                                |         | Area (square miles)    |           |                      |
|--------------------------|--------------------------|------------------------------|--------------------------------|---------|------------------------|-----------|----------------------|
|                          | Number                   | Per square mile of land area | Increase over preceding census |         | Total                  | Land      | Water <sup>1</sup>   |
|                          |                          |                              | Number                         | Percent |                        |           |                      |
| 1790 (Aug. 2) . . . . .  | 3,929,214                | 4.5                          | (X)                            | (X)     | 891,364                | 864,746   | 24,065               |
| 1800 (Aug. 4) . . . . .  | 5,308,483                | 6.1                          | 1,379,269                      | 35.1    | 891,364                | 864,746   | 24,065               |
| 1810 (Aug. 6) . . . . .  | 7,239,881                | 4.3                          | 1,931,398                      | 36.4    | 1,722,685              | 1,681,828 | 34,175               |
| 1820 (Aug. 7) . . . . .  | 9,638,453                | 5.5                          | 2,398,572                      | 33.1    | 1,792,552              | 1,749,462 | 38,544               |
| 1830 (June 1) . . . . .  | 12,866,020               | 7.4                          | 3,227,567                      | 33.5    | 1,792,552              | 1,749,462 | 38,544               |
| 1840 (June 1) . . . . .  | 17,069,453               | 9.8                          | 4,203,433                      | 32.7    | 1,792,552              | 1,749,462 | 38,544               |
| 1850 (June 1) . . . . .  | 23,191,876               | 7.9                          | 6,122,423                      | 35.9    | 2,991,655              | 2,940,042 | 52,705               |
| 1860 (June 1) . . . . .  | 31,443,321               | 10.6                         | 8,251,445                      | 35.6    | 3,021,295              | 2,969,640 | 52,747               |
| 1870 (June 1) . . . . .  | <sup>2</sup> 39,818,449  | <sup>2</sup> 11.2            | 8,375,128                      | 26.6    | 3,612,299              | 3,540,705 | 68,082               |

X Not applicable. <sup>1</sup> Data for 1790 to 1980 cover inland water only. Data for 1990 comprise Great Lakes, inland, and coastal water. Data for 2000 comprise Great Lakes, inland, territorial, and coastal water. <sup>2</sup> Revised to include adjustments for underenumeration in southern states; unrevised number is 38,558,371 (10.9 per square mile). <sup>3</sup> Total population count has been revised since the 1980 census publications. Numbers by age, race, Hispanic origin, and sex have not been corrected. <sup>4</sup> The April 1, 1990, census count includes count question resolution corrections processed through December 1997, and does not include adjustments for census coverage errors. <sup>5</sup> Data reflect corrections made after publication of the results. <sup>6</sup> Reflects modifications to the Census 2000 population as documented in the Count Question Resolution program.

**Table 3. Resident Population Projections: 2006 to 2050**

[298,217 represents 298,217,000. As of July 1. The projections are based on assumptions about future childbearing, mortality, and migration. The level of childbearing among women is assumed to remain close to present levels, with differences by race and Hispanic origin diminishing over time. Mortality is assumed to decline gradually with less variation by race and Hispanic origin than at present. International migration is assumed to vary over time and decrease generally relative to the size of the population]

<sup>1</sup> Total population count has been revised since the 1980 census publications. Numbers by age and sex have not been corrected. <sup>2</sup> The data shown have been modified from the official 1990 census counts. See text of this section for explanation. The April 1, 1990, estimates base (248,790,925) includes count resolution corrections processed through August 1997. It generally does not include adjustments for census coverage errors. However, it includes adjustments estimated for the 1995 Test Census in various localities in California, New Jersey, and Louisiana; and the 1998 census dress rehearsals in localities in California and Wisconsin. These adjustments amounted to a total of 81,052 persons. <sup>3</sup> The April 1, 2000, population estimates base reflects changes to the Census 2000 population from the Count Question Resolution program and geographic program revisions.

Figure 1.1  
**Center of Population: 1790 to 2000**

[Prior to 1960, excludes Alaska and Hawaii. The median center is located at the intersection of two median lines, a north-south line constructed so that half of the nation's population lives east and half lives west of it, and an east-west line selected so that half of the nation's population lives north and half lives south of it. The mean center of population is that point at which an imaginary, flat, weightless, and rigid map of the United States would balance if weights of identical value were placed on it so that each weight represented the location of one person on the date of the census]

| Year            | Median center |           | Mean center |             |   |

**Table 19. State Resident Population—Projections: 2010 to 2030**

[As of July 1. These projections were produced in correspondence with the U.S. interim projections released in March 2004 (see Table 3). They were developed for each of the 50 states and the District of Columbia by age and sex for the years 2000 to 2030, based on Census 2000 results. These projections differ from forecasts in that they represent the results of the mathematical projection model given that current state-specific trends in fertility, mortality, internal migration and international migration continue. The projections to 2005 have been superseded by population estimates which are shown in Table 17. Minus sign (–) indicates decrease]

Source: U.S. Census Bureau, "Age and Sex for States and for Puerto Rico: April 1, 2000 to July 1, 2005"; published 4 August 2006; <<http://www.census.gov/popest/states/asrh/SC-EST2005-02.html>>.

**Table 22. Resident Population by Age and State—Projections: 2010 and 2015**

[As of July 1, 74,432 represents 74,432,000. These projections were produced in correspondence with the U.S. interim projections released in March 2004 (see Tables 3 and 12). They were developed for each of the 50 states and the District of Columbia by age and sex for the years 2000 to 2030, based on Census 2000 results. These projections differ from forecasts in that they represent the results of the mathematical projection model given that current state-specific trends in fertility, mortality, internal migration and international migration continue. The projections to 2005 have been superseded by population estimates which are shown in Table 21]

**Table 23. Resident Population by Race, Hispanic or Latino Origin, and State: 2005**

[In thousands (296,410 represents 296,410,000). As of July. Persons of Hispanic or Latino origin may be of any race. Due to the complexities associated with the production of detailed characteristics' estimates at the state level, the values of the estimates at lower levels of geography may not necessarily sum to estimates at higher levels of geography]

| State               | Total population | One race       |                                 |                                     |               |  | Two or more races | Hispanic or Latino origin | Non-Hispanic White alone |

**Table 25. Large Metropolitan Statistical Areas—Population: 1990 to 2005—Con.**

[1990 and 2000, as of April 1; beginning 2003 as of July 1 (658 represents 658,000). Covers metropolitan statistical areas with 250,000 and over population in 2005, as defined by the U.S. Office of Management and Budget as of December 2005. For definitions and components of all metropolitan and micropolitan areas, see Appendix II. Minus sign (–) indicates decrease]

**Table 25. Large Metropolitan Statistical Areas—Population: 1990 to 2005—Con.**

[1990 and 2000, as of April 1; beginning 2003 as of July 1 (658 represents 658,000). Covers metropolitan statistical areas with 250,000 and over population in 2005, as defined by the U.S. Office of Management and Budget as of December 2005. For definitions and components of all metropolitan and micropolitan areas, see Appendix II. Minus sign (-) indicates decrease.]

<sup>1</sup> Z Less than 0.05 percent. <sup>2</sup> Reflects modifications to the Census 2000 population as documented in the Count Question Resolution program, updates to the Boundary and Annexation Survey, and geographic program revisions. <sup>3</sup> Broomfield County, CO was formed from parts of Adams, Boulder, Jefferson, and Weld Counties, CO on November 15, 2001, and is coextensive with Broomfield city. For purposes of defining and presenting data for metropolitan statistical areas, Broomfield city is treated as if it were a county at the time of the 1990 and 2000 censuses. <sup>4</sup> The portion of Sullivan city in Crawford County, Missouri, is legally part of the St. Louis, MO-IL MSA. Data shown here do not include this area.

<sup>1</sup> Based on the April 1, 2000, Population Estimates base which reflects changes to the Census 2000 population from the Count Question Resolution program and geographic program revisions. Includes residual not shown separately. <sup>2</sup> Broomfield County, CO, was formed from parts of Adams, Boulder, Jefferson, and Weld Counties, CO, on November 15, 2001, and is coextensive with Broomfield city. For purposes of defining and presenting data for metropolitan statistical areas, Broomfield city is treated as if it were a county at the time of the 2000 census. <sup>3</sup> The portion of Sullivan city in Crawford County, Missouri, is legally part of the St. Louis, MO-IL MSA. Data shown here do not include this area.

Source: U.S. Census Bureau, "Table 2: Cumulative Estimates of the Components of Population Change for Metropolitan and Micropolitan Statistical Areas: April 1, 2000 to July 1, 2005 (CBSA-EST2005-02)"; published 21 August 2006; <<http://www.census.gov/population/www/estimates/Estimates%20pagesfinal.html>>.

**Table 27. 50 Largest Metropolitan Statistical Areas—Population by Race and Hispanic Origin: 2005**

[In thousands (4,918 represents 4,918,000). As of July 1. Covers metropolitan statistical areas as defined by the U.S. Office of Management and Budget as of December 2005. For definitions and components of all metropolitan and micropolitan areas, see Appendix II]

| Metropolitan statistical area                                | Total persons | White alone | Black or African American alone | American Indian and Alaska Native alone | Asian alone | Native Hawaiian and Other Pacific Islander alone | Two or more races | Hispanic or Latino origin <sup>1</sup> |

**Table 29. Population in Coastal Counties: 1980 to 2005**

[Population as of April 1, except as indicated (3,537 represents 3,537,000). Areas as defined by U.S. National Oceanic and Atmospheric Administration, 1992. Covers 673 counties and equivalent areas with at least 15 percent of their land area either in a coastal watershed (drainage area) or in a coastal cataloging unit (a coastal area between watersheds). See Appendix III]

<sup>1</sup> The April 1, 2000, Population Estimates base reflects changes to the Census 2000 population from the Count Question Resolution program and geographic program revisions. <sup>2</sup> The population shown is for the census designated place (CDP). <sup>3</sup> Represents the portion of a consolidated city that is not within one or more separately incorporated places. <sup>4</sup> Number is for the incorporated place of Augusta city before consolidation of the city and county governments. <sup>5</sup> Data are for the incorporated place of Louisville city before consolidation of the city and county governments. <sup>6</sup> Not incorporated.

**Table 34. Mobility Status of the Population by Selected Characteristics: 1981 to 2005**

[As of March (221,641 represents 221,641,000). For persons 1 year old and over. Based on comparison of place of residence in immediate prior year and year shown. Excludes members of the Armed Forces except those living off post or with their families on post. Based on Current Population Survey, Annual Social and Economic Supplement; see text of this section and Appendix III. For composition of regions, see map, inside front cover]

| Mobility period and characteristic              | Total (1,000)  | Percent distribution |   |             |                  |            |                 | Movers from abroad |

**Table 37. Mobility Status of Resident Population by State: 2004**

[In percent, except as indicated (281,762 represents 281,762,000). Based on comparison of place of residence in 2003 and 2004. The American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Based on a sample and subject to sampling variability; see text, this section and Appendix III]

**Table 38. Persons 65 Years Old and Over—Characteristics by Sex: 1990 to 2005**

[As of March, except as noted (29.6 represents 29,600,000). Covers civilian noninstitutional population. Excludes members of Armed Forces except those living off post or with their families on post. Data for 1990 are based on 1980 census population controls; 1995 and 2000 data based on 1990 census population controls; 2004 and 2005 data based on 2000 census population controls and an expanded sample of households. Based on Current Population Survey; see text of this section and Appendix III]

**Table 41. Social and Economic Characteristics of the White and Black Populations: 1990 to 2004**

[As of March, except labor force status, annual average (134,687 represents 134,687,000). Excludes members of Armed Forces except those living off post or with their families on post. Data for 1990 are based on 1980 census population controls; 2000 data (except for income and poverty) based on 1990 census population controls; 2004 data and 2000 data for income and poverty based on 2000 census population controls and an expanded sample of households. Based on Current Population Survey; see text of this section and Appendix III]

**Table 42. American Indian and Alaska Native Population by Tribe: 2000**

[As of April. This table shows data for American Indian and Alaska Native tribes alone or in combination of tribes or races. Respondents who identified themselves as American Indian or Alaska Native were asked to report their enrolled or principal tribe. Therefore, data shown here reflect the written tribal entries reported on the questionnaire. Some of the entries (for example, Iroquois, Sioux, Colorado River, and Flathead) represent nations or reservations. The information on tribe is based on self-identification and includes federally- or state-recognized tribes, as well as bands and clans]

| American Indian and Alaska Native tribe | Number           | American Indian and Alaska Native tribe | Number  |
|---|------------------|---|---------|
| <b>Total persons</b> <sup>1</sup>       | <b>4,119,301</b> | Osage                                   | 15,897  |
| Apache                                  | 96,833           | Ottawa                                  | 10,677  |
| Blackfeet                               | 85,750           | Paiute                                  | 13,532  |
| Cherokee                                | 729,533          | Pima                                    | 11,493  |

**Table 47. Foreign-Born Population—Selected Characteristics by Region of Origin: 2005**

[In thousands (35,157 represents 35,157,000). As of March. The term foreign-born refers to anyone who is not a U.S. citizen at birth. This includes naturalized U.S. citizens, legal permanent residents (immigrants), temporary migrants (such as foreign students), humanitarian migrants (such as refugees), and persons illegally present in the United States. Based on Current Population Survey, Annual Social and Economic Supplement; see text this section and Appendix III]

**Table 48. Foreign-Born Population by Place of Birth and Citizenship Status: 2004**

[In thousands, except percent (34,280 represents 34,280,000). The term foreign-born refers to anyone who is not a U.S. citizen at birth. This includes naturalized U.S. citizens, legal permanent residents (immigrants), temporary migrants (such as foreign students), humanitarian migrants (such as refugees), and persons illegally present in the United States. The survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Based on a sample and subject to sampling variability; see text of this section and Appendix III]

B Not shown; base less than 75,000. X Not applicable. <sup>1</sup> Beginning with the 2003 Current Population Survey (CPS), respondents could choose more than one race. Beginning 2003, data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years only allowed respondents to report one race group. See also comments on race in the text for this section. <sup>2</sup> Persons of Hispanic origin may be of any race. <sup>3</sup> No spouse present. <sup>4</sup> Under 18 years old.

| Five persons . . . . .                   | 6.2         | 6.6         | 7.0          | 7.2                | 5.8                | 0.9                | 0.3                | 1.6                   | 4.4                             |
| Six persons . . . . .                    | 2.1         | 2.3         | 2.4          | 2.5                | 1.9                | 0.4                | 0.1                | 0.7                   | 1.2                             |
| Seven persons or more . . . . .          | 1.3         | 1.4         | 1.4          | 1.4                | 1.0                | 0.2                | 0.1                | 0.4                   | 0.6                             |

<sup>1</sup> Includes other races, not shown separately. <sup>2</sup> Beginning with the 2003 Current Population Survey (CPS), respondents could choose more than one race. 2005 data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years only allowed respondents to report one race group. See also comments on race in the text for this section. <sup>3</sup> Hispanic persons may be of any race.

**Table 62. Family Groups With Children Under 18 Years Old by Race and Hispanic Origin: 1990 to 2005**

[In thousands. As of March (34,670 represents 34,670,000). Family groups comprise family households, related subfamilies, and unrelated subfamilies. Excludes members of Armed Forces except those living off post or with their families on post. Population controls for 2005 based on Census 2000 and an expanded sample of households. Based on Current Population Survey, see text of this section, and Appendix III]

— Represents or rounds to zero. NA Not available. <sup>1</sup> Includes other races, not shown separately. <sup>2</sup> Beginning with the 2003 Current Population Survey (CPS), respondents could choose more than one race. 2005 data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS prior to 2003 allowed respondents to report only one race group. See also comments on race in the text for this section. <sup>3</sup> Hispanic persons may be of any race.

**Table 63. Parents and Children in Stay-At-Home Parent Family Groups: 1995 to 2005**

[In thousands (22,973 represents 22,973,000). Family groups with children include those families that maintain their own household (family households with own children); those that live in the home of a relative (related subfamilies); and those that live in the home of a nonrelative (unrelated subfamilies). Stay-at-home family groups are married-couple family groups with children under 15 where one parent is in the labor force all of the previous year and their spouse is out of the labor force for the entire year with the reason 'taking care of home and family.' Only married couples with children under 15 are included. Based on Current Population Survey; see Appendix III]

| Year | Married-couple family groups with children under 15 years old |                           |                           | Children under 15 years old in married-couple family groups |                           |                           |

NA Not available. <sup>1</sup> Includes other races not shown separately. <sup>2</sup> Beginning with the 2003 Current Population Survey, (CPS) respondents could choose more than one race. 2005 data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS prior to 2003 allowed respondents to report only one race group. See also comments on race in the text for this section. <sup>3</sup> Hispanic persons may be of any race.

<sup>1</sup> Includes other races, not shown separately. <sup>2</sup> No spouse present. <sup>3</sup> Beginning with the 2003 Current Population Survey (CPS), respondents could choose more than one race. 2005 data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS prior to 2003 only allowed respondents to report one race group. See also comments on race in the text for this section. <sup>4</sup> Hispanic persons may be of any race.

**Table 73. Self-Described Religious Identification of Adult Population: 1990 and 2001**

[In thousands (175,440 represents 175,440,000). The American Religious Identification Survey (ARIS) 2001 was based on a random digit-dialed telephone survey of 50,281 American residential households in the continental U.S.A. (48 states). Respondents were asked to describe themselves in terms of religion with an open-ended question. Interviewers did not prompt or offer a suggested list of potential answers. Moreover, the self-description of respondents was not based on whether established religious bodies, institutions, churches, mosques, or synagogues considered them to be members. Quite the contrary, the survey sought to determine whether the respondents themselves regarded themselves as adherents of a religious community. Subjective rather than objective standards of religious identification were tapped by the surveys]

| Religious group                                       | 1990           | 2001           | Religious group                        | 1990   | 2001   |

| Foursquare Gospel . . . . .                           | 28             | 70             |  |        |        |

NA Not available. <sup>1</sup> Refers to the total number of adults in all fifty states. All other figures are based on projections from surveys conducted in the continental United States (48 states). <sup>2</sup> Because of the subjective nature of replies to open-ended questions, these categories are the most unstable as they do not refer to clearly identifiable denominations as much as underlying feelings about religion. Thus they may be the most subject to fluctuation over time.

Kosmin and Ariela Keysar, Institute for the Study of Secularism in Society and Culture, Trinity College, Hartford, CT, <<http://www.trincoll.edu/secularisminstitute>> (Copyright).

**Table 74. Religious Bodies—Selected Data**

[Membership data: 2,500 represents 2,500,000. Includes the self-reported membership of religious bodies with 750,000 or more as reported to the *Yearbook of American and Canadian Churches*. Groups may be excluded if they do not supply information. The data are not standardized so comparisons between groups are difficult. The definition of “church member” is determined by the religious body]

**Table 75. Christian Church Adherents, 2000, and Jewish Population, 2003—States**

[133,377 represents 133,377,000. Christian church adherents were defined as “all members, including full members, their children and the estimated number of other regular participants who are not considered as communicant, confirmed or full members.” The Jewish population includes Jews who define themselves as Jewish by religion as well as those who define themselves as Jewish in cultural terms. Data on Jewish population are based primarily on a compilation of individual estimates made by local Jewish federations. Additionally, most large communities have completed Jewish demographic surveys from which the Jewish population can be determined]

## Section 2

# Vital Statistics

---

This section presents vital statistics data on births, deaths, abortions, fetal deaths, fertility, life expectancy, marriages, and divorces. Vital statistics are compiled for the country as a whole by the National Center for Health Statistics (NCHS) and published in its annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, and in the *National Vital Statistics Reports* (formerly *Monthly Vital Statistics Report*). Reports in this field are also issued by the various state bureaus of vital statistics. Data on fertility, on age of persons at first marriage, and on marital status and marital history are compiled by the U.S. Census Bureau from its Current Population Survey (CPS; see text, Section 1) and published in *Current Population Reports*, P20 Series. Data on abortions are published by the Alan Guttmacher Institute, New York, NY, in selected issues of *Perspectives on Sexual and Reproductive Health* online at <[www.agi-usa.org/sections/abortion.php](http://www.agi-usa.org/sections/abortion.php)>.

**Registration of vital events**—The registration of births, deaths, fetal deaths, and other vital events in the United States is primarily a state and local function. The civil laws of every state provide for a continuous and permanent birth- and death-registration system. Many states also provide for marriage- and divorce-registration systems. Vital events occurring to U.S. residents outside the United States are not included in the data.

**Births and deaths**—The live-birth, death, and fetal-death statistics prepared by NCHS are based on vital records filed in the registration offices of all states, New York City, and the District of Columbia. The annual collection of death statistics on a national basis began in 1900 with a national death-registration area of ten states and the District of Columbia; a similar annual collection of birth statistics for a national birth-registration area began in 1915, also with ten reporting states and the District of Columbia. Since 1933, the birth- and death-registration areas have comprised the entire United

States, including Alaska (beginning 1959) and Hawaii (beginning 1960). National statistics on fetal deaths were first compiled for 1918 and annually since 1922.

Prior to 1951, birth statistics came from a complete count of records received in the Public Health Service (now received in NCHS). From 1951 through 1971, they were based on a 50-percent sample of all registered births (except for a complete count in 1955 and a 20- to 50-percent sample in 1967). Beginning in 1972, they have been based on a complete count for states participating in the Vital Statistics Cooperative Program (VSCP) (for details, see the technical appendix in *Vital Statistics of the United States*) and on a 50-percent sample of all other areas. Beginning in 1986, all reporting areas participated in the VSCP. Mortality data have been based on a complete count of records for each area (except for a 50-percent sample in 1972). Beginning in 1970, births to and deaths of nonresident aliens of the United States and U.S. citizens outside the United States have been excluded from the data. Fetal deaths and deaths among Armed Forces abroad are excluded. Data based on samples are subject to sampling error; for details, see annual issues of *Vital Statistics of the United States*.

Mortality statistics by cause of death are compiled in accordance with World Health Organization regulations according to the *International Classification of Diseases* (ICD). The ICD is revised approximately every 10 years. The tenth revision of the ICD was employed beginning in 1999. Deaths for prior years were classified according to the revision of the ICD in use at the time. Each revision of the ICD introduces a number of discontinuities in mortality statistics; for a discussion of those between the ninth and tenth revisions of the ICD, see *National Vital Statistics Reports*, Vol. 49, Nos. 2 and 8. Preliminary mortality data are based on a percentage of death records weighted up to the total number of deaths reported for the given

year; for a discussion of preliminary data, see *National Vital Statistics Reports*, Vol. 49, No. 3. Information on tests of statistical significance, differences between death rates, and standard errors can also be found in the reports mentioned above.

Some of the tables present age-adjusted death rates in addition to crude death rates. Age-adjusted death rates shown in this section were prepared using the direct method, in which age-specific death rates for a population of interest are applied to a standard population distributed by age. Age adjustment eliminates the differences in observed rates between points in time or among compared population groups that result from age differences in population composition.

**Fertility and life expectancy**—The total fertility rate, defined as the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year, is compiled and published by NCHS. Other data relating to social and medical factors that affect fertility rates, such as contraceptive use and birth expectations, are collected and made available by both NCHS and the Census Bureau. NCHS figures are based on information in birth and fetal death certificates and on the periodic National Surveys of Family Growth; Census Bureau data are based on decennial censuses and the CPS.

Data on life expectancy, the average remaining lifetime in years for persons who attain a given age, are computed and published by NCHS. For details, see *National Vital Statistics Reports*, Vol. 52, No. 3.

**Marriage and divorce**—The compilation of nationwide statistics on marriages and divorces in the United States began in 1887–88, when the National Office of Vital Statistics prepared estimates for the years 1867–86. Although periodic updates took place after 1888, marriage and divorce statistics were not collected and published annually until 1944 by that office. In 1957 and 1958 respectively, the same office established marriage- and divorce-registration areas. Beginning in 1957, the marriage-registration area comprised 30 states, plus Alaska, Hawaii,

Puerto Rico, and the Virgin Islands; it currently includes 42 states and the District of Columbia. The divorce-registration area, starting in 1958 with 14 states, Alaska, Hawaii, and the Virgin Islands, currently includes a total of 31 states and the Virgin Islands. Procedures for estimating the number of marriages and divorces in the registration states are discussed in *Vital Statistics of the United States*, Vol. III—Marriage and Divorce. Total counts of events for registration and nonregistration states are gathered by collecting already summarized data on marriages and divorces reported by state offices of vital statistics and by county offices of registration. The collection and publication of detailed marriage and divorce statistics (for example: by age and race) was suspended beginning in January 1996. For additional information, contact the National Center for Health Statistics online at <<http://www.cdc.gov/nchs/datawh/datasite/frnotice.htm>>.

**Vital statistics rates**—Except as noted, vital statistics rates computed by NCHS are based on decennial census population figures as of April 1 for 1940, 1950, 1960, 1970, 1980, 1990, and 2000; and on midyear population figures for other years, as estimated by the Census Bureau (see text, Section 1).

**Race**—Data by race for births, deaths, marriages, and divorces from NCHS are based on information contained in the certificates of registration. The Census Bureau's Current Population Survey obtains information on race by asking respondents to classify their race as (1) White, (2) Black, (3) American Indian or Alaska Native, (4) Native Hawaiian or other Pacific Islander, and (5) Asian.

Beginning with the 1989 data year, NCHS is tabulating its birth data primarily by race of the mother. In 1988 and prior years, births were tabulated by race of the child, which was determined from the race of the parents as entered on the birth certificate.

Trend data by race shown in this section are by race of mother beginning with the 1980 data. Hispanic origin of the mother is reported and tabulated independently of race. Thus, persons of Hispanic origin may be any race. In 1994, 91 percent of women of Hispanic origin were reported as White.

**Table 76. Live Births, Deaths, Marriages, and Divorces: 1950 to 2004**

[3,632 represents 3,632,000. Prior to 1960, excludes Alaska and Hawaii. Beginning 1970, excludes births to, and deaths of, non-residents of the United States. See Appendix III]

| Year                          | Number (1,000)      |        |                     |                        |                       | Rate per 1,000 population |        |                     |                        |                       |

**Table 81. Total Fertility Rate by Race and Hispanic Origin: 1980 to 2004**

[Based on race of mother. Excludes births to nonresidents of United States. The *total fertility rate* is the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year. A total fertility rate of 2,110 represents "replacement level" fertility for the total population under current mortality conditions (assuming no net immigration). See Appendix III]

**Table 83. Births to Unmarried Women by Race, Hispanic Origin and Age of Mother: 1990 to 2004**

[[1,165 represents 1,165,000]. Excludes births to nonresidents of United States. Persons of Hispanic origin may be any race. Marital status is inferred from a comparison of the child's and parents' surnames on the birth certificate for those states that do not report on marital status. No estimates included for misstatements on birth records or failures to register births. See also Appendix III]

**Table 89. Women Who Had a Child in the Last Year by Selected Characteristics: 1990 to 2004**

**58,381 represents 58,381,000. As of June.** Covers civilian noninstitutional population. Since the number of women who had a birth during the 12-month period was tabulated and not the actual numbers of births, some small underestimation of fertility for this period may exist due to the omission of: (1) Multiple births, (2) Two or more live births spaced within the 12-month period (the woman is counted only once), (3) Women who had births in the period and who did not survive to the survey date, (4) Women who were in institutions and therefore not in the survey universe. These losses may be somewhat offset by the inclusion in the CPS of births to immigrants who did not have their children born in the United States and births to nonresident women. These births would not have been recorded in the vital registration system. Based on Current Population Survey (CPS); see Appendix III]

| Characteristic                       | Women who had a child in the last year |             |                |                 |                |                 |

<sup>1</sup> Live births are those which occurred from July 1 of year shown through June 30 of the following year (to match time of conception with abortions). Births are classified by race of child 1975–1988, and by race of mother after 1988. <sup>2</sup> Total numbers of abortions in 1986, 1989, 1990, 1993, 1994, 1997, and 1998 have been estimated by interpolation; 2001 and 2002 have been estimated using trends in Centers for Disease Control data.

**Table 108. Age-Adjusted Death Rates by Major Causes: 1960 to 2004**

[Rates per 100,000 population; see headnote, Table 101. Beginning 1999, deaths classified according to tenth revision of International Classification of Diseases; for earlier years, causes of death were classified according to the revisions then in use. Changes in classification of causes of death due to these revisions may result in discontinuities in cause-of-death trends. See Appendix III]

| Year                        | Diseases of heart | Malignant neoplasms (cancer) | Cerebrovascular diseases | Chronic lower respiratory diseases | Accidents <sup>1</sup> | Diabetes mellitus | Influenza and pneumonia | Nephritis, nephrotic syndrome and nephrosis | Septicemia | Intentional self harm (suicide) |
|-----------------------------|-------------------|------------------------------|--------------------------|------------------------------------|------------------------|-------------------|-------------------------|---|------------|---------------------------------|
| 1960 . . . . .              | 559.0             | 193.9                        | 177.9                    | 12.5                               | 63.1                   | 22.5              | 53.7                    | 10.6  | 1.2        | 12.5                            |

**Table 109. Deaths and Death Rates by Selected Causes: 2003 and 2004**

[Rates per 100,000 population. Figures are weighted data rounded to the nearest individual, so categories may not add to total or subtotal. Excludes deaths of nonresidents of the United States. Deaths classified according to tenth revision of International Classification of Diseases. See also Appendix III]

**Table 118. Deaths—Life Years Lost and Mortality Costs by Age, Sex, and Cause: 2000 and 2002**

[(2,403 represents 2,403,000). Life years lost: Number of years person would have lived in absence of death. Mortality cost: value of lifetime earnings lost by persons who die prematurely]

| Characteristic                          | Number of deaths (1,000) | Life years lost <sup>1</sup> |             | Mortality cost <sup>2</sup> |                  |

## Health and Nutrition

This section presents statistics on health expenditures and insurance coverage, including Medicare and Medicaid, medical personnel, hospitals, nursing homes and other care facilities, injuries, diseases, disability status, nutritional intake of the population, and food consumption. Summary statistics showing recent trends on health care and discussions of selected health issues are published annually by the U.S. National Center for Health Statistics (NCHS) in *Health, United States*. Data on national health expenditures, medical costs, and insurance coverage are compiled by the U.S. Centers for Medicare & Medicaid Services (CMS) (formerly Health Care Financing Administration), and appear on the CMS Web site at <http://www.cms.hhs.gov/NationalHealthExpendData/> and in the annual *Medicare and Medicaid Statistical Supplement* to the *Health Care Financing Review*. Statistics on health insurance are also collected by NCHS and are published in Series 10 of *Vital and Health Statistics*. U.S. Census Bureau also publishes data on utilization of insurance coverage. Statistics on hospitals are published annually by the Health Forum, L.L.C., an American Hospital Association Company, in *Hospital Statistics*. Primary source for data on nutrition is the annual *Food Consumption, Prices, and Expenditures*, issued by the U.S. Department of Agriculture. NCHS also conducts periodic surveys of nutrient levels in the population, including estimates of food and nutrient intake, overweight and obesity, hypercholesterolemia, hypertension, and clinical signs of malnutrition.

**National health expenditures**—Please be advised that the most recent release of the National Health Expenditure Accounts (NHEA) was a benchmark (comprehensive) revision. All estimates were open to revision for the entire time series, which now runs from 1960 to 2004. For NHEA Tables 120 through 127, all data have been revised.

CMS compiles estimates of national health expenditures (NHE) to measure spending for health care in the United States. The NHE accounts are structured to show spending by type of expenditure (i.e., hospital care, physician and clinical care, dental care, and other professional care; home health care; retail sales of prescription drugs; other medical nondurables; vision products and other medical durables; nursing home care and other personal health expenditures; plus other health expenditures such as public health activities, administration, and the net cost of private health insurance; plus medical sector investment, the sum of noncommercial medical research and capital formation in medical sector structures and equipment; and by source of funding (e.g., private health insurance, out-of-pocket payments, and a range of public programs including Medicare, Medicaid, and those operated by the Department of Veterans Affairs (VA)).

Data used to estimate health expenditures come from existing sources, which are tabulated for other purposes. The type of expenditure estimates rely upon statistics produced by such groups as the American Hospital Association, the Census Bureau, and the Department of Health and Human Services (HHS). Source of funding estimates are constructed using administrative and statistical records from the Medicare and Medicaid programs, the Department of Defense and VA medical programs, the Social Security Administration, Census Bureau's *Governmental Finances*, state and local governments, other HHS agencies, and other nongovernment sources.

**Medicare, Medicaid and SCHIP**—Since July 1966, the federal Medicare program has provided two coordinated plans for nearly all people age 65 and over: (1) a hospital insurance plan, which covers hospital and related services and (2) a voluntary supplementary medical insurance

plan, financed partially by monthly premiums paid by participants, which partly covers physicians' and related medical services. Such insurance also applies, since July 1973, to disabled beneficiaries of any age after 24 months of entitlement to cash benefits under the social security or railroad retirement programs and to persons with end stage renal disease. On January 1, 2006, Medicare began to provide coverage for prescription drugs as mandated by the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA). This benefit is available on a voluntary basis to everyone with Medicare, and beneficiaries pay a monthly premium to enroll in one of Medicare's prescription drug plans.

Medicaid is a health insurance program for certain low-income people. These include: certain low-income families with children; aged, blind, or disabled people on supplemental security income; certain low-income pregnant women and children; and people who have very high medical bills. Medicaid is funded and administered through a state/federal partnership. Although there are broad federal requirements for Medicaid, states have a wide degree of flexibility to design their program. Congress created the State Children's Health Insurance Program (SCHIP) to address the growing problem of children without health insurance. SCHIP was designed as a federal/state partnership, similar to Medicaid, with the goal of expanding health insurance to children whose families earn too much money to be eligible for Medicaid, but not enough money to purchase private insurance.

**Health resources**—Hospital statistics based on data from the American Hospital Association's yearly survey are published annually in *Hospital Statistics* and cover all hospitals accepted for registration by the Association. To be accepted for registration, a hospital must meet certain requirements relating to number of beds, construction, equipment, medical and nursing staff, patient care, clinical records, surgical and obstetrical facilities, diagnostic and treatment facilities, laboratory services, etc. Data obtained from NCHS cover all U.S. hospitals that meet

certain criteria for inclusion. The criteria are published in *Vital and Health Statistics* reports, Series 13.

Statistics on the demographic characteristics of persons employed in the health occupations are compiled by the U.S. Bureau of Labor Statistics and reported in *Employment and Earnings* (monthly) (see Table 602, Section 12, Labor Force, Employment, and Earnings). Data based on surveys of health personnel and utilization of health facilities providing long-term care, ambulatory care, and hospital care are presented in NCHS Series 13, *Data on Health Resources Utilization and Advance Data from Vital and Health Statistics*. Statistics on patient visits to health care providers, as reported in health interviews, appear in NCHS Series 10, *National Health Interview Survey Data*.

The CMS's *Health Care Financing Review* and its annual *Medicare and Medicaid Statistical Supplement* present data for hospitals and nursing homes as well as extended care facilities and home health agencies. These data are based on records of the Medicare program and differ from those of other sources because they are limited to facilities meeting federal eligibility standards for participation in Medicare.

**Disability and illness**—General health statistics, including morbidity, disability, injuries, preventive care, and findings from physiological testing are collected by NCHS in its National Health Interview Survey and its National Health and Nutrition Examination Surveys and appear in *Vital and Health Statistics*, Series 10 and 11, respectively. The Department of Labor compiles statistics on occupational injuries (see Section 12, Labor Force, Employment, and Earnings). Annual incidence data on notifiable diseases are compiled by the Public Health Service (PHS) at its Centers for Disease Control and Prevention in Atlanta, Georgia, and are published as a supplement to its *Morbidity and Mortality Weekly Report*. The list of diseases is revised annually and includes those which, by mutual agreement of the states and PHS, are communicable diseases of national importance.

**Nutrition**—Statistics on annual per capita consumption of food and its nutrient value are estimated by the U.S. Department of Agriculture. Data are available online at <<http://www.ers.usda.gov/data/foodconsumption>>. NCHS collects physical examination data to assess the population's nutritional status, including growth, overweight/

obesity, nutritional deficiencies, and prevalence of nutrition-related conditions, such as hypertension, hypercholesterolemia, and diabetes.

**Statistical reliability**—For discussion of statistical collection, estimation, and sampling procedures and measures of reliability applicable to data from NCHS and CMS, see Appendix III.

**Table 120. National Health Expenditures—Summary, 1960 to 2004, and Projections: 2005 to 2015**

[In billions of dollars (28 represents \$28,000,000,000). Excludes Puerto Rico and island areas]

| Year           | Total expenditures <sup>1</sup> | Private expenditures |               |           | Public expenditures |         |                 | Health services and supplies |               |                                 |                    |                   |
|----------------|---------------------------------|----------------------|---------------|-----------|---------------------|---------|-----------------|------------------------------|---------------|---------------------------------|--------------------|-------------------|
|                |                                 | Total <sup>2</sup>   | Out-of-pocket | Insurance | Total               | Federal | State and local | Total <sup>3</sup>           | Hospital care | Physician and clinical services | Prescription drugs | Nursing home care |

**Table 131. Average Annual Expenditures Per Consumer Unit for Health Care: 1990 to 2004**

[In dollars, except percent. See text, Section 13, Income, Expenditures, and Wealth, and headnote, Table 667. Consumer Expenditures Survey (CE) has implemented multiple imputation of income data, starting with the publication of the 2004 tables. Because of income imputation, data for 2004 are not strictly comparable to data from previous years, especially for income tables. For more information go to <<http://www.bls.gov/cex/csxann04.pdf>>, page 4. For composition of regions, see map, inside front cover]

- Represents or rounds to zero. <sup>1</sup> Represents persons entitled because of End Stage Renal Disease only. Benefits for those who have ESRD, but would be entitled due to their age or disabled status are included in aged and disabled benefits. <sup>2</sup> Beginning 1998 home health agency transfers are excluded from total supplementary medical insurance disbursements and included in total hospital insurance disbursements. <sup>3</sup> Beginning in 2002, Peer Review Organizations were renamed Quality Improvement Organizations. <sup>4</sup> Includes costs of experiments and demonstration projects. Includes costs of the health care fraud and abuse control program.

<sup>1</sup> Includes income from taxation of benefits beginning in 1994. Includes premiums from aged ineligible enrolled in HI. <sup>2</sup> Includes recoveries of amounts reimbursed from the trust fund. <sup>3</sup> Beginning 1998 monies transferred to the SMI trust fund for home health agency costs, as provided for by P.L. 105-33, are included in HI benefit payments but excluded from SMI benefit payments. <sup>4</sup> Premiums withheld from check and associated general revenue contributions that were to occur on Jan. 3, 1999, actually occurred on December 31, 1998. These amounts are therefore excluded from 1999 data. <sup>5</sup> These amounts for 2004 and 2005 include transitional assistance for Part D of Medicare. <sup>6</sup> These amounts for 2004 and 2005 include amounts transferred for transitional assistance for Part D of Medicare.

**Table 138. Medicaid—Beneficiaries and Payments: 2000 to 2003**

[For year ending September 30 (42,887 represents 42,887,000). Starting in 1999, states were required to submit all their eligibility and claims data to the Centers for Medicare & Medicaid Services (CMS) on a quarterly basis through the Medicaid Statistical Information System (MSIS). The federal requirement for the HCFA-Form 2082 (used for 1998 and preceding years) was eliminated.]

<sup>1</sup> Persons who had payments made on their behalf at any time during the fiscal year. <sup>2</sup> Payments are for fiscal year and reflect federal and state contribution payments. Data exclude disproportionate share hospital payments. Disproportionate share hospitals receive higher Medicaid reimbursement than other hospitals because they treat a disproportionate share of Medicaid patients.

**Table 140. State Children's Health Insurance Program (SCHIP)—Enrollment and Expenditures by State: 2000 and 2005**

[In thousands (3,357.4 represents 3,357,400) In millions (1,928.8 represents 1,928,800,000). For year ending September 30.

This program provides health benefits coverage to children living in families whose incomes exceed the eligibility limits for Medicaid. Although it is generally targeted to families with incomes at or below 200 percent of the federal poverty level, each state may set its own income eligibility limits, within certain guidelines. States have three options: they may expand their Medicaid programs, develop a separate child health program that functions independently of Medicaid, or do a combination of both]

**Table 142. Health Maintenance Organizations (HMOs): 1990 to 2004**

[As of January 1 (33.0 represents 33,000,000)]. An HMO is a prepaid health plan delivering comprehensive care to members through designated providers, having a fixed periodic payment for health care services, and requiring members to be in a plan for a specified period of time (usually 1 year). A group HMO delivers health services through a physician group that is controlled by the HMO unit or contracts with one or more independent group practices to provide health services. An individual practice association (IPA) HMO contracts directly with physicians in independent practice, and/or contracts with one or more associations of physicians in independent practice, and/or contracts with one or more multispecialty group practices. Data are based on a census of HMOs]

| Model type   | Number of plans |            |            |            |            |            | Enrollment <sup>1</sup> (mil.) |             |             |             |             |             |

<sup>1</sup> Includes other government insurance, not shown separately. Persons with coverage counted only once in total, even though they may have been covered by more than one type of policy. <sup>2</sup> Related to employment of self or other family members. <sup>3</sup> Beginning 1997, persons with no coverage other than access to Indian Health Service are no longer considered covered by health insurance; instead they are considered to be uninsured. The effect of this change on the overall estimates of health insurance coverage is negligible; however, the decrease in the number of people covered by Medicaid may be partially due to this change. <sup>4</sup> Estimates reflect results of follow-up verification questions. <sup>5</sup> Implementation of Census 2000-based population controls. Sample expanded by 28,000 households. <sup>6</sup> Persons of Hispanic origin may be any race.

<sup>1</sup> The average is presented for all covered workers and excludes workers without the plan provision. Averages are for plans stating a flat monthly cost. <sup>2</sup> Employees are classified as working either a full-time or part-time schedule based on the definition used by each establishment. <sup>3</sup> Union workers are those whose wages are determined through collective bargaining.

Z Less than 0.5 percent. <sup>1</sup> A composite rate is a set contribution covering more than one benefit area; for example, health care and life insurance. Cost data for individual plans cannot be determined. <sup>2</sup> Based on worker attributes. For example, employee contributions may vary based on earnings, length of service, or age. <sup>3</sup> Amount varies by options selected under a "cafeteria plan" or employer-sponsored reimbursement account.

B Base figure too small to meet statistical standards for reliability of derived figures. <sup>1</sup> Respondents may have reported using more than one type of therapy. <sup>2</sup> The sum of the categories listed under "Diet-based therapies" are greater than the total number of "Diet-based therapies" because respondents could choose more than one diet-based therapy. <sup>3</sup> The sum of the categories listed under "Prayer for health reasons" are greater than the total number of "Prayer for health reasons" because respondents could choose more than one method of prayer.

| White, non-Hispanic . . . . .                      | 14.5  | 13.5        | 45.4        | 46.1        | 26.0        | 25.7        | 14.1              | 14.7        |
| Black, non-Hispanic . . . . .                      | 17.2  | 15.6        | 46.9        | 47.3        | 23.4        | 24.6        | 12.6              | 12.5        |

<sup>1</sup> Includes other categories not shown separately. <sup>2</sup> Estimates are age adjusted to the year 2000 standard using six age groups: Under 18 years, 18-44 years, 45-54 years, 55-64 years, 65-74 years, and 75 years and over. <sup>3</sup> Estimates by race and Hispanic origin are tabulated using the 1997 standards for federal data on race and ethnicity. Estimates for specific race groups are shown when they meet requirements for statistical reliability and confidentiality. The categories "White only," "Black or African American only," "American Indian and Alaska Native (AI/AN) only," and "Asian only" include persons who reported only one racial group; and the category "2 or more races" includes persons who reported more than one of the five racial groups in the 1997 standards or one of the five racial groups and "Some other race." <sup>4</sup> Persons of Hispanic or Latino origin may be of any race or combination of races.

Z Less than 500 beds or \$50 million. <sup>1</sup> Includes hospital units of institutions. <sup>2</sup> Short-term (average length of stay less than 30 days) general and special (e.g., obstetrics and gynecology; eye, ear, nose and throat; rehabilitation etc. except psychiatric, tuberculosis, alcoholism and chemical dependency). Excludes hospital units of institutions. <sup>3</sup> Beginning 1990, number of beds at end of reporting period; prior years, average number in 12-month period. <sup>4</sup> Based on Census Bureau estimated resident population as of July 1, 1980, 1990, and 2000 based on enumerated resident population as of April 1. Estimates reflect revisions based on the 2000 census of population. <sup>5</sup> The average number of people served on an inpatient basis on a single day during the reporting period. <sup>6</sup> Excludes new construction. <sup>7</sup> Includes full-time equivalents of part-time personnel.

| Female . . . . .  | 143    | 136    | 139    | 138    | 135    | 137    | 139    | 141    | 141    |
| Days of care per 1,000 persons, total <sup>1</sup> . . . . .        | 784    | 620    | 589    | 581    | 560    | 562    | 572    | 578    | 574    |
| Male . . . . .  | 694    | 551    | 517    | 510    | 491    | 490    | 506    | 507    | 505    |
| Female . . . . .  | 869    | 686    | 658    | 649    | 627    | 631    | 635    | 646    | 641    |
| Average stay (days) . . . . .                                       | 6.4    | 5.4    | 5.1    | 5.0    | 4.9    | 4.9    | 4.9    | 4.8    | 4.8    |
| Male . . . . .  | 6.9    | 5.8    | 5.5    | 5.4    | 5.3    | 5.3    | 5.3    | 5.2    | 5.2    |
| Female . . . . .  | 6.1    | 5.0    | 4.7    | 4.7    | 4.6    | 4.6    | 4.6    | 4.6    | 4.5    |

<sup>1</sup> Rates are computed using Census Bureau estimates of the civilian population as of July 1. Rates for 1990 and 1995 were based on population estimates adjusted for the net underenumeration in the 1990 census. Rates for 2000 and 2003 were calculated using 2000-based postcensal estimates. Rates for 2000 differ from the ones shown in earlier reports because they were calculated using revised population estimates.

**Table 169. Hospital Discharges and Days of Care by Sex: 2004**

[13,844 represents 13,844,000. Represents estimates of inpatients discharged from noninstitutional, short-stay hospitals, exclusive of federal hospitals. Excludes newborn infants. Diagnostic categories are based on the International Classification of Diseases, Ninth Revision, Clinical Modification. See headnote, Table 166]

| Sex, age, and first-listed diagnosis          | Discharges     |                          | Days of care per average stay (days) |                         | Sex, age, and first-listed diagnosis          | Discharges     |                          | Days of care per average stay (days) |                         |

<sup>1</sup> Based on Census Bureau estimated civilian population as of July 1. <sup>2</sup> Estimates are age adjusted to the year 2000 standard population using six age groups: under 18 years, 18-44 years, 45-54 years, 55-64 years, 65-74 years, and 75 years and over. See Appendix II, Age adjustment. <sup>3</sup> Includes discharges with first-listed diagnoses not shown in table. <sup>4</sup> Includes abuse, dependence, and withdrawal. These estimates are for nonfederal short-stay hospitals only and do not include alcohol and drug discharges from other types of facilities or programs such as the Department of Veterans Affairs or day treatment programs. <sup>5</sup> These estimates are for nonfederal short-stay hospitals only and do not include serious mental illness discharges from other types of facilities or programs such as the Department of Veterans Affairs or long-term hospitals. <sup>6</sup> Estimates are considered unreliable.

NA Not available. X Not applicable. <sup>1</sup> Kidney-pancreas and heart-lung transplants are each counted as one organ. All other multi-organ transplants, excluding kidney-pancreas and heart-lung, are included in the multi-organ row. Based on the Organ Procurement and Transplant Network (OPTN) as of July 28, 2006. The data have been supplied by UNOS under contract with HHS. This work was supported in part by Health Resources and Services Administration contract 231-00-0015. The authors alone are responsible for the reporting and interpretation of these data. Data subject to change based on future data submission or correction. <sup>2</sup> 1990-1992, number of procedures and eye banks include Canada. From 1993 on, the data is for the U.S. only. <sup>3</sup> Eye banks. <sup>4</sup> Procedure data are shown in terms of square feet.

**Table 172. Injury and Poisoning Episodes and Conditions by Age and Sex: 2004**

[33,173 represents 33,173,000. Covers all medically attended injuries and poisonings occurring during the 5-week period prior to the survey interview. Age adjustment is used to adjust for differences in the age distribution of populations being compared. There may be more than one condition per episode. Based on the redesigned National Health Interview Survey, a sample survey of the civilian noninstitutionalized population; see Appendix III.

| External cause and nature of injury                  | Both sexes |                                  |                    |                    |                    |                    | Male, total | Female, total |                       |

- Represents zero. <sup>1</sup> Acquired immunodeficiency syndrome was not a notifiable disease until 1984. Figures are shown for years in which cases were reported to the CDC. Beginning 1995, based on revised classification system and expanded surveillance case definition. <sup>2</sup> Disease was not notifiable. <sup>3</sup> Includes foodborne, infant, wound, and unspecified cases. <sup>4</sup> Chickenpox was taken off the nationally notifiable list in 1991 but many states continue to report. <sup>5</sup> Includes some persons positive for antibody to hepatitis C virus who do not have hepatitis. <sup>6</sup> Whooping cough. <sup>7</sup> German measles. Excludes rubella, congenital syndrome. <sup>8</sup> Excludes typhoid fever. <sup>9</sup> Bacillary dysentery. <sup>10</sup> Newly reported active cases.

**Table 177. Reported AIDS Cases for Adults and Adolescents by Transmission Category and Sex: Cumulative Through 2004**

[Provisional. For cases reported in the year shown. Includes Puerto Rico, Virgin Islands, Guam, and U.S. Pacific Islands. Acquired immunodeficiency syndrome (AIDS) is a specific group of diseases or conditions which are indicative of severe immunosuppression related to infection with the human immunodeficiency virus (HIV). Data are subject to retrospective changes and may differ from those data in Table 175]

| Exposure category   | 2004          |               |               | Cumulative through 2004 <sup>1</sup> |                |                |

**Table 178. Estimated Number of Persons Living With Acquired Immunodeficiency Syndrome (AIDS) by Year and Selected Characteristics: 2000 to 2004**

[These numbers do not represent reported case counts. Rather, these numbers are point estimates, which result from adjustments of reported case counts. The reported case counts are adjusted for reporting delays and for redistribution of cases in persons initially reported without an identified risk factor. The estimates do not include adjustment for incomplete reporting. Data for years 2000 to 2003 have been revised. See the Commentary section in the 2004 report]

**Table 180. Learning Disability or Attention Deficit Hyperactivity Disorder for Children 3–17 Years of Age by Selected Characteristics: 2004**

[In thousands, except percent (61,285 represents 61,285,000). Learning Disability is based on the question, "Has a representative from a school or a health professional ever told you that (child's name) has a learning disability?" Attention Deficit Hyperactivity Disorder is based on the question, "Has a doctor or health professional ever told you that (child's name) had Attention Hyperactivity Disorder or Attention Deficit Disorder?"]

| Selected characteristics                            | Total  | Ever told had       |         |  |         |

**Table 182. Persons With Limitation of Activity Caused by Chronic Conditions: 2000 to 2004**

[In percent. Limitation of activity is assessed by asking respondents a series of questions about limitations in their ability to perform activities usual for their age group because of a physical, mental, or emotional problem. Based on the National Health Interview Survey, a sample survey of the civilian noninstitutionalized population; see Appendix III]

**Table 183. Persons 65 Years Old and Over With Limitation of Activity Caused by Chronic Conditions: 2000 to 2004**

[In percent. Covers noninstitutionalized persons 65 years old and over. To determine activities of daily living (ADL) limitations respondents were asked "Because of a physical, mental, or emotional problem, does (this person) need the help of other persons with personal care needs, such as eating, bathing, dressing, or getting around inside this home?" Instrumental activities of daily living (IADL) were determined by asking respondents "Because of a physical, mental, or emotional problem, does (this person) need the help of other persons in handling routine needs, such as everyday household chores, doing necessary business, shopping, or getting around for other purposes?" See also headline, Table 182]

— Represents zero. B Figure too small to meet statistical standards for reliability of a derived figure. <sup>1</sup> Respondents were asked if they had ever been told by a health professional that they had an ulcer or diabetes. A person may be represented in more than one column. <sup>2</sup> Excludes borderline diabetes. Respondents were asked if they had been told in the last 12 months by a health professional that they had weak or failing kidneys or any kind of liver condition. <sup>3</sup> Excludes kidney stones, bladder infections, or incontinence. <sup>4</sup> Respondents were asked if they had ever been told by a health professional that they had some form of arthritis, rheumatoid arthritis, gout, lupus, or fibromyalgia. <sup>5</sup> Respondents with joint symptoms that began more than 3 months ago prior to interview. Excludes back and neck. <sup>6</sup> Total includes other races not shown separately. <sup>7</sup> Refers to persons who indicated only a single race group. <sup>8</sup> Figures do not meet standard of reliability or precision. <sup>9</sup> Refers to all persons who indicated more than one race group. <sup>10</sup> Persons of Hispanic or Latino origin may be of any race or combination of races.

**Table 188. Cancer—Estimated New Cases, 2006, and Survival Rates, 1987–1989 to 1996–2002**

[1,400 represents 1,400,000. The 5-year relative survival rate, which is derived by adjusting the observed survival rate for expected mortality, represents the likelihood that a person will not die from causes directly related to their cancer within 5 years. Survival data shown are based on those patients diagnosed while residents of an area listed below during the time periods shown. Data are based on information collected as part of the National Cancer Institute's Surveillance, Epidemiology and End Results (SEER) program, a collection of population-based registries in five states (Connecticut, Hawaii, Iowa, New Mexico, Utah) and four metropolitan areas (Atlanta, Detroit, San Francisco-Oakland and Seattle-Puget Sound)]

**Table 194. Drug Use by Type of Drug and Age Group: 2002 and 2004**

[In percent. The 2002 survey changed names from the National Household Survey on Drug Abuse to the National Household Survey on Drug Use and Health (NSDUH). Due to the impact of Survey improvements, 2002 data should not be compared with data collected in 2001 or earlier years. Current users are those who used drugs at least once within month prior to this study. Based on a representative sample of the U.S. population age 12 and older, including persons living in households and in some group quarters such as dormitories and homeless shelters. Estimates are based on computer-assisted interviews of about 68,000 respondents. Subject to sampling variability; see source]

**Table 195. Estimated Use of Selected Drugs by State: 2003–2004**

[19,272 represents 19,272,000. Data in this table cover a 2-year period. The 2002 survey changed names from the National Household Survey on Drug Abuse to National Household Survey on Drug Use and Health (NSDUH). Due to the impact of survey improvements, 2002 data should not be compared with data collected in 2001 or earlier years. Current users are those persons 12 years old and over who used drugs at least once within month prior to this study. Based on national sample of respondents (see also headline, Table 194). The state estimates were produced by combining the prevalence rate based on the state sample data and the prevalence rate based on a national regression model applied to local-area county and census block group/tract-level estimates from the state. The parameters of the regression model are estimated from the entire national sample. For comparison purposes, the data shown here display estimates for all 50 states and the District of Columbia utilizing the modeled estimates for all 51 areas.]

| State               | Estimated current users (1,000) |               |                        |               |                            | Current users as percent of population |            |                        |             |                            |

**Table 196. Cumulative Percent Distribution of Population by Height and Sex: 2003–2004**

[Data are based on National Health and Nutrition Examination Survey (NHANES), a sample of the civilian noninstitutional population. For this survey, the respondent participates in an interview and a physical examination. For persons 20 years old and over. Height was measured without shoes. Based on sample and subject to sampling variability; see source]

**Table 198. Age-Adjusted Percent Distributions of Body Mass Index (BMI) Among Persons 18 Years Old and Over by Selected Characteristics: 2003–2004**

[See headline, table 196. Body Mass Index (BMI) is a measure that adjusts body weight for height. It is calculated as weight in kilograms divided by height in meters squared. For both men and women, underweight is indicated by a BMI under 18.5; healthy weight is indicated by a BMI greater than or equal to 18.5 and less than 25.0; overweight is indicated by a BMI greater than or equal to 25.0 and less than 30.0; obesity is indicated by a BMI greater than or equal to 30.0. Based on the National Health and Nutrition Examination Survey (NHANES)]

| Selected characteristic                    | Underweight | Healthy weight | Above healthy weight |            |       |
|--|-------------|----------------|----------------------|------------|-------|
|  |             |                | Total                | Overweight | Obese |

**Table 200. Households and Persons Having Problems With Access to Food: 2000 to 2004**

[106,043 represents 106,043,000. Food secure means that a household had access at all times to enough food for an active healthy life for all household members, with no need for recourse to socially unacceptable food sources or extraordinary coping behaviors to meet their basic food needs. Food insecure households had limited or uncertain ability to acquire acceptable foods in socially acceptable ways. Food insecure households with hunger were those with one or more household members who were hungry at least sometime during the period due to inadequate resources for food. The omission of homeless persons may be a cause of underreporting. The severity of food insecurity and hunger in households is measured through a series of questions about experiences and behaviors known to characterize households that are having difficulty meeting basic food needs. These experiences and behaviors generally occur in an ordered sequence as the severity of food insecurity increases. As resources become more constrained, adults in typical households first worry about having enough food, then they stretch household resources and juggle other necessities, then decrease the quality and variety of household members' diets, then decrease the frequency and quantity of adults' food intake, and finally decrease the frequency and quantity of children's food intake. All questions refer to the previous 12 months and include a qualifying phrase reminding respondents to report only those occurrences that resulted from inadequate financial resources. Restrictions to food intake due to dieting or busy schedules are excluded. Data are from the Food Security Supplement to the Current Population Survey (CPS); for details about the CPS, see text, Section 1 and Appendix III]

| Household food security level | Number (1,000) |                |                |                |                | Percent distribution |              |              |              |              |

## Section 4

# Education

---

This section presents data primarily concerning formal education as a whole, at various levels, and for public and private schools. Data shown relate to the school-age population and school enrollment, educational attainment, education personnel, and financial aspects of education. In addition, data are shown for charter schools, computer usage in schools, distance education, and adult education. The chief sources are the decennial census of population and the Current Population Survey (CPS), both conducted by the U.S. Census Bureau (see text, Section 1, Population); annual, biennial, and other periodic surveys conducted by the National Center for Education Statistics (NCES), a part of the U.S. Department of Education; and surveys conducted by the National Education Association.

The censuses of population have included data on school enrollment since 1840 and on educational attainment since 1940. The CPS has reported on school enrollment annually since 1945 and on educational attainment periodically since 1947.

The NCES is continuing the pattern of statistical studies and surveys conducted by the U.S. Office of Education since 1870. The annual *Digest of Education Statistics* provides summary data on pupils, staff, finances, including government expenditures, and organization at the elementary, secondary, and higher education levels. It is also a primary source for detailed information on federal funds for education, projections of enrollment, graduates, and teachers. *The Condition of Education*, issued annually, presents a summary of information on education of particular interest to policymakers. NCES also conducts special studies periodically.

The census of governments, conducted by the Census Bureau every 5 years (for the years ending in "2" and "7"), provides data on school district finances and state and local government expenditures for education. Reports published by the

Bureau of Labor Statistics contain data relating civilian labor force experience to educational attainment (see also Tables 578, 605, and 613 in Section 12, Labor Force, Employment, and Earnings).

**Types and sources of data**—The statistics in this section are of two general types. One type, exemplified by data from the Census Bureau, is based on direct interviews with individuals to obtain information about their own and their family members' education. Data of this type relate to school enrollment and level of education attained, classified by age, sex, and other characteristics of the population. The school enrollment statistics reflect attendance or enrollment in any regular school within a given period; educational attainment statistics reflect the highest grade completed by an individual, or beginning 1992, the highest diploma or degree received.

Beginning in 2001, the CPS used Census 2000 population controls. From 1994 to 2000, the CPS used 1990 census population controls plus adjustment for undercount. Also the survey changed from paper to computer-assisted technology. For years 1981 through 1993, 1980 census population controls were used; 1971 through 1980, 1970 census population controls had been used. These changes had little impact on summary measures (e.g., medians) and proportional measures (e.g., enrollment rates); however, use of the controls may have significant impact on absolute numbers.

The second type, generally exemplified by data from the NCES and the National Education Association, is based on reports from administrators of educational institutions and of state and local agencies having jurisdiction over education. Data of this type relate to enrollment, attendance, staff, and finances for the nation, individual states, and local areas.

Unlike the NCES, the Census Bureau does not regularly include specialized vocational, trade, business, or correspondence schools in its surveys. The NCES includes nursery schools and kindergartens that are part of regular grade schools in their enrollment figures. The Census Bureau includes all nursery schools and kindergartens. At the higher education level, the statistics of both agencies are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges.

**School attendance**—All states require that children attend school. While state laws vary as to the ages and circumstances of compulsory attendance, generally they require that formal schooling begin by age 6 and continue to age 16.

**Schools**—The NCES defines a school as “a division of the school system consisting of students composing one or more grade groups or other identifiable groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant.”

*Regular* schools are those which advance a person toward a diploma or degree. They include public and private nursery schools, kindergartens, graded schools, colleges, universities, and professional schools.

*Public* schools are schools controlled and supported by local, state, or federal governmental agencies; private schools are those controlled and supported mainly by religious organizations or by private persons or organizations.

The Census Bureau defines *elementary* schools as including grades 1 through 8; *high* schools as including grades 9 through 12; and *colleges* as including junior or community colleges, regular 4-year colleges, and universities and graduate or professional schools. Statistics reported by the NCES and the National Education Association by type of organization, such as elementary level and secondary level, may not be strictly comparable with those from the Census Bureau because the grades included at the two levels vary, depending on the level assigned to the middle or junior high school by the local school systems.

**School year**—Except as otherwise indicated in the tables, data refer to the school year which, for elementary and secondary schools, generally begins in September of the preceding year and ends in June of the year stated. For the most part, statistics concerning school finances are for a 12-month period, usually July 1 to June 30. Enrollment data generally refer to a specific point in time, such as fall, as indicated in the tables.

**Statistical reliability**—For a discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to the Census Bureau and the NCES data, see Appendix III.

**Table 204. School Enrollment: 1970 to 2015**

[In thousands (59,838 represents 59,838,000). As of fall. Based on surveys of state education agencies and private schools; see source for details]

| Year                     | All levels |        |         | Pre-K through grade 8 |         | Grades 9 through 12 |         | College <sup>1</sup> |         |
|--------------------------|------------|--------|---------|-----------------------|---------|---------------------|---------|----------------------|---------|
|                          | Total      | Public | Private | Public                | Private | Public              | Private | Public               | Private |
| 1970                     | 59,838     | 52,322 | 7,516   | 32,558                | 4,052   | 13,336              | 1,311   | 6,428                | 2,153   |
| 1975                     | 61,004     | 53,654 | 7,350   | 30,515                | 3,700   | 14,304              | 1,300   | 8,835                | 2,350   |
| 1980                     | 58,305     | 50,335 | 7,971   | 27,647                | 3,992   | 13,231              | 1,339   | 9,457                | 2,640   |
| 1985                     | 57,226     | 48,901 | 8,325   | 27,034                | 4,195   | 12,388              | 1,362   | 9,479                | 2,768   |
| 1986                     | 57,709     | 49,467 | 8,242   | 27,420                | 4,116   | 12,333              | 1,336   | 9,714                | 2,790   |

**Table 205. School Expenditures by Type of Control and Level of Instruction in Constant (2003–2004) Dollars: 1970 to 2004**

[In millions of dollars (316,401 represents \$316,401,000,000). For school years ending in year shown. Data shown reflect historical revisions. Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt and capital outlay. Data deflated by the Consumer Price Index, wage earners, and clerical workers through 1975; thereafter, all urban consumers, on a school year basis (supplied by the National Center for Education Statistics). See also Appendix III. Based on survey of state education agencies; see source for details]

| Year | Total   | Elementary and secondary schools |         |                      | Colleges and universities <sup>2</sup> |         |         |
|------|---------|----------------------------------|---------|----------------------|--|---------|---------|
|      |         | Total                            | Public  | Private <sup>1</sup> | Total                                  | Public  | Private |

**Table 211. School Enrollment by Sex and Level: 1970 to 2004**

[In millions (60.4 represents 60,400,000). As of Oct. For the civilian noninstitutional population. 1970–1979, for persons 3 to 34 years old; beginning 1980, 3 years old and over. Elementary includes kindergarten and grades 1–8; high school, grades 9–12; and college, 2-year and 4-year colleges, universities, and graduate and professional schools. Data for college represent degree-credit enrollment. See headnote, Table 208]

**Table 212. School Enrollment by Control and Level: 1980 to 2004**

[In thousands (58,305 represents 58,305,000). As of fall. Data below college level are for regular day schools and exclude subcollegiate departments of colleges, federal schools and home-schooled children. College data include degree-credit and nondegree-credit enrollment. Based on survey of state education agencies; see source for details. For more projections, see Table 206]

NA Not available. <sup>1</sup> Includes other races, not shown separately. <sup>2</sup> The 2003 Current Population Survey (CPS) allowed respondents to choose more than one race. Beginning 2003 data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years only allowed respondents to report one race group. See also comments on race in the text for Section 1. <sup>3</sup> Persons of Hispanic origin may be of any race. <sup>4</sup> Includes persons of other Hispanic origin, not shown separately. <sup>5</sup> Through 1990, completed 4 years of high school or more and 4 years of college or more. <sup>6</sup> Starting in 2003, data are for Asians only, excludes Pacific Islanders.

**Table 220. Students Who Reported Carrying a Weapon: 1993 to 2003**

[In percent. For students in grades 9 to 12. Percentages are based on students who reported carrying a weapon at least one day during the previous thirty days. Weapons are such things as guns, knives, and clubs. Based on the Youth Risk Behavior Surveillance System. See source for details. See also <<http://www.cdc.gov/HealthyYouth/yrbbs/index.htm>>]

NA Not available. <sup>1</sup> Includes races not shown separately. <sup>2</sup> Beginning 2003, for persons who selected this race group only. See footnote 2, Table 214. <sup>3</sup> Persons of Hispanic origin may be of any race. The method of identifying Hispanic children was changed in 1980 from allocation based on status of mother to status reported for each child. The number of Hispanic children using the new method is larger.

**Table 226. Public Charter and Traditional Schools—Selected Characteristics: 2003–2004**

[46,689 represents 46,689,000. A public charter school is a public school that, in accordance with an enabling state statute, has been granted a charter exempting it from selected state and local rules and regulations. Schools open as public charter schools during 2002–03 and still open in the 2003–04 school year were surveyed. Based on the 2003–2004 School and Staffing Survey and subject to sampling error; see source for details]

| Characteristic  | All schools |                | Elementary  |                | Secondary   |                | Combined    |                |
|---|-------------|----------------|-------------|----------------|-------------|----------------|-------------|----------------|
|   | Traditional | Public charter | Traditional | Public charter | Traditional | Public charter | Traditional | Public charter |

**Table 227. Students Who are Homeschooled by Selected Characteristics: 2003**

[As of spring. (50,707 represents 50,707,000). For students 5 to 17 with a grade equivalent of K–12. Homeschoolers are students whose parents reported them to be schooled at home instead of a public or private school. Excludes students who were enrolled in school for more than 25 hours a week or were homeschooled due to a temporary illness. Based on the Parent and Family Involvement Survey of the National Household Education Surveys Program; see source and Appendix III for details]

| Characteristic                             | Number of students |                       |                       | Percent distribution |               |                   |

**Table 235. Public School Districts With Alternative Schools or Programs for at-Risk Students: 2000–2001**

[For the school year. Alternative schools and programs are designed to address the needs of students that typically cannot be met in regular schools. The schools and programs in data shown here serve students who are typically at risk for educational failure (as indicated by poor grades or truancy, for example). Alternative schools are usually housed in a separate facility where students are removed from regular schools. Alternative programs are usually housed within regular schools. Based on the Fast Response Survey System; see source for details]

**Table 250. Distance Education in Public Elementary and Secondary Schools: 2002–2003**

[For the school year. Distance education courses are for-credit classes offered to students enrolled in the district where the teacher and student were in different locations. They could be delivered via audio, video, internet, or other computer technologies. Reasons for districts providing these courses include offering courses not otherwise available, offering Advanced Placement courses, addressing growing populations and space limitations, reducing scheduling conflicts for students, and permitting students who failed a course to take the course again. Excludes such things as virtual field trips, online homework, or a course delivered mainly by written correspondence. Based on the Fast Response Survey System and subject to sampling error; see source for details.]

| District characteristic                            | Number of districts |  | Enrollments in distance education courses |                        |                                 |                   |                            |        |                  |                   |

**Table 256. Proficiency Levels on Selected NAEP Tests for Students in Public Schools, by State: 2005**

[Represents percent of public school students scoring at or above Basic and Proficient levels. Basic denotes mastery of the knowledge and skills that are fundamental for proficient work at a given grade level. Proficient represents solid academic performance. Students reaching this level demonstrated competency over challenging subject matter. For more detail see <<http://www.nagb.org/pubs/pubs.html>>. Based on The National Assessment of Educational Progress (NAEP) tests which are administered to a representative sample of students in public schools, private schools, and Department of Defense schools. Data shown here are for public school students only]

<sup>1</sup> Beginning 1990, reflects new editing procedures for cases with missing data on school enrollment. <sup>2</sup> Percent of students who drop out in a single year without completing high school. For grades 10 to 12. <sup>3</sup> Includes other races, not shown separately. <sup>4</sup> Beginning 2003, for persons who selected this race group only. See footnote 2, Table 214. <sup>5</sup> Persons of Hispanic origin may be of any race. <sup>6</sup> Percent of the population who have not completed high school and are not enrolled, regardless of when they dropped out. For persons 18 to 24 years old.

NA Not available. <sup>1</sup> Number of institutions includes count of branch campuses. Due to revised survey procedures, data beginning 1990 are not comparable with previous years. Beginning 1996 (2000 for data in this table), data reflect a new classification of institutions; this classification includes some additional, primarily 2-year, colleges and excludes a few institutions that did not award degrees. Includes institutions that were eligible to participate in Title IV federal financial aid programs. <sup>2</sup> Due to revised survey methods, data beginning 1990 not comparable with previous years. <sup>3</sup> Branch campuses counted according to actual status, e.g., 2-year branch in 2-year category. <sup>4</sup> Includes unclassified students. (Students taking courses for credit, but are not candidates for degrees.) <sup>5</sup> Includes items not shown separately. <sup>6</sup> Includes schools accredited by the National Association of Trade and Technical Schools. See footnote 1 for information pertaining to data beginning 2000.

**Table 269. Degree-Granting Institutions, Number and Enrollment by State: 2004**

[17,272 represents 17,272,000. Number of institutions beginning in academic year. Opening fall enrollment of resident and extension students attending full-time or part-time. Excludes students taking courses for credit by mail, radio, or TV, and students in branches of U.S. institutions operated in foreign countries. See Appendix III]

**Table 275. Students Reported Disability Status by Selected Characteristic: 2003–2004**

[19,054 represents 19,054,000]. Disabled students reported that they had one or more of the following conditions: a specific learning disability, a visual handicap, hard of hearing, deafness, a speech disability, an orthopedic handicap, or a health impairment. Based on the 2003–2004 National Postsecondary Student-Aid Study; see source for details. Includes Puerto Rico. See also Appendix III]
