The cooperation of the many contributors to this publication is gratefully acknowledged. Source notes below each table credit the various Government agencies which collaborated in furnishing information.

## CONTENTS

|   | Page   |  | Page       |
|---|--------|--|------------|
| Introduction .....                                  | iii    | VII—Cattle, hogs, and sheep:                           |            |
| Weights, measures, and conversion factors .....     | iv     | Cattle and calves .....                                | VII-1      |
| I—Grain and feed:                                   |        | Hogs .....   | VII-18     |
| Total grain supply .....                            | I-1    | Sheep and lambs .....                                  | VII-27     |
| Food grains:  |        | Wool .....   | VII-35     |
| Wheat .....   | I-1    | Goats and mohair .....                                 | VII-40     |
| Rye .....   | I-13   | Meats .....  | VII-41     |
| Rice .....  | I-16   | Hides .....  | VII-47     |
| Feed grains:  |        | Livestock numbers .....                                | VII-50     |
| Corn .....  | I-24   | VIII—Dairy and poultry statistics:                     |            |
| Oats .....  | I-32   | Cows, milk .....                                       | VIII-1     |
| Barley .....  | I-36   | Chickens .....   | VIII-28    |
| Sorghum .....                                       | I-41   | Dairy products .....                                   | VIII-14    |
| Grain consumption .....                             | I-47   | Turkeys .....  | VIII-38    |
| Animal units fed .....                              | I-48   | Eggs .....   | VIII-41    |
| Feedstuffs .....                                    | I-49   | IX—Farm resources, income and expenses:                |            |
| II—Cotton, tobacco, sugar crops, and honey:         |        | Economic trends .....                                  | IX-1       |
| Cotton .....  | II-1   | Farm property .....                                    | IX-2       |
| Sugarbeets .....                                    | II-13  | Farm labor .....                                       | IX-13      |
| Sugar .....   | II-16  | Farm production and distribution .....                 | IX-16      |
| Honey .....   | II-23  | Prices and income .....                                | IX-26      |
| Beeswax .....                                       | II-24  | Costs and expenses .....                               | IX-39      |
| Syrups .....  | II-26  | X—Taxes, insurance, credit, and cooperatives:          |            |
| Tobacco .....                                       | II-27  | Taxes and insurance .....                              | X-1        |
| III—Oilseeds, fats, and oils:                       |        | Credit and loan programs .....                         | X-14       |
| Cottonseed .....                                    | III-1  | Farmers' cooperatives .....                            | X-17       |
| Flaxseed .....                                      | III-5  | Rural utilities .....                                  | X-18       |
| Peanuts .....                                       | III-8  | XI—Stabilization and price-support programs:           |            |
| Soybeans .....                                      | III-13 | Price support .....                                    | XI-1       |
| Sunflower .....                                     | III-20 | Payments to producers .....                            | XI-9       |
| Peppermint and spearmint .....                      | III-23 | Marketing agreements and orders .....                  | XI-14      |
| Olive oil .....                                     | III-24 | XII—Agricultural conservation and forestry statistics: |            |
| Margarine .....                                     | III-24 | Conservation Reserve Programs .....                    | XII-1      |
| Shortening .....                                    | III-25 | Soil conservation programs .....                       | XII-13     |
| Fats and oils .....                                 | III-26 | Forestry .....   | XII-15     |
| IV—Vegetables and melons:                           |        | XIII—Consumption and family living:                    |            |
| Vegetables and melons .....                         | IV-1   | Population .....                                       | XIII-1     |
| Vegetable and shipments .....                       | IV-30  | Food consumption and nutrition .....                   | XIII-1     |
| Vegetable utilization .....                         | IV-31  | Prices at retail levels .....                          | XIII-10    |
| Commercial pack .....                               | IV-32  | Food service establishments .....                      | XIII-10    |
| V—Fruits, tree nuts, and horticultural specialties: |        | XIV—Fertilizers and pesticides:                        |            |
| Fruits .....  | V-1    | Field crops .....                                      | XIV-1      |
| Tree nuts .....                                     | V-37   | Fruits .....   | XIV-13     |
| Cocoa beans, coffee, and tea .....                  | V-42   | Vegetables .....                                       | XIV-14     |
| Mushrooms .....                                     | V-45   | XV—Miscellaneous agricultural statistics:              |            |
| Flowers .....                                       | V-47   | Agricultural imports and exports .....                 | XV-2       |
| VI—Hay, seeds, and minor field crops:               |        | Fishery statistics .....                               | XV-10      |
| Hay .....   | VI-1   | Refrigeration statistics .....                         | XV-27      |
| Seeds .....   | VI-6   | Alaska statistics .....                                | XV-29      |
| Beans, dry edible .....                             | VI-7   | Crop rankings .....                                    | XV-30      |
| Peas, dry .....                                     | VI-10  | Crop progress .....                                    | XV-31      |
| Hops .....  | VI-11  | Appendix I:  |            |
|   |        | Telephone contact list .....                           | Appendix-1 |
|   |        | Index .....  | Index-1    |

# Introduction

*Agricultural Statistics* is published each year to meet the diverse need for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. Its tables of annual data cover a wide variety of facts in forms suited to most common use.

Inquiries concerning more current or more detailed data, past and prospective revisions, or the statistical methodology used should be addressed directly to the agency credited with preparing the table. Most of the data were prepared or compiled in the U.S. Department of Agriculture.

The historical series in this volume have been generally limited to data beginning with 1993 or later.

Foreign agricultural trade statistics include Government as well as non-Government shipments of merchandise from the United States and Territories to foreign countries. They do not include U.S. shipments to the U.S. Armed Forces abroad for their own use or shipments between the States and U.S. Territories. The world summaries of production and trade of major farm products are prepared by the U.S. Department of Agriculture from reports of the U.S. Department of Commerce, official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, and the result of office research.

Statistics presented in many of the tables represent actual counts of the items covered. Most of the statistics relating to foreign trade and to Government programs, such as numbers and amounts of loans made to farmers, and amounts of loans made by the Commodity Credit Corporation, etc., are data of this type. A large number of other tables, however, contain data that are estimates made by the Department of Agriculture.

The estimates for crops, livestock, and poultry made by the U.S. Department of Agriculture are prepared mainly to give timely current State and national totals and averages. They are based on data obtained by sample surveys of farmers and of people who do business with farmers. The survey data are supplemented by information from the Censuses of Agriculture taken every five years and check data from various sources. Being estimates, they are subject to revision as more data become available from commercial or Government sources. Unless otherwise indicated, the totals for the United States shown in the various tables on area, production, numbers, price, value, supplies, and disposition are based on official Department estimates. They exclude States for which no official estimates are compiled.

## DEFINITIONS

“Value of production” as applied to crops in the various tables, is derived by multiplying production by the estimated season average price received by farmers for that portion of the commodity actually sold. In the case of fruits and vegetables, quantities not harvested because of low prices or other economic factors are not included in value of production. The word “Value” is used in the inventory tables on livestock and poultry to mean value of the number of head on the inventory date. It is derived by multiplying the number of head by an estimated value per head as of the date.

The word “Year” (alone) in a column heading means calendar year unless otherwise indicated. “Ton” when used in this book without qualifications means a short ton of 2,000 pounds.

**WEIGHTS, MEASURES, AND CONVERSION FACTORS**

The following table on weights, measures, and conversion factors covers the most important agricultural products, or the products for which such information is most frequently asked of the U.S. Department of Agriculture. It does not cover all farm products nor all containers for any one product.

The information has been assembled from State schedules of legal weights, various sources within the U.S. Department of Agriculture, and other Government agencies. For most products, particularly fruits and vegetables, there is a considerable variation in weight per unit of volume due to differences in variety or size of commodity, condition and tightness of pack, degree to which the container is heaped, etc. Effort has been made to select the most representative and fairest average for each product. For those commodities which develop considerable shrinkage, the point of origin weight or weight at harvest has been used.

The approximate or average weights as given in this table do not necessarily have official standing as a basis for packing or as grounds for settling disputes. Not all of them are recognized as legal weight. The table was prepared chiefly for use of workers in the U.S. Department of Agriculture who have need of conversion factors in statistical computations.

**WEIGHTS, MEASURES, AND CONVERSION FACTORS**  
(See explanatory text just preceding this table)

**WEIGHTS AND MEASURES**

| Commodity                   | Unit <sup>1</sup>  | Approximate net weight |                  | Commodity                    | Unit <sup>1</sup>                                     | Approximate net weight |                  |
|-----------------------------|--|------------------------|------------------|------------------------------|---|------------------------|------------------|
|                             |  | U.S.                   | Metric           |                              |   | U.S.                   | Metric           |
|                             |  | <i>Pounds</i>          | <i>Kilograms</i> |                              |   | <i>Pounds</i>          | <i>Kilograms</i> |
| Alfalfa seed .....          | Bushel .....   | 60                     | 27.2             | Celery .....                 | Crate <sup>a</sup> .....                              | 60                     | 27.2             |

## CONVERSION FACTORS

| Commodity   | Unit                                    | Approximate equivalent  |
|---|---|---|
| Apples .....  | 1 pound dried .....                     | 7 pounds fresh; beginning 1943, 8 pounds fresh  |
| Do .....  | 1 pound chops .....                     | 5 pounds fresh  |
| Do .....  | 1 case canned <sup>21</sup> .....       | 1.4 bushels fresh   |
| Applesauce .....  | .....do <sup>21</sup> .....             | 1.2 bushels fresh   |
| Apricots .....  | 1 pound dried .....                     | 6 pounds fresh  |
| Barley flour .....  | 100 pounds .....                        | 4.59 bushels barley   |
| Beans, lima .....   | 1 pound shelled .....                   | 2 pounds unshelled  |
| Beans, snap or wax .....  | 1 case canned <sup>22</sup> .....       | 0.008 ton fresh   |
| Buckwheat flour .....   | 100 pounds .....                        | 3.47 bushels buckwheat  |
| Calves .....  | 1 pound live weight .....               | 0.611 pound dressed weight (1999 average)   |
| Cattle .....  | .....do .....                           | 0.607 pound dressed weight (1999 average)   |
| Cane syrup .....  | 1 gallon .....                          | 5 pounds sugar  |
| Cherries, tart .....  | 1 case canned <sup>21</sup> .....       | 0.023 ton fresh   |
| Chickens .....  | 1 pound live weight .....               | 0.72 pound ready-to-cook weight   |
| Corn, shelled .....   | 1 bushel (56 lbs.) .....                | 2 bushels (70 pounds) of husked ear corn  |
| Corn, sweet .....   | 1 case canned <sup>22</sup> .....       | 0.030 ton fresh   |
| Commeal:  |   |   |
| Degermed .....  | 100 pounds .....                        | 3.16 bushels corn, beginning 1946   |
| Nondegermed .....   | .....do .....                           | 2 bushels corn, beginning 1946  |
| Cotton .....  | 1 pound ginned .....                    | 3.26 pounds seed cotton, including trash <sup>23</sup>  |
| Cottonseed meal .....   | 1 pound .....                           | 2.10 pounds cottonseed  |
| Cottonseed oil .....  | .....do .....                           | 5.88 pounds cottonseed  |
| Dairy products:   |   |   |
| Butter .....  | .....do .....                           | 21.1 pounds milk  |
| Cheese .....  | .....do .....                           | 10 pounds milk  |
| Condensed milk, whole .....   | .....do .....                           | 2.3 pounds milk   |
| Dry cream .....   | .....do .....                           | 19 pounds milk  |
| Dry milk, whole .....   | .....do .....                           | 7.6 pounds milk   |
| Evaporated milk, whole .....  | .....do .....                           | 2.14 pounds milk  |
| MalTED milk .....   | .....do .....                           | 2.6 pounds milk   |
| Nonfat dry milk .....   | .....do .....                           | 11 pounds liquid skim milk  |
| Ice cream <sup>24</sup> .....   | 1 gallon .....                          | 15 pounds milk  |
| Ice cream <sup>24</sup> (eliminating fat from butter and concentrated milk) ..... | .....do .....                           | 12 pounds milk  |
| Eggs .....  | 1 case .....                            | 47 pounds   |
| Eggs, shell .....   | .....do .....                           | 41.2 pounds frozen or liquid whole eggs   |
| Do .....  | .....do .....                           | 10.3 pounds dried whole eggs  |
| Figs .....  | 1 pound dried .....                     | 3 pounds fresh in California; 4 pounds fresh elsewhere  |
| Flaxseed .....  | 1 bushel .....                          | About 2½ gallons oil  |
| Grapefruit, Florida .....   | 1 case canned juice <sup>22</sup> ..... | 0.64 box fresh fruit  |
| Hogs .....  | 1 pound live weight .....               | 0.737 pound dressed weight, excluding lard (1999 average)                                       |
| Linseed meal .....  | 1 pound .....                           | 1.51 pounds flaxseed  |
| Linseed oil .....   | .....do .....                           | 2.77 pounds flaxseed  |
| Malt .....  | 1 bushel (34 lbs.) .....                | 1 bushel barley (48 lbs.)   |
| Maple syrup .....   | 1 gallon .....                          | 8 pounds maple sugar  |
| Nuts:   |   |   |
| Almonds, imported .....   | 1 pound shelled .....                   | 3½ pounds unshelled   |
| Almonds, California .....   | .....do .....                           | 2.22 pounds unshelled through 1949; 2 pounds thereafter   |
| Brazil .....  | .....do .....                           | 2 pounds unshelled  |
| Cashews .....   | .....do .....                           | 4.55 pounds unshelled   |
| Chestnuts .....   | .....do .....                           | 1.19 pounds unshelled   |
| Filberts .....  | .....do .....                           | 2.22 pounds unshelled through 1949; 2.5 pounds thereafter                                       |
| Pecans:   |   |   |
| Seedling .....  | .....do .....                           | 2.78 pounds unshelled   |
| Improved .....  | .....do .....                           | 2.50 pounds unshelled   |
| Pignolias .....   | .....do .....                           | 1.3 pounds unshelled  |
| Pistachios .....  | .....do .....                           | 2 pounds unshelled  |
| Walnuts:  |   |   |

| Wheat flour .....                      | 100 pounds .....                  | 2.30 bushels wheat <sup>25</sup>   |
| Wool, domestic apparel shorn .....     | 1 pound greasy .....              | 0.48 pounds scoured  |
| Wool, domestic apparel pulled .....    | .....do .....                     | 0.73 pound scoured   |

<sup>1</sup> Standard bushel used in the United States contains 2,150.42 cubic inches; the gallon, 231 cubic inches; the cranberry barrel, 5,826 cubic inches; and the standard fruit and vegetable barrel, 7,056 cubic inches. Such large-sized products as apples and potatoes sometimes are sold on the basis of a heaped bushel, which would exceed somewhat the 2,150.42 cubic inches of a bushel basket level full. This also applies to such products as sweetpotatoes, peaches, green beans, green peas, spinach, etc.

<sup>2</sup> Approximate inside dimensions, 4½ by 12½ by 16½ inches.

<sup>3</sup> Approximate inside dimensions, 4½ by 16 by 16½ inches.

<sup>4</sup> Approximate dimensions, 4½ by 13½ by 16½ inches.

<sup>5</sup> Approximate inside dimensions, 13 by 12 by 32 inches.

<sup>6</sup> Approximate inside dimensions, 13 by 18 by 21½ inches.

<sup>7</sup> This is the weight commonly used in trade practices, the actual weight varying according to temperature conditions.

<sup>8</sup> Approximate inside dimensions, 9¾ by 16 by 20 inches.

<sup>9</sup> Approximate inside dimensions, 4½ by 11½ by 14 inches.

<sup>10</sup> The standard weight of 70 pounds is usually recognized as being about 2 measured bushels of corn, husked, on the ear, because it required 70 pounds to yield 1 bushel, or 56 pounds, of shelled corn.

<sup>11</sup> For statistical purposes the bale of cotton is 500 pounds or 480 pounds net weight. Prior to Aug. 1, 1946, the net weight was estimated at 478 pounds. Actual bale weights vary considerably, and the customary average weights of bales of foreign cotton differ from that of the American square bale.

<sup>12</sup> This is the average weight of cottonseed, although the legal weight in some States varies from this figure of 32 pounds.

<sup>13</sup> Approximate inside dimensions, 9¼ by 10½ by 15 inches.

<sup>14</sup> Approximate inside dimensions, 1¾ by 11 by 16½ inches.

<sup>15</sup> Approximate inside dimensions, 11½ by 11½ by 24 inches.

<sup>16</sup> Beginning with the 1993-94 season, net weights for California Desert Valley and Arizona grapefruit were increased from 64 to 67 pounds, equal to the California other area net weight, making a 67 pound net weight apply to all of California.

<sup>17</sup> Approximate inside dimensions, 4¾ by 16 by 16½ inches.

<sup>18</sup> Approximate inside dimensions, 9¾ by 13 by 25 inches.6 by 16 by 16½ inches.

<sup>19</sup> Includes both sorghum grain (kafir, milo, hegari, etc.) and sweet sorghum varieties.

<sup>20</sup> This average of 55 pounds indicates the usual weight of sweetpotatoes when harvested. Much weight is lost in curing or drying and the net weight when sold in terminal markets may be below 55 pounds.

<sup>21</sup> Case of 24 No. 2½ cans.

<sup>22</sup> Case of 24 No. 303 cans.

<sup>23</sup> Varies widely by method of harvesting.

<sup>24</sup> The milk equivalent of ice cream per gallon is 15 pounds. Reports from plants indicate about 81 percent of the butterfat in ice cream is from milk and cream, the remainder being from butter and concentrated milk. Thus the milk equivalent of the milk and cream in a gallon of ice cream is about 12 pounds.

<sup>25</sup> This is equivalent to 4.51 bushels of wheat per barrel (196 pounds) of flour and has been used in conversions, beginning July 1, 1957. Because of changes in milling processes, the following factors per barrel of flour have been used for earlier periods: 1790-1879, 5 bushels; 1880-1908, 4.75 bushels, 1909-17, 4.7 bushels; 1918 and 1919, 4.5 bushels; 1920, 4.6 bushels; 1921-44, 4.7 bushels; July 1944-Feb. 1946, 4.57 bushels; March 1946-Oct. 1946, average was about 4.31 bushels; and Nov. 1946-June 1957, 4.57 bushels.

# CHAPTER I

## STATISTICS OF GRAIN AND FEED

This chapter contains tables for wheat, rye, rice, corn, oats, barley, sorghum grain, and feedstuffs. Estimates are given of area, production, disposition, supply and disappearance, prices, value of production, stocks, foreign production and trade, price-support operations, animal units fed, and feed consumed by livestock and poultry.

**Table 1-1.—Total grain: Supply and disappearance, United States, 1994–2003<sup>1</sup>**

| Year <sup>2</sup>       | Supply              |                     |                     |                     | Disappearance       |                     |                     | Ending stocks       |
|-------------------------|---------------------|---------------------|---------------------|---------------------|---------------------|---------------------|---------------------|---------------------|
|                         | Beginning stocks    | Production          | Imports             | Total               | Domestic use        | Exports             | Total disappearance |                     |
|                         | Million metric tons | Million metric tons | Million metric tons | Million metric tons | Million metric tons | Million metric tons | Million metric tons | Million metric tons |
| 1994 .....              | 44.0                | 355.6               | 6.3                 | 405.9               | 246.1               | 99.2                | 345.3               | 60.5                |

| 2003 <sup>4</sup> ..... | 45.5                | 348.3               | 5.0                 | 398.8               | 263.4               | 92.3                | 355.7               | 43.2                |

<sup>1</sup> Aggregate data on corn, sorghum, barley, oats, wheat, rye, and rice. <sup>2</sup> The marketing year for corn and sorghum begins September 1; for oats, barley, wheat, and rye, June 1; and for rice, August 1. <sup>3</sup> Preliminary. <sup>4</sup> Projected as of February 10, 2004; World Agricultural Supply and Demand Estimates. Totals may not add due to independent rounding.

ERS, Market and Trade Economics Division, (202) 694–5296.

<sup>1</sup> Payment rates for the 1995/96 and prior crop years were calculated according to the provisions of the now defunct deficiency payment/production adjustment program. Payment rates for the 1996/97 through 2001/2002 crops were calculated according to the provisions of the Production Flexibility Contract (PFC) program, following enactment of the Federal Agriculture Improvement and Reform Act of 1996 (1996 Act) and included supplemental PFC payment rates for 1998 through 2001. Payment rates for the 2002/2003 and subsequent crops are calculated according to the provisions of the Direct Payment program, following enactment of the Farm Security and Rural Investment Act of 2002 (2002 Act) and includes a PFC payment rate for 2002 only. Payment rates are rounded to the nearest tenth of a cent. <sup>2</sup> The national average loan rate was also known as the price support rate prior to enactment of the 1996 Act. <sup>3</sup> Between the 1996/97 and 2001/2002 marketing years, target prices were no longer applicable; however, with enactment of the 2002 Act, target prices were reestablished. <sup>4</sup> Represents loans made, purchases, and purchase agreements entered into. Purchases and purchase agreements are no longer authorized for the 1996 and subsequent crops following enactment of the 1996 Act. <sup>5</sup> Acquisition of forfeited loans made from current crop. <sup>6</sup> Includes 141 million in 1994/95 in Food Security Reserve, 118 million in 1995/96, 93 million in 1996/97 through 2001/02 and 66 million in 2002/03. (The Food Security Reserve became the Food Security Commodity Trust in July of 1999 and the Bill Emerson Humanitarian Trust in July of 2002.) NA-not applicable.

FSA, Food Grains Analysis Group, (202) 720-5653.

<sup>1</sup> Years shown refer to years of harvest. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1994 is combined with estimates for the Southern Hemisphere Harvests, which begin late in 1994 and end early in 1995. <sup>2</sup> Harvested area as far as possible. <sup>3</sup> Preliminary.

FAS, Production Estimates and Crop Assessment Division, (202) 720-0888. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attaches and Foreign Service Officers, results of office research, and related information.

**Table 1-12.—Wheat and flour: United States imports, 1993–2002**

| Year beginning June | Wheat grain <sup>1</sup> | Flour (wheat equivalent) | Other products (wheat equivalent) <sup>2</sup> | Total wheat, flour, and other products |
|---------------------|--------------------------|--------------------------|--|--|
|                     | 1,000 bushels            | 1,000 bushels            | 1,000 bushels                                  | 1,000 bushels                          |
| 1993 .....          | 91,287                   | 6,486                    | 11,086   | 108,859                                |
| 1994 .....          | 70,561                   | 8,073                    | 13,313   | 91,947                                 |
| 1995 .....          | 47,753                   | 6,687                    | 13,493   | 67,933                                 |
| 1996 .....          | 71,727                   | 6,386                    | 14,220   | 92,333                                 |
| 1997 .....          | 73,245                   | 6,055                    | 15,623   | 94,923                                 |
| 1998 .....          | 79,766                   | 7,423                    | 15,815   | 103,004                                |
| 1999 .....          | 72,408                   | 7,116                    | 14,986   | 94,511                                 |
| 2000 .....          | 66,313                   | 8,863                    | 14,649   | 89,825                                 |
| 2001 .....          | 82,615                   | 9,907                    | 15,029   | 107,551                                |
| 2002 .....          | 49,743                   | 11,945                   | 15,691   | 77,380                                 |

<sup>1</sup> Starting January 1989, Census ceased reporting wheat suitable for milling and unfit for human consumption. <sup>2</sup> Includes macaroni, semolina, and similar products. Beginning in 1988/89 total wheat grain is reported under the suitable for milling column.

ERS, Market and Trade Economics Division, (202) 694-5285.

<sup>1</sup> Years shown refer to years of harvest. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow: thus the crop harvested in the Northern Hemisphere in 1994 is combined with estimates for the Southern Hemisphere harvests, which begin late in 1994 and end early in 1995. <sup>2</sup> Harvested area as far as possible. <sup>3</sup> Preliminary.

FAS, Production Estimates and Crop Assessment Division, (202) 720-0888. Prepared or estimated on the basis of official statistics of foreign Governments, other foreign source materials, reports of Agricultural Counselors, Attachés, and Foreign Service Officers, results of office research, and related information.

**Table 1-21.—Rice, rough: Area, yield, production, and value, United States, 1994–2003<sup>1</sup>**

| Year       | Area planted       | Area harvested     | Yield per acre | Production        | Marketing year average price per cwt. received by farmers <sup>2</sup> | Value of production <sup>2</sup> |
|------------|--------------------|--------------------|----------------|-------------------|--|----------------------------------|
|            | <i>1,000 acres</i> | <i>1,000 acres</i> | <i>Pounds</i>  | <i>1,000 cwt.</i> | <i>Dollars</i>   | <i>1,000 dollars</i>             |
| 1994 ..... | 3,353.0            | 3,316.0            | 5,964          | 197,779           | 6.78   | 1,336,570                        |
| 1995 ..... | 3,121.0            | 3,093.0            | 5,621          | 173,871           | 9.15   | 1,587,236                        |
| 1996 ..... | 2,824.0            | 2,804.0            | 6,120          | 171,599           | 9.96   | 1,690,270                        |
| 1997 ..... | 3,125.0            | 3,103.0            | 5,897          | 182,992           | 9.70   | 1,756,136                        |
| 1998 ..... | 3,285.0            | 3,257.0            | 5,663          | 184,443           | 8.89   | 1,654,157                        |
| 1999 ..... | 3,531.0            | 3,512.0            | 5,866          | 206,027           | 5.93   | 1,231,207                        |
| 2000 ..... | 3,060.0            | 3,039.0            | 6,281          | 190,872           | 5.61   | 1,049,961                        |
| 2001 ..... | 3,334.0            | 3,314.0            | 6,496          | 215,270           | 4.25   | 925,055                          |
| 2002 ..... | 3,240.0            | 3,207.0            | 6,578          | 210,960           | 4.49   | 979,628                          |
| 2003 ..... | 3,022.0            | 2,997.0            | 6,645          | 199,157           | 7.25   | 1,485,031                        |

<sup>1</sup>Sweet rice yield and production included in 2003 as short grain but not in previous years. <sup>2</sup>Marketing year average price and value of production for 1998-2002 will be updated in a statistical bulletin to be released in October 2004.

NASS, Crops Branch, (202) 720-2127.

All data updated as of January 2003. Totals may not add due to independent rounding.

<sup>1</sup> Consolidated supply and disappearance of rough and milled rice. Milled rice data converted to a rough basis using annually derived extraction rates as factors. <sup>2</sup> The residual includes unaccounted losses in drying, processing, and handling. <sup>3</sup> Trade data from Bureau of the Census. <sup>4</sup> Preliminary.

ERS, Market and Trade Economics Division, (202) 694-5292.

<sup>1</sup> Payment rates for the 1995/96 & prior crop years were calculated according to the provisions of the now defunct deficiency payment/production adjustment program. Payment rates for the 1996/97 through 2001/2002 crops were calculated according to the provisions of the Production Flexibility Contract (PFC) program, following enactment of the Federal Agriculture Improvement and Reform Act of 1996 (1996 Act) and included supplemental PFC payment rates for 1998 through 2001. Payment rates for the 2002/2003 and subsequent crops are calculated according to the provisions of the Direct Payment program, following enactment of the Farm Security and Rural Investment Act of 2002 (2002 Act) and includes a PFC payment rate for 2002 only. Payment rates are rounded to the nearest tenth of a cent. <sup>2</sup> The national average loan rate was also known as the price support rate prior to enactment of the 1996 Act. <sup>3</sup> Between the 1996/97 and 2001/2002 marketing years, target prices were no longer applicable; however, with enactment of the 2002 Act, target prices were reestablished. <sup>4</sup> Includes loans made and purchase agreements entered. Excludes quantities on which loan deficiency payments were made. <sup>5</sup> Acquisition through loan forfeitures, crop-year basis. NA-not applicable.

<sup>1</sup> Crop year beginning Aug. 1. Crops harvested in the Northern Hemisphere during the latter part of the year are combined with those harvested in Asia principally from November to May, and in the Southern Hemisphere harvested during the first part of the following year. <sup>2</sup> Harvested area as far as possible. <sup>3</sup> Preliminary.

FAS, Production Estimates and Crop Assessment Division, (202) 720-0888. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attachés and Foreign Service Officers, results of office research, and related information.

<sup>1</sup> Years shown refer to years of harvest. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1994 is combined with estimates for the Southern Hemisphere harvest, which begins late in 1994 and ends early in 1995. <sup>2</sup> Harvested area as far as possible. <sup>3</sup> Preliminary.

FAS, Production Estimates and Crop Assessment Division, (202) 720-0888. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attachés and Foreign Service Officers, results of office research, and related information.

<sup>1</sup> Payment rates for the 1995/96 and prior crop years were calculated according to the deficiency payment/production adjustment program provisions. Payment rates for the 1996/97 through 2001/2002 crops were calculated according to the Production Flexibility Contract (PFC) program provisions of the Federal Agriculture Improvement and Reform Act of 1996 (1996 Act) and include supplemental PFC payment rates for 1998 through 2001. Payment rates for the 2002/2003 and subsequent crops are calculated according to the Direct and Counter-cyclical program provisions, following enactment of the Farm Security and Rural Investment Act of 2002 (2002 Act). Payment rates are rounded to the nearest cent. Beginning with 2002/2003, the first entry is the direct payment rate and the second entry is the counter-cyclical payment rate. <sup>2</sup> The national average loan rate was also known as the price support rate prior to enactment of the 1996 Act. <sup>3</sup> Between the 1996/97 and 2001/2002 marketing years, target prices were not longer applicable; however, target prices were reestablished under the 2002 Act. <sup>4</sup> Represents loans made, purchases, and purchase agreements entered into. Purchases and purchase agreements are no longer authorized for the 1996 and subsequent crops following enactment of the 1996 Act. Percentage of production is on a grain basis. Excludes quantity on which loan deficiency payments were made. <sup>5</sup> Acquisition of all loans forfeited during the marketing year. For 2002/2003, as of September 30, 2003. NA-not applicable.

FSA, Feed Grains & Oilseeds Analysis Group, (202) 720-8838.

<sup>1</sup> Payment rates for the 1995/96 and prior crop years were calculated according to the deficiency payment/production adjustment program provisions. Payment rates for the 1996/97 through 2001/2002 crops were calculated according to the Production Flexibility Contract (PFC) program provisions of the Federal Agriculture Improvement and Reform Act of 1996 (1996 Act) and include supplemental PFC payment rates for 1998 through 2001. Payment rates for the 2002/2003 and subsequent crops are calculated according to the Direct and Counter-cyclical program provisions, following enactment of the Farm Security and Rural Investment Act of 2002 (2002 Act). Payment rates are rounded to the nearest cent. Beginning with 2002/2003, the first entry is the direct payment rate and the second entry is the counter-cyclical payment rate. <sup>2</sup> The national average loan rate was also known as the price support rate prior to enactment of the 1996 Act. <sup>3</sup> Between the 1996/97 and 2001/2002 marketing years, target prices were not longer applicable; however, target prices were reestablished under the 2002 Act. <sup>4</sup> Represents loans made, purchases, and purchase agreements entered into. Purchases and purchase agreements are no longer authorized for the 1996 and subsequent crops following enactment of the 1996 Act. Percentage of production is on a grain basis. Excludes quantity on which loan deficiency payments were made. <sup>5</sup> Acquisition of all loans forfeited during the marketing year. For 2002/2003, as of September 30, 2003. NA-not applicable.

FSA, Feed Grains & Oilseeds Analysis Group, (202) 720-8838.

**Table 1-49.—Oats: Area, yield, and production, by States, 2001–2003**

<sup>1</sup> Years shown refer to years of harvest. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1994 is combined with estimates for the Southern Hemisphere harvest, which begins late in 1994 and ends early in 1995. <sup>2</sup> Harvested area as far as possible. <sup>3</sup> Preliminary.

FAS Production Estimates and Crop Assessment Division, (202) 720-0888. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attaches, and Foreign Service Officers, results of office research, and related information.

<sup>1</sup> Years shown refer to year of harvest. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1994 is combined with estimates of the Southern Hemisphere harvests, which begin late in 1994 and end early in 1995. <sup>2</sup> Harvested area as far as possible. <sup>3</sup> Preliminary.

FAS, Production Estimates and Crop Assessment Division, (202) 720-0888. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attachés and Foreign Service Officers, results of office research, and related information.

**Table 1-58.—Grains and grain products: Total and per capita civilian consumption as food, United States, 1993–2002**

| 2002 <sup>9</sup> .....    | 981                         | 18.1                                    | 7.0              | 78.1          | 3.3           | 4.6           | 60.2                        | 4.5   | 6.4                         | 0.7  |

<sup>1</sup>Data are in marketing year; for corn, September 1-August 31; for oats and barley, June 1-May 31; and rice, August 1-July 31. Wheat, rye, syrup, and sugar are in calendar year. <sup>2</sup>Excludes quantities used in alcoholic beverages. <sup>3</sup>Includes white, whole wheat, and semolina flour. <sup>4</sup>Does not include shipments to U.S. territories. Excludes rice used in alcoholic beverages. Includes imports and rice used in processed foods and pet foods. <sup>5</sup>Includes an allowance for the quantity used as hominy and grits. This series is not adjusted for trade. <sup>6</sup>Oats used in oatmeal, prepared breakfast foods, infant foods, and food products. <sup>7</sup>Malt for food, breakfast food uses, pearl barley, and flour. <sup>8</sup>Malt equivalent of barley food products. <sup>9</sup>Preliminary. Estimates of corn syrup and sugar are unofficial estimates; industry data were not reported after April 1968.

ERS, Market & Trade Economics Division, (202) 694-5290. All figures are estimates based on data from private industry sources, the U.S. Department of Commerce, the Internal Revenue Service, and other Government agencies.

<sup>1</sup>Payment rates for the 1995/96 and prior crop years were calculated according to the deficiency payment/production adjustment program provisions. Payment rates for the 1996/97 through 2001/2002 crops were calculated according to the Production Flexibility Contract (PFC) program provisions of the Federal Agriculture Improvement and Reform Act of 1996 (1996 Act) and include supplemental PFC payment rates for 1998 through 2001. Payment rates for the 2002/2003 and subsequent crops are calculated according to the Direct and Counter-cyclical program provisions, following enactment of the Farm Security and Rural Investment Act of 2002 (2002 Act). Payment rates are rounded to the nearest cent. Beginning with 2002/2003, the first entry is the direct payment rate and the second entry is the counter-cyclical payment rate. <sup>2</sup>The national average loan rate was also known as the price support rate prior to enactment of the 1996 Act. <sup>3</sup>Between the 1996/97 and 2001/2002 marketing years, target prices were not longer applicable; however, target prices were reestablished under the 2002 Act. <sup>4</sup>Represents loans made, purchases, and purchase agreements entered into. Purchases and purchase agreements are no longer authorized for the 1996 and subsequent crops following enactment of the 1996 Act. Percentage of production is on a grain basis. Excludes quantity on which loan deficiency payments were made. <sup>5</sup>Acquisition of all loans forfeited during the marketing year. For 2002/2003, as of September 30, 2003. NA-not applicable.

FSA, Feed Grains & Oilseeds Analysis Group, (202) 720-8838.

<sup>1</sup> Payment rates for the 1995/96 and prior crop years were calculated according to the deficiency payment/production adjustment program provisions. Payment rates for the 1996/97 through 2001/2002 crops were calculated according to the Production Flexibility Contract (PFC) program provisions of the Federal Agriculture Improvement and Reform Act of 1996 (1996 Act) and include supplemental PFC payment rates for 1998 through 2001. Payment rates for the 2002/2003 and subsequent crops are calculated according to the Direct and Counter-cyclical program provisions, following enactment of the Farm Security and Rural Investment Act of 2002 (2002 Act). Payment rates are rounded to the nearest cent. Beginning with 2002/2003, the first entry is the direct payment rate and the second entry is the counter-cyclical payment rate. <sup>2</sup> The national average loan rate was also known as the price support rate prior to enactment of the 1996 Act. <sup>3</sup> Between the 1996/97 and 2001/2002 marketing years, target prices were not longer applicable; however, target prices were reestablished under the 2002 Act. <sup>4</sup> Represents loans made, purchases, and purchase agreements entered into. Purchases and purchase agreements are no longer authorized for the 1996 and subsequent crops following enactment of the 1996 Act. Percentage of production is on a grain basis. Excludes quantity on which loan deficiency payments were made. <sup>5</sup> Acquisition of all loans forfeited during the marketing year. For 2002/2003, as of September 30, 2003. NA-not applicable.

<sup>1</sup> Feed consumed by all cattle divided by the number on feed Jan. 1. <sup>2</sup> Feed for all cattle, except milk cows, divided by the net live-weight production of cattle and calves. It includes the growth on dairy heifers and calves as well as all beef cattle. <sup>3</sup> Including wool produced. <sup>4</sup> Preliminary.

ERS, Market and Trade Economics Division, (202) 694–5290.

## CHAPTER X

### INSURANCE, CREDIT, AND COOPERATIVES

The statistics in this chapter deal with taxes, insurance, agricultural credit, and farm cooperatives. Some of the series were developed in connection with research activities of the Department, while others, such as data from agricultural credit agencies, are primarily records of operations.

**Table 10-1.—Crop losses: Average percentage of indemnities attributed to specific hazards, by crops, 1948–2001**

| Crop                          | Year      | Drought heat (excess) | Hail     | Precip. (excess poor drainage) | Frost freeze, (other cold damage) | Flood    | Cy-clone, tornado, wind, hot wind | In-sects | Dis-ease | All others |
|-------------------------------|-----------|-----------------------|----------|--------------------------------|-----------------------------------|----------|-----------------------------------|----------|----------|------------|

<sup>1</sup>Data for 2000 are preliminary. <sup>2</sup>Number of farms on which the insured crop was planted including duplication where both the landlord and tenant are insured. Insured farms on which no insured crop was planted are not included. <sup>3</sup>The insured's share of the planted area on the farm.

RMA, Program Automation Branch, (816) 926-7910.

<sup>1</sup> Includes operator households. <sup>2</sup> Although price-support loans of the Commodity Credit Corporation (CCC) are non-recourse loans, they are treated as income in the year received. They are not considered farm debt even though borrowers must either pay them or deliver the commodities on which they are based. <sup>3</sup> Preliminary.  
ERS, Farm Sector Performance and Well-Being Branch, (202) 694-5586.

<sup>1</sup> Includes loans made directly by FmHA and those guaranteed by the Agency. Amounts of loans made represent obligations and include loans to new borrowers and subsequent loans to borrowers who received an initial loan in a prior year. Amounts outstanding are loan advances less principal repayments for loans made directly by the Agency.

FSA, Loan Making Division, (202) 690-4006.

<sup>1</sup>Reports of cooperatives are included for the calendar year. <sup>2</sup>Includes independent local cooperatives, centralized cooperatives, federations of cooperatives and cooperatives with mixed organizational structures. Cooperatives are classified according to their major activity. If, for example, more than 50 percent of a cooperative’s business is derived from marketing activities, it is included as a marketing cooperative. <sup>3</sup>Includes cooperatives whose major activity is providing services related to marketing and farm supply activities. <sup>4</sup>Includes members (those entitled to vote for directors) but does not include nonvoting patrons. (Some duplication exists because some farmers belong to more than one cooperative.) <sup>5</sup>Receipts for services related to marketing and purchasing activities, but not included in the volumes reported for these activities. <sup>6</sup>Revised. <sup>7</sup>Preliminary. <sup>8</sup>Estimated gross business includes all business reported between cooperatives, such as the wholesale business of farm supply cooperatives with other cooperatives or terminal market sales for local cooperatives. <sup>9</sup>Estimated net business represents the value at the first level at which cooperatives transact business for farmers. Figures are adjusted for duplication resulting from intercooperative business.

Rural Business-Cooperative Service (RBS), Statistics, (202) 720-2480 or celestine.adams@usda.gov. Based on records from cooperatives reporting to the Service.

**Table 10-13.—Farmers' cooperatives: Business volume of marketing, farm supply, and related service cooperatives, United States, 2001 and 2002 (preliminary)**

| Item  | Gross business     |                    | Net business <sup>1</sup> |                   |

<sup>1</sup>Represents value at the first level at which cooperatives transact business for farmers. <sup>2</sup>Includes coffee, fish, forest products, hay, hops, seed marketed for growers, nursery stock, other farm products not separately classified, and sales of farm products not received directly from member-patrons. Also includes manufactured food products and resale items marketed by cooperatives. <sup>3</sup>Includes automotive supplies, building materials, chicks, containers, farm machinery and equipment, hardware, meats and groceries, and other supplies not separately classified. <sup>4</sup>Charges for services related to marketing or purchasing but not included in the volume reported for those activities, plus other income.

RBS, Statistics, (202) 720-2480 or celestine.adams@usda.gov. Based on records from cooperatives reporting to the Service.

<sup>1</sup> Represents value at the first level at which cooperatives transact business for farmers. These statistics for 2000 are presented on a national basis only. Totals may not add due to rounding. <sup>2</sup> Dollar volume or membership is not shown to avoid disclosing operations of individual cooperatives. <sup>3</sup> Sales outside the United States, sales to domestic military installations, and sales of certain products not received directly from member-patrons.

## CHAPTER XI

### STABILIZATION AND PRICE-SUPPORT PROGRAMS

The statistics in this chapter relate to activities of the Commodity Credit Corporation (CCC), cropland diversion and production adjustment programs, and marketing agreement and order programs for fruits and vegetables. Statistics for Federal Milk Marketing Order programs are contained in chapter VIII.

**Table 11-1.—Commodity Credit Corporation: Price-supported commodities owned as of Dec. 31, 1993–2002<sup>1</sup> (Inventory quantity)**

| Spearmint oil (2002 season) <sup>6</sup> .....              | 184                                      | 15,086               |
| (Total 36 programs) <sup>7</sup> .....                      |  | 5,211,127            |

<sup>1</sup> Value of non-Bartlett pears is not available. <sup>2</sup> The tart cherry order covers the States of Michigan, New York, Pennsylvania, Oregon, Utah, Washington, and Wisconsin. <sup>3</sup> Farm value is available only for fresh and processed combined. <sup>4</sup> Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in New York. (Only top 5 are reported). <sup>5</sup> The Farm Security and Rural Investment Act of 2002 terminated the Peanut Administrative committee (which locally administered marketing agreement No. 146). As a result, the agreement was terminated and new quality standards for all domestic and imported peanuts were established. <sup>6</sup> The marketing order regulates the handling of spearmint oil produced in the States of Washington, Idaho, Montana, Nevada, Utah, Oregon, and California. The farm value is the sum of values for Idaho, Oregon, and Washington, the only significant producing States in the marketing order area. <sup>7</sup> Total number of producers cannot be determined from totals for individual commodities; some producers produce more than one commodity.

## CHAPTER XII

# AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS

Statistics in this chapter concern conservation of various natural resources, particularly soil, water, timber, wetlands, wildlife, and improvement of water quality. Forestry statistics include area of private and public-owned forest land, timber production, imports and exports, pulpwood consumption and paper and board production, area burned over by forest fires, livestock grazing, and recreational use of national forest lands.

### Conservation Practices on Active Contracts

| Practice code           | Practice   | Acres      |
|-------------------------|--|------------|
| CP1 .....               | Introduced grasses and legumes .....             | 3,471,645  |
| CP2 .....               | Native grasses .....                             | 6,450,368  |
| CP3 .....               | Tree planting .....                              | 1,156,897  |
| CP4 .....               | Wildlife habitat with woody vegetation .....     | 2,350,356  |
| CP5 * .....             | Field windbreaks .....                           | 62,691     |
| CP6 .....               | Diversions .....                                 | 835        |
| CP7 .....               | Erosion control structures .....                 | 662        |
| CP8 * .....             | Grass waterways .....                            | 94,529     |
| CP9 * .....             | Shallow water areas for wildlife .....           | 47,147     |
| CP10 <sup>1</sup> ..... | Existing grasses and legumes .....               | 15,226,788 |
| CP11 .....              | Existing trees .....                             | 1,097,973  |
| CP12 .....              | Wildlife food plots .....                        | 75,340     |
| CP13 .....              | Vegetative filter strips .....                   | 29,740     |
| CP15 * .....            | Contour grass strips .....                       | 72,456     |
| CP16 * .....            | Shelterbelts .....                               | 25,890     |
| CP17 * .....            | Living snow fences .....                         | 3,602      |
| CP18 * .....            | Salinity reducing vegetation .....               | 285,417    |
| CP19 .....              | Alley cropping .....                             | 52         |
| CP20 .....              | Alternative perennials .....                     | 15         |
| CP21 * .....            | Filter strips (grass) .....                      | 922,167    |
| CP22 * .....            | Riparian buffers (trees) .....                   | 617,202    |
| CP23 .....              | Wetland restoration .....                        | 1,704,440  |
| CP24 * .....            | Cross wind trap strips .....                     | 616        |
| CP25 .....              | Rare and declining habitat .....                 | 645,543    |
| CP26 .....              | Sediment retention .....                         | 5          |
| CP27 .....              | Farmable wetland (wetland) .....                 | 28,839     |
| CP28 .....              | Farmable wetland (upland) .....                  | 71,492     |
| CP29 .....              | Wildlife habitat buffer (marginal pasture) ..... | 6,137      |
| CP30 .....              | Wetland buffer (marginal pasture) .....          | 4,114      |
| CP31 .....              | Bottomland hardwood .....                        | 13         |
| .....                   | Total .....                                      | 34,452,972 |

<sup>1</sup> Includes both introduced grasses and legumes and native grasses. \* Continuous non-CREP sign-up acreage includes practices denoted by an asterisk (\*) and acreage in designated wellhead protection areas (CP1, CP2, CP3, CP4, or CP10).

### CRP enrollment: By sign up and initial contract year<sup>1</sup>, as of January 2004

<sup>1</sup>For CRP, contract year is the same as fiscal year, which begins October 1. Note: There are no contracts with initial contract years 1994 or 1995. Note: General Signup Numbers: 1-13, 15,16,18, 20, 26. Continuous Signup Numbers: 14, 17, 19, 21-25, 27-28. <sup>2</sup> Signup 26 records are in development phase and acreage totals may be incomplete. Contracts with initial year 2005 were excluded.

FSA, Conservation and Environmental Protection Division, (202) 720-6675.

<sup>1</sup>In 1974, the program was part of the Rural Environmental Conservation Program (now called the Agricultural Conservation Program). Data for the program year were published in the 1974 Rural Environmental Conservation Program Summary. In 1975 it became a separately funded program. <sup>2</sup>On May 13, 2002, the 2002 Farm Bill de-authorized the program, which was originally authorized in 1978. Funds remaining on May 13, 2002, will be exhausted through FIP closeout, primarily funding the existing contractual backlog.

<sup>1</sup>Data may not add to totals because of rounding. <sup>2</sup>Forest land is land at least 10 percent stocked by forest trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated. Forest land includes transition zones, such as areas between heavily forested and nonforested lands that are at least 10 percent stocked with forest trees, and forest areas adjacent to urban and built-up lands. Also included are pinyon-juniper and chaparral areas in the West and afforested areas. The minimum area for classification of forest land is 1 acre. Roadside, streamside, and shelterbelt strips of timber must have a crown width at least 120 feet wide to qualify as forest land. Unimproved roads and trails, streams, and clearings in forest areas are classified as forest if less than 120 feet in width. <sup>3</sup>Timberland is forest land that is producing or is capable of producing crops of industrial wood and that is not withdrawn from timber utilization by statute or administrative regulation. Areas qualifying as timberland have the capability of producing more than 20 cubic feet per acre per year of industrial wood in natural stands. Currently inaccessible and inoperable areas are included. <sup>4</sup>Includes Indian lands. <sup>5</sup>Includes Hawaii.

<sup>1</sup>Data may not add to totals because of rounding. <sup>2</sup>Live trees of commercial species meeting specified standards of quality or vigor. Cull trees are excluded. Includes only trees 5.0-inches diameter or larger at 4½ feet above ground. <sup>3</sup>Live trees of commercial species containing at least one 12-foot sawlog or two noncontiguous 8-foot logs, and meeting regional specifications for freedom from defect. Softwood trees must be at least 9.0-inches diameter and hardwood trees must be at least 11.0-inches diameter at 4½ feet above ground. <sup>4</sup>Includes Hawaii.

FS, Timber Demand and Technology Assessment, RWU-4851, (608) 231-9376.

<sup>1</sup> Data may not add to totals because of rounding. <sup>2</sup> Includes live trees of commercial species meeting specified standards of quality or vigor. Cull trees are excluded. Includes only trees 5.0-inches diameter or larger at 4½ feet above ground. <sup>3</sup> Includes salvable dead trees, rough and rotten trees, trees of noncommercial species, trees less than 5.0-inches diameter at 4½ feet above ground, tops, and roundwood harvested from nonforest land (for example, fence rows). <sup>4</sup> Includes such items as cooperage, pilings, poles, posts, shakes, shingles, board mills, charcoal and export logs. <sup>5</sup> Downed and dead wood volume left on the ground after trees have been cut on timberland. <sup>6</sup> Net of wet rot or advanced dry rot, and excludes old punky logs; consists of material sound enough to chip; excludes stumps and limbs. <sup>7</sup> Unutilized wood volume from cut or otherwise killed growing stock, from nongrowing stock sources on timberland (for example, precommercial thinnings), or from timberland clearing. Does not include volume removed from inventory through reclassification of timberland to reserved timberland.

<sup>1</sup> Data may not add to totals because of rounding. <sup>2</sup> The net increase in the volume of trees during a specified year. Components include the increment in net volume of trees at the beginning of the specific year surviving to its end, plus the net volume of trees reaching the minimum size class during the year, minus the volume of trees that died during the year, and minus the net volume of trees that became cull trees during the year. <sup>3</sup> The net volume of trees removed from the inventory during a specified year by harvesting, cultural operations such as timber stand improvement, or land clearing. <sup>4</sup> The volume of sound wood in trees that died from natural causes during a specified year. <sup>5</sup> Includes Hawaii.

<sup>1</sup> *National Forest System acreage*.—A nationally significant system of Federally owned units of forest, range, and related land consisting of national forests, purchase units, national grasslands, land utilization project areas, experimental forest areas, experimental range areas, designated experimental areas, other land areas; water areas, and interests in lands that are administered by USDA Forest Service or designated for administration through the Forest Service.

National forests.—Units formally established and permanently set aside and reserved for national forest purposes.

Purchase units.—Units designated by the Secretary of Agriculture or previously approved by the National Forest Reservation Commission for purposes of Weeks Law Acquisition.

National grasslands.—Units designated by the Secretary of Agriculture and permanently held by the Department of Agriculture under Title III of the Bankhead-Jones Farm Tenant Act.

Land utilization projects.—Units designated by the Secretary of Agriculture for conservation and utilization under Title III of the Bankhead-Jones Farm Tenant Act.

Research and experimental areas.—Units reserved and dedicated by the Secretary of Agriculture for forest or range research and experimentation.

Other areas.—Units administered by the Forest Service that are not included in the above groups. <sup>2</sup> *Other acreage*.—Lands within the unit boundaries in private, State, county, and municipal ownership and Federal lands over which the Forest Service has no jurisdiction. Areas of such lands which have been offered to the United States and have been approved for acquisition and subsequent Forest Service administration, but to which title had not yet been accepted by the United States.

FS, Timber, Demand and Technology Assessment, RWU-4851, (608) 231-9376.

**Table 12-26.—Forest products cut on National Forest System lands: Volume and value of timber cut and value of all products, United States, fiscal years 1993–2002**

<sup>1</sup>Fiscal years Oct. 1–Sept. 30. <sup>2</sup>Payments under the acts of May 23, 1908 (as amended), July 24, 1956, and Oct. 22, 1976, are 25 percent of total receipts remaining after deducting (a) payments to Arizona and New Mexico on account school section lands administered by Forest Service, (b) appropriations of receipts under laws authorizing such appropriations for acquisition of lands in specified national forests or portions thereof, and (c) receipts from an area of the Superior National Forest, Minnesota, on account of which the State (for the counties) is paid 0.75 percent of the appraised valuation in lieu of 25 percent of the receipts. Payments made in the following year.

FS, Timber Demand and Technology Assessment, RWU-4851, (608) 231–9376.

<sup>1</sup> Western Washington and western Oregon. <sup>2</sup> Southern region. <sup>3</sup> Pacific Southwest region. Includes Jeffrey pine. <sup>4</sup> Pacific Northwest region. <sup>5</sup> Eastern and Southern regions. <sup>6</sup> Eastern region.

Forest Service National Forest prices in this table are for timber sold on a Scribner Decimal C log rule basis, except in the Northeastern States where International 1/4-inch log rule is used. Prices include KV payments; exclude timber sold by land exchanges and from land utilization project lands. Data for 1983 are statistical high bid prices; beginning in 1984, data are high bid prices which include specified road costs.

FS, Timber Demand and Technology Assessment, RWU-4851, (608) 231-9376.

## CHAPTER XIII

### CONSUMPTION AND FAMILY LIVING

The statistics in this chapter deal with the consumption of food by both rural and urban people, retail price levels, and other aspects of family living of farm people. Data presented here on quantities of food available for consumption are based on material presented in the earlier commodity chapters, but they are shown here at the retail level, a form that is more useful for an analysis of the demand situation faced by the producer. Data on quantities of farm-produced food consumed directly by farm households are presented in the commodity chapters. Its value and the rental value of the farm home are given in the section on farm income.

**Table 13-1.—Population: Number of people eating from civilian food supplies, United States, Jan. 1 and July 1, 1994–2003**

| Year       | Jan. 1          | July 1          |
|------------|-----------------|-----------------|
|            | <i>Millions</i> | <i>Millions</i> |
| 1994 ..... | 257.7           | 258.9           |

<sup>1</sup> Computed by Center for Nutrition Policy and Promotion (CNPP), USDA. Based on Economic Research Service estimates of per capita quantities of food available for consumption (retail weight) and on CNPP estimates of quantities of produce from home gardens and certain other foods. No deduction is made in food supply estimates for loss of food or nutrients in further processing, in marketing, or in the home. Data include iron, thiamin, riboflavin, niacin, vitamin A, vitamin B<sub>6</sub>, vitamin B<sub>12</sub>, ascorbic acid, and zinc added by enrichment and fortification. <sup>2</sup> Sodium levels do not reflect sodium from most processed foods and therefore underestimate total sodium available in the U.S. food supply.

**Table 13-3.—Food nutrients: Percentage of total contributed by major food groups, 1970<sup>1</sup>**

| Nutrient                                       | Meat, poultry, fish | Dairy <sup>2</sup> products | Eggs           | Fats, <sup>3</sup> oils | Fruits         |                |                    |
|--|---------------------|-----------------------------|----------------|-------------------------|----------------|----------------|--------------------|
|  |                     |                             |                |                         | Citrus         | Non-citrus     | Total <sup>5</sup> |
|  | <i>Percent</i>      | <i>Percent</i>              | <i>Percent</i> | <i>Percent</i>          | <i>Percent</i> | <i>Percent</i> | <i>Percent</i>     |
| Food energy .....                              | 19.5                | 10.9                        | 2.0            | 17.8                    | 0.9            | 2.0            | 2.9                |

<sup>1</sup>Basis is that all meals and snacks are purchased at stores and prepared at home. For specific foods and quantities of foods in the Thrifty Food Plan, see Family Economics and Nutrition Review, Vol. 13, No. 1 (2001), pp. 50-64; for specific foods and quantities of foods in the Low-Cost, Moderate-Cost, and Liberal Plans, see The Low-Cost, Moderate-Cost, and Liberal Food Plans, 2003 Administrative Report (2003). All four Food Plans are based on 1989-91 data and are updated to current dollars using the Consumer Price Index for specific food items.

Center for Nutrition Policy and Promotion, (703) 305-7600.

## CHAPTER XIV

### STATISTICS OF FERTILIZERS AND PESTICIDES

This chapter contains statistics on percentages of crop acres treated by various types of fertilizers and pesticides. Nitrogen, phosphate, and potash are the most common fertilizers; herbicides, insecticides, fungicides, and other chemicals are the main categories of pesticides. Other chemicals include soil fumigants, vine killers, and dessicants. The tables show data for field crops for 1999–2002, fruits for 2001, and vegetables for 2002. NASS collects data for field crops on an annual basis and data for fruits and vegetables on a bi-yearly alternating basis. The surveyed States are generally the major producing States for each crop shown in the tables and represent 65–95 percent of the U.S. planted acres, depending on the selected crop. Quantities and rates of active chemical ingredients applied to each crop at State levels are available in the NASS series of “Agricultural Chemical Usage” reports.

**Table 14-1.—Field crops: Fertilizer, total acreage, and percent of area receiving applications, all States surveyed, 1999–2002<sup>1</sup>**

## CHAPTER XV

# MISCELLANEOUS AGRICULTURAL STATISTICS

This chapter contains miscellaneous data which do not fit into the preceding chapters. Included here are summary tables on foreign trade in agricultural products; statistics on fishery products; tables on refrigerated warehouses; and statistics on crops in Alaska.

### Foreign Agricultural Trade Statistics

Agricultural products, sometimes referred to as food and fiber products, cover a broad range of goods from unprocessed bulk commodities like soybeans, feed corn and wheat to highly-processed, high-value foods and beverages like sausages, bakery goods, ice cream, or beer sold in retail stores and restaurants. All of the products found in Chapters 1-24 (except for fishery products in Chapter 3) of the U.S. Harmonized Tariff Schedule are considered agricultural products. These products generally fall into the following categories: grains, animal feeds, and grain products (like bread and pasta); oilseeds and oilseed products (like canola oil); livestock, poultry and dairy products including live animals, meats, eggs, and feathers; horticultural products including all fresh and processed fruits, vegetables, tree nuts, as well as nursery products and beer and wine; unmanufactured tobacco; and tropical products like sugar, cocoa, and coffee. Certain other products are considered "agricultural," the most significant of which are essential oils (Chapter 33), raw rubber (Chapter 40), raw animal hides and skins (Chapter 41), and wool and cotton (Chapters 51-52). Manufactured products derived from plants or animals, but which are not considered "agricultural" are cotton yarn, textiles and clothing; leather and leather articles of apparel; and cigarettes and spirits.

U.S. foreign agricultural trade statistics are based on documents filed by exporters and importers and compiled by the Bureau of the Census. Puerto Rico is a Customs district within the U.S. Customs territory, and its trade with foreign countries is included in U.S. export and import statistics. U.S. export and import statistics include merchandise trade between the U.S. Virgin Islands and foreign countries even though the Virgin Islands of the United States are not officially a part of the U.S. Customs territory.

Data on trade of other U.S. outlying possessions with foreign countries is not compiled by the United States. Export statistics are fully compiled on shipments to all countries, except Canada, where the value of commodities classified under each individual Schedule B number is over \$2,500. Value data for such commodities valued under \$2,501 are estimated for individual countries using factors based on the ratios of low-valued shipments to individual country totals for past periods. The estimates for low-valued shipments are shown under a single Schedule B number and are omitted from the statistics for the detailed commodity classifications. Shipments valued under \$2,501 to all countries, except Canada, represent slightly less than 2.5 percent of the monthly value of U.S. exports to those countries. As a result of the data exchange between the United States and Canada, the United States has adopted the Canadian import exemption level for its export statistics on shipments to Canada. The Canadian import exemption level is based on total value per shipment rather than value per commodity classification line item.

The export value, the value at the port of exportation, is based on the selling price and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are consumed or further processed. When the shipper does not know the ultimate destination, the shipments are credited to the last country, as known at the time of shipment from the United States.

Agricultural products, like manufactured goods, are often transhipped from the one country to another. Shippers are asked to identify the ultimate destination of a shipment. However, transshipment points are often recorded as the ultimate destination even though the actual point of consumption may be in a neighboring state. Thus, exports to countries which act as transshipment points are generally overstated, while exports to neighboring countries are often understated. Major world transshipment points include the Netherlands, Hong Kong, and Singapore. In such cases, exports are over reported for the Netherlands, but under reported for Germany, Belgium and the United Kingdom. They are overstated to Hong Kong, but under reported to China, and they overstated to Singapore, but understated to Malaysia and Indonesia. After the collapse of communism in Eastern Europe and Russia, Germany and the Baltic countries became important transshipment points to those countries further east.

Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. Where the country of origin is not known, the imports are credited to the country of shipment.

Import statistics are fully compiled on shipments valued over \$1,250. Value data for shipments valued under \$1,251 are not required to be reported on formal entries. They are estimated for individual countries using factors based on the ratios of low-valued shipments to individual country totals for past periods. The estimates for low-valued shipments are shown under a single HTS number. The total value excluded represents slightly less than 1 percent of the monthly import value.

**Table 15-1.—Foreign trade: Value of total agricultural exports and imports, United States, fiscal years 1994–2003**

| Fiscal year ending Sep. 30 <sup>1</sup> | U.S. total domestic exports |                                   |   | U.S. total imports for consumption, customs value |                      |   |   |   |   | Surplus agricultural exports over agricultural imports |
|---|-----------------------------|-----------------------------------|---|---|----------------------|---|---|---|---|--|
|   | Total merchandise exports   | Agricultural exports <sup>2</sup> | Agricultural exports share of total exports | Total merchandise imports                         | Agricultural imports | Agricultural imports share of total exports | Non-competitive agricultural imports <sup>3</sup> | Competitive agricultural imports <sup>3</sup> | Competitive imports share of agricultural imports |  |
|   | Million dollars             | Million dollars                   | Percent                                     | Million dollars                                   | Million dollars      | Percent                                     | Million dollars                                   | Million dollars                               | Percent   | Million dollars  |

<sup>1</sup>Fiscal years Oct. 1–Sept. 30. <sup>2</sup>Includes food exported for relief or charity by individuals and private agencies. <sup>3</sup>Competitive agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such U.S. commodities. Noncompetitive agricultural imports include all others, about 90 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and vegetable fibers. <sup>4</sup>Preliminary.  
ERS, Market and Trade Economics Division, (202) 694–5272.

<sup>1</sup> Fiscal years, Oct. 1–Sept. 30. <sup>2</sup> Preliminary. <sup>3</sup> Competitive agricultural import products consists of all products similar to agricultural commodities produced commercially in the United States, together with all other agricultural products interchangeable to any significant extent with such U.S. commodities. Noncompetitive agricultural products include all others, about 90 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, spices, and vegetable fibers.

ERS, Market and Trade Economics Division, (202) 694–5272. Compiled from reports of the U.S. Depart. of Commerce.

**Table 15-6.—Agricultural exports: Value of U.S. exports to the top market, Canada, by commodity, fiscal year 2001/02-3–2002/2003<sup>1</sup>**

| Commodity                            | Value         |               |                        |

<sup>1</sup> Live weight, except percent. May not add due to rounding. <sup>2</sup> For univalve and bivalves mollusks (conchs, clams, oysters, scallops, etc.), the weight of meats, excluding the shell is reported. <sup>3</sup> Excluding imports of edible fishery products consumed in Puerto Rico; includes landings of tuna caught by foreign vessels in American Samoa. <sup>4</sup> Fish meal and sea herring.

U.S. Department of Commerce, NOAA, NMFS Fisheries Statistics and Economics Division (301) 713-2328.

## CHAPTER II

# STATISTICS OF COTTON, TOBACCO, SUGAR CROPS, AND HONEY

In addition to tables on cotton, tobacco, sugar, and honey, this chapter includes tables on fibers other than cotton and syrups. Cottonseed data, however, are in the following chapter on oilseeds, fats, and oils.

**Table 2-1.—Cotton: Area, yield, production, market year average price, and value, United States, 1994–2003**

| Year                    | Area               |                    | Yield per harvested acre | Production                     | Marketing year average price per pound received by farmers <sup>1</sup> | Value of production <sup>1</sup> |
|-------------------------|--------------------|--------------------|--------------------------|--------------------------------|---|----------------------------------|
|                         | Planted            | Harvested          |                          |                                |   |                                  |
|                         | <i>1,000 acres</i> | <i>1,000 acres</i> | <i>Pounds</i>            | <i>1,000 bales<sup>2</sup></i> | <i>Cents</i>  | <i>1,000 dollars</i>             |
| 1994 .....              | 13,720.1           | 13,322.3           | 708                      | 19,662.0                       | 72.0  | 6,796,654                        |
| 1995 .....              | 16,931.4           | 16,006.7           | 537                      | 17,899.8                       | 76.5  | 6,574,612                        |
| 1996 .....              | 14,652.5           | 12,888.1           | 705                      | 18,942.0                       | 70.5  | 6,408,144                        |
| 1997 .....              | 13,898.0           | 13,406.0           | 673                      | 18,793.0                       | 66.2  | 5,975,585                        |
| 1998 .....              | 13,392.5           | 10,683.6           | 625                      | 13,918.2                       | 61.7  | 4,119,911                        |
| 1999 .....              | 14,873.5           | 13,424.9           | 607                      | 16,968.0                       | 46.8  | 3,809,560                        |
| 2000 .....              | 15,517.2           | 13,053.0           | 632                      | 17,188.3                       | 51.6  | 4,260,417                        |
| 2001 .....              | 15,768.5           | 13,827.7           | 705                      | 20,302.8                       | 32.0  | 3,121,848                        |
| 2002 .....              | 13,957.9           | 12,416.6           | 665                      | 17,208.6                       | 45.7  | 3,777,132                        |
| 2003 <sup>3</sup> ..... | 13,483.1           | 12,058.0           | 725                      | 18,224.0                       | 63.8  | 5,581,619                        |

<sup>1</sup> Marketing year average price and value of production for 1998-2002 will be updated in a statistical bulletin to be re-leased in October 2004. <sup>2</sup> 480-pound net weight bales. <sup>3</sup> Preliminary.  
NASS, Crops Branch, (202) 720–2127.

<sup>1</sup> Payment rates for the 1995/96 & prior crop years were calculated according to the provisions of the now defunct deficiency payment/production adjustment program. Payment rates for the 1996/97 through 2001/2002 crops were calculated according to the provisions of the Production Flexibility Contract (PFC) program, following enactment of the Federal Agriculture Improvement and Reform Act of 1996 (1996 Act) and included supplemental PFC payment rates for 1998 through 2001. Payment rates for the 2002/2003 and subsequent crops are calculated according to the provisions of the Direct Payment program, following enactment of the Farm Security and Rural Investment Act of 2002 (2002 Act) and includes a PFC payment rate for 2002 only. Payment rates are rounded to the nearest thousandth of a cent. <sup>2</sup> The national average loan rate was also known as the price support rate prior to enactment of the 1996 Act. <sup>3</sup> Between the 1996/97 and 2001/2002 marketing years, target prices were no longer applicable; however, with enactment of the 2002 Act, target prices were reestablished. <sup>4</sup> Represents loans made, purchases, and purchase agreements entered into. Purchases and purchase agreements are no longer authorized for the 1996 and subsequent crops following enactment of the 1996 Act. <sup>5</sup> Acquisitions from the crop harvested in the year indicated. <sup>6</sup> Running bales. <sup>7</sup> Less than 500 bales. NA-not applicable.

<sup>1</sup>Ginnings during the 12 months, Aug. 1–July 31. Includes an allowance for “city crop” which consists of rebaled samples and pickings from cotton damaged by fire and weather. <sup>2</sup>May include small volume of foreign growths. <sup>3</sup>Preliminary. AMS, Cotton Program, (901) 384–3016. Compiled from reports of the Bureau of the Census.

<sup>1</sup> Imports for consumption. Imports in bonded warehouses (general imports) are tallied when customs as sugar whose content of sucrose, by weight in the dry state, corresponds to a polarimeter reading less than 99.5 degrees. <sup>2</sup> Data are actual weight x 1.035. <sup>3</sup> October–March. <sup>4</sup> Numbers may not add due to rounding.

FAS, Horticultural and Tropical Products Division, (202) 720–4620. Compiled from reports of the U.S. Department of Commerce.
