PUBLIC DEBT.

NOTE 1.—The interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific Railway bonds.
 NOTE 2.—The temporary loan per act of July 11, 1862, is included in the four per cents. from 1862 to 1863, inclusive, with the exception of the amount outstanding for August 31, 1865, the date at which the public debt reached its highest point. This loan bore interest from 4 per cent. to 6 per cent., redeemable on ten days' notice after thirty days, but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent. interest on an average for the year.
 NOTE 3.—The total interest-bearing debt, as above, is exclusive of Pacific Railway bonds.

* In the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June, issued under act of June 8, 1872, for which a like amount in United States notes was on special deposit in the Treasury for their redemption, and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but being offset by notes held on deposit for their redemption, should properly be deducted from the principal of the public debt in making comparison with former years.

† Exclusive of gold, silver, and currency certificates held in the Treasury as cash, and including \$64,623,512 bonds issued to the several Pacific railroads.

a Nine months.

b Entered for immediate consumption and withdrawn from warehouse for consumption.

NOTE 1.—There are no data prior to 1821 showing the values of free and dutiable foreign merchandise separately.

NOTE 2.—In the table of receipts from all sources, published annually in the Finance Report, the column headed "Customs" shows the total annual customs collections from all sources covered by warrant into the Treasury, after deducting expenses of collection. From 1791 to 1830 collectors paid from customs receipts all expenses of their offices and turned the net amount remaining into the Treasury, but from 1850 to the present time they have been compelled by law to turn into the Treasury all amounts collected, while the expenses of their offices are paid by warrants from the Treasury of the United States. The figures in the column of the above table headed "Amounts of duty collected" from 1791 to 1836, inclusive, show the annual amounts of duty collected on merchandise only, without any deductions for expenses of collection, and omitting the collections from tonnage, light-houses, fines, penalties, forfeitures, etc. (Explanation given by Register of Treasury.) For these reasons the figures of "duties collected" prior to 1831 in the above table largely exceed in many cases the amount of receipts from customs as shown in the Finance Report, inasmuch as the expenses of collection were of considerable magnitude during the years when the net receipts only were covered into the Treasury. From 1850 to 1866 the receipts in the table in the Finance Report should exceed the duties collected in the above table by amounts of collections from sources other than duties on merchandise, such as tonnage dues, fines, penalties, and forfeitures, hospital dues, etc. Since 1866, the duties collected as shown by the above table are taken from the accounts of this office. While these data showing the duties collected on merchandise from 1791 to the present time are somewhat diverse in character, they are the best attainable.

NOTE 3.—The annual average ad valorem rates of duty prior to 1853 are based upon the values of the gross imports; from 1853 to include 1866 upon the values of the net imports and after 1866 upon the values of imported merchandise entered for consumption, as returned by collectors of customs, considering ordinary duties only. The reason for basing the average ad valorem rates of duty prior to 1853 upon the values of the gross imports is that the amounts of "duty collected" for those years include the duties afterwards refunded upon exports of foreign merchandise.

NOTE 3.—The stock of gold coin and bullion and of silver coin and bullion in the United States at the close of each year from June 30, 1873, to June 30, 1888, is the amount estimated by the Director of the Mint.

NOTE 4.—The State-bank circulation includes only the notes of State banks converted into national banks. The amount of the outstanding notes of non-converted State banks is estimated at \$148,434.

^a As a given number of gallons of refined petroleum represents the product of a larger number of gallons of crude petroleum, it is necessary to reduce the exports of petroleum to their equivalent in crude oil, in order to arrive at a knowledge of the percentage of the total product of mineral oil exported. It has been ascertained, as the result of a careful computation, that the quantity of petroleum and its distilled products exported during the year ending June 30, 1878, was equivalent to 407,482,175 gallons of crude oil; or, in other words, that the exports of petroleum constituted about 66 per cent. of the production. ^b Barrels reduced to gallons, at the rate of 42 gallons to the barrel. ^c Estimated. ^d Figures of production for fiscal years 1882, 1883, 1884, and 1885, furnished by S. H. Stowell, editor of Stowell's Petroleum Reporter. ^e The production for calendar year 1887, as reported by the United States Geological Survey.

NOTES.—(1) The production of domestic liquors and wines for 1840, 1850, and 1860 was derived from the United States census. (2) The consumption of imported liquors and wines for 1840, 1850, and 1860 is the net imports. (3) The production of domestic wines from 1870 to 1887 is estimated by the Department of Agriculture, by Mr. Charles McK. Leoser, president of the Wine and Spirit Traders' Society, New York, and other well-informed persons. (4) The consumption of domestic spirituous and malt liquors from 1870 to 1883 was obtained from the reports of the Commissioner of Internal Revenue, and for prior years from the United States census. (5) The consumption of imported liquors and wines from 1870 to 1885 was taken from the official returns made to the Bureau of Statistics by collectors of customs. (6) In computing the quantity of sparkling and still wines and vermouth in bottles, five so-called bottles are reckoned as equivalent to the gallon.

a Prior to the year 1864 the tonnage of vessels entered from British Columbia is combined with that entered from British Possessions on the Atlantic; subsequent to that period it is shown in a separate column.

b A small portion of the tonnage from the United Kingdom during these years entered at lake ports and has been deducted from the total tonnage entered from that country, which will account for the apparent discrepancy between these figures and those of the regular annual statements of navigation.

c No detailed statement of the trade of each port with foreign countries was published for these years, which renders it impossible to determine what amount of the tonnage of each foreign country, if any, may have entered at lake ports. The whole amount of tonnage from the countries herein enumerated has therefore been credited to seaports.

^a No detailed statement of the trade of each port with foreign countries was published for these years, which renders it impossible to determine what amount of the tonnage of each foreign country, if any, may have cleared at lake ports. The whole amount of tonnage for the countries herein enumerated has therefore been credited to seaports.

NOTE.—(a) No comprehensive figures of the business of the railways of the United States are attainable prior to the above. And even these tables are the fruit of private enterprise, in compiling from the official annual reports of each road the results of the traffic as shown above, and including for the year 1885 the operations of companies running 123,320 miles of railway. No department of the Federal Government has been invested with authority to require returns of railway operations, except from the transcontinental lines chartered or endowed by Congress, nor are there State officers charged with such duties except in a few of the States. (b) This table includes elevated railroads.

α These figures, 29½, represent published rates. At times during the year the rate was cut to 20 cents, making the average rate on that basis, Saint Louis to Liverpool via New York, as low as 17½ cents per bushel.

NOTE 1.—In the normal condition of freight rates, the rate to Boston would be 5 cents per 100 pounds higher than to New York, to Philadelphia 2 cents per 100 pounds lower than to New York, and to Baltimore 3 cents per 100 pounds lower than to New York; but sometimes rates by these cities are independent of local rail rates.

NOTE 2.—The rate on flour is always double the rate on grain per 100 pounds.

The greatly increased mileage since 1880 is principally due to the fact that in 1881 the Western Union Telegraph Company absorbed by purchase all the lines of the American Union and the Atlantic and Pacific Telegraph Companies, the former having previously in operation over 12,000 miles of line and the latter 8,706 miles. Capital stock of the Western Union, \$46,200,000.

The Western Union has exclusive contracts with several international cable companies, operating eight Atlantic cables, and guaranties 5 per cent. annual dividends on the stock of the American Cable Company; amount, \$14,000,000.

Besides the above, there are many new lines of telegraph which have complied with the United States telegraph act of 1866, and are operating wires with or without connection with railway companies.

The Mutual Union Telegraph Company of the United States, established in 1881, has about 8,000 miles of line, 60,000 miles of wire, 1,200 offices, and has extended its lines North and South, operating already from Boston to Chicago, Saint Louis, Washington, etc. Capital stock, \$2,500,000. This line is now leased and operated by the Western Union Telegraph Company.

The Baltimore and Ohio Railroad Telegraph, having lines co-extensive with its railway system and branches, besides many newly extended wires South and West, constituting 6,711 miles of lines and 54,087 miles of wire, was purchased for \$5,000,000 in 1887 by the Western Union Company, which now owns and operates it.

The Bankers and Merchants' Telegraph Company, New York, organized March 23, 1851, has about 4,000 miles of line, 28,300 miles of wire, and is in operation to many leading points. Capital authorized, \$3,000,000. Debt about \$7,500,000, as stated in August, 1884. Sold in foreclosure July 31, 1885, and now operated by the United Lines of Telegraph.

The American Rapid Telegraph Company, New York to Boston, Philadelphia, Baltimore, Washington, Buffalo, etc., with capital stock of \$4,000,000, has been leased by the Western Union Company.

The Postal Telegraph and Cable Company, of New York, organized June 21, 1881, has about 1,500 miles of line and 4,500 miles of wire in operation, from New York to Chicago, etc., and owns what are claimed to be very valuable patents in improved wires and telegraphy. Authorized capital stock, \$21,000,000, of which about \$7,000,000 has been issued. Now operated by the United Lines of Telegraph.

The aggregate mileage of telegraph lines in the United States open for public business exceeds 190,000 miles, besides railway, Government, private, and telephonic lines, length not ascertainable.
