## No. 449.—ELECTRIC LIGHT AND POWER INDUSTRY—SUMMARY: 1902 TO 1937

NOTE.—Figures cover all establishments engaged either in the generation and distribution of electric energy, or the distribution or transmission of electric energy, to public or private consumers. Statistics do not include establishments which consume all current generated, such as manufacturing and mining companies, railroads, railways, hotels, and other enterprises not in the nature of public utilities, unless a portion of their generated output is sold commercially. Plants operated by the Federal Government or by States were not included unless energy was sold commercially. For classification of reporting sources for 1937, see table 450

<sup>1</sup> The term "establishment" as here used may represent a single electric station (either generating or distributing or both) or a number of such stations operated under the same ownership. <sup>2</sup> Not available.

<sup>3</sup> Comprises 1,112 stations operated by steam; 1,283 by internal-combustion; 1,426 by water; and 206 composite (stations having more than 1 type of prime mover).

<sup>4</sup> Comprises generated output and energy purchased and received from other sources. Since the energy "Received from other sources" was, in a large part, purchased from other electric light and power companies, a considerable duplication is involved, as such energy would also be included in the "Generated."

<sup>5</sup> Includes "Estimated value of free service."<sup>6</sup> Number on June 30.

<sup>7</sup> Reported by commercial establishments only. No data for municipal establishments.

<sup>8</sup> Not comparable with figures for other years since amount includes only salaries and wages chargeable to electric operating service.

<sup>9</sup> Includes value of plant and equipment, \$902,000,000, owned by companies engaged in the operation of electric light and power plants and other public utilities, not distributed among the several utilities.

<sup>10</sup> In addition, hogged fuel, sawmill, and other waste were reported.

**No. 450.—ELECTRIC LIGHT AND POWER INDUSTRY—GENERATING FACILITIES, ENERGY GENERATED, AND FUEL CONSUMED, BY REPORTING SOURCES: 1937**

*Note.*—The system of classification by reporting sources, as shown in this table, is a new one recently adopted by the Bureau of the Census in collaboration with the Federal Power Commission. This classification differs slightly from that employed by the Federal Power Commission. (See headnote, table 443.) The differences in the figures are due mainly (1) to the inclusion in the census survey of data for certain small concerns not canvassed by the Federal Power Commission, and (2) to the inclusion in the Federal Power Commission survey of data for a larger proportion of the energy output of certain concerns grouped under "Other sources" than is accounted for in the census survey.

No. 457.—WATER POWER, DEVELOPED AND POTENTIAL: 1921 TO 1940

NOTE.—In thousands of horsepower. Data for developed water power cover capacity of actual installation of water wheels and turbines in plants of 100 horsepower or more. Potential power figures are 1936 revised estimates showing the 24-hour horsepower available 60 percent of the time and 60 percent of the time at an over-all efficiency of 70 percent at all developed and undeveloped sites. Data for potential power are not directly comparable with those for developed power, because developed power is usually given in terms of the capacity of installed water wheels or turbines, which may be several times the potential power available 90 percent of the time. Probably with complete development of the water-power resources of the whole country the installed capacity would amount to 80,000,000 horsepower or more

## No. 458.—RURAL ROADS—MILEAGE, FUNDS AVAILABLE, AND DISBURSEMENTS, 1921 TO 1939, AND CONSTRUCTION UNDER FEDERAL AID, 1930 TO 1939

NOTE.—Figures cover continental United States, except as noted, and refer to calendar years for most States. Mileage data included for 1921 and 1926 were obtained from county records; figures for 1929 and 1930 include some estimates. No data available for county and township roads after 1930, except for those under State control

<sup>1</sup> Low-type includes soil-surfaced, gravel or stone, bituminous surface-treated, and mixed bituminous surfaces; high-type includes bituminous penetration, bituminous concrete and sheet asphalt, Portland cement concrete, brick, block, and dual-type surfaces, and unclassified surfacing on bridges.

<sup>2</sup> Includes 11,303 miles of unclassified roads.      <sup>3</sup> Includes mileage partially graded and drained.

<sup>4</sup> Includes original and reconstructed surfacing.      <sup>5</sup> Includes 368 miles of unclassified roads.

<sup>6</sup> Excludes funds transferred.      <sup>7</sup> Excludes balance on hand at beginning of year; not reported in 1921.

<sup>8</sup> For road and bridge purposes under supervision of State highway department only.

<sup>9</sup> Includes an undetermined amount of municipal street mileage on State highway systems or connecting these systems. Beginning with 1935 such mileage is included, however, for only a few States. Figures prior to 1935 also include mileage of secondary road systems under State control for a number of States.      <sup>10</sup> Primary systems only. See also note 9.      <sup>11</sup> Not yet available.

<sup>12</sup> Includes funds transferred to or from local units.

<sup>13</sup> Includes data for Puerto Rico beginning 1937 and for Hawaii except in 1926 figures for projects approved for construction. For 1939 figures for emergency road construction and grade-crossing projects, see table 462.

<sup>1</sup> Includes secondary rural road systems under State control with a total of 194,428 miles for the 18 States noted. Also includes 23,804 miles of urban extensions (see also note 5), 3,243 miles of which are not under State control.

<sup>2</sup> See note 1, table 458.

<sup>3</sup> Includes original and reconstructed surfacing. In addition to the mileage here shown, surfacing on secondary rural road systems under State control totaled 3,138 miles in 1937, and 8,238 in 1938, and surfacing on urban extensions of State systems totaled 774 miles in 1937 and 757 miles in 1938.

<sup>4</sup> Includes new location.

<sup>5</sup> Mileage for urban extensions under State control included with rural roads, as segregation by types was not available.

No. 460.—HIGHWAYS UNDER SUPERVISION OF STATE HIGHWAY DEPARTMENTS—  
DISBURSEMENTS (INCLUDING FEDERAL-AID FUNDS) FOR, BY STATES: 1921  
TO 1939

NOTE.—Figures include disbursements, whether from current revenues or the proceeds of loans, for construction, maintenance, interest and principal payments on highway bonds, transfers to local units, and miscellaneous disbursements. Data beginning 1934 cover calendar years, while figures for earlier years for many States represent fiscal years. For the States reporting on a fiscal year basis in 1933, the net total disbursements for interim and overlapping periods between 1933 and 1934 amounted to \$124,423,000

No. 469.—MOTOR-VEHICLE FATALITIES IN CONTINENTAL UNITED STATES: 1914 to 1938

NOTE.—This table covers all deaths from automobile accidents, excluding deaths as a result of train and street car collisions with automobiles, and motorcycle accidents. Rural area and urban area or city population figures shown for 1930 to 1933 and used in computing rates for these years are the latest revised estimates. The term "rural area" includes all rural parts of the registration States excluding cities having populations of 10,000 or more; "urban area" includes all cities having populations of 10,000 or more in the registration States; and "cities in nonregistration States" includes only a few cities in certain States not in the death registration area

# 20. TRANSPORTATION, AIR AND LAND—STEAM RAILWAYS AND ELECTRIC RAILWAYS, EXPRESS COMPANIES, MOTOR BUSES, AND CIVIL AERONAUTICS

[Data in this section relate to continental United States unless otherwise stated]

GENERAL NOTE.—The term "steam railways" as used in this section includes electrified divisions operated by such carriers. The total steam railroad mileage of the United States comprises: (a) Regular interstate carriers (and their nonoperating subsidiaries) reporting to the Interstate Commerce Commission, (b) switching and terminal railroads, also reporting to the Commission; and (c) private railroads (defined by the Commission as "circular" because they report on brief circulars and as "unofficial"). Except in certain mileage data the circular and unofficial companies are not included in any of the statistics. The switching and terminal roads were formerly included with operating railways, but are now separated, and data for them do not appear in most of the tables.

Nonoperating subsidiaries include proprietary companies, which are covered by the reports of operating carriers, and lessor companies which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railways are divided into three classes, according to the amount of their annual operating revenues, class I, having more than \$1,000,000 of such revenue; class II, from \$100,000 to \$1,000,000; and class III, less than \$100,000. During recent years more detailed reports are required from class I carriers than from smaller companies. The basis of the figures in each table is indicated by notes. Omission of class II and class III railroads affects very little the comparability of statistics with those of earlier years as regards most items, since the bulk of the business is done by class I.

The Interstate Commerce Commission divides railroads geographically into three districts and eight subsidiary regions. Each railroad is treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern district includes territory east of Chicago and north of the Ohio and Potomac Rivers; southern district, territory east of the Mississippi River and south of the Ohio and Potomac Rivers; and western district, the remainder of the country.

Class I companies make monthly reports from which data are compiled currently and published in a series of monthly statements. The yearly totals from these reports become available earlier than the sometimes slightly corrected totals from the final annual reports. The latest figures in these tables are in many cases from the monthly reports.

## NO. 471.—STEAM RAILWAYS—MILEAGE OWNED AND MILEAGE OPERATED: 1890 TO 1939

NOTE.—Beginning with 1908 switching and terminal roads are omitted (they operate about 2,300 miles of main tracks). The first and second columns cover all railways, including "circular" and "unofficial" lines; the last 6 columns omit "circular" and "unofficial" lines. Mileage owned excludes all duplication and covers continental United States only. Mileage operated includes some duplication under trackage rights and some mileage in Canada operated by United States companies

**NO. 477.—STEAM RAILWAYS (ALL REPORTING COMPANIES)—EQUIPMENT IN SERVICE: 1921 TO 1938**

NOTE.—“All reporting companies” include switching and terminal but not circular and unofficial lines. Data for tractive effort and capacity of cars exclude switching roads, also smaller roads during recent years; they would not be materially different if all carriers were included. The large number of cars owned by private car lines is not included

<sup>1</sup> Data exclude switching and terminal companies beginning 1910. Class III roads are excluded in 1913. Exclusion of the latter has practically no effect on the comparability of the figures. Information for 1916 is incomplete, as 20 of the larger railways did not report, and is not shown.

<sup>2</sup> Calculated for all classes of employees, including those not paid on an hourly basis.

<sup>3</sup> Data cover Federal reports, reports of companies not under Federal control, and corporate reports.

<sup>1</sup> Prior to 1925 figures include investment of leased lines and exclude investment of proprietary companies not rendering annual reports. Beginning with 1925, the investment in road and equipment of proprietary companies is included as follows: 1925, \$480,216,000; 1926, \$831,674,000; 1927, \$919,095,000; 1928, \$1,013,752,000; 1929, \$1,051,469,000; 1930, \$1,065,691,000; 1931, \$1,114,637,000; 1932, \$1,121,945,000; 1933, \$1,090,261,000; 1934, \$860,651,000; 1935, \$861,716,000; 1936, \$861,699,000; 1937, \$848,173,000; 1938, \$840,033,000. No allowance is made for cash and material and supplies, and no deduction is made for depreciation.

<sup>2</sup> Does not include returns for lesser companies.

<sup>3</sup> Investment originally published is increased by \$170,000,000, estimated reserve for depreciation.

<sup>4</sup> Figures not comparable on account of Federal control accounting requirements.

<sup>5</sup> Does not include returns for class II and class III companies.

No. 486.—STEAM-RAILWAY FREIGHT SERVICE—TRAIN MILES, CAR MILES,  
TONNAGE AND RELATED AVERAGES: 1891 TO 1939

NOTE.—Figures prior to 1916 relate to years ended June 30, thereafter to calendar years. Switching and terminal roads excluded beginning with 1908, except as noted. The tonnage "per loaded car" for "All roads" is based on revenue tonnage only; and for "Class I roads" on revenue and nonrevenue tonnage. Tons are of 2,000 pounds

No. 493.—STEAM RAILWAYS—REVENUE FREIGHT ORIGINATED AND CARRIED,  
BY COMMODITY GROUPS, ALL ROADS, 1906 TO 1915, CLASS I ROADS, 1916 TO  
1939

NOTE.—All figures in thousands of tons of 2,000 pounds. Data relate to years ended June 30 prior to 1916, to calendar years thereafter. Switching and terminal roads excluded beginning with 1908. Figures for 1911 to 1915, inclusive, exclude class III roads but this affects the comparability very slightly; those after 1916 exclude both class II and class III, thereby reducing the grand total about 6 percent. Non-revenue freight is excluded; this is a large item in the case of a few commodities, notably coal

### No. 497.—STEAM-RAILWAY ACCIDENTS—NUMBER OF PERSONS KILLED AND INJURED, BY STATUS: 1891 TO 1939

NOTE.—For various reasons, including the fact that returns were required under different acts, the statistics are not strictly comparable. Prior to 1921, train accidents were those causing damage to railway property in excess of \$150 or any damage and a resulting casualty. Thereafter they were considered as such when the damage exceeded \$150 with or without a casualty. Where the damage is less than \$150 and there is a reportable casualty it is classified as a train-service accident. Figures for years 1911-1915 include industrial and other nontrain accidents to employees only, and for years 1908-1910 do not cover switching and terminal roads. Otherwise the statement covers all reportable accidents, including those due to suicide, mental derangement, and attempting to escape custody

NO. 502.—ELECTRIC RAILWAYS—SUMMARY: 1890 TO 1937

NOTE.—The census of street railways, which was first taken in 1890, and which has been taken at quinquennial intervals beginning with the inquiry for 1902, covers (1) all street railways, without regard to kind of motive power, and (2) all interurban railways using other than steam as motive power. The nonelectric railroads included are those operated principally by cable and gasoline engines. Operations of electrified divisions of steam-railway companies are not included. Figures in this table and tables 503-505, 507-509 do not include data for motorbus and trolley-bus operations of electric street railways. (For motorbus and trolley-bus statistics from census reports, see tables 510-512)

<sup>1</sup> Excludes data for 22 companies, operating on a part-year basis. These companies reported 36,810,221 passengers; 9,108,009 car-miles; 1,042,866 car-hours; \$2,388,295, operating revenue; and \$2,412,010, operating expense.

<sup>2</sup> Includes certain companies in Pennsylvania which maintained separate organizations, though controlled through stock ownership by other companies. For 1912 these companies were treated as merged and not included in the number reported.

<sup>3</sup> Includes small mileage of track lying outside United States.

<sup>4</sup> Data incomplete. Some of the companies engaged in both light-and-power and electric-railway operations were unable to report separately the values of plant and equipment assignable to their railway activities.

<sup>5</sup> Number reported as of June 30, for 1890, 1922, 1927, and 1932; for 1902, average for the year; for 1912, as of Sept. 16. Figures for 1937 represent an average of numbers reported on June 30 and Dec. 31.

<sup>6</sup> Includes 334 trolley-bus operators.

<sup>7</sup> Includes 29,721,000 trolley-bus passengers.

<sup>8</sup> Includes auxiliary operating revenues of \$8,905,000 for 1927 and \$91,242,000 for 1922; auxiliary expenses, \$7,822,000 for 1927, and \$49,232,000 for 1922. Data for operating revenues and operating expenses of auxiliary operations excluded so far as possible for earlier years.

<sup>1</sup> Includes mileage of track lying outside United States, as follows: 1917, 1922, and 1927, 27 miles; 1932, 24 miles.

<sup>2</sup> No comparable data. Figures for first track of all companies are: Overhead trolley, 13,150; third rail and conduit trolley, 797; other electric, 103; other than electric, 164.

<sup>3</sup> Figures for 1917 and 1922 include data for light and power departments of electric-railway companies and therefore are not comparable with those for later years, which exclude such data.

<sup>4</sup> Not available.

<sup>5</sup> Based on miles of all track operated for 1937 and 1932; for prior years based on total track mileage operated by roads which carried revenue passengers.

<sup>6</sup> Includes 334 trolley-bus operators with wages of \$551,000.

<sup>1</sup> Figures for 1932 not strictly comparable with those for 1937 because of the inclusion for 1932, and the exclusion for 1937 of a small amount of data for trolley-bus operations.

<sup>2</sup> Not available.

<sup>3</sup> Represents principally the operations of such utilities as light, power, gas, heat, and water, except for 1927, when only the incidental sales of such service are included. Does not include motorbus or trolley-bus operations of street railways.

## 21. WATERWAYS, WATERWAYS, AND SHIPPING

[Data in this section cover the following areas unless otherwise indicated: From Board of Engineers of the United States Army, Bureau of Customs, and Bureau of Foreign and Domestic Commerce, United States customs area which includes Alaska, Hawaii, and Puerto Rico, and, beginning Jan. 1, 1935, Virgin Islands; from United States Maritime Commission, continental United States]

*General note as to units of measurement.*—"Cargo tonnage" represents weight of cargo in long tons (2,240 pounds) or short tons (2,000 pounds). All other tonnage figures refer to capacity of vessels. The terms gross and net tonnage refer to space measurement, 100 cubic feet being called 1 ton. Gross tonnage is the capacity of the entire space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers or crew, with certain minor exemptions. Net or registered tonnage is what remains after deducting from the gross tonnage the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship recorded as "entered with cargo" may bear little relation to actual weight of cargo. Dead-weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is therefore the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety. Displacement tonnage (naval vessels) has reference to weight of the vessel itself with its normal equipment, fuel, etc.

<sup>1</sup> Comprises the following with figures for 1938: Harbor traffic of New York, Philadelphia, and San Francisco, 40,433,000; local traffic of other seaports, 31,610,000; local traffic of lake ports, 9,567,000.

<sup>2</sup> Excluding St. Marys Falls Canal traffic (40,043,000 tons in 1938) and additional Detroit River traffic (21,784,000 tons in 1938), data for which are already included in figures for Great Lakes traffic; also excluding duplications relating to rivers and canals themselves.

<sup>3</sup> Principally coastwise and lake traffic passing through canals and connecting channels other than the St. Marys Falls Canal and the Detroit River.

<sup>4</sup> Estimated from figures in this table on assumption that all deductions represent duplications in domestic traffic. There are, however, some minor duplications in figures for foreign traffic.

No. 516.—COMMERCE OF PRINCIPAL UNITED STATES OCEAN PORTS: 1938

NOTE.—In thousands of short tons of 2,000 pounds. In addition to the commerce here shown, many of the ports have (1) commerce with ports on internal rivers and canals; (2) purely local port traffic, including, in the case of New York, Philadelphia, and San Francisco, what is called intraport traffic between parts of a harbor for which separate statistics are maintained. These forms of traffic, although the aggregate tonnage is large, are of much less economic importance than foreign and coastwise traffic

<sup>1</sup> Totals include data for rivers or canals and connecting channels not shown separately.

<sup>2</sup> Revised, revision not carried to totals.

<sup>3</sup> Figures for years prior to 1935 represent gross traffic from Minneapolis, Minn., to New Orleans, La. They include some duplication resulting from the overlapping of traffic carried over each of the several stretches of the river. Figures for 1935 to 1938 represent net traffic from Minneapolis to mouth of river, excluding duplication. Net traffic from Minneapolis to New Orleans in 1934 was 16,038,000 tons.

<sup>4</sup> Traffic on Illinois River only.

<sup>5</sup> See also table 520.

<sup>6</sup> Not available.

<sup>7</sup> See also table 519.

<sup>8</sup> Actual traffic through Detroit River amounted to 61,827,000 tons in 1938. St. Marys Falls Canal traffic also passes through Detroit River, and therefore, in order to avoid duplication, only the difference is credited to Detroit River.

<sup>1</sup> Sailing vessels, canal boats, and barges.

<sup>2</sup> Dec. 31.

<sup>3</sup> The decrease of tonnage arises principally from the registered tonnage having been corrected in 1818, 1820, and 1830 by striking off all vessels the registers of which were granted prior to 1815, which were supposed by the collectors to have been lost at sea, captured, etc.

<sup>4</sup> Sept. 30.

<sup>5</sup> Including Puerto Rico and Virgin Islands.

<sup>6</sup> Including Hawaii and Alaska.

<sup>1</sup> Taxes, fees, fines, etc.<sup>2</sup> Principally from operation of shops and docks.<sup>3</sup> After deduction of canal earnings repaid to appropriations.

<sup>4</sup> No interest charge against the Canal is actually made by the Treasury. In order to present the net results of the operation of the Canal, the interest on capital invested is computed at a rate considered reasonable for Government borrowings over an indefinite period. Computed interest prior to July 12, 1920, is included in capital investment account.

NO. 537.—VESSELS ENTERED AND CLEARED IN FOREIGN TRADE—NET TONNAGE:  
1840 TO 1939

NOTE.—Domestic trade is not included. For definition of net tonnage see general note, p. 458. Figures cover years ended June 30 to and including 1918, calendar years thereafter. Owing to the marked effect of the war on shipping a special average for the 6½ years July 1, 1914, to Dec. 31, 1920, is presented

## 22. FOREIGN COMMERCE OF THE UNITED STATES

GENERAL NOTE.—All statistics in this section, except table 546 and the figures for recent years in table 574, are compiled by the Department of Commerce, Bureau of Foreign and Domestic Commerce. Statistics of United States foreign trade are published annually in Foreign Commerce and Navigation of the United States and are published currently in Monthly Summary of Foreign Commerce of the United States and in mimeographed statements. Except as noted (as, for example, in table 572) the values stated are in United States dollars without reference to changes in the gold content of the dollar. (The statutory price of gold—\$20.67 per ounce—in effect prior to Jan. 31, 1934, was changed on that date by Executive Order to \$35 per ounce. Between Mar. 10, 1933, and Jan. 31, 1934, the foreign exchange value of the dollar was permitted to depreciate as a result of restriction placed on gold shipments to foreign countries.) The geographic area covered by these statistics, except as noted, is the United States customs area, which includes Alaska, Hawaii, and Puerto Rico, and, beginning Jan. 1, 1935, the Virgin Islands (see headnote, table 545). Other explanations of the trade tables are given in the introduction to the annual report, Foreign Commerce and Navigation of the United States.

**No. 545.—MERCHANDISE TRADE OF CONTINENTAL UNITED STATES WITH FOREIGN COUNTRIES AND OUTLYING TERRITORIES AND POSSESSIONS: 1903 TO 1939**

**IMPORTANT NOTE.**—This table differs as to its geographic basis from all other foreign trade tables in this section and in other publications: (1) In the case of other tables the data represent the trade of the "statistical customs area," which includes continental United States, Alaska, Hawaii, and Puerto Rico, and, beginning Jan. 1, 1935, Virgin Islands, with all foreign countries, including the Philippine and, prior to 1935, Virgin Islands. The data do not cover trade between continental United States and the territories included in the customs area as given above. (2) The present table takes continental United States as the basis. In the totals, trade between it and all United States territories and possessions is included, while the trade between that part of the customs area outside of continental United States and foreign countries is excluded. Practically all other nations calculate their foreign trade in the manner followed in the present table; that is, totaling the trade of the home country with foreign countries and with all outlying areas. Prior to 1901 Alaska was our only outlying area. Therefore, our foreign trade statistics for 1900 and earlier years very nearly represent the trade of continental United States with foreign countries. Data are for years ended June 30 through 1918; thereafter, for years ended Dec. 31

<sup>1</sup> Gold bullion (bars) and United States gold coin.

<sup>2</sup> Increase is the equivalent of net export and decrease the equivalent of net import. The reverse is true of changes in gold earmarked abroad for account of Federal Reserve banks, which were as follows: In 1932, an increase of \$72,638,000, equivalent to a net import; and in 1933, a decrease of \$72,638,000.

<sup>3</sup> Net release of gold from earmark during January at rate of \$20.67 a fine ounce, \$12,206,000; net release during remaining 11 months at rate of \$35 a fine ounce, \$70,347,000.

## NO. 551.—EXPORTABLE GOODS, PRODUCTION AND PROPORTION EXPORTED: 1909 TO 1937

NOTE.—Agricultural production is gross income, excluding feed, seed, and waste. Value added by manufacture represents manufactures. Value of mine products in 1909 and 1919 are census figures, in 1929 census data plus petroleum products, while estimates for other years are based on data of the Bureau of Mines. As the figures are not adjusted for price changes, the increase or decrease in absolute values from period to period should be disregarded.

No. 553.—EXPORTS AND IMPORTS OF GOLD, SILVER, AND OF MERCHANDISE, GOLD, AND SILVER COMBINED: 1821 TO 1939

NOTE.—All figures in thousands of dollars (for basis of dollar values, see general note, p. 488). As to periods covered see headnote, table 552. Figures for gold and silver relate to coin and bullion only prior to 1895; subsequently they include ore also

Table with columns: YEARLY AVERAGE OR YEAR, GOLD (Exports, Imports, Excess of exports), SILVER (Exports, Imports, Excess of exports), TOTAL MERCHANDISE, GOLD AND SILVER (Exports, Imports, Excess of exports). Rows list years from 1821-1830 to 1939.

1 Data shown under silver are for gold and silver. 2 These were not shown separately prior to 1826. 3 Period beginning Oct. 1, 1841, and ending June 30, 1850. 4 Period July 1, 1915, to Dec. 31, 1902. 5 Revised.

**No. 560.—EXPORTS OF UNITED STATES MERCHANDISE AND IMPORTS—INDEXES OF QUANTITY, UNIT VALUE (PRICE), AND TOTAL VALUE: 1913 TO 1939**

NOTE.—The quantity and unit value indexes have been constructed by the so-called "ideal formula," the essential feature of which is the use of the quantities of the several articles as weighting factors of their unit values for each pair of years compared. About 265 commodities were included in the direct calculations for both exports and imports. It was then assumed that the prices of articles in each economic class not directly covered had moved in parallel with those of articles covered and their value, adjusted by the computed price index, was included in the aggregative totals from which the quantity index for each class was calculated. The index of quantity and unit value of total exports and imports was based on the aggregate of the adjusted totals of the classes. In constructing the indexes the data for 1919 were linked directly to 1913, and each subsequent year was compared with that preceding. The resulting year-to-year percentages were made into a series by the chain method

No. 570.—EXPORTS (INCLUDING REEXPORTS) AND GENERAL IMPORTS OF MER

NOTE.—In the case of some countries, especially those having no seaports, there is considerable indirect imports from them; for such countries the apparent balance of trade may be far from the true bal to Europe and reported as exported to Canada. Such grain shipments were especially large in the and North America and included in exports to Europe are given in table 495 of the 1935 Statistical

trade by way of other countries, this being usually larger in the case of our exports to them than of our  
ance. A marked case of indirect trade is that of grain exported through Canada (mostly via Montreal)  
period 1920-29 and in 1938. Adjusted figures in which this grain is deducted from exports to Canada

<sup>2</sup> Treated as a customs district of the United States beginning Jan. 1, 1935. For trade of Virgin Islands with the United States and with foreign countries beginning 1935, see table 563.

<sup>3</sup> Average, 1931-1934.

<sup>4</sup> Ireland is included in United Kingdom prior to 1925.

<sup>5</sup> 1925 only.

<sup>6</sup> For statistical purposes, trade with Germany includes (as far as ascertainable) trade with German-occupied areas from the following dates: Austria, May 6, 1938; Sudeten area of Czecho-Slovakia, Nov. 10, 1938; other Czecho-Slovak provinces (Protectorate of Bohemia-Moravia and part of Slovakia), Mar. 18, 1939; Memel territory of Lithuania, Mar. 25, 1939; and Danzig and the German-occupied parts of Poland, Nov. 16, 1939. Similarly, trade with the Czecho-Slovak area occupied by Poland is included with the Polish trade from Dec. 30, 1938, to Nov. 16, 1939, while trade with that area of Czecho-Slovakia occupied by Hungary is included with that country's trade after Dec. 30, 1938, and Mar. 19, 1939, for the respective portions of Ruthenia and part of Slovakia occupied by Hungary on those dates.

NOTE.—See general note, p. 433. Figures represent "general imports" for the period 1926 to 1932, inclusive, and "imports for consumption" beginning 1933. Figures for 1926-30 and 1931-35 are annual averages. For a number of items data are not shown separately for all years from 1926 to 1930 and 1931 to 1935, and for this reason many averages for 2, 3, and 4 years are shown in the table. However, averages shown for group totals always cover 5 years. In some cases the detail does not add to the total because of the different periods covered by the averages. Blanks indicate no data or data not shown separately. Relatively small items, "Articles, ordinarily dutiable, imported free for supplies of American vessels or for the United States Government, etc.," are included in the proper commodity classification for 1933 to 1939. For 1930 through 1932, those articles were included in the proper group totals but not shown separately except in group 9, while prior to 1930 the total of those articles was included in group 9

### 23. COMMERCE OF NONCONTIGUOUS TERRITORIES

GENERAL NOTE.—In the general foreign trade statistics of the United States presented in the preceding section, the Philippines and prior to 1935, Virgin Islands, are treated as foreign countries and their trade with the United States is included while their trade with other countries is not included. On the other hand, Puerto Rico, Hawaii, and Alaska, and beginning Jan. 1, 1935, Virgin Islands, are treated as integral parts of the United States, so that trade between them and continental United States is not included, while trade between them and foreign countries is included; each of these territories appears as a separate customs district. Neither trade of American Samoa and Guam with foreign countries nor shipments between them and United States are included in the general tables on foreign trade. See also table 545, p. 484.

The tables in this section present the total foreign trade of each of the United States territories and possessions and show separately the trade with continental United States (unless otherwise indicated) and with foreign countries, including other United States territories and possessions. For basis of dollar values, see general note, p. 483.

<sup>1</sup> The discrepancy between the United States figures of exports to the Philippines prior to 1911 and the Philippine figures of imports from the United States in corresponding periods is due chiefly to the fact that the Philippine import figures prior to that year omit merchandise imported free of duty for the use of the Government or for use in construction and equipment of railways in the islands, under the act of Feb. 6, 1905, while the United States returns omit only Government supplies carried by Government vessels.

NO. 593.—IRRIGATION ENTERPRISES—SUMMARY FOR THE 19 IRRIGATION STATES:  
1910, 1920, AND 1930

NOTE.—Tables 593 to 596 relate to irrigation enterprises of all types, including those operated by individual farmers. They are based on reports of the management of the enterprises. An enterprise is defined as "an independent irrigation establishment and includes the works for supplying water and the land for which water is supplied, except that the cost and value of the land is not included in the capital invested." Statistics cover the 19 irrigation States shown in table 595

<sup>1</sup> Acreage of irrigated crops. May include some duplication on account of harvesting of 2 irrigated crops from same land.

<sup>2</sup> This item gives comparable figures for the 2 years for those States covered by irrigation census for 1929.

<sup>3</sup> Less than one-tenth of 1 percent.

<sup>4</sup> For farms in North Dakota, South Dakota, Nebraska, and Kansas only.

<sup>1</sup> Estimates.

<sup>2</sup> For definition of urban and rural, see headnote, table 0, p. 7.

<sup>3</sup> The 1930 and 1935 farm population comprises all persons living on farms without regard to occupation; the 1920 figures include also those farm laborers (and their families) who, while not living on farms, lived outside the limits of any incorporated place. A further difference is due to the fact that the 1920 and 1935 censuses were taken in January, while the 1930 census was taken in April, when the number of persons on farms is appreciably larger. For farm population by States see table 12, p. 9, and table 622, p. 657.

<sup>4</sup> Data collected for 1925 are not strictly comparable with figures for other years.

<sup>5</sup> Includes cropland harvested, crop failure, cropland lying idle or fallow, and plowable pasture.

<sup>6</sup> "Improved land"; figures nominally include land available for crops and land occupied by buildings, yards, and barnyards.

<sup>7</sup> These figures include the value of fences, tile drains, and other incidental improvements on the land, excluding only the value of buildings.

<sup>8</sup> See note 1 on "livestock" table 607, p. 641.

No. 604.—FARMS—AVERAGE VALUES PER FARM AND PER ACRE, BY STATES: 1920 to 1935

NOTE.—Averages are based on data shown in tables 605 and 607. The 1935 schedule called for the value of land and buildings only. The average value of land per acre is shown for 1920, 1925, and 1930 in the 1935 and previous issues of this publication

No. 619.—FARM MORTGAGES—NUMBER OF MORTGAGED FARMS AND TOTAL OF MORTGAGE DEBT, BY STATES: 1930 AND 1935

NOTE.—Data in the following table are partly estimated. A part of the sectional differences in changes in the proportion of farms mortgaged and the trend of mortgage debt from 1930 to 1935 is accounted for by variations among the States in the change in the number, acreage, and value of farms. The number and acreage of farms and the value of land and buildings for 1930 and 1935 are shown for all farms in tables 605 and 607 and for owner farms in tables 611, 612, and 615, respectively

No. 630.—FARMERS' BUSINESS ASSOCIATIONS, BY NUMBER, MEMBERSHIP, AND VALUE OF BUSINESS DONE, BY STATES AND BY COMMODITY GROUPS

NOTE.—Business in thousands of dollars. Estimates are based on reports received from association officers. Membership comprises members, contract members, and shareholders, but does not include patrons not in these categories. Business includes the f. o. b. value at shipping point of farm products sold by the associations, the sales value of farm supplies sold to members, and the revenue derived by associations rendering services such as ginning cotton, warehousing tobacco, and storing wheat, etc. There were 10,752 associations for 1936-37 with an estimated membership of 3,270,000, and an estimated business amounting to \$2,190,000,000; figures not available by States

1936 <sup>6</sup>	8,100					3,625	4,475

<sup>1</sup> Cash income relates to the value of quantities sold, excluding products used in the farm home. Estimates for 1933 to 1936 include Government payments by the Agricultural Adjustment Administration.

<sup>2</sup> Includes expenditures for feed, seed, fertilizer, containers, spray materials, twine, cost of operating tractors, trucks, etc., insurance, ginning, miscellaneous current expenditures, and capital expenditures for machinery, tractors and repairs, and automobiles and trucks. Allowance is made for use of automobiles for purposes other than production.

<sup>3</sup> Total cash wages paid.

<sup>4</sup> Interest on all bank loans other than real estate loans and on 90 percent of all mortgage indebtedness, 10 percent of the total mortgage indebtedness being assigned to farm dwellings.

<sup>5</sup> Only 90 percent of the estimated total taxes on farm property is included, 10 percent of the total being assigned to farm dwellings.

<sup>6</sup> Preliminary estimate.

1936 <sup>6</sup>	9,530					4,230	5,300

<sup>1</sup> Gross income includes the value of products consumed in the farm household on farm where produced

<sup>2</sup> Current operating costs less amounts estimated as paid by nonfarmer landlords.

<sup>3</sup> Relates to the depreciation of building, farm machinery, and other capital equipment, thus representing the cost of the use of these items rather than the amounts spent for them.

<sup>4</sup> Cash wages to hired labor plus an allowance for board and perquisites furnished hired labor and domestic hired labor contributing to production. Includes only that portion of interest payable by farm operators; figured at 75 percent of all interest payable on farm mortgage debt on real estate used in production and interest on all bank loans, other than real estate loans. It is assumed that 70 percent of all taxes on farm property used in production are paid by the farm operator.

<sup>5</sup> In estimating rent it is assumed that 72 percent of total rent goes to nonfarming landlords.

<sup>6</sup> Preliminary estimate.

### No. 636.—FARM PRODUCTION—INDEXES OF VOLUME, BY MAJOR GROUPS OF PRODUCTS: 1921 TO 1939

NOTE.—1924-1929=100. Indexes are based on estimates of production for sale and for consumption in the farm home. Products fed to livestock or used for seed are not included. Calendar-year production of livestock and livestock products is compared with crop production of the same year. Commodities included in the index contributed about 93 percent of the gross farm income during 1924-29

# 27. FARM ANIMALS AND ALFALFA PRODUCTS

[Data in this section relate to continental United States]

## No. 644.—DOMESTIC ANIMALS ON FARMS—NUMBER AND VALUE: 1880 TO 1940

NOTE.—Animals of all ages are included except in figures for cattle and sheep, 1880 and 1890, which are nominally exclusive of calves and lambs, respectively. The difference in date of enumeration affects the comparability of the census figures for all classes and especially for swine

<sup>1</sup> Includes only value of animals specified in the preceding columns.

<sup>2</sup> Census returns prior to 1900 represented "milk" cows; in 1900, cows kept for milk 2 years old and over; in 1910, cows and heifers kept for milk born before Jan. 1, 1909 (estimated number 2 years old and over Jan. 1, 17,125,000); in 1920 and 1925, dairy cows and heifers 2 years old and over; in 1930, cows and heifers, born before 1928, kept mainly for milk production. Census data are not available for 1935. Estimates as of Jan. 1 represent cows and heifers 2 years old and over kept for milk.

<sup>3</sup> No data. <sup>4</sup> See source note.

## No. 645.—DOMESTIC ANIMALS AND CHICKENS ON FARMS—NUMBER AND VALUE, BY KIND, AND FARMS REPORTING: 1925, 1930, AND 1935

NOTE.—Data for 1925 and 1935 are as of Jan. 1 and for 1930, as of Apr. 1. Owing to the difference in the date of enumeration, the figures for 1930 are not closely comparable with those for other years. The total value of all livestock for which data were collected at each census is shown in table 603, p. 634. Available data for number and value of certain classes not shown in the table below are as follows: Asses and burros, 1930, number, 48,000, value, \$1,881,000; turkeys over 3 months old, 1935, number, 5,382,000, value, \$11,668,000; hives of bees (on farms and elsewhere), 1930, number, 3,108,000, value, \$13,632,000

NO. 657.—MEATS AND LARD—PRODUCTION, FOREIGN TRADE, AND CONSUMPTION,  
 BY KIND: 1932 TO 1939

NOTE.—All amounts, except per capita, in millions of pounds. Pork production represents total hog-carass weight, less raw fat from carcass which was rendered into lard. Other meat production represents dressed carcass weight only, with edible byproducts excluded. Lard production represents rendered weight of lard. Uninspected production includes farm, retail, and non-federally inspected wholesale slaughter. Meat obtained from cattle, calves, and sheep purchased for slaughter by Federal Government in 1934 and 1935 in connection with drought-relief activities and pork and lard from sows and pigs slaughtered for Federal Government in August and September 1933 are not included. Exports and imports of meats comprise the several kinds of meat converted to a dressed-carass-weight basis. Lard exports represent rendered lard, including neutral lard. Exports include shipments to Alaska, Hawaii, Puerto Rico, and Virgin Islands. Consumption represents production plus imports less exports, with allowance for changes in storage stocks

No. 668.—WOOL—PRODUCTION, IMPORTS, AND EXPORTS: 1839 TO 1939

NOTE.—All figures in thousands of pounds. Production, except census data, is estimated and is for calendar years; figures for 1909 and later years have been revised because of revised estimates for numbers of sheep, based on 1935 census data. Pulled wool is included beginning 1900 and was probably included for 1870 to 1899, though the exact basis of the estimates for these years is not known. Figures for 1839, 1849, and 1859 include only fleece. Exports and imports for 1839 are for the fiscal year ended Sept. 30; for 1849, and 1859, fiscal years ended June 30; subsequently, calendar years. Imports and foreign exports prior to 1914 and domestic exports for all years include hair of the Angora goat, alpaca, and other like animals

<sup>1</sup> Relative production as indicated by multiplying the production of the crops of each year by the 1927-32 average prices and dividing the aggregate for each year by the average aggregate for the same crops during the 1923-32 (predrought) period.

<sup>2</sup> Corn, oats, barley, grain sorghums, wheat, rye, buckwheat, rice, flaxseed, cotton, tame hay, wild hay, sweet sorghums for forage and hay, dry edible beans, soybeans for beans, peanuts, potatoes, sweetpotatoes, tobacco, sorgo sirup, sugarcane, and sugar beets.

<sup>3</sup> Apples (commercial only), peaches, pears, grapes, plums, prunes (fresh basis), oranges, grapefruit, lemons, apricots, strawberries, raspberries, and olives.

<sup>4</sup> Asparagus, snap beans, cabbage, sweet corn, cucumbers, peas, spinach, and tomatoes.

<sup>5</sup> Asparagus, snap beans, cabbage, cantaloups, carrots, cauliflower, celery, cucumbers, lettuce, onions, peas, spinach, tomatoes, watermelons, beets, eggplant, and peppers. Production of farm gardens, home gardens, and most of market gardens excluded.

### No. 674.—ACREAGE LOSSES—ESTIMATED ACREAGES OF CERTAIN CROPS PLANTED AND NOT HARVESTED: 1919 TO 1939

NOTE.—Acreage in thousands. Figures do not show total crop losses chiefly because of large acreage of hay land which produced only pasturage in some dry seasons and because of incomplete estimates on losses of sorghums, rye, and other crops. Acreage excludes incidental abandonment resulting from hail, local overflow, poor soil, neglect, etc. Small grains harvested as hay, and corn which was salvaged as fodder or silage or by hogging or grazing, are included in harvested acreage.

<sup>1</sup> Excluding 14,502,932 acres reported for corn cut for fodder, a large part of which is duplicated in the acreage shown for corn harvested as grain.

<sup>2</sup> Including land in fruit orchards, vineyards, and planted nut trees (6,086,176 acres in 1929 and 6,220,679 acres in 1934) which was not reported in 1919; excluding acreage of annual legumes sowed for hay (3,067,710 acres in 1929 and 9,500,946 acres in 1934) which is practically all duplicated in the acreage shown for the various individual annual legumes grown alone.

<sup>3</sup> Published as "Kafir and milo" prior to 1929; figures include sorghum seed.

<sup>4</sup> Acreage grown alone. Not all harvested for grain or seed as acreage also includes that for hay and that which was grazed. Some grain or seed harvested from acreage grown with other crops. <sup>5</sup> Does not include sorghum for silage. <sup>6</sup> Silage and miscellaneous forage crops. <sup>7</sup> The acreage for 1909 and the values for 1919 and 1929 represent farm gardens and vegetables harvested for sale. The acreage for 1919, 1929, and 1934 represents vegetables harvested for sale only.

<sup>8</sup> Prior to 1929, nominally sugar cane either for sugar or sirup or both. Acreage includes sugar cane for seed and other purposes not specified where specific reports were available.

<sup>9</sup> The production for sugar or sale to mills was 2,992,000 tons and the production of sirup was 15,169,000 gallons.

<sup>10</sup> Running bales. <sup>11</sup> Not comparable with earlier years. <sup>12</sup> Including tangerines in 1919 and tangerines, mandarins, etc., in 1929. <sup>13</sup> Less than \$500.

<sup>1</sup> Figures for 1800 to 1903 represent commercial movement, as given by Dan Talmage's Sons Co.  
<sup>2</sup> Figures for the years 1810 to 1865 include linters; excluded in subsequent years.  
<sup>3</sup> Beginning 1899, ginnings as reported by Bureau of the Census. Figures for some years include small amounts of Lower California, Mexico, cotton ginned in United States. Round bales counted as half bales.  
<sup>4</sup> Gross weight. Figures prior to 1899 compiled by Bureau of the Census from data published by Department of Agriculture. See also note 9, table 677, p. 701.  
<sup>5</sup> Exports.  
<sup>6</sup> Census figures for the previous year.  
<sup>7</sup> Figures shown for 1870, 1875, and 1880 represent the estimated average production for 1863-71, 1874-77, and 1880-82, respectively.  
<sup>8</sup> Louisiana and Texas, 1900 to 1923; Louisiana only, 1924 to 1927; Louisiana and Florida, beginning 1928.  
<sup>9</sup> All figures except cotton and sugar production are preliminary.

<sup>1</sup> Values are based on prices for crop-marketing season or Dec. 1 prices. See notes on "Price."

<sup>2</sup> Received by farmers. Prices are weighted average prices for the crop-marketing season as follows: Barley, buckwheat, and flaxseed, beginning 1908; rice, beginning 1924. Prices for prior years are as of Dec. 1.

<sup>1</sup> Values are based on prices for crop-marketing season, Dec. 1 or Nov. 15 prices. See notes on "Price."  
<sup>4</sup> Received by farmers. Beginning with 1908 for potatoes and cotton, 1910 for sweetpotatoes, and 1909 for cottonseed, prices are weighted average prices for crop-marketing season. Figures for prior years are Dec. 1 prices. For 1933, 1934, 1937, and 1938, season average prices for cotton crops include unredeemed loan cotton at average loan value.  
<sup>5</sup> Average for 8 years. <sup>6</sup> Average for 6 years. <sup>7</sup> Average for 7 years. <sup>8</sup> Average for 4 years.  
<sup>9</sup> State production figures, which conform with census annual ginning enumerations, with allowance for cross State ginnings, rounded to thousands and added for United States totals. Cotton grown in Lower California, ginned in California from 1913 to 1924, has been excluded.  
<sup>10</sup> Production is in running bales prior to 1899; 500-pound gross weight bales thereafter.  
<sup>11</sup> Data for 1909 and 1910.  
<sup>12</sup> Area in cultivation July 1 less removal of acreage reported by the Agricultural Adjustment Administration, less abandonment on area not under contract.

<sup>1</sup> Values are based on prices for crop-marketing season, Dec. 1 or Nov. 15 prices. See notes on "Price."  
<sup>2</sup> Received by farmers. See also notes on prices for each crop.  
<sup>3</sup> Nov. 15 prices, 1919 to 1924; Dec. 1 prices, 1925 and 1926; average prices for the crop-marketing season beginning 1927.  
<sup>4</sup> Prices are weighted average prices for the crop-marketing season, prices of beans being for cleaned beans.  
<sup>5</sup> Average for 1919 and 1920.  
<sup>6</sup> Farm value of dry edible beans equals the price of cleaned beans applied to the production of cleaned beans rather than to the total production.  
<sup>7</sup> Weighted average prices for the crop-marketing season.  
<sup>8</sup> Dec. 1 prices, 1916 to 1931; beginning 1932, weighted average prices for the crop-marketing season.  
<sup>9</sup> Includes 802,000 pounds in 1934, 5,436,000 pounds in 1935, 4,365,000 pounds in 1937, 5,625,000 pounds in 1938, and 7,839,000 pounds in 1939, not available for marketing because of economic conditions and the marketing agreement allotments. Prices and values are computed on the harvested crop.  
<sup>10</sup> Equivalent solid acreage.  
<sup>11</sup> Bags of 100 pounds.  
<sup>12</sup> Average for 1924 and 1925.

<sup>1</sup> Values are based on prices for crop-marketing season, Dec. 1 or Nov. 15 prices. See notes on "Price."  
<sup>2</sup> Received by farmers. Prices are as of Dec. 1 except as noted.  
<sup>3</sup> Prices are weighted average prices for the crop-marketing season beginning 1919; Dec. 1 prices theretofore.  
<sup>26</sup> Not included in tame hay.  
<sup>27</sup> Production figures include fruit consumed on farms, sold locally, and used for manufacturing, as well as that shipped; they exclude fruit which ripened on the trees but was destroyed prior to picking. Figures relate to the crop produced from the bloom of the year shown, fruiting through the winter and the following spring and summer. In California, where picking continues throughout the year, the estimates are for 12-month periods, beginning Nov. 1. In other States, the season begins about Sept. 1.  
<sup>28</sup> Prices are averages for crop-marketing season.  
<sup>29</sup> Net content of boxes varies. In California and Arizona, the approximate average is 70 lbs.; in other States, 90 lbs.  
<sup>30</sup> Price and value apply to entire crop exclusive of that portion donated to charity or eliminated on account of market conditions. (See note 31.) Prices are State averages, weighted by production to obtain U. S. averages.  
<sup>31</sup> Production in California includes the following quantities (boxes) which have no farm value: 1933, 977,000; 1934, 1,395,000; 1935, 614,000; 1936, 1,023,000; 1937, 1,204,000; 1938, 2,655,000.  
<sup>32</sup> As estimated from prospects on July 1, 1940.

No. 687.—COTTON AND COTTONSEED—ACREAGE, PRODUCTION, AND VALUE, BY STATES: 1911 TO 1939

NOTE.—Cotton production excludes linters. Figures for production in some States differ slightly from Census figures on ginnings due to ginnings in 1 State of cotton grown in another. Where figures are not shown for the individual States, separate data are not available for the entire period but are included in the United States totals. Yields and prices for the periods are simple averages of figures for individual years. Tons are of 2,000 pounds

1 Short-time average.  
 2 Market and canning production estimated in different units which cannot properly be combined.  
 3 Includes some quantities not harvested because of market conditions. Value computed on harvested crop.  
 4 Mainly for canning, but includes also market crop for New Jersey.  
 5 Pound of oil.  
 6 Commercial early Irish.

<sup>1</sup> Based on average price for the crop-marketing season; for apples, weighted average. <sup>2</sup> Preliminary.  
<sup>3</sup> Estimates refer to production in commercial apple counties; not comparable with former estimates which represented sales for fresh consumption only in the entire State. <sup>4</sup> Average, 1934-38.  
<sup>5</sup> Includes some quantities not harvested owing to market conditions, etc.; values based on harvested crop.  
<sup>6</sup> Includes small quantities for cold packing.  
<sup>7</sup> In addition, an equivalent of 60,000 tons (dry basis) was not harvested because of market conditions and 4,000 tons (dry basis) were lost in drying process in California.  
<sup>8</sup> Production includes some quantities donated to charity or eliminated on account of market conditions. Values apply only to entire crop, exclusive of donated or eliminated portions.  
<sup>9</sup> As estimated from prospects on July 1, 1940.

<sup>1</sup> Growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually not ended before February in Louisiana and April in Florida, following season of growth of cane.

<sup>2</sup> Calculated by the Agricultural Adjustment Administration method. (S. R. Series 1, No. 1.)

<sup>3</sup> Based on the ratio of 100 pounds of raw sugar to 93.46 pounds of refined sugar.

<sup>4</sup> Not including sirup production. See table 696. Preliminary.

<sup>1</sup> Beginning 1909, stocks on hand are taken into account. Figures for 1909-21 are for cane sugar only, stocks on hand July 1, 1922, comparable with July 1, 1921, amounted to 296,492 tons; 1922-34 includes stocks of raw cane sugar in all ports and beet sugar held by factories, according to trade sources. Beginning 1935, includes stocks of raw and refined sugar held by refiners, by importers and distributors of direct consumption sugar, and by beet sugar factories, as reported by the Sugar Division, U. S. Department of Agriculture. Stocks on July 1, 1935, comparable with July 1, 1934, totaled 1,051,296 tons raw value.

<sup>2</sup> Beet sugar converted to raw at the rate of 1.075 until 1921.

<sup>3</sup> Includes Hawaii, Puerto Rico, and the Philippines; Virgin Islands included beginning July 1, 1917.

<sup>4</sup> No account taken of sugar imported in other forms. Imports from the Philippine Islands excluded beginning July 1, 1900, and from Virgin Islands beginning July 1, 1917; reexports deducted through 1932; imports for consumption beginning 1933.

<sup>5</sup> Includes shipments to Hawaii and Puerto Rico for all years, to Alaska beginning 1933, and the Virgin Islands beginning Jan. 1, 1935. Excludes direct exports to foreign countries through customs districts of noncontiguous territories.

<sup>6</sup> Sugar used in the manufacture of other commodities for export on which drawback was paid, taken into account beginning 1909.

<sup>7</sup> 4-year average.

<sup>8</sup> 1909 only.

<sup>9</sup> Raw sugar converted to refined by multiplying by the following factors: For years prior to 1922, 0.9369; 1922-30, Cuba and Hawaii, 0.9358; Puerto Rico, 0.9393; Philippine Islands, 0.95; all others, 0.932; beginning 1931, Hawaii, 0.9617; Puerto Rico, Philippine Islands, and Virgin Islands, 0.946; Cuba and all others, 0.9418.

No. 706.—COTTON—PRODUCTION, CONSUMPTION, EXPORTS, IMPORTS, PRICES,  
AND CARRY-OVER: 1905 TO 1940

NOTE.—All figures, except average net weight and price, in thousands of bales. Production figures relate to crop of preceding year and are compiled from individual reports of ginners. Beginning 1911, price per pound represents average price received by growers, as computed by Department of Agriculture; for earlier years, it is average price of average grade marketed in New Orleans prior to April 1 of following year. Consumption figures relate to 12 months during which crop of specified year was chiefly marketed, and not to calendar year. Export and import figures (compiled by Bureau of Foreign and Domestic Commerce) relate to 12 months beginning Sept. 1 for years prior to 1915, and to 12 months beginning Aug. 1, thereafter. Figures for linters are included in those for consumption prior to 1909, and in export figures prior to 1915. Separate figures for linters prior to those years not available. See 1937 Statistical Abstract, table 659, for figures for years prior to 1905

No. 729.—FOREST FIRES—NUMBER, AREA, AND DAMAGE: 1931 TO 1939

NOTE.—Data were compiled from reports by National Forest Supervisors and from those of cooperating States. Figures for unprotected area are based on partial information only from incomplete reports; reliable data are not available for years prior to organized protection. Figures for fires in national parks were excluded prior to 1931, and for those on Indian reservations, prior to 1932

<sup>1</sup> Includes both saw timber and cordwood trees. The cubic foot volumes include the tops and limbs, but not the bark. Detailed data for cordwood trees are omitted from this table.<sup>2</sup> Includes only timber of saw timber size. Lumber items include allowances for logging waste which might have been utilized.<sup>3</sup> Lumber tally measure.<sup>4</sup> This item increased to account for the probable cut of mills failing to report to the census.<sup>5</sup> A square is considered equivalent to 800 pieces.

No. 733.—LUMBER—PRODUCTION, BY KIND OF WOOD, AND AVERAGE MILL VALUE

NOTE.—For 1889, 1914, 1921, 1923, 1925, and 1927 custom mills are excluded and beginning with 1911 for each year except 1919 mills cutting less than 50,000 board feet are excluded. Custom mills are much less important in recent years than formerly

## No. 756.—MINES AND QUARRIES, PRODUCING—SUMMARY, BY STATES: 1919 AND 1929

NOTE.—Figures for 1919 and 1929 have been revised to make them comparable except for 1919 where data for revision were not available, and for certain States for 1929 where revision would result in disclosure of individual operations. Therefore, the totals for the United States are less than the sum of the figures for the States for both years and for geographic divisions for 1919; also the totals for most of the geographic divisions for 1929 are less than the sum of the figures for the States

NO. 757.—MINES AND QUARRIES, PRODUCING—SUMMARY, BY INDUSTRIES:  
1919 AND 1929

NOTE.—Figures for 1919 and 1929 for the limestone, sandstone, abrasive materials, and silica industries are not strictly comparable, owing to the inclusion or exclusion of data for 1929 not similarly treated for 1919. For the limestone industry, data for quarrying operations of lime and cement manufacturers are included in the figures for 1929 but not in those for 1919. For the sandstone industry, data for enterprises whose product was ground into glass or molding sand, or used as refractory materials (siliceous mica schist and ganister), etc., are included in the figures for 1919 but excluded from those for 1929 and included in the figures for the glass-sand, molding-sand, abrasive-materials, or silica industries, according to the nature and purpose of the final product. Data for diatomaceous earth are included in the figures for abrasive materials in 1919 and in those for silica in 1929.

<sup>1</sup> The figures noted include the value of work or services.

<sup>2</sup> Includes salaried officers, technical and supervisory employees, and all others on salaries, except employees at central administrative offices not connected with mine or plant.

<sup>3</sup> Includes cost of lumber or timber, iron and steel materials, explosives and oil used directly or sold to employees, water for boilers, machinery supplies, and all other supplies and materials necessary to maintain and operate the mine or plant.

<sup>4</sup> Determined by averaging the total number reported on pay rolls the 15th of each month.

<sup>5</sup> For the industries noted, data are included for beneficiating plants, finishing plants, or mills operated in connection with the mine or plant; in such cases, the value of their product is included and not the value of the product of the mine or quarry.

<sup>6</sup> Not available.

<sup>7</sup> Average including shut-down periods.

<sup>8</sup> The value of most of the crude feldspar is duplicated in the value of the ground product.

<sup>9</sup> Number of grinding mills; some of these are operated in connection with the feldspar mines.

<sup>10</sup> In addition, fluorspar was produced at an undetermined number of prospects and reclaimed from mill ponds, waste dumps, and old workings of abandoned mines. Data for these operations are included in the other figures given.

<sup>11</sup> Data for natural gas and petroleum cover number of wells; for natural gasoline, number of plants.

<sup>12</sup> Value at points of consumption; the value at wells amounted to \$110,402,000.

<sup>13</sup> Not including 625 salaried employees at central offices with salaries amounting to \$1,752,000.

<sup>14</sup> Boron, bromine and iodine, diatomite, emery, garnet, greensand marl, magnesite, magnesium salts, manganese, molybdenum, natural sodium compounds, miscellaneous stone, and vermiculite.

## No. 761.—MINERAL PRODUCTION, BY STATES AND FOR ALASKA: 1932 TO 1938

NOTE.—The sum of the State totals in the table below does not agree with the total for the United States given in tables 752 and 753 chiefly because of the following reasons: (1) Figures for certain of the products included in the United States total are not available by States of origin; (2) the use of iron ore values in State totals and pig iron values in United States total; (3) the use of mine figures for gold, silver, copper, lead, and zinc in the State totals and mint and smelter figures in the United States total; and (4) the inclusion of estimates in the United States total for a few products for which no canvass has been conducted for many years and for which no estimate by States is made

NOTE.—Data cover continental United States and, for leading products, outlying areas. Certain of the figures represent shipments rather than quantity mined, and some of the figures for 1939 are preliminary. Total values of metallic and nonmetallic products include figures which the Bureau of Mines is not at liberty to publish and estimated figures for certain products for which data are not available. In some cases, neither quantity nor value can be shown and those products are not listed here but data for them are included in totals. On the other hand, values for certain products, such as coke, are excluded from the totals to eliminate duplication, since the values of the products derived therefrom, or of raw materials used, are accounted for under other items. Short tons are 2,000 pounds; long tons, 2,240 pounds

<sup>1</sup> From both domestic and foreign ores. Beginning 1935, data represent antimonial lead produced at primary refineries from both primary and secondary sources, and are not comparable with data for prior years; estimate of value of primary antimony and lead contents of antimonial lead from domestic sources included in total value of metallic products.

<sup>2</sup> For 1920, largely content of antimonial lead; 1925 and 1930, content of antimonial lead. Value of the antimony in antimonial lead excluded from total value.

<sup>3</sup> Largely from foreign ore beginning 1935. Value not included in total value. Bureau of Mines not at liberty to publish value figures or quantity figures for 1938 and 1939.

<sup>4</sup> Value not included in total value; see headnote.

<sup>5</sup> Value where not shown included in total value of metallic or nonmetallic products. Bureau of Mines not at liberty to publish figures or not available.

<sup>6</sup> Product from domestic ores only.

<sup>7</sup> According to Bureau of the Mint; valued at \$20.67+ per ounce through 1930, at \$35 per ounce in 1935 and subsequent years.

<sup>8</sup> Figures not available. Value of products derived therefrom, or of raw materials used, is included elsewhere.

<sup>9</sup> According to Bureau of the Mint.

<sup>10</sup> Less than \$500.

<sup>11</sup> Figures obtained through cooperation with Bureau of the Census. Data for 1939 not yet available; estimate included in total value of nonmetallic products. Beginning 1937, value of clay products excludes values of pottery and refractories.

<sup>12</sup> Includes brown coal and lignite, and anthracite mined elsewhere than in Pennsylvania.

<sup>13</sup> Quantities as reported by Department of the Interior, National Bituminous Coal Division; values are estimated from various sources and include selling expenses.

<sup>14</sup> No canvass. Estimate of value included in total value of nonmetallic products.

<sup>15</sup> Gypsum mined: After 1936, value of crude at mine; for earlier years, value as sold (crude and calcined).

<sup>16</sup> Figures cover fiscal year ended June 30 of year stated.

<sup>17</sup> Includes mica recovered by grinding mica schist; excluded in prior years shown.

<sup>18</sup> Largely for use in manufacture of pigments.

<sup>19</sup> Sublimed blue lead, sublimed white lead, leaded zinc oxide, and zinc oxide.

<sup>20</sup> Figures include pyrites concentrates from Tennessee and partly desulphurized tailings from zinc operations in Wisconsin; similar output in earlier years was not included.

<sup>21</sup> Includes soapstone used as dimension stone.

<sup>22</sup> From copper and zinc smelters and zinc roasters and from roasting of high-sulfide gold and silver concentrates.

<sup>23</sup> Includes 23,723 tons of stronger acid, not converted to 60° Baumé.

<sup>24</sup> For 1925 and 1930, figures exclude soapstone. For 1935 and thereafter, figures cover talc, pyrophyllite, and ground soapstone. Dimension soapstone is included in stone. Value of soapstone in 1925 and 1930 is included in value of nonmetallic products; Bureau of Mines not at liberty to publish figures.

No. 768.—STEEL, WIRE AND WIRE PRODUCTS, TIN PLATE AND TERNEPLATE, AND  
CAST-IRON PIPE AND FITTINGS—PRODUCTION: 1933, 1935, AND 1937

NOTE.—The overlapping of the industries shown in this table results in considerable duplication in ton-  
nages shown. The products chiefly used further in manufacture are wire rods, plates and sheets, black  
plates for tinning, and skelp. The figures under "Wire," "Tin and terneplate," and "Cast-iron pipe  
and fittings" include data for products of these departments of steel works and rolling mills and of all  
other industries producing these commodities

<sup>1</sup> Of 2,240 pounds.

<sup>2</sup> In addition, steel castings were produced for sale and for interplant transfer by establishments classified in other industries as follows: For 1933, 14,495 tons valued at \$2,508,632; 1935, 58,289 tons valued at \$8,254,025; 1937, 49,187 tons valued at \$9,596,662.

<sup>3</sup> Includes the production of piercing billets, rounds, and blanks which were not called for separately prior to 1935. The amounts reported for 1935 are as follows: Produced and consumed in same works, 888,594 tons; made for sale and interplant transfer, 73,639 tons, valued at \$3,920,021. For 1937, produced and consumed in same works, 1,684,618 tons; made for sale and interplant transfer, 634,292 tons valued at \$24,807,581. For years prior to 1935 data for the tonnage produced and consumed in plant and an indeterminate amount of that made for sale and interplant transfer were reported under "Blooms, billets, and slabs."

<sup>4</sup> Includes 10,377 tons, valued at \$6,011,666 for 1933, 13,615 tons, valued at \$9,147,892 for 1935, and 32,853 tons, valued at \$21,618,180 for 1937, of stainless-steel plates and sheets not reported separately.

<sup>5</sup> All iron and steel wire, including that subsequently galvanized, otherwise coated, and cold rolled.

<sup>6</sup> Of 2,000 pounds.

<sup>7</sup> Not called for separately.

<sup>8</sup> Includes \$313,000 in 1933, \$673,000 in 1935, and \$214,000 in 1937 for which no quantity was reported.

<sup>9</sup> Not including value of nails and tacks made from nail and tack plate.

<sup>10</sup> Of 100 pounds.

<sup>11</sup> No comparable data; quantity not reported in all cases.

<sup>1</sup> Includes much duplication.<sup>2</sup> Value of products less cost of materials, fuel, and purchased electric energy. Beginning 1935, deductions include, in addition, cost of contract work.<sup>3</sup> No data.<sup>4</sup> Includes data for 3 establishments in 1935 and 5 in 1937 engaged in production of sintered ore and flue dust and operated independently of blast furnaces.

## No. 771.—IRON AND STEEL—AGGREGATE EXPORTS: 1890 TO 1939

NOTE.—Prior to 1922, the small items for which quantity is not available are excluded, while in later years all items are included. Ferromanganese is included for all years. The small item "steam and hot water heating boilers and radiators," formerly classified as heavy iron and steel, is excluded beginning 1922

No. 776.—COPPER—PRODUCTION, EXPORTS, IMPORTS, AND CONSUMPTION:  
1910 TO 1939

NOTE.—All quantities except ore produced in millions and tenths of millions of pounds. Production figures include continental United States and Alaska. Owing to the varying stages of production, the stocks in different classes of hands, the redistribution of copper previously purchased, the recovery and use of old copper, etc., calculations of consumption are somewhat uncertain. The American Bureau of Metal Statistics presents consumption estimates rather widely different from those given below. Consumption as shown represents the quantity of copper withdrawn on domestic account, but not actual domestic consumption, as no account is taken of consumers' stocks

No. 779.—COPPER—EXPORTS AND IMPORTS: 1891 TO 1939

NOTE.—Exports are those classed as "domestic" in the foreign trade statistics but include copper smelted or refined in the United States from imported ore or unrefined metal. Values include all forms of copper. Quantities represent all copper except the small item, "other manufactures." Copper content of exports of ore for years 1891-1915 and of imports for years 1894-1903 was estimated

NO. 781.—LEAD—PRODUCTION OF REFINED PRIMARY AND SECONDARY LEAD, 1830 TO 1939, AND BY CLASS AND SOURCE: 1880 TO 1939

NOTE.—Production in short tons (2,000 pounds); values, except price per pound, in thousands of dollars. Figures, except those for antimonial and secondary lead, relate to new (primary) lead only; totals include lead derived from both domestic (including Alaska) and foreign ore. General production figures and production of desilverized lead exclude lead content of antimonial lead, shown in next to last column

<sup>2</sup> Includes small quantities of old, reclaimed, and scrap lead.

<sup>3</sup> Includes a small quantity, not separable, of "sheets."

<sup>4</sup> Including small quantities of foreign lead reexported through 1935.

No. 783.—NON-FERROUS METALS AND ALLOYS, AND FINISHED PRODUCTS THEREOF—PRODUCTION, BY KIND: 1933, 1935, AND 1937

NOTE.—Table shows products made for sale and interplant transfer, excluding those made for consumption in same works. Data represent production of commodities specified, whether made as primary or as secondary products by industries reporting them. The census designations of industries in which these commodities are made as primary products are as follows: "Nonferrous-metal alloys; nonferrous-metal products, except aluminum, not elsewhere classified," and "Smelting and refining, nonferrous metals other than gold, silver, and platinum, not from the ore." No data are included for establishments engaged in smelting and refining concentrates containing copper, lead, zinc, and other nonferrous metals

No. 786.—GOLD AND SILVER—PRODUCTION IN CONTINENTAL UNITED STATES,  
ALASKA, PUERTO RICO, AND PHILIPPINE ISLANDS: 1792 TO 1939

NOTE.—The value of gold, in terms of money, being at a fixed rate, is not shown in the table. Gold is valued at \$20.67+ per fine troy ounce from 1837 through 1933. In 1933, however, varying higher prices prevailed subsequent to the Executive order of Aug. 29. The value of gold production for 1933, as computed by the Bureau of Mines, was \$65,338,000, including \$52,842,000 calculated at legal coinage value (\$20.67+ per ounce) plus \$12,496,000 premium calculated at average weighted price (\$25.56 per ounce). On Jan. 31, 1934, the legal value of gold was fixed at \$35 per fine ounce. The value of silver given is commercial value, except for 1921 to June 1923 and beginning 1934 (see footnotes 1 and 2), which has differed materially from coinage value

1 Value prior to 1934 calculated on basis of \$20.67+ per fine ounce; in 1934 and thereafter, \$35.00 per fine ounce. 2 Excess of return from industry over new material issued to industry.

No. 788.—SILVER—PRICES, LONDON AND NEW YORK, AND VALUE IN THE DOLLAR: 1835 TO 1939

NOTE.—The London price is converted to the basis of the ounce 1,000 fine and converted to American money at par of exchange through 1930; thereafter, at the current rate of exchange. London quotations are in depreciated currency after Sept. 21, 1931, also in some prior year periods, including 1918 to 1924. New York quotations are in depreciated currency after early March 1933. The commercial ratio is computed on the basis of London quotations through 1914; thereafter, on the basis of the New York average price. Beginning with 1934 the monetary value of gold is \$35.00 per fine ounce as compared with \$20.67 in previous years. The value of fine silver (371/4 grains) in the dollar is computed on the basis of London quotations through 1917; thereafter, on the basis of the New York average price

<sup>1</sup> Figures for bituminous coal represent average value per ton less selling expense (Bur. of Mines series) prior to 1937; thereafter, average gross realization including selling expense (Bit. Coal Div. series).

<sup>2</sup> Calculated at 303.5 working days in the anthracite field and 308 working days in the bituminous field.

<sup>3</sup> Of 2,000 pounds. <sup>4</sup> Not available. <sup>5</sup> Estimate by Pa. Dept. Mines. <sup>6</sup> 1891. <sup>7</sup> 1896.

**No. 798.—NATURAL GAS AND NATURAL GASOLINE—PRODUCTION, 1906 TO 1939, AND BY STATES, 1925 TO 1939**

NOTE.—Quantities of gas in millions of cubic feet, of gasoline in thousands of gallons; values in thousands of dollars. Production figures for gas refer only to that marketed, in addition to which considerable quantities are used by producers, and large quantities are wasted or lost. Values given are at the point of consumption. Consumption figures by States differ greatly from production figures by reason of interstate transportation

No. 799.—MANUFACTURED-GAS INDUSTRY—FUEL CONSUMED, BY KIND AND BY USE: 1932 TO 1939

NOTE.—Coal and coke in thousands of tons of 2,000 pounds; oil in thousands of gallons. Companies formerly distributing manufactured gas but which were distributing natural gas at the beginning of 1939 have been excluded from the figures for all years. The figures do not include fuels used in production of coke oven gas which is purchased by gas companies from coke and steel companies for public distribution

No. 800.—MANUFACTURED-GAS AND NATURAL-GAS INDUSTRIES—SUMMARY: 1932 TO 1939

NOTE.—Population served and number of customers in thousands, gas produced, purchased, and sold in millions of cubic feet; revenue in thousands of dollars. Companies formerly distributing manufactured gas but which were distributing natural gas at the beginning of 1939 have been excluded from the figures for manufactured gas and included with those for natural gas for all years shown in this table. Companies selling mixed manufactured and natural gas are included with data for manufactured gas. Figures for natural gas do not include natural gas used in field operations or in the manufacture of carbon black, or gas used by distributing companies in the conduct of their gas operations

<sup>1</sup> Includes natural gasoline run through pipe lines in California.

<sup>2</sup> Stocks east of California only

<sup>3</sup> Includes terminal, transit, and natural gasoline stocks.

<sup>4</sup> Including California heavy crude.

<sup>5</sup> For comparison with succeeding year.

<sup>6</sup> New basis; considers transfers of light grades of crude petroleum to the gas-oil and fuel-oil account, and also changes in bulk-terminal stocks, in refinery districts east of California.

<sup>7</sup> Of 2,000 pounds.

<sup>8</sup> Other finished products include still gas formerly reported also with losses.

## 32. MANUFACTURES

(Statistics in this section relate to continental United States except as noted. For additional statistics on manufactured food products, mineral products, and forest products, see sections 27, 28, 29, and 31)

**GENERAL NOTE.**—The Census of Manufactures was taken decennially prior to 1899 and for each fifth year thereafter through 1919, and has since been taken biennially. The censuses for 1904, 1909, 1914, and 1919 covered all factories or plants whose products were valued at \$500 or more, but, beginning with 1921, the minimum limit has been \$5,000. As a rule, the term "establishment" signifies a single plant or factory, but in some cases an establishment operates two or more factories and in a few cases two or more departments of a single plant or factory are treated as separate establishments. At the Census for 1937, however, an establishment operating two or more factories was counted as two or more establishments. The total number of establishments was increased approximately 2,000 by this change.

"Value of products" represents selling value at the plant or factory. Because of the use of the products of some establishments as materials for others, the total cost of materials and the total value of products for all industries in a given group, and for all groups in the aggregate, include much duplication, estimated at roughly one-third of the gross value of products. Such duplication is not, however, found to any great extent within individual industries.

At the census for 1933 the smaller establishments in many industries were canvassed by means of an abridged schedule which did not call for detailed data on production, and therefore the production figures in the reports of that census for certain industries are somewhat incomplete. In cases in which the degree of incompleteness was sufficient to affect the comparableness of the statistics for different census years, the 1933 figures have been omitted from tables presenting detailed statistics of production in the 1937 and subsequent issues of the Statistical Abstract. Figures for 1933, together with 1931 figures adjusted for comparison with 1933, are, however, included in the 1936 edition.

It is sometimes necessary, for various reasons but chiefly because of changes in census classification, to make adjustments in the figures for earlier census years. Adjustments have been made as a result of the exclusion from the Census of Manufactures for 1937 of the industries "Gas, manufactured, illuminating and heating" and "Railroad repair shops." Adjustments have been made, also, as a result of the exclusion, beginning 1933, of the industries "Coffee and spice, roasting and grinding" and "Peanuts, walnuts, and other nuts, processed and shelled." The "Motion pictures, not including projection in theaters" industry was treated as a manufacturing industry in the censuses for 1921 to 1929, inclusive, but not in subsequent censuses. No adjustments of the figures for 1929 and earlier years have been made on account of this change, but its effect on the comparableness of the figures for different census years is very slight.

Detailed quantity and value figures for products of selected manufacturing industries are presented in certain of the Census tables in this section and in sections 27, 28, 29, and 31. The "total value" figures for the respective industries, as given in those tables, differ from the values of products of the corresponding industries, as given in table 830, because of the inclusion in the product-value totals in those tables, but not in the values of products for the corresponding industries in table 830, of data for the respective classes of commodities made as minor or secondary products by establishments engaged primarily in other lines of manufacture.

<sup>1</sup> See second paragraph of general note.

<sup>2</sup> Value of products less cost of materials, containers, fuel, and purchased electric energy.

<sup>3</sup> For all establishments having products valued at \$500 or more. <sup>4</sup> Reduced to gold basis.

<sup>5</sup> Figures for "Gas, manufactured, illuminating and heating" and "Railroad repair shops" have been excluded beginning 1899.

<sup>6</sup> For all establishments having products valued at \$5,000 or more. <sup>7</sup> Includes cost of contract work.

<sup>8</sup> Calculated by subtracting sum of cost of materials, containers, fuel, purchased electric energy, and cost of contract work from value of products. Not strictly comparable with years prior to 1935.

No. 830.—MANUFACTURES—SUMMARY FOR INDUSTRY GROUPS AND INDUSTRIES:  
1931 to 1937

NOTE.—The figures given in this table do not represent exactly the numbers of wage earners, values of products, etc., assignable to the classes of commodities from which the industries derive their names, as it is necessary for census purposes to classify each establishment as a whole in some one industry, according to its product of chief value, although in many cases a single establishment manufacturer two or more classes of commodities. See also general note, p. 802

<sup>3</sup> Revised; revision not carried into subgroup or group total.

<sup>4</sup> Figures for 1937 and 1935 not strictly comparable with those for earlier years, because of inclusion of data for malthouses, first reported separately by breweries for 1935.

<sup>5</sup> At the 1935 census ethyl alcohol was assigned to "Chemicals, n. e. c." and "Liquors, rectified, etc." were separately classified. The 1933 figures in italics have been adjusted for comparison with 1935 and 1937.

<sup>1</sup> Figures for 1937 and 1935 include cost of contract work; those for 1933 and 1931 do not, except as noted.

<sup>2</sup> Value added by manufacture calculated for 1937 and 1935 by subtracting cost of materials, etc., fuel, purchased energy, and contract work from value of products; for 1933 and 1931 figures for contract work are not available except for a few industries.

<sup>3</sup> No comparable figures available for 1931.

<sup>4</sup> No comparable figures available for earlier years.

<sup>5</sup> Revised by adding figures for "Hats and caps, except felt and straw," formerly included in the "Cutting-up" industries.

<sup>10</sup> Because of changes in classification the figures below will not add to these totals.

<sup>11</sup> Figures not strictly comparable with those for 1933 and 1931.

<sup>12</sup> Because of changes in classification of certain establishments, the figures for earlier years are not strictly comparable with those for 1937.

<sup>1</sup> Figures for 1937 and 1935 include cost of contract work; those for 1933 and 1931 do not, except as noted.

<sup>2</sup> Value added by manufacture calculated for 1937 and 1935 by subtracting cost of materials, etc., fuel, purchased energy, and contract work from value of products; for 1933 and 1931 figures for contract work are not available except for a few industries.

<sup>3</sup> No comparable figures available for earlier years.

<sup>16</sup> Excludes data for wiping rags for 1937 because not considered a manufactured product. Such data were included for 1935.

<sup>17</sup> Revised to include data for "Haireloth," which has been abandoned as a separate classification.

<sup>18</sup> Because of the fact that some establishments, such as those in all apparel industries, lose their identity during a 2-year period through change of name, ownership, and location, and, therefore, may be missed by a canvass made largely by mail, the 1937 statistics are not complete.

<sup>1</sup> Figures for 1937 and 1935 include cost of contract work; those for 1933 and 1931 do not, except as noted.

<sup>2</sup> Value added by manufacture calculated for 1937 and 1935 by subtracting cost of materials, etc., fuel, purchased energy, and contract work from value of products; for 1933 and 1931 figures for contract work are not available except for a few industries.

<sup>13</sup> Because of changes in classification of certain establishments, the figures for earlier years are not strictly comparable with those for 1937.

<sup>14</sup> Revised to include cost of contract work.

<sup>1</sup> Figures for 1937 and 1935 include cost of contract work; those for 1933 and 1931 do not, except as noted.

<sup>2</sup> Value added by manufacture calculated for 1937 and 1935 by subtracting cost of materials, etc., fuel, purchased energy, and contract work from value of products; for 1933 and 1931 figures for contract work are not available except for a few industries.

<sup>3</sup> Revised; revision not carried into subgroup or group total.

<sup>4</sup> This group formerly included "Gas, manufactured, illuminating and heating." At the Census for 1937 this was discontinued as a manufactures industry classification; the figures for earlier years have been revised accordingly.

<sup>1</sup> Figures for 1937 and 1935 include cost of contract work; those for 1933 and 1931 do not, except as noted.

<sup>2</sup> Value added by manufacture calculated for 1937 and 1935 by subtracting cost of materials, etc., fuel, purchased energy, and contract work from value of products; for 1933 and 1931 figures for contract work are not available except for a few industries.

<sup>23</sup> At the census for 1937 "Handbags and purses, women's," "Leather goods—small articles," and "Leather goods not elsewhere classified" were established as separate industry classifications. The establishments comprising these industries were formerly in the industries "Pocketbooks, purses, and card cases" and "Leather goods not elsewhere classified." Comparable figures are not available for classifications established for 1937.

<sup>24</sup> At the census for 1937 "Nonclay refractories" was established as a separate industry classification; data were formerly included in the "Clay products" industry. The figures for 1935 and 1933 for the latter industry have been revised by excluding data for nonclay refractories, but no segregation has been made for 1931. The subgroup totals have been revised for the years 1935 and 1933.

<sup>1</sup> Figures for 1937 and 1935 include cost of contract work; those for 1933 and 1931 do not, except as noted.

<sup>2</sup> Value added by manufacture calculated for 1937 and 1935 by subtracting cost of materials, etc., fuel, purchased energy, and contract work from value of products; for 1933 and 1931 figures for contract work are not available except for a few industries.

<sup>27</sup> Prior to the census for 1937 in "Machinery, not including transportation equipment" group. No separate figures for 1931; at that census included in the abandoned industry "Foundry and machine-shop products."

<sup>28</sup> Not including similar products manufactured to a considerable extent by steel works and rolling mills or by plants operated in connection with rolling mills. The figures here given refer only to establishments engaged primarily in the specified classes of products. "Nails, spikes," etc., also exclude products made in wire mills.

<sup>29</sup> Largely custom work. Exclusive of products made in steel works and rolling mills or in plants operated in connection with rolling mills.

<sup>30</sup> Represents industries classified prior to 1937 as "Steam and hot-water heating apparatus and steam fittings" and "Stoves and ranges, other than electric."

<sup>1</sup> Figures for 1937 and 1935 include cost of contract work; those for 1933 and 1931 do not, except as noted.

<sup>2</sup> Value added by manufacture calculated for 1937 and 1935 by subtracting cost of materials, etc., fuel, purchased energy, and contract work from value of products; for 1933 and 1931 figures for contract work are not available except for a few industries.

<sup>30</sup> Revised; revision not carried into group total.

<sup>33</sup> The figures for 1935 and 1933 have been revised by excluding figures for the "Boiler-shop products" and "Foundry products (gray-iron and malleable-iron)" industries which have been transferred to "Iron and steel and their products, except machinery" group. The figures for 1931 have not been revised as there are no figures available for these industries for 1931.

<sup>34</sup> Beginning 1935 figures for tractors excluded from "Engines, turbines, water wheels, and windmills" and included with "Agricultural implements (including tractors)." The 1933 and 1931 figures for these industries have been revised accordingly.

<sup>35</sup> Manufacturers of duplicating machines, check-writing machines, and manifold machines, now classified in this industry, prior to 1935 were assigned to the abandoned industry "Foundry and machine-shop products." Figures for 1933 have been revised accordingly, but no revision has been made for 1931.

<sup>36</sup> New industry at the census for 1935; formerly a part of the abandoned industry classification "Foundry and machine-shop products." No figures available for earlier years.

<sup>37</sup> No figures available for 1931; included with those for the abandoned industry "Foundry and machine-shop products" for 1931.

<sup>1</sup> Figures for 1937 and 1935 include cost of contract work; those for 1933 and 1931 do not, except as noted.  
<sup>2</sup> Value added by manufacture calculated for 1937 and 1935 by subtracting cost of materials, etc., fuel, purchased energy, and contract work from value of products; for 1933 and 1931 figures for contract work are not available except for a few industries.

<sup>30</sup> Revised; revision not carried into group total.

<sup>40</sup> This industry abandoned as a separate classification at the census for 1935; divided into 6 industries. The 1933 and 1931 figures were not in all cases assigned to the industry classifications.

<sup>41</sup> Excludes figures for "Carriages and sleds, children's." See "Miscellaneous industries" group.

<sup>42</sup> Manufacturers of lunch wagons, classified in this industry prior to 1933, are now assigned to "Planing-mill products" industry in "Forest products" group. These figures have been revised for comparison with later years.

<sup>1</sup> Figures for 1937 and 1935 include cost of contract work; those for 1933 and 1931 do not, except as noted.

<sup>2</sup> Value added by manufacture calculated for 1937 and 1935 by subtracting cost of materials, etc., fuel, purchased energy, and contract work from value of products; for 1933 and 1931 figures for contract work are not available except for a few industries.

<sup>3</sup> Revised; revision not carried into group total.

<sup>45</sup> New classification at the census for 1935; no comparable figures available for earlier years.

<sup>46</sup> At the census for 1937 the industry "Fur goods" was separated into two industries, "Fur goods—regular factories" and "Fur goods—contract factories." Because of the fact that some establishments lose their identity during a 2-year period through change of name, ownership, and location, and, therefore, may be missed by a canvass made largely by mail, the 1937 figures for this industry are not complete and are not comparable with the figures for the "Fur goods" industry for prior years.

<sup>1</sup> Figures for 1937 and 1935 include cost of contract work; those for 1933 and 1931 do not, except as noted.

<sup>2</sup> Value added by manufacture calculated for 1937 and 1935 by subtracting cost of materials, etc., fuel, purchased energy, and contract work from value of products; for 1933 and 1931 figures for contract work are not available except for a few industries.

<sup>4</sup> Revised; revision not carried into subgroup or group total.

<sup>47</sup> Manufacturers of gas and water meters, prior to 1935, assigned to "Meters (gas, water, etc.) and gas generators" industry in "Machinery, except transportation equipment" group, are now classified in this industry. The figures for years prior to 1935 have been revised accordingly, but the revision has not been carried into the total for the group and subgroup.

<sup>48</sup> Revised to include figures for "Combs and hairpins not made of metal or of rubber" industry, abandoned as a separate classification.

<sup>1</sup> Figures for 1937 and 1935 include cost of contract work; those for 1933 and 1931 do not, except as noted.

<sup>2</sup> Value added by manufacture calculated for 1937 and 1935 by subtracting cost of materials, etc., fuel, purchased energy, and contract work from value of products; for 1933 and 1931 figures for contract work are not available except for a few industries.

<sup>4</sup> Revised; revision not carried into subgroup or group total.

<sup>4b</sup> Abandoned as a separate classification in 1935, now assigned to other industries.

<sup>5b</sup> Revised to exclude data for establishments manufacturing mineral wool as a primary product, such establishments having been transferred to "Wallboard and plaster (except gypsum), building insulation, and floor composition" industry in "Stone, clay, and glass products" group. Revision not carried into total for group or subgroup.

<sup>1</sup> Figures beginning with 1927 are not strictly comparable with earlier years owing to the fact that large quantities of heavy footwear now included with men's shoes were included with "Athletic" prior to 1927.

<sup>2</sup> Figures exclude footwear with fabric uppers and rubber soles; data for this class, for certain census years, are shown in table 840, p. 850.

<sup>3</sup> Figures include satin, canvas, etc.

<sup>4</sup> Includes slippers and moccasins (all leather and part leather, felt, etc.) for house wear.

<sup>5</sup> Not reported separately; included with "all other."

<sup>6</sup> Not reported separately; included with the various classes of boots and shoes.

<sup>4</sup> Data not strictly comparable because 1935 figures are partially incomplete.

<sup>5</sup> No comparable data or data incomplete.

<sup>6</sup> Combined glove, garment, and upper leather.

<sup>7</sup> Includes some fancy leather.

<sup>8</sup> Includes values for items to which footnote 5 is indexed and therefore are not comparable with those for 1937.

<sup>9</sup> Some items included in "Other leather" and therefore are not comparable with those for 1937.

No. 837.—CHEMICALS—PRODUCTION, BY KIND: 1933, 1935, AND 1937

NOTE.—Data shown in this table represent products made for sale and for interplant transfer. In addition, large quantities of certain chemicals, especially acids, are made and consumed in further processes in the same establishments. There is considerable duplication in the total value of products due to the use of products sold by one establishment as material for other establishments manufacturing chemicals. Tons are of 2,000 pounds, except as noted

<sup>1</sup> Value includes data for items not shown separately.  
<sup>2</sup> Production in 1935 and 1937, basis 80 percent; for 1933, as reported, regardless of strength.  
<sup>3</sup> Data incomplete, no comparable data, data not available, or data withheld.  
<sup>4</sup> Synthetic, natural, dilute, and glacial.  
<sup>5</sup> Production in 1935 and 1937, basis 100 percent; for 1933, as reported, regardless of strength.  
<sup>6</sup> Production in 1933, basis 50 percent, in part P<sub>2</sub>O<sub>5</sub> and in part H<sub>2</sub>P<sub>4</sub>O<sub>7</sub>; in 1935 and 1937, basis 50 percent H<sub>2</sub>P<sub>4</sub>O<sub>7</sub>.  
<sup>7</sup> Data for production by establishments classified in lead smelting and refining and copper smelting industries included in figures for 1935 and 1937, but not in those for 1933.  
<sup>8</sup> In addition, 3,968,000 gallons of refined natural methanol, valued at \$1,133,000, was produced for sale in the "Wood distillation and charcoal manufacture" industry.  
<sup>9</sup> The production of ethyl alcohol in proof gallons, as reported to the Bureau of Internal Revenue, Treasury Dept., was as follows: 1933, 138,600,000; 1935, 193,219,000; 1937, 215,438,000.  
<sup>10</sup> Includes production from ammonia liquor, as follows: 1935, 2,991,000 pounds, value \$380,000; 1937, 2,662,000 pounds, value \$246,000; 1933, not reported separately.  
<sup>11</sup> Figures for 1935 and 1937, but not for 1933, include data for ammonia produced in the manufacture of gas. For production in coke industry, see Bureau of Mines report, Minerals Yearbook.  
<sup>12</sup> Basis 35 to 37 percent available chlorine.  
<sup>13</sup> For 1933, includes methyl chloride; thereafter, included in "Compressed and liquefied gases" industry.  
<sup>14</sup> In addition, production by establishments engaged primarily in manufacture of salt was as follows: 1935, 8,000 tons, value \$50,000; 1937, 7,000 tons, value \$67,000. Data included for 1933.  
<sup>15</sup> Figures for 1935 and 1937 do not include color lakes, included with "Paints, pigments, and varnishes" (table 838), nor certain other coal-tar chemicals, shown elsewhere in this table. Data for these classes of products are included with the figures for 1933.  
<sup>16</sup> Not including byproduct crudes made in coke plants and gas works.  
<sup>17</sup> Data incomplete; value included in that of "Other chemicals." <sup>18</sup> Tons are of 2,240 pounds.  
<sup>19</sup> Total production of crude glycerine, as reported to the Div. of Cotton and Oils, Bur. of the Census, for 1937, was 169,039,000 pounds. Most of this was further refined and sold or used as glycerine, dynamite grade, or glycerine, chemically pure. Prior to 1937, both dynamite grade and chemically pure glycerine were reported as glycerine, refined.  
<sup>20</sup> Data for sodium nitrate withheld to avoid disclosing an approximation of the output of an individual establishment. Value included in that of "Other chemicals."  
<sup>21</sup> Data for production of photographic-film base and wrapping materials are not included. Value of these included in that of "Other chemicals."  
<sup>22</sup> Made in producing establishments in "Chemicals not elsewhere classified" industry. Nitrocellulose articles are also made from purchased nitrocellulose plastics by establishments in other industries.  
<sup>23</sup> Includes an indeterminate amount of materials used as fillers, such as wood flour, etc.  
<sup>24</sup> Production in 1935 and 1937, basis 15 percent available chlorine; for 1933, as reported, regardless of strength.  
<sup>25</sup> Liquid, basis 40%. <sup>26</sup> Includes that refined from natural product. <sup>27</sup> Includes product made from brines.  
<sup>28</sup> Production in 1935 and 1937, basis 60 to 62 percent; for 1933, as reported, regardless of strength.

<sup>1</sup> Does not include value of methyl chloride.

<sup>2</sup> Includes approximately 64,500,000 pounds piped to plants making dry ice in 1933, 25,285,000 pounds in 1935, and 17,000,000 pounds in 1937. <sup>3</sup> Basis 16 percent available phosphoric acid.

<sup>4</sup> Comparable data for 1933 are not available; see third paragraph of general note, p. 802.

<sup>5</sup> Includes value of production for which no quantity was reported.

<sup>6</sup> Includes shaving cream with soap base.

Shaving cream containing no soap is classified as a product of the "Perfumes, cosmetics, and toilet preparations" industry, p. 849. The total production of shaving cream, with and without soap, in 1935 and 1937, was valued at \$7,957,000 and \$9,626,000, respectively.

<sup>7</sup> No comparable data.

<sup>1</sup> The values of "Systems, high sides, low sides, etc.," (see footnote 3) and "Cabinets, display cases, etc.," are duplicated in the totals to which this footnote is indexed, to the extent to which these products were sold to manufacturers in the industry for assembly and sale as complete refrigerators.

<sup>2</sup> No data or data incomplete.

<sup>3</sup> The term "system," as used here, refers to a complete assembly, consisting of "high side" and "low side" with motor, control, and expansion valve or its equivalent. The cabinet is not a part of the system.

<sup>4</sup> Data incomplete; included with "All other, including air-conditioning equipment, etc."

<sup>5</sup> Figures combined to avoid disclosing output of individual manufacturers.

## No. 852.—COTTON SPINDLES, COTTON CONSUMPTION, AND STOCKS

NOTE.—The statistics for 1916 to 1940 relate to the 12 months ended July 31 and those for prior years to the 12 months ended Aug. 31. Consumption and stocks are expressed in running bales, counting round as half bales, except that all figures, 1840 to 1870, inclusive, and foreign cotton for all years are in equivalent 500-pound bales. The number of active cotton spindles represents spindles operated at some time during the year, and is not as satisfactory a measure of activity of the industry as active spindle hours

## No. 857.—TOBACCO, LEAF—AMOUNTS CONSUMED IN THE MANUFACTURE OF CIGARS, CIGARETTES, CHEWING AND SMOKING TOBACCO, AND SNUFF

NOTE.—All figures in thousands of pounds. Figures represent the equivalent in unstemmed leaf tobacco of stemmed leaf or scraps, cuttings, and clippings. In the following table the tobacco used in the manufacture of cigars and cigarettes was converted on the basis of 3 pounds of stemmed leaf or scraps, etc., to 4 pounds of unstemmed beginning 1915 (conversion prior to 1915 was at the ratio of 3 to 5) and of tobacco and snuff beginning 1903. For 1896 to 1902, tobacco used in manufactured tobacco and snuff was shown only under two heads, namely "leaf" and "scraps." It is probable that stemmed leaf was included with unstemmed tobacco under the head of "leaf" without the one kind being converted to the equivalent in the other. The conversion ratio of 3 to 4 was applied only to "scraps" for these years. Data exclude tobacco used in bonded manufacturing warehouses (see table 856)

<sup>1</sup> In computing taxable gallons all fractional parts of a proof gallon less than one-tenth are excluded.

<sup>2</sup> Production represents the amount removed from fermenters including wine that is removed for use as distilling material in the production of brandy.

<sup>3</sup> Includes artificially carbonated wine. Tax is payable "on each one-half pint (for artificially carbonated wine, 'on each pint' beginning June 26, 1936) or fraction thereof" of "each bottle or other container."

<sup>4</sup> Barrels of not more than 31 gallons. <sup>5</sup> C containing less than one-half of 1 percent alcohol by volume.

<sup>6</sup> Includes data for Alaska, Hawaii, and Puerto Rico.

<sup>7</sup> No data compiled by Bureau of Internal Revenue. <sup>8</sup> No legal production.

<sup>9</sup> Includes 1,588,788 barrels produced prior to Apr. 7 (effective date of the Act of Mar. 22, 1933).

<sup>10</sup> Alcoholic content limited to 3.2 percent by weight from Apr. 7 to Dec. 5, 1933.

<sup>11</sup> Does not include brandy withdrawn for the fortification of wine.

<sup>12</sup> Total withdrawals; tax law repealed, effective May 10, 1934. <sup>13</sup> In thousands of proof gallons.

<sup>14</sup> In thousands of wine gallons. <sup>15</sup> Figures not available.

## No. 861.—MOTION-PICTURE PRODUCTION—SUMMARY: 1921 TO 1937

NOTE.—All money figures are in thousands of dollars. Data represent the activities of the motion-picture studios and laboratories. They do not include the distribution of films and their projection in theatres. No data are included for establishments which reported less than \$5,000 as the cost of work done. The motion-picture industry has been canvassed, since 1921, in connection with the Biennial Census of Manufactures. It is not, however, a manufacturing industry, but was treated as such prior to 1931

### 33. DISTRIBUTION, SERVICES, AND HOTELS

[Data in this section relate to continental United States]

#### No. 863.—MANUFACTURERS' SALES—DISTRIBUTION, BY PRIMARY CHANNELS, BY INDUSTRY GROUPS: 1929 AND 1935

NOTE.—Figures do not cover sales or distribution expenses of manufacturers' own wholesale branches or retail stores, which are covered in data for wholesale trade and retail trade, respectively. Figures were not compiled for industries: (1) Where no outside sales were made, the plants being maintained for the purpose of making repairs, such as railroad repair shops; (2) where sales were made direct to users, the value of products in most instances comprising the sale of services, such as engraving and lithographing industries; (3) in which the plants were engaged, for the most part, in performing labor on materials owned by others so that their sales represented the sales of services rather than commodities, such as electroplating and galvanizing industries; and (4) where the plants of one organization so dominated that to show distribution of sales figures would disclose individual operations. The following table is limited to industries which are directly comparable in 1929 and 1935, while table 864 covers all industries for which 1935 data were compiled

No. 869.—WHOLESALE TRADE—PERCENTAGE CHANGES IN SALES: 1935 TO 1937

NOTE.—The 1937-38 Census Survey of Wholesale Distribution covered a total of 18,417 establishments, comprising 12,840 service and limited-function wholesalers in 22 of the 29 kind-of-business groups recognized by the census classification of wholesale establishments; 5,476 manufacturers' sales branches; and 101 fruit and vegetable commission merchants. On the basis of the returns for the 1935 Census of Business, these establishments constituted a sample of 19 percent in number and 33 percent in sales for the service and limited-function wholesalers in the 22 kind-of-business groups, and a sample of 53 percent in number and 67 percent in sales for the manufacturers' sales branches. The sales of the 12,840 service and limited-function wholesalers in 1937 amounted to \$5,769,482,000, and those of the 5,476 manufacturers' sales branches in that year reached a total of \$5,936,268,000. (No figures for the fruit and vegetable commission merchants are given in this table)

<sup>1</sup> See note 1, table 871, regarding shifts in classifications between the food group and "General stores."

<sup>2</sup> Revised.

<sup>3</sup> Includes general merchandise mail-order houses.

<sup>4</sup> This classification includes in 1929, 3,379 body, fender, and paint shops with receipts of \$46,106,000 and 2,059 parking stations, parking garages, and lots with receipts of \$30,262,000, which are included under "Service establishments" in 1933 and 1935.

<sup>5</sup> Bicycle shops, included in this classification in 1929 and 1933, are included with "Other retail stores" in 1935.

<sup>6</sup> Fuel-oil retailers, included in "Filling stations" in 1933 are included in "Fuel and ice dealers" under "Other retail stores" in 1935.

<sup>7</sup> Figures for 1935 are not comparable with data for earlier years. Some heating, plumbing, and air-conditioning contractors, included in 1933, were transferred to the Construction Census in 1935.

<sup>8</sup> The 1935 figures are not comparable with those for earlier years. A number of electrical contractors, included in this classification in 1933, were transferred to the Construction Census in 1935 and those electrical shops whose income from repairs was greater than the sale of merchandise were included under Service Establishments in 1935.

No. 879.—SALES BY DEPARTMENT STORES—INDEXES OF VALUES, BY FEDERAL RESERVE DISTRICTS, 1922 TO 1939, AND BY MONTHS, 1937 TO 1940

NOTE.—1923-1925 average=100. Compiled from reports of about 240 to 560 firms (400 in 1939). Indexes for the United States have been adjusted for variations in number of firms reporting and monthly indexes for the varying number of business days in the different months, for seasonal changes, and for the effect of the shifting date of Easter. These adjustments do not apply uniformly to the indexes by districts

**NO. 880.—SALES BY CHAIN STORES—INDEXES OF VALUES, 1935 TO 1939, AND BY MONTHS, 1938, 1939, AND 1940**

NOTE.—The combined index for all groups includes the apparel chains shown separately in the table, 5 grocery chains, 6 variety chains, 2 drug chains, and 3 (prior to January 1936, 2) shoe chains. Indexes are based on daily average sales. Each monthly index is expressed as a percentage of the average for the same month of the base period. Allowance for the fluctuating date of Easter is made in the case of apparel, variety, and shoe chains. No allowance has been made for changes in the number of stores operated.

**NO. 881.—SALES BY SELECTED GROUPS OF RETAIL OUTLETS—INDEXES OF DOLLAR VALUES, 1932 TO 1939, AND BY MONTHS, 1938, 1939, AND 1940**

NOTE.—Indexes of automobile sales are based on unit sales figures reported monthly to the Automobile Manufacturers' Association, which represent over 95 percent of all dealer's sales. The unit sales figures are converted to dollar volume by the use of a computed "average realized price." Indexes of sales in small towns and rural areas are based on figures furnished by three mail-order companies for sales by mail only and by a large group of chain units operating in small towns and cities which serve the rural population. Sales of reporting concerns represent about one-fourth of all general merchandise sales in places of less than 30,000 inhabitants. Indexes of both variety store sales and grocery chain store sales are based on figures furnished by chain organizations doing more than 75 percent of the business in the respective fields. For the variety store index adjustment has been made for changes in the number of stores operated by the companies so that the index reflects sales changes for a constant number of stores. All indexes are computed from dollar sales reduced to a daily average basis. In computing the index of automobile sales, equal weight is given to all days of the month, while in computing the other three indexes, allowance is made for the varying number of business days in the months and the varying sales importance of the different days of the week. The monthly indexes of all four series are adjusted for seasonal changes and, in addition, the variety-store index is adjusted for the changing date of Easter.

Variety store sales, daily average basis—1935-39=100; other columns, monthly average basis—1929-31=100

## No. 884.—SERVICE ESTABLISHMENTS—SUMMARY, BY STATES: 1935

NOTE.—The census of service establishments covers a heterogeneous group of kinds of business (see table 883) primarily engaged in the sale of service, as distinguished from establishments dealing in merchandise. The professional field, the financial, education, transportation, construction, and diverse other fields of business activity, many of which are covered elsewhere, are not included. Owing to differences in the scope of the 1933 and 1935 censuses of service establishments, the aggregates for 1935 are not comparable with the aggregates for 1933 published in the 1936 issue of the Abstract.

### No. 885.—POWER LAUNDRIES, CLEANING AND DYEING ESTABLISHMENTS, AND RUG-CLEANING ESTABLISHMENTS—SUMMARY: 1919 TO 1935

NOTE.—All money figures in thousands of dollars. Statistics cover establishments reporting receipts of \$5,000 or more. Data for power laundries relate to commercial laundries. Data for cleaning and dyeing establishments are restricted to establishments using mechanical power; they include cleaning and dyeing departments of laundries where separate data could be obtained. Rug-cleaning, which was given a separate classification beginning with 1933, was treated in general as an activity of the power laundry industry at prior censuses; statistics include rug-cleaning departments of laundries and of cleaning and dyeing plants so far as they were reported separately. Data for 1933 are incomplete, as about 15 percent of the laundries and 24 percent of the cleaning and dyeing establishments that had reported for 1931 failed to supply any information as to their status or activities in 1933. The laundries that failed to report accounted for around 8 percent of the 1931 totals for number of wage earners and receipts for work done for all laundries, while the cleaning and dyeing establishments that did not report accounted for about 15 percent of the 1931 totals for these two items for cleaning and dyeing establishments.

### No. 886.—HOTELS—SUMMARY FOR HOTELS WITH 25 OR MORE GUEST ROOMS, 1929, 1933, AND 1935, AND FOR ALL HOTELS, BY SIZE, 1935

NOTE.—Receipts and pay roll in thousands of dollars. The census includes principally establishments designating themselves as hotels and providing accommodations as their major business activity. Establishments reporting a total of less than six guest rooms or receipts from room rentals amounting to less than \$500 for a full year's operations, are excluded from the 1935 figures. Owing to differences in coverage for 1929, 1933, and 1935, comparable data for these years are available only for year-round hotels of 25 or more guest rooms.

### 34. CONSTRUCTION AND HOUSING

#### No. 890.—CONSTRUCTION CONTRACTS AWARDED IN 37 STATES—VALUE OF CONSTRUCTION AND FLOOR SPACE OF BUILDINGS, BY CLASS OF CONSTRUCTION: 1925 TO 1939

NOTE.—For State figures, see table 891. Public works and public utilities cover some projects not measurable in terms of floor space, such as highways, pipe lines, subways, etc. Statistics for the 37 States were not compiled for years prior to 1925, but available figures covering a varying number of States for earlier years have been published in the 1932 and previous issues of the Statistical Abstract. Figures for the individual States and districts in table 891 represent the value of construction contracts awarded in the States and districts where the work was actually done.

[Values in millions and tenths of millions of dollars; floor space in thousands of square feet]

<sup>1</sup> Owing to change in classification, data for airports have been excluded from "Commercial" class and included with "Public utilities" for 1930 and subsequent years. Separate figures for airports are not available for years prior to 1930.

<sup>2</sup> Owing to change in classification, figures for "Industrial" class exclude data for pipe lines for 1929 and subsequent years (separate figures not available for years prior to 1929), which data are included with those for "Public utilities."

<sup>3</sup> Figures exclude data for 23 projects, valued at \$20,551,900, for which data by class of construction are not available. These projects were under Civil Works Program, which was not in existence after March 1934.

No. 893.—CONSTRUCTION CONTRACTS AWARDED—INDEXES OF VALUE: 1919 TO 1940

NOTE.—1923-25 average=100. Indexes are derived from monthly figures of construction contracts awarded reported by the F. W. Dodge Corporation. Reports covered 37 States beginning with May 1924 and a varying number for earlier years. In order to obtain comparable figures from 1919 to date, the total value of construction contracts awarded in 37 States was estimated for January 1919 through April 1924. Seasonal adjustments were computed separately for "residential" and "all other" types of construction and the two series combined. The indexes are based on a 3-month moving average, centered at the middle month. For a more detailed description of the indexes, see the Federal Reserve Bulletin for July 1931

No. 894.—BUILDING PERMITS ISSUED—NUMBER AND COST OF BUILDINGS, FOR  
PRINCIPAL CITIES: 1935 TO 1939

NOTE.—Figures cover new buildings and repairs to old buildings, but exclude data for installation permits (those for installing boilers, signs, etc.) which are not strictly building operations. These permits are rather numerous, but in value they are of small amount. The number figures represent the number of buildings covered by permits issued (new construction and repairs, etc.), rather than the number of permits. Buildings authorized by permit are not always actually constructed, and the actual cost of those constructed may differ considerably from that originally estimated. The cities shown had a population of 50,000 or over in 1930

# NO. 897.—CONSTRUCTION AND OTHER PROJECTS FINANCED FROM FEDERAL FUNDS—VALUE, BY TYPE, 1936 TO 1939, AND BY FUND, 1939

NOTE.—In thousands of dollars. In the case of Federal projects financed from Public Works Administration funds, the entire amount is allotted to Federal departments or other Federal agencies. The work is performed by commercial firms under contracts or, in force-account, by day labor hired directly by the Federal agencies for construction work. In the cases of allotments to States and local governments for non-Federal projects, the Public Works Administration makes a direct grant of not more than 30 percent of the total labor and material cost on projects financed from funds appropriated under the National Industrial Recovery Act, and of not more than 45 percent of the total labor and material cost on projects financed by funds provided under the Emergency Relief Appropriation Acts of 1935, 1936, and 1937, or the Public Works Administration Act of 1938. The State or local government finances the other 70 or 55 percent, in some cases through loans at interest through the Public Works Administration. Commercial allotments are in the form of loans and for the most part have been made to railroads

No. 898.—CONSTRUCTION IN THE UNITED STATES—ESTIMATED EXPENDITURES FOR PUBLIC AND PRIVATE CONSTRUCTION: 1916 TO 1939

NOTE.—The estimates represent the value of work performed during the year, as measured by expenditures for labor, material, and other items. They consequently differ from building permit and construction contract data which measure the value of work started. In addition, they have a generally broader coverage than permit and contract data. Figures include value and cost of installation of equipment which is an integral part of a structure, but not that of machinery, shipbuilding, or land costs

## No. 899.—CONSTRUCTION INDUSTRY—SUMMARY, BY CLASS OF CONTRACTOR: 1935

NOTE.—The 1935 Census covered reporting contracting establishments that did work valued at \$500 or more. Figures do not cover all construction work done in the United States, as some contractors failed to make returns. No data for force-account construction (no contracts let) are included. In reporting work done, each contractor accounted for only the work performed by his own organization, excluding value of work sublet to other contractors.

## No. 904.—RESIDENTIAL STRUCTURES—SUMMARY FOR 64 CITIES: 1934

NOTE.—The cities included in the real-property inventory were selected from every State in the Union as a representative sample of urban housing in the United States. The cities chosen vary in size from a population of 11,000 to more than 1,000,000. The total population of the areas canvassed constituted about one-seventh of the total urban population of the United States. The survey covered all buildings with residential units except hotels, clubs, rooming houses, and summer cottages. Data for the individual cities included in this summary are shown in table 815 of the 1935 issue of the Statistical Abstract

### 36. ALASKA, HAWAII, AND PUERTO RICO TERRITORIES AND POSSESSIONS

GENERAL NOTE.—The Sixteenth Census figures for the population of Alaska and Puerto Rico, and for manufactures in Alaska and Hawaii, as given in this section, are preliminary and subject to revision. Population statistics for Alaska, Hawaii, and Puerto Rico, comparable with those appearing in tables 912 to 915, and manufactures statistics for Puerto Rico, comparable with those for Alaska and Hawaii in tables 916 and 917, will be included in the 1941 edition of the Abstract. That edition will also include summary statistics for agriculture and business, for Alaska, Hawaii, and Puerto Rico, and for agriculture for Virgin Islands.

## NO. 916.—ALASKA—MANUFACTURES, BY INDUSTRIES: 1899 TO 1939

NOTE.—The figures for 1939 do not include data for plants reporting products valued at less than \$2,000; those for earlier years cover all plants having products valued at \$500 or more. This increase in the minimum value-of-products limit resulted in some reduction in the "Number of establishments" reported, as compared with what it would have been had the minimum of \$500 been retained, but did not seriously impair the comparableness of the figures for 1939 with those for earlier years

<sup>1</sup> Value of products less cost of materials, etc., fuel, and purchased electric energy.

<sup>2</sup> Figures cover the 12 months ended Sept. 30, 1939.

<sup>3</sup> Figures include data for coffee roasting and spice grinding which are no longer treated as manufacturing activities.

<sup>4</sup> Except canned tuna, rice polishing, vegetable oils, and sirups. See footnote 14.

<sup>5</sup> Combined to avoid disclosing, exactly or approximately, any data for individual establishments or companies.

<sup>6</sup> Figures for this industry relate solely to sugar mills, and do not include data for sugarcane plantations.

<sup>7</sup> Reported as confectionery and ice cream.

APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, not weight. Whether handled in containers or without them the quantities are customarily reduced to the equivalent of barrels of 42 United States gallons (barrel thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table:
