DEPARTMENT OF COMMERCE,  
BUREAU OF THE CENSUS,  
*Washington, D. C., February 18, 1941.*

SIR: I have the honor to submit herewith for publication the sixty-second issue of the Statistical Abstract of the United States. This annual volume is a compilation of authoritative statistics relating to the social and economic condition of the population and to the industrial, commercial, and governmental activities of the Nation. It is designed to serve as a convenient reference work for businessmen, economists, statisticians, students, and others who may have need of a statistical compendium covering a wide range of subjects.

The present volume was prepared in the Division of Territorial, Insular, and Foreign Statistics, of this Bureau, under the supervision of Kathleen H. Dugan, editor, and under the administrative direction of LeVerne Beales, Chief Statistician for the Division.

The first 34 issues of the Abstract were prepared and published by the Bureau of Statistics, originally a bureau of the Treasury Department and later of the Department of Commerce and Labor; the next 25 by the Bureau of Foreign and Domestic Commerce, now of the Department of Commerce; and subsequent issues by the Bureau of the Census.

The statistical tables contained in the Abstract are compilations of data collected by the various statistical agencies of the Federal Government, by several State agencies, and by a considerable number of nongovernmental organizations. Many of these agencies have rendered valuable assistance not only in supplying advance data but also in the actual preparation of tables for inclusion in the Abstract. Special mention on this account is due the following-named agencies of the Federal Government: The Bureau of Foreign and Domestic Commerce, the Bureau of Marine Inspection and Navigation, and the Weather Bureau, of the Department of Commerce; the Bureau of Agricultural Economics, the Agricultural Marketing Service, the Office of Foreign Agricultural Relations, the Farm Credit Administration, and the Forest Service, of the Department of Agriculture; the Office of Education and the Social Security Board, of the Federal Security Agency; the Bureau of Fisheries, the General Land Office, the Bureau of Mines, and the National Park Service, of the Department of the Interior; the Immigration and Naturalization Service, of the Department of Justice; the Bureau of Labor Statistics, of the Department of Labor; the Bureau of Customs and the Bureau of Internal Revenue, of the Treasury Department; the Federal Communications Commission; the Board of Governors of the Federal Reserve System; the Interstate Commerce Commission; the Railroad Retirement Board; the United States Maritime Commission; and the Veterans' Administration.

Respectfully,

VERGIL D. REED,  
*Acting Director of the Census.*

To HON. JESSE H. JONES,  
*Secretary of Commerce.*

748. Salmon, canned—Output, by kind, for Washington, Oregon, and Alaska: 1939 and earlier years.....	755
749. Fishery products of Alaska—Quantity and value, by kind: 1925 to 1939.....	755
750. Salmon canned in Alaska—Output and average price, by kind: 1911 to 1939.....	756
751. Fish propagation—Output of eggs, fry, and fingerlings, by Bureau of Fisheries, 1895 to 1939, and by kind, 1939.....	756

## 31. MINING AND MINERAL PRODUCTS

752. Mineral products of the United States—Value, for metallic and nonmetallic: 1881 to 1939.....	757
753. Nonferrous metals—Yearly average prices, by kind: 1896 to 1939.....	757
754. Mines and quarries—Summary for producing and nonproducing enterprises: 1929.....	758
755. Mines and quarries, producing—Summary: 1909 to 1929.....	758
756. Mines and quarries, producing—Summary, by States: 1919 and 1929.....	759
757. Mines and quarries, producing—Summary, by industries: 1919 and 1929.....	760
758. Mineral industries—Summary for specified industries: 1935.....	761
759. Mines and quarries, producing—Establishments classified by number of wage earners, by principal industries: 1929.....	762
760. Mines and quarries, producing—Hours of labor, by industries: 1929.....	762
761. Mineral production, by States and for Alaska: 1932 to 1938.....	763
762. Mineral products of the United States—Quantities and values: 1920 to 1939.....	764
763. Iron ore—Production, shipments, exports, and imports, 1881 to 1939, and production, by region, State, and kind, 1936 to 1939.....	768
764. Pig iron and ferro-alloys—Production, by States, disposition, kind, and fuel and materials used: 1800 to 1939.....	768
765. Pig iron and ferro-alloys and steel ingots and castings—Production, exports, and imports: 1871 to 1939.....	769
766. Rolled and miscellaneous steel products—Production, by kind: 1910 to 1939.....	769
767. Iron and steel, finished rolled—Production, exports, and imports: 1870 to 1939.....	770
768. Steel, wire and wire products, tin plate and terneplate, and cast-iron pipe and fittings—Production: 1933, 1935, and 1937.....	771
769. Steel ingots and castings—Production, by grade: 1890 to 1939.....	773
770. Blast furnaces and steel mills—Summary: 1889 to 1937.....	773
771. Iron and steel—Aggregate exports: 1890 to 1939.....	773
772. Iron and steel—Exports, by kind: 1936 to 1939.....	774
773. Iron and steel—Exports, by destination: 1937, 1938, and 1939.....	774
774. Iron and steel—Average annual prices, by class or kind: 1891 to 1939.....	775
775. Aluminum and bauxite—Production, exports, and imports: 1913 to 1939.....	775
776. Copper—Production, exports, imports, and consumption: 1910 to 1939.....	776
777. Copper—Smelter production, by State of origin of ore: 1910 to 1939.....	776
778. Copper—Smelter and refinery output: 1850 to 1939.....	777
779. Copper—Exports and imports: 1891 to 1939.....	777
780. Lead, recoverable—Mine production, by States and for Alaska: 1920 to 1939.....	778
781. Lead—Production of refined primary and secondary lead, 1830 to 1939, and by class and source, 1880 to 1939.....	778
782. Lead—Supply and distribution of refined primary pig: 1910 to 1939.....	779
783. Nonferrous metals and alloys, and finished products thereof—Production, by kind: 1933, 1935, and 1937.....	779
784. Zinc—Production of ore, by States, smelter production, and primary slab zinc available for consumption: 1910 to 1939.....	780
785. Zinc, primary—Smelter production from domestic ore: 1875 to 1939.....	780
786. Gold and silver—Production in continental United States, Alaska, Puerto Rico, and Philippine Islands: 1792 to 1939.....	781
787. Gold and silver for use in manufactures and the arts: 1880 to 1939.....	782
788. Silver—Prices, London and New York, and value in the dollar: 1835 to 1939.....	782
789. Coke—Production, exports, and imports: 1896 to 1939.....	783
790. Coke—By-product and beehive production, by States: 1915 to 1939.....	783
791. Coal—Production, 1821 to 1939, and by States, 1911 to 1939.....	784
792. Coal—Exports, imports, and bunker coal laden on vessels in foreign trade: 1891 to 1939.....	785

Table	Page
793. Coal—Shipments, value, and employment in mines: 1890 to 1939.....	785
794. Bituminous coal—Consumption, by class of consumer: 1890 to 1939.....	786
795. Strikes in anthracite and bituminous coal mining industries, by major issues involved: 1923 to 1939.....	786
796. Coal for household use—Retail prices, by cities: 1929 to 1939.....	787
797. Coal—Average retail prices and indexes for large cities combined: 1931 to 1940.....	788
798. Natural gas and natural gasoline—Production, 1906 to 1939, and by States, 1925 to 1939.....	788
799. Manufactured-gas industry—Fuel consumed, by kind and by use: 1932 to 1939.....	789
800. Manufactured-gas and natural-gas industries—Summary: 1932 to 1939.....	789
801. Gas prices—Monthly prices of specified quantities, by cities, based on rate as of Dec. 15, 1939.....	790
802. Petroleum, crude—Production: 1861 to 1939.....	791
803. Petroleum, crude and refined—Production, imports, exports, and bunker oil laden on vessels in foreign trade: 1871 to 1939.....	791
804. Petroleum, crude—World production; United States production by regions and States: 1911 to 1939.....	792
805. Petroleum and petroleum products—Stocks on Dec. 31: 1920 to 1939.....	792
806. Oils, crude and refined—Supply and demand: 1933 to 1939.....	793
807. Petroleum products—Production, by kind: 1933, 1935, and 1937.....	793
808. Petroleum and natural gasoline—Amounts run to stills; refinery production, stocks, exports, and apparent consumption of products: 1918 to 1939.....	794
809. Petroleum and natural gasoline—Amounts run to stills, 1938 and 1939, and refinery products, 1939, by regions.....	794
810. Petroleum pipe lines—Summary: 1921 to 1939.....	795
811. Petroleum and petroleum products—Prices, 1921 to 1939, and by months, 1939.....	795

<sup>1</sup> Based on land area.

<sup>2</sup> In comparing this percentage of increase with that shown for the decade 1910-1920, allowance should be made for the fact that the period between the censuses of 1910 and 1920 was less than a full decade, and that between the 1920 and 1930 censuses was more than a full decade. An increase of 16.1 percent for 123 months (the time between Jan. 1, 1920, and Apr. 1, 1930) is equivalent to 15.7 percent for exactly 10 years; and the 1920 increase for 110½ months (the time between Apr. 15, 1910, and Jan. 1, 1920) is equivalent to 15.4 percent for 120 months. Making this adjustment, the rate of increase for the decade ending in 1930 is only slightly higher than that for the preceding decade.

<sup>3</sup> Area is that of 1930; population figures are preliminary.

<sup>1</sup> Population of area taken to form State of Missouri in 1821; part of Louisiana Territory in 1810.  
<sup>2</sup> Population shown for South Dakota in 1860 represents entire Dakota Territory; for 1870 and 1880, population parts as since existing have been segregated.  
<sup>3</sup> Area now constituting West Virginia formed part of Virginia prior to 1870.  
<sup>4</sup> Population of area taken to form Arkansas Territory in 1819; part of Louisiana Territory in 1810.  
<sup>5</sup> Includes population of Indian Territory, as follows: 1890, 180,182; 1900, 392,080.

NOTE.—The population of continental United States has been divided by the total land area, although it included at each census some unorganized territory which was not canvassed by the enumerators. For each State or Territory the population as returned at a given census has been divided by the land area as constituted at the time that census was taken. The areas of Indian reservations, outside of Indian Territory, are included in the areas of the several States and Territories, although the population was not ascertained and cannot be considered in figuring density of population prior to 1890. The census of 1870 in the Southern States is considered incomplete. Population density in 1930 of Alaska, Hawaii, and Puerto Rico, and of Philippine Islands, Dec. 31, 1918, based on gross area, and not land area, was as follows: Alaska, 0.1; Hawaii, 57.5; Puerto Rico, 449.5; Philippine Islands, 90.0

No. 9.—POPULATION, FOR URBAN SIZE GROUPS AND FOR RURAL TERRITORY: 1900 TO 1930

NOTE.—Prior to 1930 all incorporated places and also towns (townships) in Massachusetts, Rhode Island, and New Hampshire having 2,500 or more inhabitants, are classed as urban areas. For 1930, urban areas also include unincorporated political subdivisions with a total population of 10,000 or more inhabitants and a population density of 1,000 per square mile and include for the 3 New England States named above only those towns which contain a village of more than 2,500 inhabitants comprising, either by itself or when combined with other villages within the same town, more than 50 percent of the population of the town. The total urban and rural population for 1880 and 1890 is as follows: Urban—1880, 14,358,167; 1890, 22,298,359; rural—1880, 35,797,616; 1890, 40,649,355; percent urban—1880, 28.6; 1890, 35.4

AREA AND POPULATION

No. 11.—POPULATION, URBAN AND RURAL, BY STATES: 1910 TO 1930

NOTE.—See headnote, table 9. The proportion of urban and rural population in 1930 as compared with data for earlier censuses was affected by changes in the classification. If the segregation of urban and rural had been made in 1930 on the same basis as in 1920, the percent urban in 1930 for the areas affected would have been as follows: United States, 55.9; New Hampshire, 66.3; Massachusetts, 95.3; Rhode Island, 97.5; Connecticut, 65.0; New York, 83.4; New Jersey, 77.5; Pennsylvania, 65.7; California, 72.4

## No. 13.—POPULATION, ESTIMATED AS OF JULY 1, BY STATES: 1928 TO 1937

NOTE.—Estimates of population for 1928 and 1929 are based on the assumption that the increase (or decrease) each year between the censuses of 1920 and 1930 is equal to the annual average change between the two enumerations. For 1930 to 1937, the total population is estimated upon the basis of the available birth, death, immigration, and emigration figures, allowance being made for unregistered births and deaths. For State estimates for 1934 and 1935 a study of local conditions was made through State data, principally school statistics, State censuses, and a review of the farm population as indicated by the Agricultural Census of Jan. 1, 1935. The figures for 1930 to 1933 are obtained by interpolation between the 1930 census figures and the 1934 and 1935 estimates. For estimate for continental United States for 1938, see table 14, p. 11. No later estimates of the population of States will be made until the 1940 census figures have been compiled. For actual enumerations for 1940 (preliminary figures), see table 5, p. 3; for 1790 to 1930, see table 7, p. 4

<sup>1</sup> Enumeration in Southern States incomplete; this affects especially figures for the Negro population.  
<sup>2</sup> White population includes Mexicans prior to 1930. The estimated number of Mexicans included in the white classification in 1920 was as follows: Total, 700,541; native white, 243,181 (172,704 of foreign parentage and 70,477 of mixed parentage); foreign-born white, 457,360. For close comparison with 1930, adjusted figures for 1920 may be obtained by deducting these from the white population as reported in 1920.  
<sup>3</sup> Exclusive of Indians in Indian Territory and on Indian reservations, not enumerated prior to 1890.  
<sup>4</sup> Comprises Filipinos, Hindus, Koreans, Hawaiians, Malays, Siamese, Samoans, and Maoris.  
<sup>5</sup> Less than one-tenth of 1 percent. <sup>6</sup> A minus sign (-) denotes decrease.  
<sup>7</sup> Exclusive of 325,464 persons (117,368 whites, 18,636 Negroes, 189,447 Indians, and 13 Chinese), specially enumerated in 1890 in Indian Territory and on Indian reservations.  
<sup>8</sup> Increase over figures adjusted for 1920 on account of Mexicans. See footnote 2.  
<sup>9</sup> Increase over estimated number in 1920. <sup>10</sup> Percent not shown where base is less than 100.

<sup>1</sup> DEFINITION OF MEDIAN.—The median is the numerical value of the half-way point in a series of units arranged according to size, age, value, weight, or some other measurable characteristic. Therefore there are as many units above the median size, weight, etc., as there are below it. One-half the population is older than the median age and the other half is younger. One-half of the homes have a value above the median value, the other half a value below it.

<sup>1</sup> A minus sign (-) denotes decrease.

<sup>2</sup> Boundaries changed between 1910 and 1920. Statistics for 1910 relate to pre-war boundaries.

<sup>3</sup> Persons reported in 1910 as of Polish mother tongue born in Germany (150,090), Austria (829,418), and Russia (413,370) have been deducted from the respective countries and combined as Poland for comparison with number reported in 1920 as born in Poland. Though Poland before 1919 was divided among Russia, Germany, and Austria, the censuses of 1880 to 1900 listed it as a country of birth.

<sup>4</sup> Created since 1910.

<sup>5</sup> Included as part of Yugoslavia in 1920 and 1930.

<sup>6</sup> Turkey in Asia included with Turkey in Europe prior to 1910.

<sup>7</sup> Albania included with Turkey in Europe in 1910 and earlier years.

<sup>8</sup> Newfoundland included with Canada prior to 1910.

<sup>9</sup> Except possessions of the United States.

No. 39.—FAMILIES, BY HOME TENURE AND SIZE OF FAMILY, BY STATES

NOTE.—A family is defined as a group of persons related either by blood or by marriage or adoption who live together as 1 household usually sharing the same table. Single persons living alone are counted as families, however, as are a few small groups of unrelated persons sharing the same living accommodations as "partners." In the 1920 count, inmates of an institution were treated as a single family as were also other quasi-family groups. Families not reporting tenure are included in the totals for all families

<sup>1</sup> Private families only, excluding 75,178 institutions, hotels, etc. These quasi-family groups were included in the count as made for 1920.

<sup>2</sup> The first of the 2 averages shown for 1930 is obtained by dividing the total population by the combined number of private families and quasi-family groups (institutions, hotels, etc.). This figure is strictly comparable with the 1920 average. The second average presented for 1930 is obtained by dividing the total population living in private families by the number of private families.

<sup>1</sup> A part of the decreases from 1920 to 1930 in the percentage illiterate in some States is doubtless due to the separate classification in 1930 of Mexicans who were included in 1920 with the white population.

<sup>1</sup> Because of changes made in 1930 in the classification of agricultural pursuits, it is impossible to group the 1920 occupations exactly according to the 1930 classification. It is believed, however, that the effect of the difference in grouping on the comparability of figures here presented is negligible. Figures have been adjusted to exclude those employed on turpentine farms classified in "Agriculture" in 1920 (see note 6).

<sup>2</sup> Since, in 1920, only farm laborers on general farms were distinguished as working on "home farm" or "working out," farm laborers on dairy farms, stock farms, truck farms, poultry farms, etc., who were, in fact, working on the "home farm" as "unpaid family workers" were not included in "Farm laborers (home farm)." Hence, as here compiled for 1920, the number of farm laborers classified as "Wage workers" probably is somewhat too large and the number classified as "Unpaid family workers" somewhat too small.

19 See note 15, p. 64. 20 Selected occupations. 21 Not classified separately in 1920.

22 Neither in 1920 nor in 1930 was the attempt to distinguish chauffeurs and motortruck drivers from draymen, teamsters, and carriage drivers very successful.

23 Teamsters in agriculture, forestry, and the extraction of minerals are classified with the other workers in those industries, respectively; drivers for bakeries and stores are classified as delivermen in trade, and drivers for laundries are classified as delivermen in domestic and personal service.

24 Included with "Draymen, teamsters, and expressmen" in 1920.

25 Because of indefinite returns by census enumerators, it is probable that some stationary engineers were included with locomotive engineers, and some firemen of stationary boilers with locomotive firemen.

### 3. VITAL STATISTICS

GENERAL NOTE.—Births and deaths are registered by the States, and transcripts of the original certificates are received and tabulated by the Bureau of the Census. Because of the gradual expansion of the "registration" areas up to 1933 (see tables 77, 84, and 95), the numbers of births and deaths recorded for earlier years for the areas as a whole are not strictly comparable, but, in most cases, the expansion of the areas had only a negligible effect on the comparableness of the rates. Beginning with 1933, all States have been included in both the birth and death registration areas.

All birth and death statistics in this section, except as noted in table 85, have been compiled according to the places in which the births or the deaths occurred. The alternative is to allocate each birth and each death to the State, city, and county of residence or usual place of abode. (For comparison of births and deaths by place of occurrence and by place of residence, for selected cities, see table 85. For State totals the difference in most cases would be negligible.) Inasmuch as the population census is compiled according to the usual place of abode, the tabulation of vital statistics according to place of occurrence has seriously restricted, for certain purposes, the use of these data. The factors to be considered depend upon the specific purpose for which the data are to be used. If crude death rates—and especially the rates for individual causes of death—are used as indexes of the health conditions of a community, comparisons of rates for different States or cities are not strictly valid unless the age, sex, and racial composition of the population of each area is considered. It is obvious that, if the population in a State is generally older than that in another, the crude death rate will be higher, even though there are no essential differences between the rates for identical age groups. Moreover, in a few States the rates for certain causes, notably tuberculosis, are abnormally high because the deaths represented by these rates include those of considerable numbers of persons who have gone to the States in question in the hope of recovering their health. Similar considerations apply also to crude birth rates. For example, comparison of the birth rate of an area having a certain proportion of women of childbearing age with the rate of another community of a different population composition is erroneous if the rates are used as a measure of intrinsic biological fertility.

Rates are based on midyear estimates of population. For estimates of population for continental United States, Hawaii, and Puerto Rico, see table 14, p. 11; for individual States, see table 13, p. 10. Rates for continental United States for 1930 are based on population estimates for 1938 as no estimate is available for 1930. Rates for individual States or groups of States for 1938 and 1939 are based on population estimates for 1937 as no later estimates are available. No estimates of population by sex, by race, by age groups, or for urban and rural areas have been made for years later than 1933. Data for stillbirths (see table 89) are excluded from the figures for both births and deaths.

In all tables giving statistics by race, data for Mexicans have been included with those for the white population.

No. 85.—BIRTHS AND DEATHS, BY PLACE OF OCCURRENCE AND BY PLACE OF RESIDENCE, FOR SELECTED CITIES: 1938

NOTE.—The first and second columns compare the numbers of births occurring in the specified cities (regardless of the places of residence of the mothers) with the numbers of births to mothers whose permanent homes were in the specified cities (regardless of the places of occurrence of such births). Similarly, the third and fourth columns compare the numbers of deaths occurring in the specified cities (regardless of the places of residence of the decedents) with the numbers of deaths of residents of the specified cities (regardless of the places of occurrence of such deaths). For example: The total number of births occurring in Akron (including births to mothers having their permanent homes elsewhere) was 4,212; whereas the total number of births to mothers having their permanent homes in Akron (including births occurring elsewhere) was 3,825

# IMMIGRATION, EMIGRATION, AND NATURALIZATION

## No. 98.—IMMIGRATION: 1821 TO 1939

GENERAL NOTE.—In compiling immigration and emigration statistics, Alaska, Hawaii, and Puerto Rico, beginning with 1904, 1901, and 1902, respectively, have been treated as integral parts of the United States. In prior years the transfer of population between these areas and the United States was treated as immigration and emigration. The movement of population between the Philippine Islands and the United States was treated as immigration and emigration prior to July 1, 1898, and has been so treated since May 1, 1934, but was not accounted for in the statistics for the period between those dates.

## No. 102.—IMMIGRATION, BY COUNTRY OF ORIGIN, BY DECADES: 1841 TO 1930

NOTE.—For 1841 to 1867 figures represent alien passengers arriving; for 1868 to 1903, immigrants arriving; for 1904 to 1906, aliens admitted; thereafter, immigrant aliens admitted. Data prior to 1906 cover countries whence aliens came; thereafter, countries of last permanent residence. Owing to changes in the lists of countries separately reported and to changes in boundaries, data for certain countries are not comparable throughout. Countries added to the list since the beginning of the World War were therefor included with the countries to which they belonged. Data are totals (not annual averages) for periods ended June 30 since 1870, Dec. 31 theretofore, except as noted

No. 106.—IMMIGRATION QUOTAS ALLOTTED AND QUOTA ALIENS ADMITTED, BY COUNTRY OF BIRTH: YEARS ENDED JUNE 30, 1925 TO 1939

NOTE.—The Immigration Act of 1921 limited the number of aliens admitted annually of any nationality subject to the quota law, to 3 percent of the number of foreign-born persons of such nationality resident in continental United States as determined by the census of 1910; the population plan of the act of 1924, to 2 percent according to the census of 1890. The national origins clause of the latter act, which became effective July 1, 1929, provided that the quota of any nationality should be computed by applying to 150,000 the ratio between the calculated number of inhabitants in continental United States in 1920 owing their origin to the nationality concerned and the total inhabitants in the United States of all nationalities subject to the quota law. (For estimates of white population by countries of origin, calculated as a basis for immigration quotas, see table 97, Statistical Abstract, 1932.) Under the act of 1921, the minimum quota is 100. Both immigrant and nonimmigrant aliens may appear in quota law statistics, or aliens of both classes may not be counted against quotas at all

<sup>1</sup> Quota for 1924; revisions from 1922 or 1923 allotments for certain countries were made due to changes in boundaries or other adjustments. Quota immigrants admitted, 1922 to 1924, are as follows: 1922, 243,953; 1923, 335,480; 1924, 357,643. For admissions by countries see the 1934 and previous issues of the Statistical Abstract.

<sup>2</sup> Quota for 1934 to 1939. The total quota for 1930 and 1931 was 153,714; for 1932 and 1933, 153,831; the Soviet Union's quota was 2,784 for 1930 and 1931, and 2,701 for 1932 and 1933; Rumania's, 295 prior to 1934. There were also changes in 1932 and 1933 for certain countries included in "Other Europe," Asia, and Pacific Islands.

<sup>3</sup> Austria included with Germany beginning with 1938.

<sup>4</sup> All Ireland included with United Kingdom prior to 1925; thereafter, Northern Ireland only.

<sup>5</sup> Annual quotas for colonies, dependencies, or protectorates in "Other Europe," Asia, Africa, Pacific islands, and America are included in the annual quotas of the European countries to which they belong.

<sup>6</sup> Includes quota immigrants born in colonies, dependencies, or protectorates of European countries.

<sup>1</sup> Includes superintendents, principals, and supervisors for States not reporting them separately, but not for all States. These numbers are, therefore, somewhat smaller than those on which average annual salaries are based.

<sup>2</sup> Includes 231 part-time teachers.

<sup>3</sup> Estimated.

<sup>4</sup> For 1919.

No. 134.—VOCATIONAL COURSES, FEDERALLY AIDED—STUDENTS ENROLLED, BY CLASS, BY STATES AND TERRITORIES AND FOR PUERTO RICO: YEAR ENDED JUNE 30, 1939

NOTE.—Institutions federally aided are reimbursed from Federal funds provided under the act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917," and subsequent acts extending the benefits of vocational education to Alaska, Hawaii, and Puerto Rico and providing for the further development of vocational education. These acts, administered by the Office of Education, provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education

No. 135.—VOCATIONAL REHABILITATION OF DISABLED PERSONS, BY NUMBER AND BY CASES ON ROLL, BY STATES AND FOR HAWAII AND PUERTO RICO: 1930 TO 1939

NOTE.—In accordance with the Civilian Vocational Rehabilitation Act of June 2, 1920, Congress set up a program of cooperation with the States for the vocational rehabilitation of persons disabled in industry or otherwise. By the end of the fiscal year 1939, 46 States, the District of Columbia, Hawaii, and Puerto Rico had accepted the provisions and begun cooperation with the Federal Government. The figures given relate only to cases aided by Federal funds. The total expenditure in 1939 (fiscal year) comprised: Federal funds, \$1,832,964; State and private funds, \$2,158,700

6. PUBLIC LANDS

GENERAL NOTE.—An original entry is a first claim to a given tract of public land. Perfected entry is made after required lapse of time and compliance with other conditions. A patent is a conveyance or grant of land to a claimant who has made his perfected entry. By Executive orders of Nov. 26, 1934, and Feb. 5, 1935, public lands were temporarily withdrawn from settlement, location, sale, or entry. Both orders, however, were made subject to valid existing rights

\* In the adjustment of this grant the road was treated as an entirety and without reference to the State line. Hence Alabama has had approved to her more and Mississippi less than they would appear to be entitled to in proportion to the length of road in the respective States.

† Includes 35,685 acres of the Chicago, Rock Island & Pacific R. Y.; 109,757 acres of the Cedar Rapids & Missouri River R. R.; and 77,636 acres of the Dubuque & Sioux City R. R., situated in the old Des Moines River grant of Aug. 8, 1846, which should be deducted.

‡ Declared to be a grant.

§ See Minnesota for original grants.

¶ Leavenworth, Lawrence & Galveston includes 156,937 acres and Missouri, Kansas & Texas 270,971 acres in the Oregon ceded reservation which are to be deducted under decision of the Supreme Court.

## No. 148.—CLIMATIC CONDITIONS OF SELECTED CITIES, BY MONTHS

NOTE.—The table presented herewith shows the more important facts concerning the weather at a number of points in continental United States and outlying areas selected with a view to covering all the important climatic sections. The temperature extremes include the entire period of observations to Dec. 31, 1939. Other data are standard normals or long-time averages covering periods ranging up to 50 years or more. Average hourly wind velocity data are reduced to true velocities. Temperatures are Fahrenheit

## No. 149.—ARMY OF THE UNITED STATES—STRENGTH OF COMPONENT PARTS: 1890 TO 1939

NOTE.—Prior to 1914, table covers quinquennial years and years in which considerable changes occurred in the number of Regular Army. Figures for Officers' Reserve Corps include Regular Army enlisted men and also, prior to 1924, National Guard officers holding commissions in the Reserve. There is, therefore, some duplication in the grand totals, but the number of this personnel is not so great as to make a material difference in the figures

<sup>1</sup> Includes Philippine Scouts beginning with 1902. Figures for 1919 to 1926, inclusive, include in most cases World War emergency personnel still in service. All emergency enlisted men still in service were discharged on July 2, 1921. On Nov. 11, 1926, the last emergency officer was discharged, thereby completing the demobilization of the World War Army. Retired personnel on active duty are not included.

<sup>2</sup> State militia prior to act of June 3, 1916.  
<sup>3</sup> U. S. Volunteers.  
<sup>4</sup> Figures on officers and enlisted men not available.

<sup>5</sup> Regular Army Reserve. The Regular Army Reserve was abolished by act of June 4, 1920.  
<sup>6</sup> Includes National Guard personnel in Federal service.  
<sup>7</sup> Estimate.

<sup>8</sup> Officers' Reserve Corps. Beginning with 1924, figures do not include individuals who hold commissions also in the National Guard.  
<sup>9</sup> Includes Regular Army Reserve, 8,382; Enlisted Reserve Corps, 35,000 (estimate).  
<sup>10</sup> Includes Officers' Reserve Corps, 80,262; National Army, 49,118 (estimate).

<sup>11</sup> Estimated enlisted strength of the National Army. Practically all members of the Regular Army Reserve and the Enlisted Reserve Corps had, by this date, been assigned to duty with Regular Army, National Guard, and National Army organizations.

<sup>12</sup> Estimates only. Under orders of the Secretary of War all components had been merged into 1 Army known as "The United States Army."

<sup>13</sup> Beginning with 1919, figures for commissioned officers include warrant officers in the following numbers: 1919, 37; 1920, 68; 1921, 1,159; 1922, 1,151; 1923, 1,085; 1924, 1,063; 1925, 1,023; 1926, 1,325; 1927, 1,262; 1928, 1,208; 1929, 1,138; 1930, 1,089; 1931, 1,028; 1932, 973; 1933, 926; 1934, 869; 1935, 825; 1936, 784; 1937, 794; 1938, 782; 1939, 775.

No. 170.—CIVIL SERVICE AND CANAL ZONE RETIREMENT: 1921 TO 1939

NOTE.—Retirement for civil service employees was established by act of May 22, 1920. Under this act as amended July 3, 1926, and May 26, 1930 (effective July 1, 1930), employees of the classified service and certain other groups, including unclassified laborers subject to labor regulations, are eligible for retirement on annuity at the ages of 62, 65, and 70, according to the class of service, if they have rendered at least 15 years of service. The last-named act permits the optional retirement of employees 2 years before reaching the retirement age where they have rendered at least 30 years of service and also permits retirement on account of permanent and total disability after 5 years of service. From the basic compensation of each employee within the scope of the acts there is deducted 3½ percent (2½ prior to July 1, 1926) thereof for deposit to the credit of the retirement fund. All amounts deducted prior to July 1, 1930, and thereafter amounts deducted less \$1 per month are credited to the employee's individual account. Under the amendment of May 26, 1930, annuities are composed of (1) a sum equal to \$50 for each year of service not exceeding 30 (provided it does not exceed three-fourths of average salary for any five consecutive years), and (2) the amount of annuity purchasable with the sum credited to the individual's account, together with interest at 4 percent per annum, with the provision that the annuity shall in no case be less than an amount equal to the average salary, not to exceed \$1,000 per annum, received during any five consecutive years, multiplied by the number of years of service, not exceeding 30, and divided by 40. By act of Mar. 2, 1931 (effective July 1, 1931), special provision was made for employees of the Panama Canal and Panama Canal Railroad, who theretofore had been eligible for retirement under the civil service retirement and disability act.

No. 175.—APPORTIONMENT OF CONGRESSIONAL REPRESENTATION, BY STATES,  
FROM ADOPTION OF CONSTITUTION TO 1930

NOTE.—The ratios for 1870 and subsequent years indicate the numbers of inhabitants per member of the House of Representatives, as provided for by the several apportionment acts. The ratio for each year prior to 1870 was based on a total made up of (a) the number of free persons, excluding Indians not taxed, and (b) three-fifths of the number of slaves

# 9. NATIONAL GOVERNMENT FINANCES

*General note as to bases used in compiling statistics of receipts and expenditures of the United States Government.*—Four different bases are used in compiling both the receipts and expenditures of the Government. These bases, in the case of receipts, are the daily Treasury statements (unrevised and revised), warrants issued, and collections reported. The expenditures of the Government are published on the first 3 of these bases and also on the basis of checks issued. Figures in the daily Treasury statements (unrevised) which are on a current cash basis are compiled from the latest daily reports from the Treasury offices or public depositories. Owing to the distance of some of these offices and depositories from the Treasury, reports from them are somewhat delayed in reaching the Treasury, and consequently it is necessary to issue the unrevised Treasury statements before they are received. The figures for actual transactions during a month or year which are calculated to take into account these delayed reports are said to be on a basis of daily Treasury statements (revised). The unrevised figures are the basis of the Budget estimates submitted to Congress by the President.

It is provided by law that warrants shall be issued by the Secretary of the Treasury in acknowledgment of money received, and that warrants must be drawn by the Secretary of the Treasury for all disbursements of money. Some of these warrants for expenditures do not represent actual payments but are merely advances of credit to disbursing officers, who then issue checks in payment of Government obligations. Expenditures on the basis of warrants issued include unexpended balances to the credit of disbursing officers at the end of the year but do not include expenditures made during the year from unexpended balances of the preceding year.

Expenditures on the basis of checks issued (table 179) represent most accurately the actual expenditures during any given year. They differ from expenditures shown by daily Treasury statements (revised), because they include checks outstanding at the end of the year and exclude unpaid checks at the beginning of the year.

Government transactions are classified according to the accounts through which they are effected. The three classes of accounts are: General fund accounts, which include the general revenues and from which the operating expenses of the Government, including capital outlays and fixed charges, are paid under appropriations by Congress; special fund accounts, or funds received under special authorizations of law which are earmarked for some specific purpose; and trust fund accounts, representing money received and held in trust for the benefit of individuals or classes of individuals. The latter are not strictly Government moneys and are shown separately in all tables except No. 177. (See headnote of that table.)

All figures for receipts and expenditures include postal surpluses or deficiencies only; postal revenues other than surplus receipts and postal expenditures payable from postal revenues are shown in table 177

<sup>1</sup> Surplus or deficit takes into account public debt retirements chargeable against ordinary receipts beginning 1918. See p. 168 for expenditures chargeable against ordinary receipts.  
<sup>2</sup> Based on reports of the Post Office Department. Expenditures include adjusted losses, etc., postal funds, and expenditures from postal balances; they exclude departmental expenditures in Washington, D. C., to the close of the fiscal year 1922, and amounts transferred to the civil-service retirement and disability fund, fiscal years 1921 to 1926; in 1927 to 1939 the 3½ percent salary deductions are included.  
<sup>3</sup> Includes tonnage tax prior to 1932. Beginning 1932, tonnage tax is included in miscellaneous receipts.  
<sup>4</sup> On the basis of warrants issued 1789 to 1930; thereafter, on basis of checks issued.  
<sup>5</sup> Average for period Mar. 4, 1789, to Dec. 31, 1800.  
<sup>6</sup> Averages are for entire period though there were no amounts under these items for certain years.  
<sup>7</sup> Years ended Dec. 31, 1801 to 1842; average for 1841-1850 is for the period Jan. 1, 1841, to June 30, 1850.  
<sup>8</sup> Less than \$500. <sup>9</sup> Average for 1863 to 1865. <sup>10</sup> Average for 1881 and 1884. <sup>11</sup> One year only, 1895.  
<sup>12</sup> See headnote.  
<sup>13</sup> Includes processing tax and for 1937 to 1940, taxes under Social Security Act, and taxes upon carriers and their employees. <sup>14</sup> Includes unjust enrichment tax.  
<sup>15</sup> Sales of public lands included with miscellaneous receipts; postal revenues and expenditures not available.

No. 181.—INTERNAL REVENUE RECEIPTS, BY CHIEF TAX SOURCES: 1863 TO 1940

NOTE.—All figures in thousands of dollars. The figures represent collections by internal revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal revenue stamps and deposits of internal revenue collected through customs offices, and, therefore, differ from those in tables 176 to 178 and 180 which represent the deposits of these collections in the Treasury or depositories during the fiscal year concerned, there being thus an overlapping of time. Certain items, included in the totals in the last column, are shown in detail in the second part of the table

No. 184.—INCOME TAX RETURNS, INDIVIDUAL—SUMMARY: 1913 TO 1938

NOTE.—All money figures in thousands of dollars. Statistics are based on the taxpayers' returns as filed, unaudited except to insure proper execution of the return. Under the revenue laws these classes of individuals were required to file personal returns: For 1913 to 1916, those with net income of \$3,000 and over; 1917 to 1924, and 1932 to 1938, \$1,000 and over; 1925 to 1931, \$1,500 and over; or if married and living with husband or wife filing a joint return, \$2,000 for 1917 to 1923, \$2,500 for 1924, and 1932 to 1938, and \$3,500 for 1925 to 1931; also, beginning 1921, individuals with gross income of \$5,000 or over regardless of net income. Data for returns showing no net income, filed in accordance with the latter provision, are not included in statistics shown. Partnership net income or net loss is reported on the individual returns of copartners according to their shares. All income-tax data include Alaska and Hawaii

<sup>1</sup> See table 185 for detail, beginning with 1929.

<sup>2</sup> Includes war excess-profits taxes of \$101,250,000 on individuals and of \$103,888,000 on partnerships.

<sup>3</sup> Preliminary figures for 1937 returns filed through August 1938, and for 1938 returns filed through June 1939. Complete figures include additional returns filed to December 31, including final returns replacing tentative returns which are not tabulated.

<sup>4</sup> Includes alternative tax of \$277,174,000. The alternative tax is imposed on returns with net long-term capital gain when such alternative tax is less than the sum of the normal tax and surtax computed on net income including net long-term capital gain; and the alternative tax is imposed on returns with net long-term capital loss when such alternative tax is greater than the sum of the normal tax and surtax computed on net income after deducting net long-term capital loss.

<sup>1</sup> Total income and net income for 1929 to 1933 include net capital gains from sale of assets held over 2 years, whereas net income has not been reduced nor have deductions been increased by amount of net capital losses from such sales. For treatment of capital gains and losses for 1934 and later years, see note 5.

<sup>2</sup> Excludes salaries and wages of the individual, his wife, or dependent minors derived from business conducted by the individual.

<sup>3</sup> Dividends on stock of domestic corporations prior to 1936, taxable interest on obligations of the United States for all years, and prior to 1934, capital net gain from sale of assets held more than 2 years, received through partnerships and fiduciaries were reported under their respective classifications. For 1934 and subsequent years, income of partnerships and fiduciaries includes proportion of net capital gains and losses resulting from sales of capital assets through these entities required to be reported under Revenue Acts of 1934 and 1936.

<sup>4</sup> Exclusive of amount taxed as capital net gain from sales of assets held over 2 years.

<sup>5</sup> Under the Revenue Acts of 1934 and 1936, certain percentages (varying according to the period for which assets were held) of gains or losses from the sale of all capital assets are taken into account in computing net income, the deduction for capital losses being limited to \$2,000 after subtracting capital gains. Amounts shown as "net capital gain" and "net capital loss" represent the proportion of gains and losses required to be included and are not comparable with "profits (or net loss) from sale of real estate, stocks, bonds, etc." and "capital net gain from sale of assets held over 2 years" reported for earlier years; they exclude gain or loss on sale of capital assets through partnerships or fiduciaries (see note 3).

<sup>6</sup> Amount reported for tax at 12½ percent in lieu of normal tax and surtax.

<sup>7</sup> On stocks of domestic corporations prior to 1936; includes dividends on stocks of both domestic and foreign for 1936 and 1937, subject to normal tax and surtax. <sup>8</sup> Not wholly exempt from tax.

<sup>9</sup> Other than reported for tax credit on capital net loss from sale of assets held more than 2 years.

<sup>10</sup> Excludes amounts reported in business deductions. <sup>11</sup> No deduction allowed for prior year loss.

<sup>12</sup> Beginning with 1934 limited credit for earned income was allowed against net income in computing taxable income.

<sup>13</sup> Loss in ordinary net income for given year and net loss for prior year deductible from capital net gain.

<sup>1</sup> Prior to 1935 includes returns of husbands whose wives though living with them file separate returns.

<sup>2</sup> Included in "Joint returns of husbands and wives."

<sup>3</sup> An unequal number of separate returns of husbands and wives results from the use of the sample method for returns with net income under \$5,000, as the net income of one spouse may be \$5,000 or over and that of the other spouse under \$5,000.

<sup>4</sup> Prior to 1935 returns of estates were distributed according to sex and family relationship of testator or grantor, and returns of property held in trust, according to sex and family relationship of beneficiary or sex and family relationship of testator or grantor if status of beneficiary could not be determined.

No. 192.—INCOME TAX RETURNS, CORPORATION—SUMMARY: 1911 TO 1938

NOTE.—All money figures in thousands of dollars. Statistics are based on taxpayers' returns as filed, un-audited except to insure proper execution of the returns. They include data for Alaska and Hawaii. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, charitable, etc., not operating for profit. Under the Revenue Act of 1934, the privilege of filing consolidated returns, which had formerly been permitted for groups of affiliated corporations, was limited to steam and electric railroads. The Revenue Act of 1936 extended this privilege to street, suburban, and interurban electric railways. These changes resulted in marked differences between the industrial and the net-income or deficit classifications of returns for 1934 and subsequent years and those for 1933 and prior years and also in the distribution of returns by size-of-assets classes. Corporations are classified industrially according to their predominant business. Owing to the diversified activities of many corporations, the industrial groups include some corporations not engaged exclusively in the industries classified. Tables showing the effect of the discontinuance of the consolidated return on the tabulated data will be found in Statistics of Income for 1934, Part 2

<sup>1</sup> For 1935 and prior years, net income or deficit represents amount for income tax computation. For 1936 and later years, net income or deficit represents amount for excess-profits tax computation and includes dividends received on stock of domestic corporations subject to taxation under title I of the effective revenue acts and interest received on certain Government obligations subject to excess-profits tax and excludes contributions or gifts (limited to 5 percent of net income before deduction of contributions or gifts).

<sup>2</sup> Includes inactive concerns prior to 1927. <sup>3</sup> Returns showing net income in excess of \$5,000 exemption. <sup>4</sup> Returns showing net income not in excess of \$5,000 exemption or deficit. <sup>5</sup> Not available.

<sup>6</sup> Receipts for year ended June 30 following year in stub as reported by Commissioner of Internal Revenue. Figures shown for 1911 and 1912 and \$10,671,000 of the amount shown for 1913 are excise tax receipts.

<sup>7</sup> Figures for 1915 contain approximately 32,000 returns which properly belong in 1914.

<sup>8</sup> Excess-profits tax (effective June 30, 1933, under provisions of the National Industrial Recovery Act).

<sup>9</sup> Includes surtax on undistributed profits according to provisions of Revenue Act of 1936.

<sup>1</sup> See note 1, table 192.

<sup>2</sup> Includes excess-profits tax of \$37,540 for 1934 and \$19,534 for 1935 on returns with no net income, since credit for interest received on certain obligations of the United States and its instrumentalities is not allowed against net income in the computation of the excess-profits tax. For 1936 and 1937, includes surtax on undistributed profits.

No. 196.—GROSS INCOME OF CORPORATIONS, BY INDUSTRIAL GROUPS: 1930 TO 1937

NOTE.—In millions of dollars. For 1930 to 1935 gross income excludes nontaxable income, except dividends on capital stock of domestic corporations, but includes receipts from all other sources. For 1936 and 1937 gross income includes interest on certain Government obligations subject to excess-profits tax, and dividends, unlike former years, are taxable. Sales are included on gross basis, but only net profits from the sale of capital assets are included. See also headnote, table 192

<sup>1</sup> Excludes nontaxable income, other than interest on tax-exempt obligations for all years and dividends on stock of domestic corporations except for 1936 and 1937. For 1936 and 1937, dividends are taxable income.

<sup>2</sup> Where inventories are an income-determining factor. For "Cost of goods sold," see "Compiled deductions."

<sup>3</sup> Where inventories are not an income-determining factor. Figures for years prior to 1932 represent gross profits other than from sales. For 1926, gross profits from operations other than from sales, for all corporations, were tabulated in "Other receipts." For 1926, 1927, and 1928 such profits for only those corporations classified under "Transportation and other public utilities," "Service," "Finance," and "Nature of business not given" were included in "Other receipts."

<sup>4</sup> Included in "Other deductions" prior to 1933.

<sup>5</sup> Includes obligations of States and Territories and minor political subdivisions, securities issued under the Federal Farm Loan Act, and obligations of the United States and its possessions, and for 1936 and 1937 certain obligations subject to excess-profits tax.

<sup>6</sup> "Dividends from domestic corporations" (taxable income beginning 1936) included with "Other receipts."

<sup>7</sup> These figures are affected by the inclusion in deductions of contributions or gifts (limited to 5 percent of net income before deduction of contributions or gifts).

<sup>8</sup> Compiled receipts less compiled deductions. <sup>9</sup> See note 1, table 192.

<sup>10</sup> Deducted by concerns reporting net income.

<sup>11</sup> Includes excess-profits tax for 1933 to 1937, and for 1936 and 1937 surtax on undistributed profits.

<sup>12</sup> Excludes dividends of life-insurance companies prior to 1923.

<sup>13</sup> Other than income and excess-profits taxes and taxes reported under "Cost of goods sold" and "Cost of operations."

<sup>14</sup> Included in "Other deductions." <sup>15</sup> Deficit.

<sup>2</sup> Includes data for lines of manufacture not shown separately.  
<sup>3</sup> Excludes returns for inactive corporations and returns with fragmentary balance sheet data.  
<sup>4</sup> A adjustments of assets and liabilities are made in tabulating the data, if the following conditions appear on the balance sheets: (1) a negative amount reported in assets is transferred to its appropriate place under liabilities and "Total assets" and "Total liabilities" are increased by the amount; (2) a deficit in surplus shown under assets is transferred to liabilities and "Total assets" and "Total liabilities" are decreased by the amount of the deficit; and (3) reserves for depreciation and depletion when shown under liabilities are transferred to the corresponding asset accounts and "Total assets" and "Total liabilities" are reduced by the amount of such reserves.  
<sup>5</sup> In full and deposits in bank.   <sup>6</sup> See note 5, table 198.   <sup>7</sup> Less depreciation and depletion.  
<sup>8</sup> Includes copyrights, formulas; goodwill; patents; trade-marks; sinking funds; deferred charges; organization expenses; prepaid and suspense items; interest, discount, coupons, and dividends receivable; guaranty deposits, and deposits on contracts, meters, and leaseholds; and cash value of life insurance. Other assets of life insurance companies include market value of real estate and bonds in excess of book value; interest, rents, and premiums due; and agents' balances.  
<sup>9</sup> "Accounts payable" only. Notes payable are included in "Bonds, notes, and mortgages payable" for 1937.  
<sup>10</sup> Includes notes payable, which for 1936 were included in "Notes and accounts payable."  
<sup>11</sup> Includes all reserves other than surplus and reserves for depletion, depreciation, and bad debts; deferred and suspense items; funds held in trust; borrowed securities; discount and dividends payable; outstanding coupons and certificates; and overdrafts. Other liabilities of life insurance companies include net value of outstanding policies and securities and borrowed money. Other liabilities of banks include deposits (time, savings, demand, etc.) and bank notes in circulation.  
<sup>12</sup> Includes "Surplus reserves," "Paid-in or capital surplus," and "Earned surplus and undivided profits."  
<sup>13</sup> If one or more of these amounts are negative they are tabulated as "Deficit" and the remaining positive items are tabulated as "Surplus and undivided profits." In prior years the net amount of "Surplus and undivided profits" or "Deficit" was tabulated from each return. See note 13.  
<sup>14</sup> Consists of negative amounts for "Paid-in or capital surplus" and "Earned surplus and undivided profits." See note 12.   <sup>15</sup> Includes transportation.

No. 205.—ESTATE TAX RETURNS, FEDERAL—SUMMARY: 1916 TO 1938

NOTE.—All money figures in thousands of dollars. Under the various revenue acts estate tax returns are required: (1) In the case of every citizen or resident (only every resident for deaths prior to May 11, 1934) decedent if gross estate exceeds \$50,000 for deaths prior to Feb. 26, 1926, and from June 6, 1932, to Aug. 30, 1935; \$100,000 for deaths from Feb. 26, 1926, to June 5, 1932; and \$40,000 for deaths on or after Aug. 31, 1935; (2) in the case of every nonresident alien (every nonresident citizen and alien if decedent died prior to May 11, 1934) who owned property in the United States at date of death. Estates of decedents dying on or after June 6, 1932, are subject to two taxes, that levied under the Revenue Act of 1926 and an additional tax levied under the act of 1932 or that act as amended.

<sup>1</sup> Includes returns of all citizen decedents, regardless of place of residence, who died after May 11, 1934.

<sup>2</sup> The basis for net estate classes is the amount of net estate before the deduction of specific exemption. For returns of decedents who died on or after 5 p. m., June 6, 1932, the net estate and specific exemption used are those provided in computing the additional tax under the Revenue Act of 1932 or that act as amended and not those provided under the 1926 act.

<sup>3</sup> Specific exemption allowed under act of 1924 and prior acts is \$50,000; act of 1926, \$100,000. Specific exemption allowed for computing additional tax under act of 1932 and act of 1932 as amended by 1934, \$50,000; and act of 1932 as amended by 1935, \$40,000.

<sup>4</sup> For years 1935-37 the deduction tabulated is that computed under 1926 act; for 1938 the deduction is that used for computing additional tax under 1932 act or that act as amended, except for 19 returns for decedents who died prior to June 6, 1932. <sup>5</sup> Not reported separately. <sup>6</sup> Less than \$500.

<sup>7</sup> Credits for estate, inheritance, legacy, or succession taxes paid to any of the several States, Territories, or District of Columbia and gift taxes paid to the Federal Government.

<sup>1</sup> Independent school districts, townships, bridge, dike, drainage, irrigation, road, etc., districts.  
<sup>2</sup> Data for years ended June 30, 1913 and 1933. Postal revenues and postal expenditures chargeable against them are included in receipts and expenditures, respectively. Further differences between figures in this table and totals in tables 170 to 178 are as follows: Receipts here shown exclude trust funds and other nonrevenue receipts while expenditures exclude public debt retirements, trust funds, Federal contribution for District of Columbia government, refunds of customs and internal revenue and other non-governmental costs.  
<sup>3</sup> Cities, towns, etc., with a population of 2,500 and over; comparable data for 1932 are: Revenue receipts, \$3,221,900,000 (per capita, \$45.69); governmental-cost payments, \$3,449,000,000 (per capita, \$49.24).  
<sup>4</sup> Not available.  
<sup>5</sup> The differences between the figures covered by this footnote and the corresponding ones appearing in subsequent tables are due (1) to the inclusion in this table and the exclusion in tables 216, 217, and 218 of data for public-service enterprises and (2) to the fact that data for the fiscal year 1931 (instead of 1932) are included in this table and in table 229 for 18 States and in other subsequent tables for only 7 States.  
<sup>6</sup> Gross debt less cash in Treasury as of June 30 following the year stated in stub.

No. 216.—REVENUES AND COST PAYMENTS OF GENERAL GOVERNMENT OF STATES, BY SOURCE AND FUNCTION: 1932 AND 1937

NOTE.—For statistics of public-service enterprises for 1937, see table 219. Revenues exclude borrowings and other nonrevenue receipts. Cost payments exclude outlays and interest, and debt retirements and other noncost payments. Because of a change in classification of accounts for 1937, it is impracticable to present comparable data for 1932 for some of the items. Data for 1937 are for fiscal years ended in 1937; those in the 1932 columns are for fiscal years ended in 1932, except for 7 States, for which 1931 fiscal-year data were included

No. 223.—TAX LEVIES—TOTAL LEVIES OF GENERAL PROPERTY TAXES OF STATE AND LOCAL GOVERNMENTS, BY STATES: 1880 TO 1932

Note.—The data represent the total levies of general property taxes of States, counties, cities, villages' towns, boroughs, townships, school districts, etc., and for all purposes. They do not cover "special assessments" on property benefited by specific improvements nor special property taxes applying only to limited classes, nor taxes based on other standards than property, such as income, volume of business, inheritance, etc., which have been steadily growing in relative importance. The change in buying power of money affects materially the comparability of the figures. For data for 1860, 1870, and 1890, by States, see table 437, Statistical Abstract of 1922

<sup>1</sup> Data included for State debt for 18 States are for fiscal year 1931.

<sup>2</sup> Farm-mortgage and other rural-credit assets amounting to \$121,387,000, resulting from rural-credit loans, held by the State sinking funds of Minnesota, North Dakota, and South Dakota, were not deducted from gross debt. The sinking funds for these States include farm mortgages and other rural-credit assets as follows: Minnesota, \$67,281,000; North Dakota, \$31,303,000; South Dakota, \$32,753,000.

<sup>3</sup> Farm-mortgage and other rural-credit assets were not deducted from gross debt for Minnesota, North Dakota, and South Dakota.

<sup>4</sup> Indebtedness of local governments. Sinking-fund assets of State governments exceeded the gross debt.

<sup>5</sup> No State indebtedness reported; the Virginia-West Virginia debt settlement was not made until 1919.

<sup>6</sup> Includes \$853,000 indebtedness of local governments in Indian Territory reported separately in 1902.

Under orders of the Secretary of the Treasury of Dec. 28, 1933, and Jan. 11 and 15, 1934, all gold coin domestically owned (with minor exceptions) was required to be delivered to the Treasurer of the United States, and under the Gold Reserve Act of 1934 (Jan. 30) withdrawn from circulation and formed into bars. Gold coin (\$287,000,000) shown on Treasury records as then outstanding was dropped from statements.

No. 243.—MONEY—STOCK, BY KIND: 1860 TO 1940

NOTE.—Amounts in thousands of dollars. Figures prior to 1890 were revised in 1925 from the best available data, but the older records, especially from 1860 through the early 70's, are not complete and figures for gold and silver for those years are only estimates. In 1927, data were revised to include minor coins beginning 1900 (no satisfactory data available for earlier years) and gold coin and bullion held abroad for Federal Reserve banks and to exclude gold earmarked for foreign account

<sup>1</sup>The totals include a duplication to the extent that United States notes, Federal Reserve notes, Federal Reserve bank notes, and national bank notes, all included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 have been excluded, however, since they are complete duplications of the equal amounts of gold or silver held as security therefor and included in the totals.

<sup>2</sup>By a proclamation of the President dated Jan. 31, 1934, the weight of the gold dollar was reduced from 25.8 to 15.5 grains of gold, 0.9 fine. The value of gold is therefore based on \$35 per fine ounce beginning June 1934; therefore, it is based on \$20.67 per fine ounce.

<sup>3</sup>There has been no fractional currency in actual circulation to any extent since 1878.

<sup>4</sup>Silver bullion in Treasury.

<sup>5</sup>Includes silver bullion as follows: June 30, 1934, \$1,560,000; June 30, 1935, \$313,309,000; June 30, 1936, \$708,211,000; June 30, 1937, \$835,196,000; June 30, 1938, \$1,037,163,000; Dec. 31, 1938, \$1,137,624,000; June 30, 1939, \$1,230,586,000; Dec. 31, 1939, \$1,298,212,000; June 30, 1940, \$1,353,162,000.

No. 244.—MONEY IN CIRCULATION, MONEY HELD IN TREASURY AND IN FEDERAL RESERVE SYSTEM, AND TOTAL STOCK: 1800 TO 1940

NOTE.—All figures except per capita in thousands of dollars. In conformity with revisions in the form of circulation statement in 1922 and 1927, figures for 1915 on have been compiled to include in the holdings of Federal Reserve banks and agents, and, hence, in stock of money, gold bullion and foreign coin held by them and gold coin and bullion held abroad for the account of Federal Reserve banks, and also to include in the holdings of Federal Reserve banks and agents, and, hence, exclude from circulation, all forms of money held by them whether as Reserve against Federal Reserve notes or otherwise. See also headnote, table 243. Per capita figures based on population estimates of the Treasury Department

<sup>1</sup> Gold and silver certificates and Treasury notes of 1890 are excluded before combining money outside of the Treasury with money in the Treasury in order to avoid duplication, since the gold and silver held in Treasury as security against these currencies is included. See also notes 1 and 2, table 243.

<sup>2</sup> Both of these items include also reserve against Treasury notes of 1890.

<sup>3</sup> See note 1, table 242.

<sup>4</sup> Includes total stock of silver dollars and subsidiary silver.

<sup>5</sup> Gold certificates. This amount is not included in the total since the gold held as security against the gold certificates is included in the column, "In trust against gold and silver certificates."

<sup>1</sup> Figures for loans and investments beginning Dec. 31, 1938, are not entirely comparable with prior call dates because investments and other assets (principally loans) indirectly representing bank premises and other real estate are no longer included in loans and investments but are now reported separately. Such investments and other assets amounted to \$94,569,000 and \$49,930,000, respectively, on Dec. 31, 1938.

<sup>2</sup> Not reported separately where no figures are shown.

<sup>3</sup> Figures prior to Dec. 31, 1938 represent all loans on securities, except loans to banks and to brokers and dealers.

<sup>4</sup> This is a residual item and, because of revised loan classification beginning Dec. 31, 1938, the residual amounts are not comparable.

<sup>5</sup> Corporate stocks of foreign corporations were reported in combination with bonds, notes, and debentures prior to Dec 31, 1938.

No. 263.—ALL REPORTING BANKS IN THE UNITED STATES—NUMBER, LOANS, INVESTMENTS, AND DEPOSITS: 1928 TO 1940

NOTE.—Money figures in millions of dollars. This table covers all national banks in continental United States, all State commercial banks, trust companies, mutual and stock savings banks, and such private, Morris Plan, and industrial banks as are included in abstracts issued by State banking departments. Also includes, during the period June 1934-June 1935, private banks which, under provisions of sec. 21 (a) of the Banking Act of 1933, submitted reports to the Comptroller of the Currency. Morris Plan and industrial banks in New York and North Carolina were not included until June 30, 1937; in Connecticut, not until Dec. 31, 1938

No. 264.—ALL ACTIVE BANKS—PRINCIPAL ASSETS AND LIABILITIES, BY CLASS OF BANKS: 1840 TO 1939

NOTE.—Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands, and beginning with 1935, those in Virgin Islands and in 1935, those in Canal Zone, Guam, and American Samoa. Data are as of June 30 or about June 30 except data for the earlier years for banks other than national, for which reports were of various dates. Figures for banks other than national for the earlier years, especially through 1885, are incomplete. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years; since 1926 only one is included. Private banks are not included prior to 1890; statistics for private banks, except for 1934 and 1935, cover only banks under State supervision and those voluntarily reporting; for 1934 and 1935, they include also private banks which submitted reports to the Comptroller of the Currency under provisions of the Banking Act of 1933

<sup>1</sup> Acceptances of other banks and bills of exchange or drafts sold with endorsements are excluded for national and State banks beginning with 1920 and for other banks beginning with 1929.

<sup>2</sup> Securities borrowed excluded for national banks beginning with 1903 and for other banks beginning with 1929. Not reported separately for prior years.

<sup>3</sup> Includes lawful reserve, exchanges for clearing house, and all cash items except for 1936 to 1939, for which years, cash items not in process of collection are excluded.

<sup>4</sup> Includes reserve accounts, and for banks other than national for 1934 to 1939, capital notes and debentures. Interest, taxes, and other expenses accrued and unpaid are excluded for national banks beginning with 1920 and for other banks beginning with 1929.

<sup>5</sup> Figures for national banks represent national bank circulation only; comparatively small amounts of State bank notes outstanding for 1870 to 1910, for which national banks converted from State banks or merged with State banks assumed liability, are not included in the figures for national banks or for all banks.

<sup>6</sup> Includes postal savings. <sup>7</sup> Capital only. <sup>8</sup> Includes capital only for banks other than national.

<sup>9</sup> Figures for State banks, except number of banks and capital, estimated. <sup>10</sup> Licensed banks only.

<sup>11</sup> U. S. Government securities only. <sup>12</sup> Includes State bank circulation outstanding.

<sup>13</sup> Includes loan and trust companies and, with some exceptions (see headnote), stock savings banks.

<sup>14</sup> Figures given under capital, surplus, etc., represent surplus and undivided profits, including reserves, except that they include capital for any stock savings banks included (see headnote).

<sup>1</sup> Comprises banks suspended before banking holiday, licensed banks suspended or placed on restricted basis following banking holiday, unlicensed banks placed in liquidation or receivership, and unlicensed banks granted licenses after June 30, 1933. At close of banking holiday (Mar. 15, 1933) 1,400 national banks with deposits (on Dec. 31, 1932) of \$1,942,574,000, and 225 State bank members with deposits of \$925,777,000 had not been licensed to reopen. On Apr. 12, 1933, the earliest date following the banking holiday for which corresponding data are available regarding nonmember banks, there were in the United States 1,108 unlicensed national banks with deposits of \$1,818,541,000, 152 unlicensed State member banks with deposits of \$842,982,000, and 2,938 unlicensed nonmember banks with deposits of \$1,317,607,000. By the end of June 1933 supervisory authorities had completed their examination of all or nearly all the banks not granted licenses immediately following the banking holiday and had authorized such of the banks to reopen as could qualify for licenses. On June 30, 1933, there remained 935 unlicensed national banks with deposits of \$1,028,347,000, 114 State member banks with deposits of \$239,268,000, and 1,983 nonmember banks with deposits of \$1,068,984,000 to be rehabilitated and reopened or to be placed in liquidation or receivership. All such banks are treated as suspensions.

<sup>2</sup> Includes 2 insured nonmember banks in 1934, 22 in 1935, 40 in 1936, 47 in 1937, 47 in 1938, and 25 in 1939, with deposits of \$1,912,000, \$3,768,000, \$10,207,000, \$10,156,000, \$11,721,000, and \$6,589,000, respectively. Federal deposit insurance became operative Jan. 1, 1934.

### No. 277.—SAVINGS BANKS—NUMBER OF DEPOSITORS AND AMOUNT OF SAVINGS DEPOSITS, CONTINENTAL UNITED STATES: 1820 TO 1910

NOTE.—Data for later years are as of June 30 or about June 30. In earlier years reports were of various dates. Prior to 1900 data include both mutual and stock savings banks; beginning 1900 they are for mutual savings banks only, which in that year had about 90 percent of the savings deposits in all savings banks. For figures for later years and also savings deposits in all classes of banks, see table 278

<sup>1</sup> In obtaining totals in this column adjustments were made to avoid duplication arising from the fact that production credit associations and banks for cooperatives borrow from and rediscount loans with the Federal intermediate credit banks.

<sup>2</sup> Includes outstanding loans of associations which have been placed in liquidation.

<sup>3</sup> Not including loans for the Central Bank for Cooperatives which have not been allocated by States.

<sup>4</sup> Includes participation by the Central Bank for Cooperatives.

<sup>1</sup> Less payments on principal and principal of delinquent and extended installments.  
<sup>2</sup> Less amounts sold under repurchase agreements.  
<sup>3</sup> Unmatured. Figures for 1932 include \$18,500,000 of bonds issued to the Reconstruction Finance Corporation and for 1933, \$142,118,000.  
<sup>4</sup> Owned by national farm loan associations and individual borrowers.  
<sup>5</sup> Not including special reserves set up against particular assets.  
<sup>6</sup> Less impairment or deficit. The decrease in reserves and undivided profits for 1934 resulted largely from a change in accounting procedures. Includes earned surplus beginning with 1937.  
<sup>7</sup> Includes claims not yet paid: \$3,054,000 for 1934, \$2,719,000 for 1935, \$6,094,000 for 1936, \$3,621,000 for 1937, \$381,000 for 1938, and \$186,000 for 1939.

No. 310.—BANK CLEARINGS FOR LEADING CITIES: 1922 TO 1939

NOTE.—In millions of dollars. Cities are listed in order of importance according to clearings in 1939. No figures are given for Los Angeles, which ranked eighth in 1939 but has not reported clearings for any subsequent year. Comparability of figures for different years is affected by the tendency toward consolidation of banks, eliminating former clearings between 2 or more banks. Debits to individual account (tables 311 and 312) are a better measure of volume of payment. For figures for earlier years for all cities reporting to New York Clearing House Association, 1882 to 1920, and for figures for 146 identical cities, 1920 to 1936, see table 293, Statistical Abstract, 1937

No. 318.—FIRE LOSSES, TOTAL AND PER CAPITA, CONTINENTAL UNITED STATES: 1876 TO 1939

NOTE.—Amounts, except per capita, in thousands of dollars. Prior to 1916 figures are as compiled by the New York Journal of Commerce and include losses of \$10,000 or over in the principal cities of the United States, adding 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being \$214,531,000 as against \$258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses prior to 1935 and 30 percent thereafter

No. 323.—LIFE INSURANCE WRITTEN AND IN FORCE, BY STATES: 1937 AND 1938

NOTE.—Figures cover business transacted in continental United States, including United States business of Canadian companies. They include data for some small companies which confine their business to the State in which they domicile, and usually to several small cities, which are not included in tables 319 to 322. Further differences between totals in this table and in the preceding tables are due to duplications from reinsurance

<sup>1</sup> Total premium receipts prior to 1910.

<sup>2</sup> Figures for 1895 to 1930 (also 1932 figures in italics) include adjustment expenses excluded thereafter.

<sup>3</sup> Including taxes.

<sup>4</sup> Figures through 1930, and 1932 figures in italics, include data for companies which transact life insurance in addition to accident and health insurance. Income and disbursement items include business of accident and health branches only of these life insurance companies, where companies were able to segregate data, while capital, assets, and net surplus include total amounts of these items for such companies, excluding, however, data for a few very large companies for which accident and health business is only a small proportion of the total business. Capital, assets, and net surplus are therefore overstated and in part duplicated in figures for life insurance companies in other tables. Figures for 1932 to 1933, except 1932 italic figures, relate to casualty, surety, and miscellaneous insurance companies only.

<sup>5</sup> Number of companies reporting. <sup>6</sup> See note 4.

<sup>7</sup> Includes stock casualty, surety, and miscellaneous insurance companies, shown separately above, mutual companies, reciprocal, and Lloyd's; number of companies and income and disbursement items also include accident and health departments of life insurance companies.

**No. 329.—INSURANCE CARRIERS AND INSURANCE AGENCIES AND BROKERAGE OFFICES—NUMBER OF OFFICES, PERSONNEL, AND PAY ROLL, BY TYPE OF INSURANCE, FOR THE UNITED STATES: 1935**

**NOTE.**—Carriers include all types of insurance coverage except title insurance and the guarantee of mortgages. Each carrier is considered as having only one home office. Insurance agencies and brokerage offices include insurance agencies, sub-agencies, and brokerage offices identifiable as business establishments; managing agencies for one or more carriers; attorneys-in-fact for Lloyd's Associations and for reciprocal exchanges; and underwriter agencies. Classifications by kind of insurance in the case of multiple line companies submitting a consolidated report are based on the kind of insurance from which the major portion of the business is derived. For employment by occupational groups, see table 388

### No. 331.—COMMODITY EXCHANGE TRANSACTIONS—VOLUME OF TRADING IN PRINCIPAL GRAIN FUTURES AND AMOUNT OF FEDERAL TAXES COLLECTED ON SALES OF ALL COMMODITIES FOR FUTURE DELIVERY: 1922 TO 1940

NOTE.—Trading in wheat and corn futures usually accounts for around 90 percent of the total volume of trading in grain futures. Statistics of the volume of future trading are not collected for commodities other than grains. The value of all futures sales is roughly indicated, however, by the amount of taxes collected on such sales. Since Oct. 3, 1917, stamp taxes upon sales of products or merchandise on exchanges, boards of trade, or similar places, for future delivery, have been in effect as follows: On each \$100 of such sales or a fractional part thereof in excess of \$100, 2 cents prior to July 2, 1924; 1 cent July 2, 1924, to June 21, 1932; 5 cents June 21, 1932, to May 11, 1934; 3 cents May 12, 1934, to June 30, 1938; repealed, effective July 1, 1938

### NO. 342.—CAPITAL ISSUES—SUMMARY, BY CLASSES: 1922 TO 1939

NOTE.—In millions and tenths of millions of dollars. Data cover domestic and foreign issues in the United States. Preferred stocks of no par value and all common stocks are taken at their offering price, other issues at par, except that in the figures for corporate issues for 1916 to 1918 all stocks are included at their market value. Corporate issues for 1916 to 1918 exclude real estate offerings and privileged stock subscriptions included in figures beginning 1919, and issues of less than \$100,000. State and municipal issues include bonds issued by States, Territories, and possessions, counties and municipalities, and by school and road districts and other independent governmental bodies

No. 346.—INDUSTRIAL AND COMMERCIAL FAILURES—NUMBER AND LIABILITIES, BY MONTHS: 1936 TO 1940

NOTE.—Liabilities in thousands of dollars. Current liabilities include all accounts and notes payable and all obligations, whether in secured form or not, known to be held by banks, officers, affiliated companies, supplying companies, or the Government. Deferred liabilities (the difference between current, as defined above, and the total) are therefore long-term obligations held by the public

## 12. INCOME, EXPENDITURES, AND DEBT

[Data in this section relate to continental United States]

### No. 350.—NATIONAL INCOME AND INCOME PAID OUT: 1929 TO 1939

**NOTE.**—National income produced is net value of commodities produced and services rendered (gross value less expenditures for materials and interindustry services—such as transportation and communication—used in productive processes, for taxes, and for depreciation of capital equipment). Income paid out is amount actually distributed to individuals as salaries, wages, interest, dividends, entrepreneurial withdrawals, and net rents and royalties. Imputed income from ownership of durable goods (including owned homes), imputed value of services of members of family, earnings from odd jobs, direct relief and charity, earnings from illegal pursuits, and changes in value of assets not derived by groups professionally engaged in handling of assets are not included either in income produced or in income paid out. Business savings (positive or negative) represent difference between income produced and income paid out

<sup>1</sup> Data on dividends, interest, and corporate savings by industrial divisions for 1934 and for subsequent years are based on a different industrial classification than are the estimates of these items for earlier years because of a change in the Revenue Act of 1934. Special tabulations of the Bureau of Internal Revenue permitted the making of estimates for 1934 on the earlier basis. For specific items in certain industries the variations are substantial, but for total income the changes were small. The 2 estimates were averaged in compiling this table.

### No. 354.—CONSUMER INCOMES—DISTRIBUTION OF FAMILIES AND SINGLE INDIVIDUALS AND OF AGGREGATE INCOME RECEIVED, BY INCOME LEVEL: 1935-36

NOTE.—These figures are estimates based primarily on sample data collected in the Study of Consumer Purchases, a Works Progress Administration project conducted by the Bureau of Home Economics and the Bureau of Labor Statistics in cooperation with the National Resources Committee and the Central Statistical Board. Findings of that study were supplemented by income tax statistics and by other sample data on family and individual incomes

<sup>1</sup> The estimates cover all consumers with the exception of 2,000,000 persons living in institutions or quasi-institutional groups. A family is defined as 2 or more persons sharing a common income and living under a common roof. Single individuals include persons lodging in rooming houses and hotels, living as lodgers or servants in private homes, or maintaining independent living quarters as 1-person families. Income includes the total net money income received during the year by all members of the economic family plus the value of certain items of nonmoney income, such as the occupancy of an owned home and food produced by rural families for their own use. The estimates apply to the 12-month period from July 1935 through June 1936.

<sup>2</sup> Less than .005 percent.

No. 355.—CONSUMER EXPENDITURES—AGGREGATE AND AVERAGE OUTLAY OF FAMILIES AND SINGLE INDIVIDUALS FOR CONSUMPTION, GIFTS AND PERSONAL TAXES, AND SAVINGS, BY INCOME LEVEL: 1935-36

NOTE.—These figures are estimates based primarily on sample data collected in the Study of Consumer Purchases (see headnote, table 364), supplemented by data from various other sources. The estimates apply to the 12-month period from July 1935 through June 1936, and cover all families and single individuals in the United States. A family is defined as 2 or more persons sharing a common income and living under a common roof. Single individuals include persons lodging in rooming houses and hotels, living as lodgers or servants in private homes, or maintaining independent living quarters as 1-person families

<sup>1</sup> Excludes residents in institutional groups.

<sup>2</sup> Includes the total net money income received during the year by all members of the economic family and by single individuals, plus the imputed value of the following nonmoney items: Occupancy of owned homes, rented farm homes, and rent-free homes; food produced by rural families for their own use; fuel and ice obtained free by farm families.

<sup>3</sup> Includes, in addition to goods and services purchased during the year, the imputed value of the nonmoney items mentioned in note 2. All purchases of durable consumer goods, except payments on homes and improvements to homes, are considered current expenditures for the year. Automobile expenditures cover purchase and operating costs for family and personal use only, excluding costs chargeable to business use.

<sup>4</sup> Gifts include gifts made to persons outside the economic family, to churches and other religious organizations, and to welfare agencies. Taxes cover only personal income taxes, poll taxes, and certain minor personal property taxes. Taxes on automobiles and on owned homes, and sales and excise taxes are included in consumption expenditures. Business taxes and taxes on income-producing property were deducted in calculating net income.

<sup>5</sup> These estimates represent net changes in family and personal assets or liabilities, exclusive of gains or losses from revaluation of assets. At the lower income levels they appear as average net deficits for the year, the surpluses of some families in the income group being more than offset by the deficits of other families.

No. 358.—NET DEBT IN THE UNITED STATES: 1929 TO 1939

NOTE.—Net indebtedness in the United States consists of public and private, long-term and short-term, corporate and noncorporate debts, originated for productive, consumptive, and other purposes, after deductions have been made for duplicating and overlapping debts (1) incurred and recorded more than once in the performance of one purpose, and (2) debts issued and held by issuers or by their affiliates. The debts of financing intermediaries, such as banks, insurance companies, governmental corporations and lending agencies which assemble the savings of initial lenders and make loans directly or indirectly to ultimate borrowers are accordingly excluded from the totals. Excluded also are those debts of private corporations issued and held by units of a "corporate system" bound together by a common management, and the debts of Government units issued and held by their sinking, trust and investment funds. Assets of such funds other than those consisting of the debt instruments described are not deducted in obtaining net debt. The aggregates are, in the main, composed of indebtedness outstanding at the end of the calendar year, and accordingly are treated as year-end totals

### 13. PRICES

GENERAL NOTE.—The wholesale-price index of the Department of Labor is based on primary market quotations of 784 commodities beginning 1926, 813 beginning January 1938, and 863 beginning March 1940; a smaller number of commodities was covered in earlier years. The price of each article is weighted by the approximate quantity marketed during a period approximating that covered by the index. Beginning with 1921, in computing indexes for commodity groups, articles falling under more than one of the classifications were included under each classification. For example, articles produced on the farm which reach the consumer practically unchanged in form, such as potatoes, milk, and eggs, were included among both farm products and foods. However, in computing the index for all commodities such articles were counted only once.

The retail-food-cost indexes presented in this section for periods beginning January 1935 are revised indexes based on the distribution of expenditures as shown by the 1934-36 study made by the Bureau of Labor Statistics of expenditures of wage earners' and lower salaried workers' families. Differences in changes in retail-food costs as shown by the revised, as compared with the unrevised, data are due largely to the relatively greater importance of citrus fruits and green vegetables and the lesser importance of cereals, potatoes, and apples in the revised index. The revised indexes are computed from prices of 54 foods. Aggregate costs of 54 foods in each of 51 cities, weighted to represent total purchases, have been combined for the United States with the use of population weights. In accordance with a recommendation of the Central Statistical Board, Bureau of the Budget, an average of the years 1935-39 is being used as a base in presenting these revised indexes of food costs. Indexes for all periods prior to January 1935 are converted from indexes computed for corresponding periods on the 1923-25 base.

The farm-price index is based on prices paid to producers for 34 major crops and, beginning 1924, also 13 commercial truck crops. Average quotations for the period August 1909-July 1914 are used as a base, and each price series is weighted by the average annual marketings of farmers in the years 1924 to 1926.

No. 366.—PRICES, WHOLESALE—INDEXES, ALL COMMODITIES AND BY ECONOMIC CLASSES: 1916 TO 1940

NOTE.—Figures in boxes indicate number of quotations. As originally published, Bradstreet's "Index" is the sum of the prices per pound of 96 commodities; Dun's represents the aggregate cost per capita of a year's supply of the approximately 300 commodities included. In the following table, both series have been expressed as a percentage of 1926 by the Bureau of Foreign and Domestic Commerce. Indexes of the National Bureau of Economic Research for 1916 to 1928 are unweighted geometric means for approximately 400 commodities (converted from a 1913 base to a 1926 base by the Bureau of Foreign and Domestic Commerce), for subsequent years they are weighted arithmetic means for 680 price series, the weights being based upon the average value of production in 1927 and 1931. For method of computing the Department of Labor index, see general note, p. 322

<sup>1</sup> Formerly "Finished products."

<sup>2</sup> Perishable and semidurable.

<sup>3</sup> Effective March 1940. In earlier years a smaller number of commodities was included.

<sup>4</sup> Number of quotations used beginning 1929; see headnote regarding earlier years. The sum of the number of quotations for producers' and consumers' goods and for durable and nondurable goods is greater than the number of all commodities owing to duplication of certain price series in the classifications. For example, identical price quotations on flour are used in both producers' goods and consumers' goods.

<sup>5</sup> Beginning December 1937, discontinued by reporting source.

No. 367.—COST OF GOODS PURCHASED BY WAGE EARNERS AND LOWER-SALARIED WORKERS IN 33 LARGE CITIES COMBINED—INDEXES: 1913 TO 1940

NOTE.—1935-39=100. Figures for food represent 51 cities since June 1920 and a smaller number in earlier years; other figures, 19 cities from 1913 to 1917, 32 cities from 1918 to 1934, and 33 cities thereafter. Totals from 1913 to 1924 are weighted by relative importance of items as ascertained by country-wide study of family expenditures in 1917-19. Totals from 1930 to date are weighted by relative importance of items as ascertained by a study of family expenditures in 1934-36. Totals for the intervening years, 1925 through 1929, are weighted by an average of the 1917-19 and the 1934-1936 expenditure data. Except for 1913, the annual average indexes for items other than food are estimates based on indexes compiled as of particular dates at irregular intervals shown in previous issues of this publication. They represent weighted averages of indexes for each pricing period affecting the year. For example, where goods were priced in June and December, the indexes for December of the previous year were considered in arriving at the average of the year. The annual average food index is based on monthly indexes

No. 373.—UNIT VALUES, ANNUAL AVERAGE, OF IMPORTANT ARTICLES IMPORTED: 1909 TO 1939

NOTE.—The values are required by law to represent the values of the goods in the foreign markets whence exported to the United States. "Ton" signifies long ton of 2,240 pounds. The averages are obtained by dividing the total value of imports of the specified article by the total quantity, and as in some commodities there may be considerable variations in price between different grades, methods of packing, etc., and as the proportions of the grades, etc., may vary from year to year, the averages in such cases may show the actual price movements only roughly

## No. 874.—HOURS AND EARNINGS, AVERAGE, IN SELECTED MANUFACTURING INDUSTRIES: 1935 TO 1939

NOTE.—The averages in this table are based on monthly data supplied by representative establishments in the respective industries. As the number of such establishments varies slightly from month to month, the averages for different years are not in all cases strictly comparable; but the reporting "samples" are, in general, large enough to be representative of the industries. The average weekly earnings do not represent full-time earnings, inasmuch as the data from which they are computed cover both full-time and part-time workers. The average weekly hours and average hourly earnings are derived from somewhat smaller samples than the average weekly earnings, and therefore the product obtained by multiplying the hours by the hourly earnings is not identical with the average weekly earnings

No. 375.—EARNINGS, AVERAGE WEEKLY, IN MANUFACTURING INDUSTRIES;  
COST OF LIVING; WEEKLY EARNINGS ADJUSTED TO COST OF LIVING—INDEXES:  
1922 TO 1939

NOTE.—1923-25 average=100. The indexes of average weekly earnings in this table are derived from the employment and pay-roll indexes shown in table 370. The indexes of cost of living are those shown in table 367, p. 328, converted to a 1923-25 base. The significance of changes in average earnings is affected by such considerations as labor productivity, labor cost per unit of output, labor turnover, and wholesale prices. Such qualifying data are embodied in detailed reports of the Bureau of Labor Statistics

<sup>1</sup> Changes in United States wage rates are affected by the relative number of men employed in areas with higher or lower wage rates.

<sup>2</sup> Beginning with March 1932 through December 1935, data from State projects also are included.

<sup>3</sup> Average for 10 months. <sup>4</sup> Average for 11 months.

<sup>5</sup> Federal-aid projects were at a low level for 1933 to 1935 and wage rates are not representative; see data for emergency, etc., projects. <sup>6</sup> Works Program as such abandoned July 1939.

<sup>7</sup> Data are based upon the type of project that employed the greatest number of men for the given year.

**No. 379.—EMPLOYMENT AND PAY ROLLS IN MANUFACTURING INDUSTRIES—INDEXES, BY MONTHS: 1922 TO 1940**

NOTE.—Monthly average, 1923-25=100. Indexes are based on monthly reports from representative establishments in 90 manufacturing industries. These industries and industry groups are shown in tables 381-388. The base used in computing these indexes is the 3-year average, 1923-25, taken as 100. Indexes are not adjusted for seasonal variation. Indexes in this table and tables 380-388 have been adjusted to conform with the Federal Biennial Census statistics on factory employment and pay rolls through the year 1937 and supersede the previously published series. It was not found practicable to follow some of the modifications made by the 1937 census in industry classifications because comparable data were not available from the census for the base-period years 1923 and 1925. In such cases the indexes of employment and pay rolls between 1935 and 1937, as in earlier revisions, were adjusted to movements of selected census data on the assumption that such movements would agree closely with those of the former census series. For indexes of employment adjusted for seasonal variations, see table 380.

No. 384.—EMPLOYMENT AND PAY ROLLS IN MANUFACTURING INDUSTRIES—  
INDEXES, FOR SPECIFIED STATES: 1925 TO 1940

NOTE.—Index numbers for New Jersey, Pennsylvania, and Delaware, relative to monthly average of the years 1923-25 as 100; for Massachusetts, New York, Illinois, and Wisconsin, monthly average of the years 1925-27. Reports cover the week ending nearest the 15th of the month, except for New York prior to 1935 which covered the week including the 15th of month. The indexes are not adjusted for seasonal variation and are unweighted, except for Pennsylvania and Wisconsin as stated in footnotes

<sup>1</sup> Compiled by Massachusetts Department of Labor and Industries, based upon monthly returns from approximately 1,800 manufacturing establishments employing about 60 percent of the factory wage earners in the State. Office workers assigned to productive departments are included, but not executives, salaried officers, etc. The employment indexes are adjusted to the annual State census of manufactures through 1936. Pay-roll indexes are based upon a computation of employment times average weekly earnings.

<sup>2</sup> Compiled by the New York State Department of Labor, based upon monthly reports from approximately 2,412 manufacturing firms who employ about 38 percent of all the factory workers in the State. Reports cover employees in both office and shop, including foremen. Executives and salesmen are omitted, and administrative and sales offices located away from the plants are not covered.

<sup>3</sup> Compiled by the Federal Reserve Bank of Philadelphia. For New Jersey, indexes are based upon monthly reports to the bank for 1925 and 1926 and since then, to the New Jersey Bureau of Statistics and Records of the Department of Labor. Current reports are from about 330 manufacturing plants which account for approximately 60 percent of all wage earners engaged in manufacturing industries of the State and 67 percent of the total wage payments. For Pennsylvania, indexes are based upon reports collected by the bank in cooperation with the U. S. Bureau of Labor Statistics and the Pennsylvania Department of Labor and Industry. Current reports are from over 2,300 manufacturing plants and represent about 59 percent of the wage earners and 64 percent of the wage payments in the manufacturing industries of the State. Indexes are weighted according to the relative importance of each industry in the State totals. For Delaware indexes are based upon reports collected by the bank in cooperation with the U. S. Bureau of Labor Statistics. Current reports are from about 82 manufacturing plants and represent approximately 60 percent of all workers engaged in manufacturing industries of the State and 70 percent of the total wage payments. The indexes for the 3 States have been adjusted to conform with the Federal Census of Manufactures data through 1937 and will be similarly adjusted to subsequent censuses.

<sup>4</sup> Compiled by the Illinois Department of Labor, based upon monthly reports from about 2,500 manufacturing plants covering wage earners (production employees) only. Reports represent approximately 69 percent of all wage earners engaged in manufacturing industries of the State and 78 percent of the total wage payments.

<sup>5</sup> Compiled by the Industrial Commission of Wisconsin, based on monthly reports (covering manual employees only) from representative manufacturers who employ about 81 percent of total factory earners and whose pay rolls are about 83 percent of total factory pay rolls in the State. Employment and pay-roll indexes computed for months through July 1937 are weighted relatives of totals. Employment and pay-roll indexes for subsequent months and indexes of average weekly earnings for all months are unweighted relatives. The indexes have been adjusted to Census data through 1935. Comparable indexes for months prior to January 1929 are not available.

**No. 386.—EARNINGS, AVERAGE WEEKLY AND HOURLY, IN 25 MANUFACTURING INDUSTRIES, BY LABOR GROUPS: 1925 TO 1939**

NOTE.—Index numbers based on 1923 as 100. Data cover a representative number of plants which employed 1,700,000 workers during 1939. The earnings are computed by weighting the average earnings in each industry according to the relative importance of the industry as revealed by the Federal Biennial Census of Manufactures for 1923. In addition, each labor group is weighted according to the relative proportion of the group in each industry as revealed in the Conference Board's studies during the 3-year period 1927-29. The pay-roll data are based upon the first full week in each month, or, if a generally recognized holiday falls in that week, upon the succeeding week.

No. 388.—EMPLOYMENT, PAY ROLLS, AND AVERAGE WEEKLY WAGES FOR FULL-TIME EMPLOYEES, BY OCCUPATIONAL GROUPS, FOR SPECIFIED INDUSTRIES OR BUSINESSES: 1935

NOTE.—Pay-roll figures are in thousands of dollars. Data are for 1 week in 1935—in general, the week ended October 26, but where this period was not representative figures are for 1 week of normal employment. The figures are summarized from reports secured in connection with the 1935 Census of Business, and cover only those establishments or concerns which gave detailed information by occupational groups. For the average number of employees (full-time and part-time) and total pay rolls for 1935, consult index for references to data for the individual industries and businesses shown elsewhere in this publication

No. 389.—WAGE RATES PER HOUR AND HOURS PER WEEK—INDEXES OF UNION SCALES IN BUILDING AND PRINTING TRADES, BY OCCUPATIONS: 1909 TO 1939

NOTE.—Data for the earlier years cover 39 cities. The coverage was gradually extended until, beginning with 1938, 72 cities were included. Prior to 1938 the figures were based upon the scale prevailing May 15 each year. For 1938 and 1939 the study was made as of June 1. The relative wages are percentages which indicate the change in wages per hour. The relative hours are percentages showing the change in the regular full-time hours per week, account not being taken of loss of time from slack work or other causes, nor of overtime work

**NO. 391.—STRIKES—NUMBER, WORKERS INVOLVED, AND MAN-DAYS IDLE, BY MAJOR ISSUES INVOLVED: 1927 TO 1939**

Note.—The term "strike" is here used in the generic sense to include all stoppages of work due to labor disputes, whether initiated by the employers (lock-outs) or by the workers. Strikes involving fewer than 6 workers or lasting less than 1 day are not included. Information regarding strikes is obtained principally from the public press, union publications, and trade journals. Reports are also received from the various Government labor boards and conciliation services. For the first time, information was also obtained from one of the clothing unions, which began in 1933 to keep a complete record of all strikes conducted by the union.

No. 395.—EMPLOYMENT AND PAY ROLLS ON PROJECTS FINANCED FROM PUBLIC WORKS ADMINISTRATION FUNDS: JULY 1933 TO JUNE 1940

NOTE.—Pay-roll disbursements in thousands of dollars. Construction projects financed by the Public Works Administration are those projects authorized by the National Industrial Recovery Act of June 1933. This program of public works was extended to June 30, 1937, by the Emergency Relief Appropriation Acts of 1935 and 1936. The Public Works Administration was continued until July 1, 1939, by the P. W. A. Extension Act of 1937, and to June 30, 1941, by the P. W. A. Appropriation Act of 1938. Data for employees engaged on force-account projects (projects for which contracts are not let) are duplicated in employment figures given elsewhere for Federal executive service and railroads. Monthly figures cover periods ended on the 15th. Figures for July 1935 and subsequent months include data for employees working on P. W. A. projects financed from funds provided by the Emergency Relief Appropriation Acts of 1935, 1936, and 1937, and P. W. A. Appropriation Act of 1938. See table 396

**No. 396.—EMPLOYMENT AND PAY ROLLS ON PROJECTS FINANCED FROM EMERGENCY RELIEF APPROPRIATION ACTS FUNDS: JULY 1935 TO JUNE 1940**

NOTE.—Pay-roll disbursements in thousands of dollars. The figures cover those projects originally financed by the Works Program which was inaugurated by the President by the authority of the Emergency Relief Appropriation Act of 1935, continued by subsequent acts, and abandoned as such in July 1939. Included are those projects conducted under the supervision of the Work Projects Administration (prior to July 1939, the Works Progress Administration), those conducted by the Public Works Administration, those of the National Youth Administration (formerly under Works Progress Administration, now in Federal Works Agency), and other Federal agency projects financed from the Emergency Relief Appropriation Acts. The activities of the Civilian Conservation Corps financed from the Emergency Relief Appropriation Act of 1935 are not included in these figures. Unless otherwise stated, figures refer to calendar months

## GENERAL NOTE

**Old-age and Survivors Insurance.**—Federal old-age and survivors insurance, administered by the Social Security Board under the Social Security Act as amended in August 1939, covers employment in industry and commerce. Specified employments are excepted, notably agricultural labor, domestic service, services for government and for certain types of nonprofit organizations, and self-employment. In January 1940, monthly benefits became payable to qualified workers at age 65 and also to certain dependents of beneficiaries and certain survivors of insured workers. Benefits are based on the legally defined average wage of the insured and are paid from the Federal Old-Age and Survivors Insurance Trust Fund, to which is appropriated annually an amount equal to the total taxes paid by employers and employees under the Federal Insurance Contributions Act. (A separate system, administered by the Railroad Retirement Board, covers employees of railroads and certain of their subsidiaries and affiliates. See pp. 384 to 388.)

Figures for 1937 published in the 1939 edition of the Statistical Abstract are not comparable with 1938 figures given in tables 401 to 404.

**Unemployment Compensation.**—The Federal-State unemployment compensation program provides for payments to persons who are able and willing to work but are unable to find jobs. The contributions collected under State laws are designed to provide a fund to be used solely for this purpose. Employers, and in some States employees also, contribute definite proportions of pay rolls and wages to a special fund, from which qualified unemployed workers may draw benefits, limited as a rule by the amount of their prior employment and the wage rate. Under the Social Security Act the Social Security Board has two statutory responsibilities in the administration of the unemployment-compensation program. It certifies each year to the Secretary of the Treasury, for normal and additional tax-credit purposes, the State laws which conform to the standards prescribed; it also certifies grants to defray necessary costs of administering the State program for those States which, in law and administration, conform to the standards prescribed in title III of the act. Funds are certified in the amounts determined by the Board to be necessary for the proper administration of State laws, including administration of employment services in connection with payment of benefits. Funds for State employment services are also allocated by the Board under the provisions of the Wagner-Peysor Act.

**Public Assistance.**—Under the Social Security Act, the Federal Government shares with the States the costs of assistance given to needy persons and families. The assistance in which the Federal and State governments are thus collaborating is of three types: (1) Aid to needy persons aged 65 and over, (2) aid to the needy blind, and (3) aid to dependent children under the age of 16 who have been deprived of parental support, or under the age of 18 if regularly attending school. To receive a Federal grant under any one of these programs, a State must submit a plan which can be approved by the Social Security Board as meeting the basic requirements of the act, and, after approval of its plan, must supply with its requests for Federal funds the data required by the Board.

Public assistance under the Social Security Act obviously is related to other forms of public aid maintained by Federal, State, and local governments. The Social Security Board has therefore undertaken, at the request of other governmental agencies and with their cooperation, to report on all public aid to persons in need.

### NO. 401.—OLD-AGE INSURANCE—NUMBER OF EMPLOYEES, BY AGE AND BY SEX, BY INTERVAL OF EARNINGS, FOR THE UNITED STATES: 1938

NOTE.—Age at birthday nearest July 1, 1938. Of the 65 years or older group, nearly 80 percent became 65 during 1938 and consequently earned some taxable wages in that year before passing the age limit imposed. Figures corrected to Aug. 15, 1940. See headnote, table 402, and general note above

No. 402.—OLD-AGE INSURANCE—NUMBER OF EMPLOYEES AND AMOUNT OF TAXABLE WAGES, BY SEX, BY STATES AND TERRITORIES: 1938

Note.—Wages in thousands of dollars. Figures in this table and in tables 401 and 403 are partly estimated, and, plus the exclusions referred to in note 2 below, represent 100 percent of all employees with taxable wages in 1938 and their taxable wages. Taxable wages are defined as excluding wages of employees 65 years and over, wages earned in excess of \$3,000 in the service of any one employer within a year, and wages earned outside the industries covered by the Social Security Act. Figures corrected to Aug. 15, 1940. See also general note, p. 366

<sup>1</sup> State of employment was indicated only for employees for whom taxable wages were reported for the fourth quarter of 1938, their wages for the entire year being allocated to that State; State of registration was utilized for the remaining employees in estimating the distribution by State of employment. Of the latter class, there were 4,846,765 males with taxable wages of \$2,531,488,000, and 2,053,531 females with taxable wages of \$467,619,000.

**No. 404.—OLD-AGE INSURANCE—NUMBER OF EMPLOYEES IN FOURTH QUARTER OF 1938 AND TOTAL AMOUNT OF THEIR 1938 TAXABLE WAGES, BY AGE GROUPS, BY SEX, AND BY INDUSTRIAL DIVISIONS**

**NOTE.**—Wages in thousands of dollars. This table excludes data for 2,554,210 workers in covered employment in the fourth quarter of 1938 and for their taxable wages of \$2,597,377,000 received during 1938. These data could not be included because the returns were uncoded industrially, or because the workers were in industries other than those listed, or because their sex was unknown. The addition of these data to the totals for workers and wages appearing in the body of the table gives a total of 23,623,916 for workers and \$23,617,466,000 for taxable wages. These totals differ from those in tables 401 and 402 because they pertain only to workers employed in the fourth quarter of 1938 and because no adjustments have been made in this table to exclude 1937 taxable wages which were identified for posting after July 9, 1938, or to include 1938 taxable wages which were identified for posting after May 12, 1939, and additional workers for whom they were reported. Workers in the fourth quarter and their taxable wages for the year were assigned to the industrial group in which they were employed in the fourth quarter; those in multi-industry employing organizations were allocated to the primary industry, as determined by the largest number of employees in such organizations in the United States engaged in the same combination of industries. Figures are corrected to Aug. 15, 1940. See also headnotes, tables 401 and 402, and general note, p. 366

<sup>1</sup> Unadjusted for returned or voided benefit checks. For most States, figures for all unemployment include irregular payments not broken down by type of unemployment.

<sup>2</sup> Includes payments for part-total unemployment except where otherwise noted. Payments for partial unemployment are not provided by State law in Mass., Miss., Mont., N. J., N. Y., and Pa. Of these, only Mississippi provides for payments of less than the full weekly benefit amount for total unemployment, i. e., "part-total" unemployment. In Kentucky, which pays benefits for part-total unemployment, the provision for benefits for partial unemployment became effective Jan. 1940. Provision for payment of benefits for partial and part-total unemployment in Mich. became effective Jan. 1939 and in Nebr. in May 1939.

<sup>3</sup> Data for Jan. not reported by Calif., Maine, and Oreg.; for Jan.-Mar., by Mass. and Va.; for May and June, by Ind.; and for entire year, by N. Y.

<sup>4</sup> Data for Feb.-Mar. not reported by Conn.; for Feb.-July, by Md.; and for entire year, by N. C.

<sup>5</sup> Data for Jan. not reported by Alaska, Nev., and Tex.; for Jan.-Mar., by N. C.; and for Jan.-May, by Idaho.

<sup>6</sup> Excludes "additional claims."

<sup>7</sup> Data for Feb., Mar., and Apr. were for total unemployment only.

<sup>8</sup> Data for Feb. and Mar. were for total unemployment only.

<sup>9</sup> Excludes "additional claims" Sept.-Dec. in Md. and for Jan.-Sept. in N. J.

<sup>10</sup> Payments for part-total unemployment included with payments for total unemployment.

<sup>11</sup> Includes claims for total and part-total unemployment only.

<sup>12</sup> Payments for part-total unemployment included with payments for total unemployment Jan.-Aug. and with payments for partial unemployment Sept.-Dec.

# No. 408.—UNEMPLOYMENT COMPENSATION—NUMBER OF EMPLOYEES, BY MAJOR INDUSTRIAL DIVISIONS, BY STATES AND TERRITORIES, 1938

NOTE.—Data classified by industry groups listed in the Social Security Board Industrial Classification Code, edition of Mar. 15, 1937, with slight modifications in the major industrial divisions. Figures represent monthly averages and are based on the number of covered employees reported each month on the various types of pay rolls. Figures are preliminary and subject to revision.

<sup>1</sup> Includes industry groups No. 71 (eating and drinking places) and No. 75 (auto repair services, garages, and filling stations). <sup>2</sup> Includes ind. group No. 68 (real estate, ins., loans, law offices, or any comb.).

<sup>3</sup> Includes total service (less No. 71 and No. 75—included in trade), professional services, industry group No. 86 (membership organizations, such as trade associations, trade unions, etc.), and industry group No. 88 (governmental agencies other than Federal).

<sup>4</sup> Includes industry groups Nos. 67 and 68 (administrative offices and auxiliary units), industry group No. 85 (private business organizations not elsewhere classified), and other industries not elsewhere classified.

<sup>5</sup> Excludes industry group No. 40 (interstate railroads) not covered by State law.

<sup>6</sup> Includes logging and lumbering camps, not attached to sawmills and logging contractors.

<sup>7</sup> Over 80 percent auxiliary units and holding companies. <sup>8</sup> Includes plantation agencies.

<sup>9</sup> Not adjusted for change in coverage from employers of 8 or more to 4 or more, effective Oct. 1, 1938.

<sup>10</sup> Monthly averages based on data for 8 months (March, and June to December).

<sup>11</sup> Includes approximately 18,000 covered workers in domestic service covered by State law. Monthly averages are derived from monthly employment totals based on the sum of all employees on the monthly pay rolls, plus the highest number on the semi-monthly, weekly, and any other pay rolls. Does not include approximately 10,847 workers reported under temporary numbers each month. <sup>12</sup> See note 13.

<sup>13</sup> Includes street, suburban, and interurban railways and city and suburban bus lines.

<sup>14</sup> Based on 9-month data (April through December). <sup>15</sup> No industrial classifications reported.

<sup>16</sup> Data adjusted to conform with Social Security Board industrial classifications.

<sup>17</sup> Includes approximately 13,000 government employees (other than Federal) covered by State law.

<sup>1</sup> Represents sum of balances at end of month in State clearing account, benefit-payment account, and Unemployment Trust Fund Account maintained in the U. S. Treasury.

<sup>2</sup> Includes contributions plus penalties and interest collected from employers during 1939. Figures are adjusted for refunds of contributions and for dishonored contribution checks. Employer contributions of 2.7 percent are collected in all States except the District of Columbia and Michigan, in which the rate is 3 percent; in New York, the rate is 3 percent for employers covered by State law but not covered by title IX; those employers covered by title IX pay 2.7 percent. Employee contributions are collected in 6 States. See note 5.

<sup>3</sup> Except interest earned on funds in State accounts in the Unemployment Trust Fund which is credited and reported by the U. S. Treasury in the last month of each quarter.

<sup>4</sup> Adjusted for voided benefit checks.

<sup>5</sup> Employee contributions of 1 percent are collected in Alabama, California, Kentucky, and New Jersey; of 0.5 percent in Louisiana; and 1.5 percent in Rhode Island.

<sup>6</sup> Under provision of the Connecticut law, administrative grants equal to the preliminary and "liquidating" amount to be transferred to the Railroad Unemployment Insurance Account are to be withheld by the Social Security Board, and the State is permitted to withdraw from unemployment compensation insurance funds the amounts found necessary for administrative purposes, up to the amount so withheld. As of Dec. 31, 1939, \$509,000 had been withheld.

<sup>1</sup> Figures from the F. S. A. represents net amount of emergency grant vouchers certified to cases and value of commodities distributed during month.

<sup>2</sup> Includes earnings of persons certified as in need and earnings of all other persons employed on work and construction projects financed in whole or in part from Federal funds. Figures for the C. C. O. represent earnings of enrolled persons only.

<sup>3</sup> Figures through January 1936 represent payments from State and local funds only. Thereafter, figures represent payments to recipients from Federal, State, and local funds in States administering the 3 special types of public assistance under the Social Security Act and from State and local funds only in States not participating under the act. After 1939, figures include payments for hospitalization and burials.

<sup>4</sup> Figures through March 1937 from the W. P. A., Division of Statistics. Figures for 1933-35 include obligations incurred for direct relief, and earnings of relief and nonrelief persons (other than of administrative employees) employed under the general relief program of the F. E. R. A.; they also include an estimated amount of obligations incurred for relief extended to cases by local authorities from public funds under the poor laws. After 1939, figures include payments for hospitalization and burials.

<sup>5</sup> Figures from the W. P. A., Division of Statistics; include obligations incurred for relief extended to cases under the emergency education, student aid, rural rehabilitation, and transient programs of the Emergency Relief Administrations largely financed from F. E. R. A. funds.

<sup>6</sup> Figures estimated by the C. C. O. by multiplying average monthly number of persons enrolled by an average of \$70 per month through June 1939, \$67 for July-October and \$66.25 for November and December. This average amount is based on amount of obligations incurred for cash allowances and for clothing, shelter, subsistence, and medical care of persons enrolled, and for certain other items.

<sup>7</sup> Figures for September 1935-June 1936 from the W. P. A., Division of Statistics; thereafter, from the N. Y. A.; represent earnings during all pay-roll periods ended during month.

<sup>8</sup> Figures from the W. P. A., Division of Statistics; represent earnings of persons employed on projects operated by the W. P. A. and, after June 1938, earnings of persons employed on Federal agency projects financed by transfer of W. P. A. funds; cover all pay-roll periods ended during month.

<sup>9</sup> Figures from the Bureau of Labor Statistics, Division of Construction and Public Employment; represent earnings on other work and construction projects financed in whole or in part from Federal funds and cover all pay-roll periods ended during monthly period ended on 15th of specified month.

<sup>10</sup> Figures from the W. P. A., Division of Statistics; represent estimated total earnings during month.

<sup>11</sup> Less than \$500.

<sup>1</sup> Estimated by the W. P. A. and the Social Security Board.

<sup>2</sup> Includes recipients assisted from Federal, State, and local funds for programs administered under State plans approved by the Social Security Board, and from State and local funds for those administered under State laws without Federal participation. After 1939, includes cases receiving hospitalization and burials.

<sup>3</sup> Figures for January 1933—March 1937 from the W. P. A., Division of Statistics. Figures represent the number aided during the month. Figures for 1933-35 include cases receiving direct relief, and relief and nonrelief persons (other than administrative employees) employed under the general relief program of the F. E. R. A.; they include an estimated number of general relief cases aided by local authorities from public funds under the poor laws. After 1939, figures include cases receiving hospitalization and burials.

<sup>4</sup> Figures from the W. P. A., Division of Statistics; include cases receiving relief during month under emergency education, student aid, rural rehabilitation, and transient programs of emergency relief administrations largely financed from F. E. R. A. funds.

<sup>5</sup> Figures from the F. S. A.; represent net number of emergency grant vouchers certified to cases and number of cases receiving commodities purchased by the F. S. A. and distributed during month.

<sup>6</sup> Includes persons certified as in need and all others employed on work and construction projects financed in whole or in part from Federal funds. Figures for C. C. C. represent enrolled persons only.

<sup>7</sup> Figures from the C. O. C.; estimated for March 1933—March 1935; for subsequent months they are averages computed by the C. C. C. from reports on number of persons enrolled on 10th, 20th, and last day of each month except for the Indian Division, for which averages are computed from daily reports.

<sup>8</sup> Figures for September 1935—June 1939 from W. P. A., Division of Statistics; thereafter, from the N. Y. A.; represent number of different persons employed during month.

<sup>9</sup> Figures from the W. P. A., Division of Statistics; represent average weekly number of persons employed during month on projects operated by the W. P. A. and, after June 1938, persons employed on Federal agency projects financed by transfer of W. P. A. funds.

<sup>10</sup> Figures from the Bureau of Labor Statistics, Division of Construction and Public Employment; represent average weekly number of persons employed on other work and construction projects financed in whole or in part from Federal funds during monthly period ended on 15th of specified month.

<sup>11</sup> Figures from W. P. A., Div. of Statistics; estimated number employed during month.

<sup>12</sup> Fewer than 500 persons.

NO. 418.—RAILROAD RETIREMENT—BENEFIT PAYMENTS CERTIFIED TO THE SECRETARY OF THE TREASURY, BY CLASS OF PAYMENT: 1936 TO 1939

NOTE.—The Railroad Retirement Act, as passed in 1935 and amended in 1937, established a Federal retirement system for railroad employees. Employers under the act include carriers—railroads, express companies, and sleeping-car companies; carrier affiliates—refrigerator-car loan companies, for example; organizations such as railroad or traffic associations maintained by 2 or more employers; and standard railway-labor organizations, national in scope. The act provides for 5 classes of retirement benefits:

- (1) Employee annuities, both disability and old age, based on an employee's years of service and average monthly compensation, exclusive of earnings above \$300, with employers under the act.
- (2) Survivor annuities, paid to the surviving spouse of a deceased employee annuitant who had elected a reduced annuity during his or her lifetime in order to provide a lifetime annuity for his or her surviving spouse.
- (3) Death-benefit annuities, paid under the 1935 act to the surviving spouse or dependent next of kin of a deceased annuitant or of a deceased employee who at the time of his or her death was entitled to receive an annuity. These annuities are equal to half the annuities paid or payable to the employee annuitants before their death, and are payable for 12 months.
- (4) Lump-sum death benefits, paid under the 1937 act to a designated beneficiary or to the deceased employee's legal representative. These benefits are equal to 4 percent of the compensation earned as an employee after Dec. 31, 1936 (excluding compensation in excess of \$500 in any 1 month), less the aggregate amount of any employee or survivor annuities that may have been paid or payable. If an employee annuitant had elected a joint and survivor annuity and his or her spouse was alive at the time of his or her death, the death benefit is not payable until after the death of the spouse.
- (5) Pensions paid under the 1937 Act to individuals who were, on both March 1 and July 1, 1937, on the pension or gratuity rolls of employers under the act and who were not eligible on July 1, 1937, for annuities based in whole or in part on service prior to Jan. 1, 1937. The pensions are equal in amount to the individual pensions or gratuities granted by employers, but cannot exceed \$120 per month.

The funds of the retirement system come from an equal tax on employers and employees, based on the amount of compensation, not in excess of \$300 in any 1 calendar month, earned by each employee. The changes in the tax rate are as follows: Calendar years 1937, 1938, 1939, rate 2¾ percent; 1940, 1941, 1942, rate 3 percent; 1943, 1944, 1945, rate 3¼ percent; 1946, 1947, 1948, rate 3½ percent; 1949 and subsequent years, rate 3¾ percent. Thus the total amount of the tax available for the first 3 years of the system is 5¼ percent of total employee compensation (as defined above), and for the year 1949 and thereafter it will be 7½ percent.

<sup>1</sup> Total benefit payments on basis of vouchers certified to the Secretary of the Treasury are \$8.8 million more than total on basis of checks drawn by disbursing officer. Amounts are certified to the Secretary of the Treasury, and encumbered on books of the Railroad Retirement Board in latter part of month, but checks are not drawn by disbursing officer until first of following month.

<sup>2</sup> Includes payments, for 3 months before Oct. 1, 1937, of \$1,183,542 to temporary pensioners who were eligible for employee annuities.

<sup>1</sup> In a few cases payments are made to more than 1 survivor on account of the death of a single individual. Such payments are here counted as single items. Terminations include those by death and by expiration of 12-month period for which death-benefit annuities are payable. Practically all terminations are of the latter type.

<sup>2</sup> Obtained, after adjustments, by adding the difference between certifications and terminations to number in force at end of preceding period. Adjustments include suspensions, returns to service, commuted lump-sum payments, and reinstatements of suspended payments.

<sup>1</sup> For annuities and pensions in force, residence at time first check was mailed. For lump-sum death benefits, residence at time check was mailed; arbitrarily chosen if divided between 2 or more beneficiaries residing in different States. This was necessary in less than one-half of 1 percent of the payments.

<sup>2</sup> Figures do not represent the number of individuals receiving these annuities. In 4 cases, death benefit annuity payments were being made to more than 1 individual and in 157 cases the same individual was receiving both a survivor annuity and a death benefit annuity.

<sup>3</sup> 1 death benefit annuity at \$16.30 payable to 4 beneficiaries was assigned to North Dakota although 1 of the beneficiaries receiving \$4.03 resided in Minnesota.

No. 422.—RAILROAD UNEMPLOYMENT INSURANCE—NUMBER OF APPLICATIONS FOR CERTIFICATES OF BENEFIT RIGHTS RECEIVED, CERTIFICATES OF BENEFIT RIGHTS ISSUED, CLAIMS RECEIVED, CERTIFICATES OF WAITING-PERIOD CREDIT ISSUED, NUMBER AND AMOUNT OF BENEFIT PAYMENTS CERTIFIED, AVERAGE BENEFIT PAYMENT, AND NUMBER OF ACCOUNTS OPENED AND EXHAUSTED: JULY 1939 THROUGH MAY 1940

NOTE.—The Railroad Unemployment Insurance Act, as passed in 1938 and amended in 1939, established a Federal unemployment insurance system for the same employees who are covered by the Railroad Retirement Act. (See headnote, table 418.) Under the Railroad Unemployment Insurance Act contributions first began to accrue and benefits first became payable as of July 1, 1939. Contributions amounting to 3 percent of pay rolls are collected from the employers. Ninety percent of the contributions are used to pay benefits and 10 percent to pay administrative expenses. Unemployed employees may draw benefits if they have earned at least \$150 of creditable earnings in the base year and have served a waiting period of 8 days of unemployment in a period of 15 consecutive days. After the waiting period has been served, benefits are paid for each day of unemployment in excess of 7 in a period of 15 consecutive days up to a maximum of 80 days of benefits in the period of 1 year. The daily benefit amount is related to the amount of base-year earnings.

<sup>1</sup> An application for a certificate of benefit rights is submitted the first time an unemployed worker applies for unemployment insurance benefits, or the first time after the expiration of a benefit year.

<sup>2</sup> A certificate of benefit rights is issued to each employee who has filed an application for a certificate of benefit rights and is eligible for unemployment insurance benefits.

<sup>3</sup> A claim is prepared for each period of 15 consecutive days beginning with a day of unemployment. It contains registrations for each day of unemployment in the 15-day period and is submitted at the end of the period.

<sup>4</sup> A certificate of waiting-period credit is issued to an unemployed worker who has filed his first claim for a 15-day period with registrations for 8 or more days of unemployment.

<sup>5</sup> A benefit payment is certified after the waiting period has been served for each period of 15 successive days with 8 or more days of unemployment. The amount of the certification is the product of the daily benefit amount and the number of days of unemployment in excess of 7 in the 15-day period.

<sup>6</sup> An account is opened with the first benefit payment.

<sup>7</sup> An account is exhausted when an employee has been certified for the maximum number of days of benefits to which he is entitled in a benefit year.

<sup>8</sup> Cumulative through Dec. 1.

<sup>1</sup> Excluding rural free delivery routes, ocean mail routes, and air mail routes to foreign countries.

<sup>2</sup> Audited postal surplus or deficit which is greater or less than excess of receipts or expenditures by the amount of adjusted losses and contingencies.

<sup>3</sup> International includes foreign countries on domestic basis. For explanation, see headnote, table 425.

<sup>4</sup> Data are for continental United States and are estimates except in 1923 and beginning with 1926, when figures are accurate calculations. No estimates made from 1914 to 1922, inclusive.

<sup>5</sup> Postage stamps first issued under act of Mar. 3, 1847, and placed on sale at New York July 1, 1847.

<sup>6</sup> From Nov. 1, 1864, when money-order system first went into operation, to June 30, 1865.

<sup>7</sup> From Sept. 1, 1899, to June 30, 1870. International money orders first issued under convention of Oct. 12, 1847.

<sup>8</sup> Gross revenues of department for 1918 and 1919 include \$44,500,000 and \$71,262,000, respectively, war-tax revenue accruing from increased postage.

**NO. 425.—POSTAL MONEY-ORDER BUSINESS—SUMMARY: YEARS ENDED JUNE 30, 1910 TO 1939**

NOTE.—For revenues from money orders, see table 424. For value of orders issued for other years, see table 423. Money orders are exchanged on a domestic basis not only within this country, but with its outlying possessions, Canada, Cuba, and numerous islands and minor countries neighboring the United States. International-basis orders are exchanged between the United States and its outlying possessions, on the one hand, and other than "domestic basis" foreign countries, on the other. In this table, however, "International" includes money orders exchanged between the United States and "domestic basis" foreign countries, and these are not included in "Domestic"

No. 427.—TRANSPORTATION OF DOMESTIC MAILS, BY CLASS OF SERVICE: 1915 TO 1939

NOTE.—Amounts, except as indicated, in thousands of dollars. Since Nov. 1, 1916, all service on steam railroads is authorized and paid for under the space basis system; formerly, payments were based on a system of quadrennial weighings. Railway mail space units of service vary in size and character and may consist of a car, a section of a car, or a closed pouch carried on a car. Some cars are railway post offices, others are for storage only, about 20 classes of units being distinguished. The "equated unit" represents a calculation of the equivalent of all the different units in terms of a 60-foot car. Annual rate of expenditure (regular authorizations) represents estimated cost for transporting normal mail traffic over regular routes only, based on contracts outstanding at the end of each fiscal year. "Annual cost" includes emergency and side and transfer service. Average rates are based on "regular authorizations"

<sup>1</sup> Includes 10,550 connecting lines for which separate reports were not secured; data for such lines, however, were included in reports of operating companies supplying switchboard service.

<sup>2</sup> Includes data for connecting lines having fewer than 5 telephones per line, as follows: 11,759 lines; 29,000 telephones; and estimated figures for other items as follows: 44,000 miles of single wire; and \$1,300,000 investment in equipment.

<sup>3</sup> Not reported for systems and lines having less than \$5,000 annual income in 1912. For 1917 and 1922, figures represent number of systems and lines reporting central offices; actual number of central offices was probably slightly larger.

<sup>4</sup> Not reported except for systems and lines with income of \$5,000 or more.

<sup>5</sup> Including assessments of mutual companies, and miscellaneous operating revenues.

<sup>6</sup> 83,378,000 miles of wire in cable and 6,193,000 not in cable.

<sup>7</sup> No data.

<sup>8</sup> No comparable data available.

**No. 435.—RADIOTELEPHONES—SUMMARY: 1937**

NOTE.—Figures cover all companies and systems licensed by the United States to engage in the reception and transmission of commercial radiotelephone communications. No data are included for radiotelephone stations such as amateur, experimental, Federal, police, fire, etc., which were not licensed to charge fees for receiving or sending calls. The survey covered U. S. licensees in the United States, Alaska, Hawaii, and Puerto Rico, as well as those operating ship stations

Number of companies or systems	27
Number of stations (as of Dec. 31)	132
Operating revenues applicable to the radio link (dollars)	1,212,073
Revenue calls, total number	147,696
Foreign traffic of the U. S. (calls subject to overseas regulations)	152,607
Ship traffic of the U. S. (calls subject to overseas, coast, and harbor regulations)	126,409
Other traffic—Within the United States; <sup>1</sup> within Alaska; <sup>2</sup> within Hawaii; <sup>3</sup> within Puerto Rico; <sup>4</sup> Hawaii and Puerto Rico with other countries except continental U. S.; and Alaska with ships	68,680

<sup>1</sup> Calls originating, terminating, or relayed in the United States.<sup>2</sup> Originating calls only.

## No. 436.—TELEPHONE SYSTEMS—SUMMARY, CLASS A CARRIERS: 1926 TO 1939

NOTE.—Figures cover Class A telephone carriers which reported for 1939. Class A carriers are those carriers whose average annual operating revenues exceeded \$100,000. The gross operating revenues of Class A carriers reporting in 1937 represented approximately 96 percent of the revenues of all telephone carriers as reported for the Census of Electrical Industries for that year. (See table 431.) The figures include data for carriers consolidated and merged prior to 1939, so far as annual data are available. Intercorporate duplications have not been excluded

<sup>1</sup> The decrease reflected in data shown for the year 1933 is due mainly to the fact that prior to that year the total of wire jointly owned with other companies was included, whereas from 1933 on, only the respondents' portion of jointly owned wire was included.

<sup>2</sup> Data not reported.

<sup>3</sup> In comparing figures in this table, consideration should be given to the effect of the revision of the Uniform System of Accounts, First Revised Issue, and the issue of June 19, 1935, as amended, resulting in certain changes and rearrangements of both the balance sheet and the income statement.

<sup>1</sup> The Western Union Telegraph Co., which operates both land and ocean-cable systems, is counted as 2 companies.  
<sup>2</sup> Exclusive of pole line owned and operated wholly by railway companies.  
<sup>3</sup> Exclusive of wire owned and operated wholly by railway companies, as follows: Reported by all railway companies, 1912, 314,329 miles; reported by railway companies having annual operating revenues of \$1,000,000 or more, 1917, 344,110 miles; 1922, 285,002 miles; 1927, 333,898 miles; 1932, 337,059 miles; 1937, 318,116 miles.  
<sup>4</sup> Not available.  
<sup>5</sup> Data are for land systems only.  
<sup>6</sup> Excluding 31,102,577 lettergrams not distributed according to rate.  
<sup>7</sup> Number of employees includes 7,516 messengers whose wages are not included in amount given for salaries and wages.  
<sup>8</sup> In addition, telegraph revenues amounting to \$25,899,000 were reported by companies primarily engaged in supplying telephone service.  
<sup>9</sup> Data for ocean-cable business of Western Union Telegraph Co. included with those for land systems.

<sup>1</sup> Fuel equivalent is calculated from kilowatt-hours of power produced wherever available, as is true of all public-utility plants since 1919. Otherwise fuel equivalent is calculated from reported horsepower of installed water wheels. Prior to 1890 data were unsatisfactory, but estimates are included in total.

<sup>2</sup> Calculated at 26,200,000 British thermal units per ton.

<sup>3</sup> Based on amount of coal displaced by gas, as estimated by gas companies.

**No. 443.—ELECTRIC ENERGY—PRODUCTION, BY TYPE OF PRIME MOVER:  
1920 TO 1939**

NOTE.—In thousands of kilowatt hours. Figures for 1939 in this table and those in table 442 and in tables 444 to 448 are based on the operation of 4,126 power plants, owned by 1,677 concerns, generating electric energy for sale. The production and capacity of the following types of plants are included: Privately owned electric utilities, mining and manufacturing (exclusive of plants of those concerns whose sales were less than 10,000 kilowatt hours per month), railways and railroads, municipal electric utilities, Bureau of Reclamation, other Federal projects, cooperatives, power districts, State projects, and publicly owned noncentral stations
