NOTE. — Les monnaies utilisées dans les divers tableaux peuvent être converties l'une dans l'autre, pour une date quelconque, au moyen du rapport entre leurs cours du change exprimés en cents (ou leurs parités suivant le cas) tels qu'ils figurent dans le tableau 123.

Pour un grand nombre de pays, les cours de change en 1932 étaient nominaux (voir à ce sujet les notes au tableau 123).

Le « franc-or » dans lequel sont exprimés les cours de prix donnés dans ce volume, est celui de l'ancienne Union monétaire latine (= franc suisse)

NOTE. — The currencies used in the different tables of the Year-Book may be converted into any others for any date by taking the relation between their respective exchange rates expressed in cents (or their parities) as given in Table 123.

For a large number of countries, the exchange rates in 1932 were nominal (see notes to Table 123).

The « gold franc » in which the price quotations throughout the present volume are expressed is that of the former Latin Monetary Union (= Swiss franc).
