**NOTES AU TABLEAU 2. SUPERFICIE ET POPULATION. NOTES TO TABLE 2. AREA AND POPULATION**

(des cartes géographiques et une liste des Etats membres de la S. d. N. se trouvent à la fin du volume).  
(geographical maps and a list of States Members of the League of Nations will be found at the end of the volume).

*Note générale :* L'astérisque \* devant un chiffre de recensement indique que ce recensement était partiel, p. ex., que seulement la population blanche était recensée et que le reste était estimé. L'astérisque devant des estimations indique des chiffres de caractère incertain. Dans certains cas, la population n'est pas exactement connue (par exemple dans la majorité des possessions africaines, en Chine, Arabie, Libéria, Ethiopie, Haïti, Bolivie) ; dans d'autres cas, les estimations périodiques varient considérablement et ne peuvent être considérées comme reflétant les fluctuations de la population d'une année à l'autre. Dans de nombreux cas, des estimations de caractère incertain ont pu être révisées sur la base des recensements effectués en 1930 et 1931.

En voulant mesurer l'augmentation de la population du monde ou des divers continents, il faudrait tenir compte du fait que pour certains pays, dont la population n'est pas connue exactement, on insère chaque année le même chiffre, et que pour de nombreux autres pays (p. ex. possessions africaines et asiatiques) les données tendent à devenir de plus en plus exactes. Dans certains cas, les critères qui servent de base à des estimations, subissent des modifications et par conséquent, les nouvelles estimations ne font pas suite aux anciennes. Pour toutes ces raisons, les totaux publiés dans les différentes éditions de l'Annuaire, ne peuvent pas être comparés sans qu'on y fasse de nombreux ajustements.

*General Note :* An asterisk \* before a census figure denotes that the census was incomplete—e.g., that it covered white population only, the remainder having been estimated. An asterisk before an estimate means that the figure is uncertain. In some cases the exact population is not known (e.g., in most of the African possessions, in China, Arabia, Liberia, Ethiopia, Haiti, Bolivia) ; in others, the periodical estimates vary considerably, and cannot be taken as reflecting the fluctuations in the population from one year to another. In many cases it has been possible to revise uncertain estimates on the basis of censuses taken in 1930 and 1931.

In gauging the increase of the population of the world or of the different continents, it should be borne in mind that for certain countries, the exact population of which is not known, the same figure is inserted each year, and that the data for a number of other countries (e.g., the African and Asiatic possessions) are gradually becoming more exact. In some cases the criteria on which the estimates are based undergo certain modifications, and the new estimates, therefore, are not directly comparable with the older ones. For all these reasons, the totals published in the different editions of the Year-Book are not comparable without numerous adjustments.

**AFRIQUE.**

<sup>1</sup> La population est dans certains cas purement hypothétique, la majorité des soi-disant recensements coloniaux s'appliquant seulement à la population blanche ; les données relatives aux indigènes représentent, en règle générale, des dénombrements approximatifs dont l'exactitude tend à s'améliorer.

<sup>2</sup> Egypte : le chiffre total de la population contient les bédouins. La superficie peuplée mesure 35.168 km<sup>2</sup>.

<sup>3</sup> Ethiopie, Libéria : population inconnue ; les estimations varient de 5 à 10 millions pour l'Ethiopie et de 2 à 2,5 millions pour le Libéria.

<sup>4</sup> Union Sud-Africaine : A. pop. totale. B. pop. européenne.

<sup>5</sup> Congo belge : la population dénombrée progressivement était à la fin de 1932 de 9.383.000. Le dénombrement n'est pas encore achevé.

<sup>6</sup> Superficie de Nyasaland, Ouganda, Tanganyika : y compris les eaux (Nyasaland : 27.000 km<sup>2</sup> ; Ouganda : 35.000 km<sup>2</sup> ; Tanganyika : 52.000 km<sup>2</sup>).

<sup>7</sup> Somalie, 1931 ; Rio de Oro, 1930 : blancs seulement.

<sup>8</sup> Afrique du Nord esp. : Alhucemas, Melilla, Ceuta et plusieurs autres petites possessions.

<sup>9</sup> Guinée esp. : Fernando-Po, Rio-Muni et plusieurs autres possessions.

<sup>10</sup> Afrique-Equatoriale française : total du Gabon, du Moyen-Congo, de l'Oubangi-Chari et du Tchad.

<sup>11</sup> Afr.-Occ. fr. : la province de Haute-Volta a été supprimée administrativement à partir de janvier 1933, et son territoire rattaché à la Côte d'Ivoire, au Soudan et au Niger.

<sup>12</sup> Algérie : la superficie comprend le Sahara algérien.

<sup>13</sup> Dépendances de Madagascar : Iles du Sud.

<sup>14</sup> Protectorat français du Maroc : y compris des estimations pour « la zone insoumise ».

<sup>15</sup> Mozambique : la « colonie » ou « province » est administrée par l'Etat ; le territoire de Manica et Sofala est administré par la compagnie du Mozambique. La charte de la Compagnie du Nyassa ayant expiré en octobre 1929, son territoire fait à présent partie de la « colonie ».

<sup>16</sup> Les mandats s'appliquent aux colonies ci-devant allemandes ; pour détails, voir éditions précédentes de l'Annuaire.

**AMÉRIQUE.**

<sup>1</sup> Les chiffres pour la population de certains pays sont très incertains. Ceci s'applique particulièrement à la majorité des pays de l'Amérique Centrale, à la Bolivie, à la Colombie, à l'Equateur et au Pérou. Ainsi, les évaluations pour Haïti varient entre 2 et 2,5 millions d'habitants, celles pour la Bolivie entre 2,5 et 3,5 millions et celles pour l'Equateur entre 2 et 3 millions d'habitants ; dans certains cas les relevés tendent à devenir plus complets.

<sup>2</sup> Superficie de Canada, Etats-Unis, Alaska, Nicaragua : y compris les eaux (Canada 588.000 km<sup>2</sup>, Etats-Unis 138.000 km<sup>2</sup>, Nicaragua 12.000 km<sup>2</sup>).

<sup>3</sup> Groenland, superficie : partie libre de glace.

<sup>4</sup> Labrador : y compris 290.000 km<sup>2</sup> de territoire canadien incorporé au Labrador en 1927.

<sup>5</sup> Bolivie, 1900, Venezuela, 1926 : les chiffres totaux de la population recensée contiennent les personnes dont le sexe n'est pas spécifié.

<sup>6</sup> Equateur : les estimations de la superficie varient ; le chiffre donné dans le tableau a été publié par l'Union Pan-Américaine.

**AFRICA.**

<sup>1</sup> The population figures are in certain cases hypothetical, as most of the so-called colonial censuses refer to the white population only. The figures for the native population represent as a rule approximate records which are gradually improving in exactitude.

<sup>2</sup> Egypt : the total population figure includes beduins. The area inhabited amounts to 35,168 km<sup>2</sup>.

<sup>3</sup> Ethiopia, Liberia : population unknown ; the estimates vary between 5 and 10 millions for Ethiopia and between 2 and 2.5 millions for Liberia.

<sup>4</sup> Union of S. Africa : A. Total pop. ; B. European pop.

<sup>5</sup> Belgian Congo : the population progressively recorded was 9,383,000 at the end of 1932. The recording is not yet finished.

<sup>6</sup> Area of Nyasaland, Uganda, Tanganyika : including inland waters (Nyasaland 27,000 km<sup>2</sup> = 10,353 sq. miles ; Uganda = 35,000 km<sup>2</sup> = 13,616 sq. miles ; Tanganyika, 52,000 km<sup>2</sup> = 20,000 sq. miles).

<sup>7</sup> Somaliland, 1931 ; Rio de Oro, 1930 : white population only.

<sup>8</sup> Sp. Northern Africa : Alhucemas, Melilla, Ceuta and several other minor possessions.

<sup>9</sup> Sp. Guinea : Fernando Po, Rio Muni and several other possessions.

<sup>10</sup> French Equatorial Africa : total of Gabon, Middle Congo, Oubangi-Chari and Tchad.

<sup>11</sup> French West Africa : the province of Upper Volta has been administratively abolished as from January 1933. Its territory was ascribed to the Ivory Coast, Sudan and Niger.

<sup>12</sup> Algeria : the area comprises the Algerian Sahara.

<sup>13</sup> Madagascar Dependencies : Southern islands ("Iles du Sud").

<sup>14</sup> French Protectorate of Morocco : including estimates for territories for which returns could not be obtained.

<sup>15</sup> Mozambique : the "colony" or "province" is under State administration ; the territory of Manica and Sofala is administered by the Mozambique Company. As the charter of the Nyasa Company expired in October 1929, its territory is included under "Colony".

<sup>16</sup> The former German colonies are under mandate ; for details, see previous editions of the Year-Book.

**AMERICA.**

<sup>1</sup> The population figures of certain countries are subject to a wide margin of error. This applies in particular to the majority of the Central-American countries, to Bolivia, Colombia, Ecuador and Peru. Thus the estimates for Haiti range from 2 to 2.5 millions, those for Bolivia from 2.5 to 3.5, and those for Ecuador from 2 to 3 millions. In some cases the data are gradually becoming more complete.

<sup>2</sup> Area of Canada, United States, Alaska, Nicaragua : including inland waters (Canada 588,000 km<sup>2</sup> = 226,979 sq. miles ; U.S.A. 138,000 km<sup>2</sup> = 53,000 sq. miles ; Nicaragua 12,000 km<sup>2</sup> = 4,500 sq. miles).

<sup>3</sup> Greenland, area : part free from ice.

<sup>4</sup> Labrador : including 290,000 km<sup>2</sup> (112,000 sq. miles) of Canadian territory transferred in 1927 to Labrador.

<sup>5</sup> Bolivia, 1900, Venezuela, 1926 : the total census figures include persons whose sex was not specified.

<sup>6</sup> Ecuador : estimates of area vary ; the figure given in the table was published by the Pan-American Union.

**ASIE.**

<sup>1</sup> Les estimations de la population sont très incertaines dans le cas de l'Afghanistan (7-11 millions), de l'Arabie (7-10 millions), du Bhoutan, de la Chine, de la Perse, du Nepal, de l'Irak, du Sarawak, de la Syrie et du Liban, de certaines parties de l'Indochine, de la Transjordanie. Les totaux pour le continent sont, par conséquent, dans une large mesure hypothétiques. Au sujet de la répartition de l'U. R. S. S., voir Europe, note <sup>8</sup>.

<sup>2</sup> Arabie : Arabie Saoudienne (Nejd, Hedjaz), Oman, Koweït, Yemen, Hadramout.

<sup>3</sup> Chine : d'après les dénombrements de la population effectués par les gouvernements provinciaux en 1928 et 1929 et complétés par des estimations faites, soit par le Ministère de l'Intérieur, soit par la Société géographique de Wuchang, la population se serait élevée à 452.791.000 habitants. Les estimations publiées par le Service des douanes maritimes chinoises sont plus élevées. Les estimations des autres autorités compétentes varient considérablement.

Selon l'avis d'autorités chinoises compétentes, toutes ces estimations comportent une marge d'erreur très considérable. Le chiffre rond de 450 millions a été inséré dans le tableau à titre d'indication. Il est impossible de faire des estimations annuelles, vu qu'on ne possède pas de critères suffisants permettant de mesurer les fluctuations de la population d'une année à l'autre. La population de la Mandchourie et du Jehol (connus également sous le nom de « Mandchoukou ») avait été estimée en 1932 à 29.600.000.

<sup>4</sup> Turquie, superficie : non compris les lacs et les marécages (9.604 km<sup>2</sup>).

<sup>5</sup> U.R.S.S. : voir Europe, note <sup>8</sup>.

<sup>6</sup> Etablissements des Détroits : Singapour, Penang, Malacca ; dépendances : Wellesley, Iles Dindings, Labuan, Iles Christmas et Cocos-Keel.

<sup>7</sup> Etats Malais fédérés : Perak, Selangor, Negri-Sembilan, Pahang ; non fédérés : Johore, Kedah, Kelantan, Perlis, Trengganu.

<sup>8</sup> Indochine : les données dites « de recensement » représentent en fait, des dénombrements souvent très approximatifs. Le chiffre exact de la population n'est pas connu.

<sup>9</sup> Possessions japonaises : les estimations pour 1932 sont basées sur les résultats du recensement de 1930. A l'exception des données pour Formose, les estimations officielles ne s'accordent pas avec les résultats des recensements.

<sup>10</sup> Kouang-Toung : y compris la zone du chemin de fer de la Mandchourie du Sud (280 km<sup>2</sup>, 372.000 h. en 1930).

<sup>11</sup> Indes néerl. : le total pour 1930 comprend les personnes dont le sexe n'est pas spécifié.

<sup>12</sup> Syrie et Liban : un dénombrement de la population est en cours ; les résultats partiels connus actuellement ont servi de base pour l'estimation de 1932.

**EUROPE.**

<sup>1</sup> Là où les relevés de recensements font une distinction entre la population de fait et la population de droit, on a inséré les chiffres qui paraissent être complets, tout en évitant des doubles emplois. Ainsi, par exemple, a-t-on inséré pour la Finlande, l'Italie, l'Espagne, la Suisse, la Tchécoslovaquie, la population de fait ou présente, tandis que pour la Norvège on a pris la population légale et pour la France la population de résidence habituelle.

<sup>2</sup> Allemagne, recensement 1933 : population de fait ; la population de résidence habituelle était de 65.188.600. Les estimations officielles annuelles se réfèrent à la population de résidence habituelle. Non compris le territoire de la Sarre.

<sup>3</sup> Estonie, Finlande, Norvège, Pays-Bas, Suède : y compris les eaux (Finl. : 44.839 km<sup>2</sup> ; Norvège : 14.087 km<sup>2</sup> ; Pays-Bas : 1.598 km<sup>2</sup>, le Zuidersee n'étant pas compris ; Suède 38.692 km<sup>2</sup>).

<sup>4</sup> Finlande : population finnoise présente ; on y a compris les habitants se trouvant dans le pays, mais en dehors de leurs communes. (Ils sont d'habitude exclus des relevés officiels.) Non compris les étrangers (27.700 en 1930).

<sup>5</sup> Etat libre d'Irlande, Irl. du Nord : non compris les lacs et les grandes rivières.

<sup>6</sup> Lithuanie : le recensement de 1923 ne comprenait pas Klaipeda (Memel), dont la population s'élevait à environ 150.000 h.

<sup>7</sup> Norvège : population de droit. La population de fait, selon le recensement de 1930, était de 2.785.550.

<sup>8</sup> U. R. S. S. : la répartition par continents est approximative, elle n'est pas conforme à celle de l'Ancien Empire russe (pour détails, voir éditions précédentes de l'Annuaire).

**Océanie et Total Mondial.**

<sup>1</sup> Australie : les données ne comprennent pas la population autochtone qui est estimée à 60.000.

<sup>2</sup> Etablissements français : Tahiti, Makatea, Iles de la Société, Iles sous le Vent, etc.

<sup>3</sup> Nauru : Mandat de l'Empire britannique, exercé à présent par l'Australie.

<sup>4</sup> Total mondial : voir la Note générale à la page précédente au sujet du degré de comparabilité des données d'une année à l'autre.

**ASIA.**

<sup>1</sup> The population estimates for Afghanistan (7-11 millions), Arabia (7-10 millions), Bhutan, China, Persia, Nepal, Iraq, Sarawak, Syria and Lebanon, certain parts of Indo-China and for Trans-Jordan are subject to a wide margin of error. The totals for the continent are therefore to a great extent hypothetical. The distribution of the U.S.S.R. is referred to under Europe, note <sup>8</sup>.

<sup>2</sup> Arabia : Sa'udi Arabia (Nejd, Hejaz), Oman, Koweit, Yemen, Hadramout.

<sup>3</sup> China : according to census reports of Provincial governments in 1928 and 1929, completed by estimates made by the Ministry of the Interior and by the Geographical Society of Wuchang, the population amounts to 452,791,000 inhabitants. The estimates published by the Chinese Maritime Customs Service are higher. Those of other competent authorities vary considerably.

According to competent Chinese authorities there is a very considerable margin of error in all these estimates. The round figure of 450 millions has been entered in the table as a general indication. It is impossible to make annual estimates, because of the lack of criteria which could be used for measuring fluctuations from year to year. The population of Manchuria and Jehol (also known as "Manchukuo") had been estimated at 29,600,000 in 1932.

<sup>4</sup> Turkey, area : not including lakes and swamps (9,604 km<sup>2</sup>).

<sup>5</sup> U.S.S.R. : see Europe, note <sup>8</sup>.

<sup>6</sup> Straits Settlements : Singapore, Penang, Malacca ; dependencies : Wellesley, Dindings, Labuan and Christmas and Cocos-Keeling Islands.

<sup>7</sup> Federated Malay States : Perak, Selangor, Negri-Sembilan, Pahang ; Non-federated : Johore, Kedah, Kelantan, Perlis, Trengganu.

<sup>8</sup> Indo-China : the so-called "census" figures are in fact largely based on merely approximate records. The exact population figure is not known.

<sup>9</sup> Japanese possessions : the estimates for 1932 are based on the 1930 census returns. Except in the case of Formosa, the official estimates do not agree with census returns.

<sup>10</sup> Kwantung : including the zone of the South Manchuria Railway (280 km<sup>2</sup>, 372,000 inhabitants in 1930).

<sup>11</sup> Netherl. Indies : the total for 1930 includes persons whose sex was not specified.

<sup>12</sup> Syria and Lebanon : a count is actually being made ; the results known so far have served as a basis for the 1932 estimate.

**EUROPE.**

<sup>1</sup> Whenever a distinction is made in the census returns between the *de facto* and the legal population, preference has been given to figures which appear to be the most complete, whilst obviating duplication. Thus, the figures inserted for Finland, Italy, Spain, Switzerland, Czechoslovakia, etc., refer to the actual or *de facto* population, whereas that for Norway refers to the legal population and that for France to population "habitually resident".

<sup>2</sup> Germany : 1933 census : *de facto* population ; the population "domiciled" was 65,188,600. The official annual estimates refer to the population "domiciled". Not including Saar Territory.

<sup>3</sup> Estonia, Finland, Norway, Netherlands, Sweden : including inland waters. (Finland : 44,839 km<sup>2</sup> ; Norway : 14,087 km<sup>2</sup> ; Netherlands : 1,598 km<sup>2</sup>, the Zuiderzee not being included ; Sweden : 38,692 km<sup>2</sup>).

<sup>4</sup> Finland : actual Finnish population, including inhabitants absent from their communes but staying in the country (they are usually excluded from the official records published), not including foreigners (27,700 in 1930).

<sup>5</sup> Irish Free State, Northern Ireland : not including lakes and larger rivers.

<sup>6</sup> Lithuania : the 1923 census did not include Klaipeda (Memel), the population of which amounted to about 150,000.

<sup>7</sup> Norway : legal population. The *de facto* population was 2,785,550 according to the 1930 census.

<sup>8</sup> U. S. S. R. : the distribution by continents is approximative, and is not comparable with that of the former Russian Empire (for details, see previous editions of the *Year-Book*).

**OCEANIA AND WORLD TOTAL.**

<sup>1</sup> Australia : the figures do not include the aboriginal population, estimated at 60,000.

<sup>2</sup> French Settlements : Tahiti, Makatea, Society Islands, Leeward Islands, etc.

<sup>3</sup> Nauru : mandate of the British Empire, at present exercised by Australia.

<sup>4</sup> World total : see the *General Note* on the preceding page dealing with the comparability of the figures from one year to another.

Tableau 3. POPULATION PAR SEXE ET PAR GROUPES D'AGE, D'APRÈS DIVERS RECENSEMENTS.

a) Chiffres absolus (en milliers). — (a) Actual Numbers (000's omitted).

**Abréviations :** M. = sexe masculin ; F. = sexe féminin ; M.F. = population des deux sexes. Le groupe « ? » se réfère aux personnes dont l'âge n'est pas connu ; « -1 » signifie « moins de 1 an » ; « 60 + » signifie « 60 ans et plus » ; « Estim. » signifie « estimation officielle faite en l'absence d'un recensement ».

Les données figurant au tableau se réfèrent en règle générale à la population de fait, dans certains cas à la population légale ; où la différence entre ces deux populations est sensible, mention en est faite dans les notes ci-après.

Les totaux qui figurent au tableau ne s'accordent pas toujours avec la population totale indiquée par les recensements, soit que les chiffres relatifs à la population totale aient été révisés, sans que la révision s'étende aux chiffres détaillés, soit que les relevés par groupes d'âge ne portent pas sur la population totale du pays.

Les relevés relatifs à l'âge sont, dans un certain nombre de pays, peu exacts, ce qui est souvent dû à la tendance qui existe de déclarer l'âge approximativement, par un chiffre finissant par 0 ou 5.

Les relevés relatifs au nombre d'enfants au-dessous d'un an sont parfois particulièrement inexacts : là où les déclarations

**Abbreviations :** M. = Males ; F. = Females ; M.F. = Population of both sexes. The group « ? » refers to persons whose age is unknown ; « -1 » means « less than one year » ; « 60 + » means « 60 years and over » ; « Estim. » means « official estimate made in the absence of a census ».

The data appearing in the table refer, as a rule, to the *de facto* population, but in certain cases, to the legal population ; when the difference between these two populations is material, the fact is mentioned in the notes.

The totals appearing in the table do not always agree with the total population indicated by the censuses, either because the figures regarding the total population have been revised without this revision being extended to the detailed figures, or because the returns by age-groups do not cover the total population of the country.

The returns regarding age are in some countries not very accurate, which is often due to the tendency to declare ages approximately by means of a figure ending with a 0 or a 5.

The returns regarding the number of children under one year of age are sometimes particularly inaccurate ; when the decla-

Table 3 (concluded). Population by Sex and by Age-Groups, according to Various Censuses.

portent non pas sur l'âge, mais sur l'année de naissance, le chiffre risque d'être incomplet si le recensement a lieu avant la fin de l'année, et il risque de comprendre plus d'une année dans le cas où le recensement a lieu après le début de l'année. C'est en partie pour cette raison que le groupe 0-4 a été subdivisé dans le tableau en «—1» (moins d'un an) et «1-4».

L'indication de groupes telle que «5-9», s'entend pour cinq années allant de cinq ans révolus — c'est-à-dire du début de la sixième année — à neuf ans et 364 jours, c'est-à-dire au seuil de la onzième année; «10-14» couvre cinq années allant de dix ans révolus — c'est-à-dire du début de la onzième année — à quatorze ans et 364 jours, c'est-à-dire au seuil de la seizième année, et ainsi de suite.

Le groupe «âge inconnu» est indiqué dans l'entête par un point d'interrogation «?». Là où il ne figure pas de chiffre dans cette rubrique, l'âge de tous les recensés n'est pas nécessairement connu, car dans certains cas, le nombre d'individus d'âge inconnu est réparti entre les divers groupes.

Les chiffres qui se réfèrent à des groupes autres que ceux indiqués dans les entêtes figurent entre parenthèses.

(Suite des notes à la page 38.)

rations refer not to the age but to the year of birth the figure is likely to be incomplete if the census takes place before the end of the year, and it is likely to include more than one year if the census takes place after the beginning of the year. It is partly for this reason that the group 0-4 has been subdivided in the table into «-1» (less than one year), and «1-4».

Group headings such as «5-9» mean five years extending from five years completed — i. e., from the beginning of the sixth year — to nine years and 364 days — i. e., to just before the beginning of the eleventh year; «10-14» covers five years extending from ten years completed — i. e., from the beginning of the eleventh year — to fourteen years and 364 days — i. e., to just before the beginning of the sixteenth year, and so on.

The group «Age unknown» is indicated in the heading by a query «?». Where no figure is given under this heading, this does not necessarily mean that the age of all those recorded is known, since in certain cases the number of individuals of unknown age has been split up among the different groups.

The figures relating to groups other than those indicated in the headings are placed in brackets.

(Notes continued on page 38.)

## NOTES AU TABLEAU 3 (suite). — NOTES TO TABLE 3 (continued).

Les pourcentages de la partie b) du tableau indiquent : 1° la proportion de chaque sexe par rapport à la population totale et 2° pour chaque sexe l'importance relative du nombre d'individus des divers groupes d'âge calculée par rapport au nombre total d'individus du même sexe (les pourcentages relatifs à chaque sexe ne sont donc plus calculés par rapport à la population totale, comme c'était le cas dans les précédentes éditions de l'*Annuaire*).

Le fait de donner des chiffres absolus en milliers et les pourcentages avec une seule décimale explique quelques petites divergences entre la somme des chiffres par groupes d'âge et les totaux insérés. Les pourcentages ont été calculés sur des chiffres entiers.

<sup>1</sup> Algérie : non compris la « population comptée à part », surtout militaire, s'élevant en 1931 à 83.000.

<sup>2</sup> Egypte : sans les Bédouins, estimés, en 1927, à 40.000.

<sup>3</sup> Maurice : non compris les dépendances.

<sup>4</sup> Chili, 1930 : non compris le territoire de Tacna, qui ne fait plus partie du Chili, et dont la population en 1920 était de 20.000 habitants.

<sup>5</sup> Colombie, 1918 : non compris les Indiens, estimés à 158.000.

<sup>6</sup> Inde : y compris Aden et Périm ; non compris certaines provinces dans lesquelles il n'a pas été fait de relevés par groupes d'âge et dont la population s'élevait à 2.513.000 en 1911, à 3.592.000 en 1921 et à 3.027.000 en 1931.

<sup>7</sup> Japon, 1930 : données approximatives calculées provisoirement d'après un nombre restreint de relevés, pris comme échantillons.

<sup>8</sup> Malaisie : Etablissements des Détroits, Etats Malais fédérés et non fédérés, Brunei.

<sup>9</sup> Palestine : non compris les Bédouins nomades, estimés en 1931, à 66.600.

<sup>10</sup> Turquie : les chiffres se réfèrent aux groupes suivants : 0-6, 7-12, 13-19, 20-45, 46-60, 61 et plus. Les totaux sont légèrement inférieurs aux données globales révisées.

<sup>11</sup> Allemagne : les données de recensement de 1910 se réfèrent à la population de fait, celles de 1925 et les estimations pour 1931 à la population résidente.

<sup>12</sup> Autriche : le recensement de 1920 ne comprenait pas le Burgenland. Les chiffres y relatifs (285.609 hab.) qui se réfèrent à 1923 ont été ajoutés aux données du recensement.

<sup>13</sup> Espagne : les chiffres ne sont pas strictement comparables ; en 1910, ils comprennent Ceuta ; en 1920, Ceuta et la population espagnole des autres possessions de l'Afrique du Nord (86.300 hab.) ; en 1930, par contre, ils ne comprennent pas l'Afrique du Nord.

<sup>14</sup> Finlande : A. population de résidence habituelle (= population de droit) ;

B. 1930, population de fait ; le chiffre correspondant pour 1920 est de 3.147.600 hab.

Les étrangers sont exclus dans les deux cas.

<sup>15</sup> France : les données par groupes d'âges se réfèrent à la population de fait ; la population légale (« de résidence habituelle ») non compris les militaires se trouvant hors de France s'élevait en 1926 à 40.743.900. Il est probable que les relevés de la population de fait sont inférieurs à la réalité et que les chiffres relatifs à la population légale contiennent par contre des doubles emplois. Le nombre d'enfants qui figurent dans la rubrique « -1 » se réfère pour l'année 1911 aux enfants nés du 1<sup>er</sup> janvier 1910 au 5 mars 1911.

<sup>16</sup> Grèce : les données relatives à l'année 1920 se rapportent au territoire dans les limites fixées en 1923. La population de la Grèce selon les limites de 1920 s'élevait à 5.531.500 hab. Le nombre des réfugiés rapatriés d'Asie mineure compris dans le recensement de 1930 était de 1.070.000.

<sup>17</sup> Hongrie, 1920 : y compris la partie de Szeged, attribuée à la Hongrie en 1922.

<sup>18</sup> Italie, 1921 : non compris Fiume ; la répartition est établie sur la base de chiffres non révisés. Par suite d'une révision rétrospective faite à l'occasion du recensement de 1930, le chiffre total pour 1921 a été ramené de 38.710.000 à 38.033.000.

<sup>19</sup> Norvège : population de droit.

<sup>20</sup> Pologne, 1921 : non compris la Haute-Silésie et une partie de la province de Wilno. La population totale s'élevait à 27.201.000 hab.

<sup>21</sup> Yougoslavie, 1921 : non compris la Dalmatie. La population totale s'élevait à 11.984.900 hab.

<sup>22</sup> Nouvelle-Zélande, 1911, 1921, 1926 : non compris les Maoris. Ceux-ci, dont le nombre s'élevait en 1932 à 68.200, sont inclus dans l'estimation officielle de 1932 relative à la répartition par groupes d'âges.

The percentages of Part (b) of the table indicate (1) the proportion of each sex in relation to the total population ; (2) for each sex, the relative importance of the various age-groups in relation to the total number of individuals of the same sex (these percentages are therefore no longer calculated in relation to the total population as was the case in the previous editions of the *Year-Book*).

The fact that absolute figures are given in thousands and percentages with a single decimal explains some slight divergences between the sums of the figures for the different age groups and the totals shown.

<sup>1</sup> Algeria : not including " Population counted separately ", mainly soldiers, amounting in 1931 to 83,000.

<sup>2</sup> Egypt : not including Beduins, estimated in 1927 at 40,000.

<sup>3</sup> Mauritius : not including dependencies.

<sup>4</sup> Chile, 1930 : not including the territory of Tacna, which no longer forms part of Chile and the population of which was 20,000 inhabitants in 1920.

<sup>5</sup> Colombia, 1918 : not including Indians, estimated at 158,000.

<sup>6</sup> India : including Aden and Perim ; not including certain provinces for which returns by age-groups were not made, and the population of which amounted in 1911 to 2,513,000, in 1921 to 3,592,000 and in 1931 to 3,027,000.

<sup>7</sup> Japan, 1930 : approximate data provisionally calculated on the basis of samples.

<sup>8</sup> Malaya : Straits Settlements, Federated and Unfederated Malay States, Brunei.

<sup>9</sup> Palestine : not including nomad Beduins estimated in 1931 at 66,600.

<sup>10</sup> Turkey : the figures relate to the following groups : 0-6, 7-12, 13-19, 20-45, 46-60, 61 and over. The totals are slightly less than the revised aggregate figures.

<sup>11</sup> Germany : the data of the 1910 census refer to the actual population, those of 1925 and the estimate for 1931 to the resident population.

<sup>12</sup> Austria : the 1920 census did not include the Burgenland. The figures for the latter for 1923 (285,609 inhabitants) have been added to the census data.

<sup>13</sup> Spain : the figures are not strictly comparable ; in 1910, they include Ceuta ; in 1920, Ceuta and the Spanish population of the other North African possessions (86,300) ; while in 1930, they do not include Northern Africa.

<sup>14</sup> Finland : A. Population in habitual residence (= legal population).

B. 1930 actual population ; the corresponding figure for 1920 is 3,147,600.

Foreigners are not included in either case.

<sup>15</sup> France : the data by age-groups relate to the *de facto* population ; the legal population (" in habitual residence "), not including soldiers outside France, amounted in 1926 to 40,743,900. The returns for the *de facto* population are probably below the real figure, and on the other hand the figures relating to the legal population probably contain duplications. The number of children appearing under the heading " -1 " refers, for the year 1911, to children born between January 1st, 1910, and March 5th, 1911.

<sup>16</sup> Greece : the figures for 1920 relate to the territory within the boundaries fixed in 1923. The population of Greece within the boundaries of 1920 was 5,531,500. The number of refugees repatriated from Asia Minor included in the 1930 census amounted to 1,070,000.

<sup>17</sup> Hungary, 1920 : including the part of Szeged assigned to Hungary in 1922.

<sup>18</sup> Italy, 1921 : excluding Fiume ; the distribution is based on unrevised figures. As a result of a retrospective revision made at the 1930 census, the total figure for 1921 was reduced from 38,710,000 to 38,033,000.

<sup>19</sup> Norway : legal population.

<sup>20</sup> Poland, 1921 : not including Upper Silesia and part of the province of Wilno. The total population was 27,201,000.

<sup>21</sup> Yugoslavia ; 1921 : not including Dalmatia. The total population was 11,984,900.

<sup>22</sup> New Zealand, 1911, 1921, 1926 : not including Maoris. The latter, who numbered 68,200 in 1932, are included in the official estimate of 1932 regarding distribution by age-groups.

Tableau 4. POPULATION PAR PROFESSIONS D'APRÈS DIVERS RECENSEMENTS.

Table 4. POPULATION BY OCCUPATIONAL GROUPS ACCORDING TO VARIOUS CENSUSES.

Chiffres absolus (en milliers) et pourcentages.— Actual Numbers (000's omitted) and percentage distribution.

NOTES AU TABLEAU 4. — POPULATION PAR PROFESSIONS D'APRÈS DIVERS RECENSEMENTS,  
 NOTES TO TABLE 4. — POPULATION BY OCCUPATIONAL GROUPS ACCORDING TO VARIOUS CENSUSES.

*Note.* — Comme les classifications utilisées varient d'un pays à l'autre, et pour le même pays souvent, d'un recensement à l'autre, les chiffres donnés dans le tableau ne présentent pas une comparabilité absolue. Les données originales ont été reclassées dans la mesure du possible afin d'opérer un certain rapprochement. Toutefois, les données relatives aux recensements récents n'ont pas pu toujours être élaborées de manière à faire suite aux recensements précédents, la documentation actuellement disponible étant parfois trop sommaire.

Les recensements portent, tantôt sur la population entière à partir d'un certain âge, tantôt seulement sur les individus ayant une profession lucrative. Parfois, on prend en considération seulement la population active, ou bien on y ajoute la population passive, c'est-à-dire la famille et les autres dépendants. Afin de rendre les chiffres plus aisément comparables entre eux, on a fait abstraction dans presque tous les cas : 1° des dépendants entretenus et 2° des individus n'exerçant pas une profession active et lucrative, par exemple, des rentiers, des étudiants, des détenus, etc., de sorte que les chiffres représentent, dans la mesure du possible, la population active ayant une profession lucrative.

La plupart des recensements sont basés sur la classification par occupations et non pas par classes d'industries, c'est-à-dire que toutes les professions similaires sont groupées sans égard à la destination finale ou à la classe d'industrie à laquelle elles s'appliquent. Plusieurs pays, entre autres les Etats-Unis d'Amérique, l'Union de l'Afrique du Sud, le Royaume-Uni, le Canada etc., publient à présent les résultats selon les deux classifications. Le recensement de l'U. R. S. S. est basé strictement sur la classification par industries. La classification adoptée dans certains pays et surtout pour les recensements d'avant guerre, tout en étant en principe une classification par occupations, est de fait souvent hybride. Les chiffres donnés dans le tableau reposent dans la plupart des cas, sur la classification par occupations. Dans plusieurs cas, on a inséré des chiffres élaborés suivant les deux classifications.

La composition originale des groupes d'occupations varie selon les pays et dépend souvent non seulement du degré de développement économique, mais aussi de leur organisation administrative. Un pays centralisé, dont le gouvernement exerce des fonctions réservées ailleurs à l'initiative privée, groupera les professions de manière différente que ne le feront les autres pays. Là encore, on a cherché à rendre les données plus comparables en les regroupant.

Le groupe « autres transports et communications » du tableau contient l'exploitation des télégraphes, des téléphones et des postes, même dans le cas des pays où celle-ci figure dans les relevés sous « administration publique ». Pour toutes ces raisons, les chiffres relatifs à l'administration publique ne renseignent nullement sur le nombre d'individus au service de l'Etat.

Le groupe « professions libérales » est mal délimité, et sa signification varie considérablement d'un pays à l'autre. Le groupe « services domestiques » est particulièrement mal délimité ; il comprend généralement les domestiques proprement dits ainsi que toutes les personnes s'occupant du service personnel (par exemple, coiffeurs, infirmières, etc.), mais souvent également des journaliers sans profession définie, des travailleurs non qualifiés, etc. Les différences que l'on rencontre dans la répartition de ce groupe de personnes peuvent affecter considérablement le degré de comparaison de certains autres groupes, notamment l'agriculture et le groupe « autres et non spécifiés ».

\* Chiffres provisoires, élaborés sur la base de données sommaires.

<sup>1</sup> Egypte : par suite d'un changement de classification, les données du recensement de 1927 ne sont pas comparables à celles du recensement de 1917. Toutefois, les chiffres de ce dernier ont été regroupés autant que possible, de manière à diminuer les divergences.

<sup>2</sup> Tunisie : population active sans limite d'âge. Les domestiques n'étant pas séparés des dépendants ont dû être omis. Le service des postes, des télégraphes et des téléphones est compris sous « administration publique ».

<sup>3</sup> Pour le Canada (1931), le Mexique, l'Ecosse (recensement de 1921), et, dans une grande mesure, pour l'Etat libre d'Irlande (1926), et pour les Etats-Unis d'Amérique, les commis figurent dans les relevés sous une rubrique spéciale et non pas séparément d'après les différentes branches économiques qui les occupent. Vu l'impossibilité de faire une répartition adéquate, les chiffres y relatifs ont été inclus dans la rubrique « autres et non spécifiés ». Pour les Etats-Unis et pour le Canada (1931), les chiffres de cette rubrique représentent exclusivement ces commis non répartis ; pour les Etats-Unis, les commis de magasin sont toutefois incorporés sous la rubrique « commerce ». Pour le Mexique, les « commis » semblent comprendre des fonctionnaires.

*Note.* — As the classifications employed vary from country to country, and frequently from census to census in the case of one and the same country, the figures shown in the table are not strictly comparable. The original data have, as far as possible, been reclassified to allow of some comparison. The data of recent censuses have, however, not always been established so as to follow on those of the preceding census, the available information being in some cases too summary.

The censuses sometimes relate to the entire population over a certain age, and sometimes only to persons gainfully occupied. Occasionally only the "breadwinners" are considered, while in other cases the dependants, family or other, are included. In order to render the figures, as far as possible, comparable, (1) dependants and (2) persons not gainfully occupied, e.g., rentiers, students, inmates of prisons, etc., have been omitted in most cases. The figures are thus confined, whenever possible, to the gainfully employed.

The basis taken in most censuses is classification by occupation and not by industrial groups, i.e., all similar trades and professions are grouped together irrespective of the industrial group in which persons following these trades or professions are actually employed. A number of countries, including the United States of America, the Union of South Africa, the United Kingdom and Canada, now publish results based on the two forms of classification. The census of the U.S.S.R. is based strictly on the classification by industries. The classification adopted in certain countries, particularly for pre-war censuses, while in principle by occupation, is in point of fact frequently of a mixed type. The figures given in the table are based in most cases on classification by occupation. In several cases, figures established according to two classifications have been inserted.

The original composition of the occupational groups varies from country to country, and often depends, not only on the degree of economic development, but also on the administrative organisation. Countries with a centralised administration and those in which the Government exercises functions left elsewhere to private enterprise will group occupations differently from the other countries. Again, in order to render the data more comparable, the figures have been regrouped.

The group "Other transport and communications" in the table covers the telegraph, telephone and postal services, even in the case of countries where these services are shown in the returns under "Public administration". For these reasons the figures relating to the public administration give no information as to the number of persons employed by the State.

The meaning given to the expression "liberal professions" (or professional service) varies greatly from country to country. The "domestic service" group, especially ill-defined, usually includes domestic servants proper and also individuals performing personal services (e.g., hairdressers, nurses, etc.), but often it also includes daily workers without any definite profession, non-qualified workers, etc. Differences in the composition of this group may considerably affect the comparability of certain other groups, particularly agriculture and the group called "other and unspecified".

\* Provisional figures, computed from summarised records.

<sup>1</sup> Egypt : as the result of a change in classification the data for the 1920 census are not comparable with those of the 1917 census. The latter have, however, been so far as possible re-grouped with a view to reducing the discrepancies.

<sup>2</sup> Tunis : active population without age limit. As domestic servants are not shown separately from dependents, they have been omitted.

<sup>3</sup> For Canada (1931) for Mexico, Scotland (census of 1921), to a large extent the Irish Free State (1926), and the United States of America, clerks are shown in the returns under a special heading, and not under the individual branch of business in which they are employed. As it was impossible to split up the figures, they have been included under the heading of "Other and unspecified". The figures for the United States and for Canada (1931) under this heading embrace only these unclassified clerks ; but "clerks in stores" are shown in the U.S.A. census under "Trade". In Mexico, "clerks" appear to include a proportion of officials.

NOTES AU TABLEAU 4 (suite).  
NOTES TO TABLE 4 (continued).

<sup>4</sup> États-Unis : les données ont été classées dans la mesure du possible selon les critères employés pour le recensement de 1930. Il subsiste néanmoins quelques cas où le regroupement ne peut pas se faire (ainsi, par ex., les « assistants et aides dans les services professionnels » sont montrés en 1930 sous « services domestiques », tandis qu'en 1910 et 1920, ils figurent dans le groupe « Professions libérales », sans qu'on puisse faire le transfert ; leur nombre était de 170.000 en 1930).

<sup>5</sup> Tous les chiffres pour le Chili et certains chiffres pour le Japon, l'U. R. S. S. (voir note <sup>13</sup> ci-après), l'Angleterre et le Pays de Galles, la France, la Pologne, la Suède et la Nouvelle-Zélande se réfèrent à la classification par industries. Pour l'Angleterre et le Pays de Galles, les données ont été élaborées d'après les calculs du professeur A. Bowley dans *London and Cambridge Economic Service, Special Memorandum, No. 17 A.*

<sup>6</sup> Chili, 1920 : les chiffres absolus et les pourcentages ne comprennent pas les domestiques. Les données ont été regroupées afin de les rapprocher dans une certaine mesure de celles pour 1930.

<sup>7</sup> Japon : A. Classification par occupations individuelles. B. Classification par groupes d'industries.

La principale différence entre ces deux classifications provient du groupe « Journaliers » : ils figurent sous A comme groupe distinct et sont compris dans les « non spécifiés » ; sous B ils ont été distribués dans les divers groupes. L'armée n'étant pas spécifiée dans les documents originaux, on a supposé qu'elle est incluse dans l'administration publique. Les données relatives à 1930 ont été calculées de manière sommaire d'après un nombre restreint de fiches.

<sup>8</sup> Palestine : non compris les Bédouins, appartenant en majorité au groupe « Agriculture » (17.200 en 1930).

<sup>9</sup> Belgique, Danemark : changement de territoire.

<sup>10</sup> Autriche, Belgique, Dantzig, Estonie, Finlande, Tchécoslovaquie (1930) : total de la population active et de la population passive aidant au chef de ménage.

<sup>11</sup> Italie : à la suite d'une révision rétrospective faite à l'occasion du recensement de 1931, le chiffre total de la population en 1921 a été ramené de 38.711.000 à 38.033.000. La répartition professionnelle est établie sur la base de chiffres non révisés. 1931 : les chiffres relatifs à l'administration publique comprennent les organisations syndicales.

<sup>12</sup> Pologne : non compris la Haute-Silésie et une partie de la province de Wilno.

<sup>13</sup> Inde, Portugal : l'augmentation du groupe « Domestiques » est, selon toute évidence, due à un changement de classification.

<sup>14</sup> Tchécoslovaquie : A. Y compris les membres aidants de la famille. B. Non compris ces membres aidants.

Les chiffres de la série B relatifs à 1921 ont été en outre quelque peu révisés, afin de les rendre comparables avec les données de 1930.

<sup>15</sup> U. R. S. S. : classification strictement par groupes d'industries. Ainsi, par exemple, les ingénieurs attachés aux exploitations agricoles figurent sous « Agriculture », et non pas sous « Professions libérales » ; les domestiques dans une entreprise industrielle sous « Industrie », etc. Le groupe « Professions libérales » se compose presque exclusivement de professeurs et d'ecclésiastiques. Le groupe « Autres et non spécifiés » comprend les chômeurs (en milliers : hommes 599 et femmes 415). Les chiffres comprennent les membres aidants de la famille (en milliers : hommes 16.273 et femmes 32.190).

<sup>16</sup> Yougoslavie : non compris la partie non recensée de la Dalmatie et certains autres districts.

<sup>4</sup> United States : data have been classified so far as possible according to the scheme used for the 1930 census. There are some cases in which re-grouping has been impossible (e.g., « assistants and helpers in professional service » are shown in 1930 under « domestic services », whereas for 1910 and 1920 they are shown under « liberal professions » and could not be transferred ; they amounted to 170,000 in 1930).

<sup>5</sup> All the figures for Chile, and certain figures for Japan, the U.S.S.R. (see note <sup>13</sup> below), England and Wales, France, Poland, Sweden and New Zealand refer to the classification by industries. Those for England and Wales are based on the calculations of Professor A. Bowley in the *London and Cambridge Economic Service, Special Memorandum, N.17.A.*

<sup>6</sup> Chile, 1920 : actual figures and percentages do not include domestic service. Data have been re-grouped in order to make them to some extent comparable with the 1930 data.

<sup>7</sup> Japan : A. Classification by individual occupation. B. Classification by groups of industries.

The main difference between these two classifications arises in the group of « daily workers ». They appear under A as a separate group and are included under « unspecified » ; under B, they have been distributed among the various groups. As the army is not shown separately in the original documents, it has been taken to be included in public administration. The 1930 figures have been summarily calculated from a number of sample data.

<sup>8</sup> Palestine : excluding the Bedouins, who mostly belong to the group « Agriculture » (17,200 in 1930).

<sup>9</sup> Belgium, Denmark : change of territory.

<sup>10</sup> Austria, Belgium, Danzig, Estonia, Finland, Czechoslovakia (1930) : total of breadwinners and dependents assisting head of household.

<sup>11</sup> Italy : as a result of a retrospective revision made after the census of 1931, the figure of total population for 1921 was reduced from 38,711,000 to 38,033,000. The distribution by occupational groups is based on the unrevised figures. 1931 : figures for public administration include trade unions.

<sup>12</sup> Poland : not including Upper Silesia and some districts of Wilno.

<sup>13</sup> India, Portugal : the increase of the group of « Domestic service » is obviously due to a change in classification.

<sup>14</sup> Czechoslovakia : A. Including active dependents. B. Not including active dependents.

Figures in Series B for 1921 have been further revised to some extent so as to make them comparable with data for 1930.

<sup>15</sup> U. S. S. R. (Europe and Asia) : strictly classified by industrial groups. Thus, for instance, engineers attached to agricultural enterprises are shown under « Agriculture » and not under « Liberal professions » ; domestic servants in industrial enterprises are shown under « Industry », etc.. The group of « Liberal professions » is almost entirely composed of teachers and clergy. The group « Other and unspecified » includes unemployed (in thousands : men 599, women 415). Figures include active dependents (men 16,273,000, women 32,190,000).

<sup>16</sup> Yugoslavia : not including Dalmatia and certain other districts which were not subjected to census.

NOTES AUX TABLEAUX 6 ET 7. NOMBRE DE NAISSANCES ; NOMBRE DE DÉCÈS (chiffres absolus).

NOTES TO TABLES 6 AND 7. NUMBER OF BIRTHS ; NUMBER OF DEATHS (actual figures).

SOURCES : Communications directes de divers gouvernements. Annuaires et bulletins statistiques. Rapports des offices d'hygiène publique. Rapports sur le mouvement de la population de divers pays.

SOURCES : Direct information from various Governments. Statistical Year-Books and Bulletins. Reports of Public Health Departments. Reports on the movement of the population of various countries.

NOTE GÉNÉRALE. — Les statistiques de certains pays, et notamment celles relatives aux naissances, sont incomplètes ou accusent des fluctuations exagérées dues au fait que les enregistrements dans un territoire donné (ex. Cuba) sont irréguliers ou qu'ils deviennent plus complets (ex. Chili). Ceci s'applique, entre autres, à une partie des possessions africaines, à la plupart des pays de l'Amérique latine, à Puerto-Rico, aux Philippines, à l'Albanie et peut-être, dans une moindre mesure, à certains autres pays européens.

Pour d'autres pays, le territoire auquel s'appliquent les chiffres n'est pas constant d'année en année, soit qu'il augmente régulièrement, soit que les données provisoires et fragmentaires se trouvent complétées par la suite. Le premier cas est celui des Etats-Unis d'Amérique et de la Grèce, le second, entre autres, celui de l'Union des Républiques soviétiques socialistes et du Pérou. Il y a enfin des pays dans lesquels les relevés sont incomplets de manière régulière et sans que le degré de comparaison des données en soit affecté, comme par exemple pour l'Afrique du Sud, le Japon, l'Australie et la Nouvelle-Zélande, qui ne comprennent pas les indigènes, la Palestine, qui exclut les Bédouins, et enfin, l'Inde britannique, l'Argentine et le Canada, qui excluent de manière constante une certaine partie, du reste peu importante, de leur territoire.

Les données publiées ne comprennent pas les mort-nés.

\* Chiffre provisoire ou estimé.

† Pays non compris dans les totaux.

a) Année finissant le 30. VI.

<sup>1</sup> Algérie : les données relatives aux indigènes ne comprennent pas les territoires du Sud, les relevés existants étant incomplets.

<sup>2</sup> Egypte : les enregistrements des étrangers sont incomplets.

<sup>3</sup> Canada, Argentine, Provinces britanniques de l'Inde : territoire d'enregistrement légèrement inférieur au territoire total.

<sup>4</sup> Etats-Unis : le territoire d'enregistrement des naissances est plus petit que celui d'enregistrement des décès. Les deux territoires sont en outre en progression constante. La population du premier, en 1931, formait 94,7 % de la population totale, et celle du second, 96,3 % du total. Dans le tableau N° 7, la série A se réfère seulement aux décès dans le territoire d'enregistrement des naissances, et la série B aux décès dans le territoire d'enregistrement des décès.

<sup>5</sup> Chili, Colombie, Cuba, Mexique, Pérou, Philippines : les enregistrements des naissances sont souvent incomplets ou irréguliers. Certains chiffres comprennent les enregistrements se rapportant à des naissances des années précédentes (p. ex. Cuba 1930, Mexique 1930, etc.).

<sup>6</sup> Europe : les totaux ont été ajustés en tenant compte des lacunes que présentent certaines séries et du caractère incomplet de plusieurs chiffres relatifs à la Grèce.

<sup>7</sup> Grèce : le nombre de communes qui ont envoyé des relevés n'était pas constant. La population des communes manquantes s'élevait en 1923 à 455,000 habitants, en 1924 à 553,500, en 1925 à 142,000, en 1926 à 132,000 et en 1927 à 105,000 habitants. A partir de 1929, les relevés sont complets.

<sup>8</sup> Portugal : y compris les îles.

<sup>9</sup> U. R. S. S. : à l'exception de l'Ukraine, les données existantes ne se réfèrent pas toujours à des territoires identiques. Des chiffres approximativement complets pour R. S. F. S. R. d'Europe existent seulement pour les années 1926 et 1927. (R. S. F. S. R. = République Fédérative Russe en opposition aux autres républiques formant l'Union des Républiques soviétiques socialistes.) Il n'a pas été publié de données au cours des dernières années. L'augmentation de la population telle qu'elle résulte des estimations annuelles de la population publiées dans diverses sources soviétiques indique un ralentissement, même en chiffres absolus.

GENERAL NOTE. — The statistics of certain countries, especially statistics of births, are incomplete, or reveal violent fluctuations, either because registrations in a given territory are irregular (ex. Cuba) or because they become more complete (ex. Chile). This applies, among other territories, to certain African possessions, most of the Latin-American countries, Puerto Rico, the Philippines, Albania, and possibly, in a lesser degree, to several other European countries.

In other countries the area to which the figures relate is not the same from year to year, either (as, e.g., in the United States of America and Greece) because the registration area is steadily increasing or (especially in the Union of Soviet Socialist Republics and Peru) because the provisional figures do not always apply to the whole country, but are completed later. There are also certain countries in which the returns are regularly incomplete and the comparability of the figures is therefore not affected; such is the case in South Africa, Japan, Australia and New Zealand, which exclude natives; Palestine, which excludes Bedouins; and the Argentine, Canada and the British provinces of India, which always exclude a small part of their territory.

The data published do not include still-births.

\* Estimated or provisional figure.

† Figures not included in the totals.

a) Year ending June 30th.

<sup>1</sup> Algeria : the data for natives do not include the southern territories, the records for which are incomplete.

<sup>2</sup> Egypt : registration of foreigners is incomplete.

<sup>3</sup> Canada, Argentine, India (Brit. prov.) : registration area slightly less than the total area.

<sup>4</sup> United States : the number of States for which records are available is continually increasing. The registration area for births is smaller than that for deaths. The population included within the former area in 1931 was 94.7 %, that included within the latter 96.3 % of total population. Series A of table 7 refers to deaths in the births registration area only and series B to deaths in the deaths registration area.

<sup>5</sup> Chile, Colombia, Cuba, Mexico, Peru, Philippines : registration of births is frequently incomplete or irregular. Some of the figures include registration of births during preceding years (e.g., Cuba 1930, Mexico 1930, etc.).

<sup>6</sup> Europe : the totals have been adjusted by taking into account the incompleteness of some series and of some of the Greek returns.

<sup>7</sup> Greece : the number of districts taken into account was not constant. The population of districts not included amounted in 1923 to 455,000 inhabitants, in 1924 to 553,500, in 1925 to 142,000, in 1926 to 132,000 and in 1927 to 105,000 inhabitants. Since 1929 the records are complete.

<sup>8</sup> Portugal : including islands.

<sup>9</sup> U.S.S.R. : except in the case of the Ukraine, the existing records do not always refer to identical territories. Approximately complete figures for European R.S.F.S.R. are available only for 1926 and 1927 (R.S.F.S.R. = the Russian Federation, as distinct from the other Republics composing the Union). Data for recent years are not available. The increase of the population, as can be ascertained from yearly estimates of population published in various Soviet publications, shows a falling-off, even in actual numbers.

a) Douze mois finissant le 30. VI. ; b) 1922-1925 ; c) 1923-1925 ; d) 1925 ; e) 1924-25.

\* Chiffres provisoires ou approximatifs.

*Note générale.* — Les taux ont été calculés en règle générale sur la base d'une population annuelle moyenne ou se référant au milieu de chaque année. On a tenu compte dans la mesure du possible des nombreux recensements effectués en 1930 et 1931 pour reviser, le cas échéant, des estimations de population faites antérieurement aux recensements. Pour toutes ces raisons, les taux de ce tableau diffèrent souvent des taux officiels. Là où les estimations officielles de la population, révisées sur la base du dernier recensement, n'étaient pas encore disponibles, on a fait des estimations pour les années comprises entre deux recensements, suivant une progression géométrique. De pareils pays ont été marqués de \*\*. Les pays pour lesquels il n'est pas possible de faire des estimations annuelles de la popu-

lation ont été omis du tableau. Les estimations de la population de certains pays — notamment d'Amérique latine et d'Asie — sont toutefois incertaines.

Dans certains cas, les taux, surtout ceux relatifs aux naissances, sont influencés par le caractère incomplet des enregistrements (voir à ce sujet les notes relatives aux tableaux 6 et 7).

<sup>1</sup> Afrique du Sud ; population blanche.  
<sup>2</sup> Etats-Unis : territoires d'enregistrement.  
<sup>3</sup> Inde : non compris les Etats indiens.  
<sup>4</sup> Finlande : taux basés sur la population de fait, différant des taux officiels.  
<sup>5</sup> Grèce : taux calculés par rapport à la population estimée pour chaque année, en tenant compte des districts qui n'ont pas envoyé de relevés.  
<sup>6</sup> U.R.S.S. : territoires d'Europe (voir aussi note \*, page 49).

**Table 3. — BIRTHS, DEATHS, GROWTH OF POPULATION AND MARRIAGES : RATES PER 1,000 INHABITANTS.**

a) Twelve months ending 30.VI.; b) 1922-1925; c) 1923-1925; d) 1925; e) 1924-25.

\* Provisional or approximate figures.

General note. — As a rule the rates are based on yearly average population or on population at the middle of each year. Whenever possible the numerous censuses made in 1930 and 1931 were taken into account and the population estimates made prior to the censuses revised accordingly. For these reasons the rates given in this table frequently differ from official rates. Whenever official population estimates revised on the basis of the last census were not available, the geometrical progression was used for making yearly intercensal estimates. Such countries are marked with \*\*. Countries for which it is not possible to calculate the yearly population have been omitted from the table. Population estimates of some countries,

particularly Latin-American and Asiatic, are, however, uncertain. In some cases the rates, especially those for births, are affected by the incompleteness of returns (see in this connection the notes to tables 6 and 7).

- <sup>1</sup> South Africa: white population.
- <sup>2</sup> United States: registration area.
- <sup>3</sup> British India: excluding Indian States.
- <sup>4</sup> Finland: rates based on actual population, different from official rates.
- <sup>5</sup> Greece: rates based on the estimated population in each year, account being taken of the districts which did not report.
- <sup>6</sup> U.S.S.R.: European territory only (see also note<sup>1</sup>, page 49.

**Tableau 9. MORTALITÉ INFANTILE. — Table 9. INFANT MORTALITY.**

Décès au-dessous d'un an par 1.000 naissances vivantes. — Deaths under one year per 1,000 living births.

\* Provisional or approximate figures.

<sup>1</sup> Amérique : l'enregistrement des naissances dans la majorité des pays de l'Amérique latine est incomplet ou irrégulier, ce qui explique en partie les fluctuations des taux.

<sup>1</sup> America : in most of the Latin-American countries, the registration of births is incomplete or irregular. This accounts for some of the fluctuations of the rates.

<sup>2</sup> Portugal et îles. Taux pour Portugal continental 139 ‰ en 1931 et 143 ‰ en 1932.

<sup>2</sup> Portugal and islands. Rate for Continental Portugal : 139 ‰ in 1931 and 143 ‰ in 1932.
