Note. — Les monnaies utilisées dans les divers tableaux peuvent être converties l'une dans l'autre, pour une date quelconque, au moyen du rapport entre leurs cours du change (ou leurs parités suivant le cas) tels qu'ils figurent dans le tableau 122.

Pour un grand nombre de pays, les cours officiels en 1935 étaient nominaux (voir à ce sujet les notes au tableau 122, qui renseignent sur la nature des cours et qui indiquent les principales mesures d'ordre monétaire prises dans ces divers pays).

Le « franc-or » dans lequel sont exprimés les prix donnés dans ce volume est celui de l'ancienne Union monétaire latine (= franc suisse).

Note. — The currencies used in the different tables of the Year-Book may be converted into any others for any date by taking the relation between their respective exchange rates (or their parities) as given in Table 122.

For a large number of countries, the official exchange rates in 1935 were nominal (see notes to Table 122, where reference is made to the nature of the exchange quotations and to the principal monetary measures taken in various countries).

The "gold franc" in which the price quotations throughout the present volume are expressed is that of the former Latin Monetary Union (= Swiss franc).
