The Philippines sits between 4°23'N and 21°25'N latitude, and between 116°E and 127°E longitude. Bordered by water, the country has the Bashi Channel up north, Sulu and Celebes Seas down south, the Pacific Ocean to its east, and South China Sea to its west. The country lies at the heart of Asia, where it is within a few hours distance by air travel to Brunei, China, Japan, Malaysia, and Vietnam.

Combined, the Philippines' 7,107 islands span a total area of 300,000 square kilometers. Of these islands, only 3,144 have been named. The three major island groups are Luzon, Visayas, and Mindanao.

There are 17 regions that artificially subdivide the country. Aside from Regions 1-13, that includes CALABARZON and MIMAROPA, are Metro Manila or the National Capital Region (NCR) which has 14 cities and three urban municipalities, Cordillera Administrative Region (CAR) and Autonomous Region in Muslim Mindanao (ARMM). As of December 2005, there are 79 provinces, 117 cities, 1,500 municipalities, and 41,975 barangays.

From June to November, rains shower all across the Philippines. The dry season, meanwhile, spans from December to May each year. These seasons bring temperatures from a cool of 18.7°C in January to peak heat of 36.0°C in March.

Sources: DILG and PAGASA.

Archaeological findings suggest indigenous Filipinos, not Asian migrants, were the country's first settlers. Through time, foreign races streamed into the country and left traces in the Filipino's genetics.

Ferdinand Magellan's rediscovery of the islands on March 16, 1521, signaled more than 300 years of Spanish colonial rule. Mass unrests led to revolution that weakened the Spanish government.

Americans defeated the Spanish forces in May 1898. By yearend, the Philippines was ceded to the United States through the Treaty of Paris. Meanwhile, on June 12, 1898, General Emilio Aguinaldo declared independence and assumed leadership in the first Philippine Constitutional Republic proclaimed on January 23, 1899.

Just as Filipinos were enjoying the fruits of a newly inaugurated Republic, Philippine-American relations developed. American sovereignty was later recognized in the islands when Filipino forces were subdued in the Filipino-American War of 1899 to 1902.

While the Americans were training Filipinos in self-governance, World War II broke out. Japanese troops invaded the Philippines on January 2, 1942, occupying the nation until October 20, 1944. Five presidents that ruled the nation in the two decades following the war carried out the task of rebuilding the Republic.

In 1972, with the clash of peace and order, then President Ferdinand E. Marcos declared martial law. Until on February 25, 1986, the People Power Revolution toppled his government and seated Corazon C. Aquino, widow of Marcos' strongest opposition, in the presidency. President Fidel V. Ramos succeeded her in 1992. In 1998 elections, Joseph E. Estrada, strongly supported by the masses, became the 13th President of the Republic. However, barely two years in service, Estrada was forced to step down from office by yet another people power revolution on January 20, 2001. Immediately, the then Vice President Gloria Macapagal-Arroyo took oath as the 14th President and still seats on leadership after a peaceful election in 2004 with her 10-point development agenda.

The Philippine government is guided by the 1987 Constitution which provides for a presidential form of government. Laws limit a Philippine president's term to six years only, without any provision for extension. The President heads the executive branch of government and has the Vice-President and a 24-member Cabinet aiding him in leadership.

Aside from the executive branch, the legislative and the judicial branches also carry on government affairs. The legislative branch is made up of the Congress of the Philippines, a bicameral body with the 24 senators and over two hundred district representatives duly elected by the people.

During the latest polls for representatives, party-list representatives were voted and introduced in Philippine political arena. The party-lists are organized lobby groups representing marginalized sectors of society that vie for seats in Congress. Winning parties had qualified persons of their choice to represent that sector in Congress. So far, 14 of 220 congressmen are party-list representatives.

The Judicial branch on the other hand consists of the Supreme Court, the Appellate, the lower courts and the special courts established by law.

In sharing and mobilizing the resources for countrywide development, the government is distinctly divided into national and local sectors. Local government officials are elected by the people and serve their constituents for three years. As provided for in the Local Government Code of 1991, autonomy resides in the province, city and municipality.

* Projection based on the 1995 Census of Population.

Dependency ratio - ratio of persons in the "dependent" ages (under 15 and over 64 years) to those in the "economically productive" ages (15 to 64 years) in a population.

CBR - number of live births per thousand-midyear population.

CDR - number of deaths per thousand-midyear population.

CRNI - the difference between CBR and CDR.
