

Dear readers,

you are obtaining the sixteenth annual volume of the Statistical Yearbook of the Slovak Republic. Although the yearbook's design in the long term is stable, this volume brings also some changes. We have excluded some not topical information (e. g. Microcensus 2003) and added new areas, or partial view, respectively.

I would like to bring the readers' attention to the new survey results about income and living conditions in Slovakia, and supplementary surveys on labour force for the harmonization of family and working life. This volume contains data on election statistics too, where election results to the bodies of self-government regions in December 2005, as well as election results to the National Council of the SR in June 2006 are included. New indicators can be found in the section of demography, culture, finance, accidents and natural disasters, etc.

Elimination of regional surveys is a more cardinal change in the publication. The regional data will be presented in more detail in a new publication – Regional Statistical Yearbook of Slovakia, which will be also issued yearly.

In addition to the Statistical Yearbook of the Slovak Republic, a wide extent of information on economic and social development of the Slovakia can be obtained since 2005 also in an electronic form – from the SLOVSTAT database on the Statistical office's web site (www.statistics.sk).

The Statistical Yearbook of the Slovak Republic 2006 can be ordered at the following address: VEDA – publishing house of SAV, P.O.Box 2, 845 02 Bratislava 45 (tel: ++4212/54774255, fax: ++4212/54772682), or can be purchased directly in the shop of VEDA – publishing house of SAV, Bratislava, Štefánikova 3. A CD-ROM is included in the printed publication.

The Statistical Yearbook was edited by the staff of the Statistical Office of the Slovak Republic, in partnership with ministries and other institutions, which contributed with their

data sources. I would like to thank them all for their cooperation. A word of thanks belongs also to the publishing house VEDA, which has been publishing and distributing the Statistical Yearbook of the Slovak Republic since the very beginning.

Dear users, if you wish to help us to improve the quality of the statistical yearbook, we will gladly receive your comments and suggestions at the address: Statistical Office of the Slovak Republic, Miletičova 3, 824 67 Bratislava 26.

The publication was elaborated by a team of authors from among the staff of the Statistical Office of the Slovak Republic under a leadership of the Editorial Board:

Peter Mach, chairman of the Editorial Board

Pavol Baláž

Benjamín Berta

Eva Blahová

Jana Condíková

Edita Holičková

Agnesa Králiková

Vladimír Miroššay

Milan Olexa

Alexander Pflügler

Mária Schwartzová

Magdaléna Šipková

Ivan Škultéty

Notice

Unless otherwise specified in the text heading or a legend to the table, the region the data refer to (country, district etc.) is the territory of the Slovak Republic.

Unless the size of published data file is specified in the table heading or a legend to the table, the data refer to the economy of the SR in total (including imputation for the organizations of up to 19 employees, self-employed persons, or the whole population).

As far as data published according to certain classifications are concerned (e. g. Statistical Branch Classification of Economic Activities, Standard International Trade Classification etc.), the English text of indicators does not always correspond to a literal translation of the Slovak text, instead it is given according to the diction of the foreign classifications, or is given in the abbreviated form.

Names of countries are given in abbreviations, that are not always in compliance with official full names of the countries.

Differences in sums and ratios result from rounding the data off. Unless stated otherwise explicitly, published data are definitive.

Explanations to symbols

- | | |
|---------------------|--|
| Macron (–) | in a table in place of a number denotes that the phenomenon did not occur |
| Zero (0; 0,0; 0,00) | denotes the magnitude exceeding the zero, but smaller than the least unit expressible in the table |
| Dot (•) | in place of a number denotes that the figure is not available or reliable |
| Cross (x) | means that the entry is not possible for logical reasons |
| Capital D (D) | means that it is not possible to publish the figure because of its confidential character |
| Break symbol (~) | means that the comparability of data series is cut off due to methodology or another reason |

Preface ● **Primary Economic Indicators** ● Territory and Climate ● Demography and Social Statistics ● Macroeconomic Statistics ● Business Statistics ● Multisectoral Statistics ● Criminality, Justice, Accidents and Natural Disasters ● International Statistics ● Electoral Statistics ● Graphs ● Measuring Units, Symbols and Abbreviations

Preface ● Primary Economic Indicators ● **Territory and Climate** ● Demography and Social Statistics ● Macroeconomic Statistics ● Business Statistics ● Multisectoral Statistics ● Criminality, Justice, Accidents and Natural Disasters ● International Statistics ● Electoral Statistics ● Graphs ● Measuring Units, Symbols and Abbreviations

START

2. Territory and Climate

2. Territory and Climate

- 2-1. Area, borders and surface of the Slovak Republic in 2005
- 2-2. Location of the Slovak Republic's territory
- 2-3. Maximum distances on the area of the Slovak Republic
- 2-4. Meteorological data from selected monitoring stations
- 2-5. Hydrological data
- 2-6. Main rivers in the Slovak Republic, their basins and length of bordering water courses
- 2-7. Mountains

3. Population
4. Labour Market
5. Income, Expenditure and Consumption of Households
6. Education
7. Health
8. Social Security
9. Culture and Religion
10. Physical Training and Sport

3. Population

- 3-1. Population
- 3-2. Population by age (as of July1)
- 3-3. Population by age (as of Dec. 31)
- 3-4. Population by nationality
- 3-5. Population by marital status (as of Dec. 31)
- 3-6. Population change
- 3-7. Marriages by age of engaged couples in 2005
- 3-8. Marriages by education of engaged couples in 2005
- 3-9. Divorces by age of married couples in 2005
- 3-10. Divorces by education of married couples in 2005
- 3-11. Divorces by cause of the breakdown of marriage and by sex
- 3-12. Live-births by age of mother
- 3-13. Fertility of women by age
- 3-14. Live-births by month of birth
- 3-15. Live-births by legitimacy and birth order of marital live-births
- 3-16. Abortions by type and age of women
- 3-17. Deaths by age and sex
- 3-18. Deaths by age and sex per 100 thous. inhabitants
- 3-19. Deceased men by causes of death
- 3-20. Deceased women by causes of death
- 3-21. Life expectancy by sex and 5-year age groups
- 3-22. Internal migration of population by types
- 3-23. International migration in 2005

4. Labour Market

- 4-1. Economic activity of the population (from labour force survey)
- 4-2. Employed by age and education (from labour force survey)
- 4-3. Employed by Classification of Occupation – ISCO-88 (COM) (from labour force survey)
- 4-4. Employed by economic activity – NACE (from labour force survey)
- 4-5. Employed by status in employment, working time and permanency of the job (from labour force survey)
- 4-6. Ad hoc module on reconciliation between work and family life (by labour force survey) for 2nd quarter 2005
- 4-7. Employees and tradesmen in the economy of the SR (average registered number)
- 4-8. Average gross nominal monthly wage of employees in the economy of the SR calculated per persons
- 4-9. Number of employees and average gross nominal monthly wage in the economy of the SR by size of enterprises
- 4-10. Average gross hourly wage of employees in the economy of the SR for the enterprises with 20 and more employees (calculated per persons)
- 4-11. Structure of average gross nominal monthly wage of employees in the economy of the SR for 2004 (from results of the structure of earnings survey)
- 4-12. Structure of monthly labour costs per employee in 2004 (from total labour costs survey)
- 4-13. Hourly labour costs in the SR (from total labour costs survey)

- 4-14. Job applicants registered in the offices of labour, social affairs and family (as of Dec. 31)
- 4-15. Unemployed by labour force survey
- 4-16. Job vacancies by economic activity – NACE
- 4-17. Job vacancies by Classification of Occupation – ISCO-88 (COM)

5. Income, Expenditure and Consumption of Households

- 5-1. Gross money income of private households by type of income (household budget surveys)
- 5-2. Net money income of private households (household budget surveys)
- 5-3. Gross money income and expenditure of private households by social groups (household budget surveys)
- 5-4. Structure of net money income and expenditure of private households by social groups (household budget surveys)
- 5-5. Selected cross-sectional indicators based on the cross-sectional component of EU-SILC 2005
- 5-6. Consumption of selected kinds of food and alcoholic beverages (per capita/year)
- 5-7. Recommended yearly allowances of the foodstuffs per capita per year (gross figures when purchased, including losses during food preparation)
- 5-8. Daily consumption of energy and the most important nutritive substances per capita

6. Education

- 6–1. Kindergartens and basic schools
- 6–2. Grammar schools (secondary general education)
- 6–3. Specialized secondary schools
- 6–4. Specialized secondary schools by type of schools (separate part-time schools included)
- 6–5. Specialized secondary schools – students and school-leavers by fields of study (full time study)
- 6–6. Associated secondary schools
- 6–7. Associated secondary schools – students and school-leavers by fields of study (full time study)
- 6–8. Vocational secondary schools
- 6–9. Special schools
- 6–10. Higher education institutions
- 6–11. Higher education institutions by fields of study – students of Slovak nationality
- 6–12. Higher education institutions by subjects of studies
- 6–13. Higher education institutions – foreign students by nationality
- 6–14. Higher education institutions in school year 2005/2006
- 6–15. Schools by type and teaching language
- 6–16. Private schools
- 6–17. Basic schools of arts
- 6–18. Providing meals at schools

- 6–19. Scholarships
- 6–20. After school facilities
- 6–21. Church schools
- 6–22. Income in private subsidized and church schools
- 6–23. Expenditures in private subsidized and church schools

7. Health

- 7-1. Physicians posts, beds in health facilities, pharmacies as of Dec. 31
- 7-2. Natural curative spa
- 7-3. Employees working in health services as of Dec. 31
- 7-4. Physicians and pharmacists as of Dec. 31
- 7-5. Bed fund in the wards of institutional health care establishments as of Dec. 31
- 7-6. Hospitalised patients in the wards of institutional health care establishments
- 7-7. Average length of stay in the wards of institutional health care establishments
- 7-8. Bed occupancy of stay in the wards of institutional health care establishments
- 7-9. Cases of treatments (examination) in out-patient facilities of curative and preventive care (without visiting service)
- 7-10. Selected infectious diseases compulsory notified
- 7-11. Terminated cases of disability to work
- 7-12. Disability to work due to disease and injury
- 7-13. Calendar days of disability to work by NACE
- 7-14. Expenditures in public health sphere
- 7-15. Consumption of drugs
- 7-16. Consumption of drugs by categories
- 7-17. Consumption of drugs by selected producer countries
- 7-18. Consumption of drugs by selected producers

8. Social Security

- 8-1. Persons under sickness insurance
- 8-2. Systematic sickness insurance benefits by kind
- 8-3. State social benefits
- 8-4. Pension benefits refunded by government
- 8-5. Number of pensions and average pensions
- 8-6. Actually paid out pensions benefits
- 8-7. Number of pension receivers
- 8-8. Non-investment expenditures on social assistance
- 8-9. Nursing service
- 8-10. Social service facilities as of Dec. 31
- 8-11. Social service facilities as of Dec. 31 by kind
- 8-12. Asylum seekers in the Slovak Republic

9. Culture and Religion

- 9-1. Theatres
- 9-2. Musical ensembles
- 9-3. Moving-picture distribution for cinema in year 2005
- 9-4. Audio-visual works
- 9-5. Radio broadcasting
- 9-6. Television broadcasting
- 9-7. Public libraries, scientific libraries, university libraries
- 9-8. Periodical press
- 9-9. Journals by periodicity of issue
- 9-10. Newspapers by periodicity of issue
- 9-11. Activities of individual cultural facilities (museums, galleries, observatories, Zoo's)
- 9-12. Botanic gardens
- 9-13. Preservation of monuments
- 9-14. Caves
- 9-15. Population by religions by the housing and population census
- 9-16. Selected indicators on churches
- 9-17. Selected indicators on Roman-Catholic Church
- 9-18. Membership in civil associations, chambers and trade unions

10. Physical Training and Sport

- 10–1. Selected indicators on physical culture
- 10–2. Sports schools
- 10–3. Sports classes
- 10–4. Unions and membership of the Association of Technical and Sporting Activities of the SR
- 10–5. Metals won by the Slovak sportsmen (adults)
- 10–6. Metals won by the Slovak sportsmen (juniors)

11. National Accounts

12. Finance and Currency

13. Foreign Trade

14. Prices

15. Fixed Assets

16. Organizational Statistics

11. National Accounts

- 11-1. Gross domestic product
- 11-2. Selected macroeconomic indicators in 2004
- 11-3. Selected macroeconomic indicators in 2005
- 11-4. Selected macroeconomic indicators – deflators
- 11-5. Gross domestic product by economic activities in 2004 and 2005
- 11-6. Value added by size structure of enterprises
- 11-7. Gross output by size structure of enterprises
- 11-8. Generation and use of income in sector of households
- 11-9. Gross domestic product by output, income and expenditure approach
- 11-10. Balancing items of national accounts in the Slovak Republic
- 11-11. Distributive transactions for institutional sectors
- 11-12. Main components of non-financial assets for institutional sectors
- 11-13. Financial transactions
- 11-14. Gross output from supply and use tables by branches
- 11-15. Intermediate consumption from supply and use tables by branches
- 11-16. Gross value added by economic activities from supply and use tables
- 11-17. Final consumption from supply and use tables by commodities
- 11-18. Compensation of employees from supply and use tables by branches
- 11-19. Gross fixed capital formation by selected economic activities
- 11-20. Gross fixed capital formation from supply and use tables by commodities
- 11-21. Gross operating surplus from supply and use tables by branches

12. Finance and Currency

- 12-1. The main aggregates of general government sector in ESA 95 methodology
- 12-2. Structure of revenues and expenditures of local budgets by type
- 12-3. Balance of revenues and expenditures of the State Budget
- 12-4. Structure of expenditures of general government budgets by functional classification
- 12-5. General government debt (maastricht debt) as of Dec. 31
- 12-6. Revenues and expenditures on health insurance companies
- 12-7. Insured under health insurance companies as of Dec. 31
- 12-8. Revenues of the Social Insurance Agency
- 12-9. Expenditures of the Social Insurance Agency
- 12-10. Expenditures for active labour market measures
- 12-11. Insured under the Social Insurance Agency as of Dec. 31
- 12-12. Selected indicators of non-financial corporations by size structure of enterprises
- 12-13. Selected financial indicators of non-financial corporations
- 12-14. Selected financial indicators in financial corporations
- 12-15. Assets and liabilities of the National Bank of Slovakia as of Dec. 31
- 12-16. Assets and liabilities of commercial banks as of Dec. 31
- 12-17. Monetary survey in actual exchange rate
- 12-18. Balance of payments of the Slovak Republic
- 12-19. Detailed capital account of balance of payments of the Slovak Republic
- 12-20. Average interest rates of deposits and credits by sectors in 2005
- 12-21. Summary of credits and deposits as of Dec. 31

- 12–22. Summary of population deposits as of Dec. 31
- 12–23. Average foreign exchange rates (midpoint)
- 12–24. Banking sector
- 12–25. Capital market
- 12–26. Foreign direct investments into the Slovak Republic as of Dec. 31
- 12–27. Foreign direct investments into the Slovak Republic by country of investor and by selected economic activities as of Dec. 31
- 12–28. Direct investments of the Slovak Republic abroad by country as of Dec. 31
- 12–29. Direct investments of the Slovak Republic abroad by country and selected economic activities as of Dec. 31
- 12–30. Insurance companies in the insurance market
- 12–31. Premium fixed by the law
- 12–32. Settled claims
- 12–33. Revenues and expenditures of supplementary pension insurance companies
- 12–34. Number of contracts, insured and beneficiaries in supplementary insurance companies

13. Foreign Trade

- 13–1. Territorial structure of foreign trade
- 13–2. Foreign trade by commodity groups (Standard International Trade Classification Revision 3)
- 13–3. Imports, exports and trade balance by selected countries
- 13–4. Foreign trade by chapters of classification of goods in Customs Tariff – imports
- 13–5. Foreign trade by chapters of classification of goods in Customs Tariff – exports
- 13–6. Imports of selected commodities by the most important partners
- 13–7. Exports of selected commodities by the most important partners

14. Prices

- 14–1. Development of price indices (annual averages)
- 14–2. Industrial producers price indices in selected sections of Classification of Products by Activity
- 14–3. Industrial producers price indices by the Classification of Products by Activity – total
- 14–4. Industrial producers price indices by the Classification of Products by Activity – inland
- 14–5. Industrial producers price indices by the Classification of Products by Activity – export
- 14–6. Price indices of construction works by the Classification of Products by Activity
- 14–7. Producer price indices of agricultural products
- 14–8. Average prices of agricultural products
- 14–9. Development of core and net inflation
- 14–10. Consumer price indices
- 14–11. Cost of living indices of employees
- 14–12. Cost of living indices of pensioners
- 14–13. Average consumer prices of selected products

15. Fixed Assets

- 15-1. Status and movement of fixed assets at purchasing value in 2004
- 15-2. Status of tangible fixed assets at purchasing value as of Dec. 31, 2004 in corporations with 20 and more employees by groups
- 15-3. Status of intangible fixed assets at purchasing value as of Dec. 31, 2004 in corporations with 20 and more employees by groups
- 15-4. Fixed assets excluded from gross fixed capital formation as of Dec. 31, 2004 in corporations with 20 and more employees
- 15-5. Status of fixed assets at purchasing value in 2004 in corporations with 20 and more employees by ownership
- 15-6. Fixed assets at purchasing value as of Dec. 31, 2004 in corporations with 20 and more employees by size structure of enterprises
- 15-7. Status of fixed assets at reproduction prices by sector of national accounts as of Dec. 31
- 15-8. Dwellings

16. Organizational Statistics

- 16–1. Legal units by economic activities
- 16–2. Enterprises by economic activities
- 16–3. Legal units by selected legal forms
- 16–4. Natural persons-entrepreneurs by economic activities and selected legal forms as of Dec. 31, 2005
- 16–5. Enterprises by economic activities and selected ownership forms as of Dec. 31, 2005
- 16–6. Enterprises by economic activities and size categories by employees as of Dec. 31, 2005
- 16–7. Legal units by sectors and subsectors of National Accounts System as of Dec. 31, 2005
- 16–8. Enterprises by selected ownership forms and size categories by employees as of Dec. 31, 2005

17. Agriculture

18. Forestry

19. Industry

20. Energy

21. Construction

22. Trade, Catering and Accommodation

23. Transport

24. Posts, Telecommunications, Information Society

25. Real Estate, Renting, Business Activities and other Services

26. Tourism

17. Agriculture

- 17-1. Use of land
- 17-2. Gross agricultural production in enterprises with 20 and more employees
- 17-3. Sown areas as of May 20
- 17-4. Production of agricultural crops
- 17-5. Hectare yields
- 17-6. Selected sorts of vegetables
- 17-7. Selected sorts of fruit
- 17-8. Roofed areas
- 17-9. Age and sort composition of vineyards as of Dec. 31
- 17-10. Balance of cereals
- 17-11. Livestock as of Dec. 31
- 17-12. Livestock production
- 17-13. Livestock yields
- 17-14. Catches in inland waters
- 17-15. Apiculture
- 17-16. Sales of agricultural products by primary producers
- 17-17. Level of agricultural production
- 17-18. Means of mechanization as of Dec. 31
- 17-19. Consumption of fertilizers
- 17-20. Consumption of plant protection agents

- 17–21. Employees and wages by main professions in agriculture (in enterprises with 20 and more employees)
- 17–22. Economic accounts for agriculture: production account
- 17–23. The structure of farms (from results of Farm structure census and Structural survey)
- 17–24. Workers on farms of natural persons (from results of Farm structure census and Structural survey)
- 17–25. The employees on farms of legal persons (from results of Farm structure census and Structural survey)
- 17–26. Age structure of workers on farms (from results of Farm structure census and Structural survey)
- 17–27. Classification of farms by economic size (from results of Farm structure census and Structural survey)
- 17–28. Used agricultural land area (from results of Farm structure census and Structural survey)
- 17–29. Farms by size used agriculture land (from results of Farm structure census and Structural survey)

18. Forestry

- 18–1. Forest land
- 18–2. Afforestation and silviculture
- 18–3. Logging and timber deliveries
- 18–4. Number and size of enterprises managing forest in 2005

19. Industry

- 19–1. Basic indicators of industry
- 19–2. Selected indicators in industry by size structure of enterprises
- 19–3. Industrial production index (not adjusted from influence of working days number) by economic activity
- 19–4. Industrial production index (PY = 100; not adjusted from influence of working days number) by economic activity
- 19–5. Industrial production index (not adjusted from influence of working days number) by Main Industrial Groupings
- 19–6. Industrial production index (PY = 100; not adjusted from influence of working days number) by Main Industrial Groupings
- 19–7. Receipts from sales for export of enterprises with 20 and more employees by economic activity
- 19–8. Turnover of enterprises with 20 and more employees by economic activity
- 19–9. Number of enterprises with 20 and more employees by economic activity
- 19–10. Monthly labour productivity based on turnover in enterprises with 20 and more employees by economic activity
- 19–11. Average registered number of employees of enterprises with 20 and more employees by economic activity
- 19–12. Average monthly wage of employee in enterprises with 20 and more employees by economic activity

- 19–13. Turnover of enterprises with 20 and more employees by Main Industrial Groupings
- 19–14. Selected indicators of enterprises with 20 and more employees by sector of ownership
- 19–15. Production of selected industrial commodities

20. Energy

- 20–1. Balance of fuels, electricity and heat
- 20–2. Balance of solid fuels
- 20–3. Balance of gaseous fuels
- 20–4. Balance of crude oil and petroleum products
- 20–5. Balance of renewables and wastes
- 20–6. Balance of electricity
- 20–7. Balance of heat
- 20–8. Consumption of selected fuels in agriculture in enterprises with 20 and more employees
- 20–9. Consumption of selected fuels and electricity in industry in enterprises with 20 and more employees
- 20–10. Consumption of selected fuels and electricity in construction in enterprises with 20 and more employees

21. Construction

- 21–1. Construction production and turnover – aggregate data
- 21–2. Construction production carried out by own employees and average registered number of employees by ownership sector
- 21–3. Construction production carried out by own employees and labour productivity by size structure of enterprises
- 21–4. Average registered number of employees and labour productivity per employee by size structure of enterprises
- 21–5. Average registered number of workers and labour productivity per worker by size structure of enterprises
- 21–6. Turnover and receipts construction activity by size structure of enterprises
- 21–7. Basic indicators in construction enterprises with 20 and more employees
- 21–8. Contractually agreed construction production in new construction, reconstructions and modernisations in inland by Classification of Types of Constructions in enterprises with 20 and more employees
- 21–9. Construction production carried out by own employees by Classification of Production (CPA) in enterprises with 20 and more employees
- 21–10. Completed dwellings in new buildings for habitation built by supplier enterprises with 20 and more employees by construction technology
- 21–11. Consumption of selected products in construction enterprises with 20 and more employees

22. Trade, Catering and Accommodation

- 22–1. Selected indicators on internal trade
- 22–2. Structure of turnover for retail trade
- 22–3. Turnover on sale, maintenance and repair of motor vehicles and motorcycles by economic activities
- 22–4. Turnover in wholesale by economic activities
- 22–5. Turnover in retail trade by economic activities
- 22–6. Average registered number of employees on sale, maintenance and repair of motor vehicles and motorcycles by economic activities
- 22–7. Average registered number of employees in wholesale by economic activities
- 22–8. Average registered number of employees in retail trade by economic activities
- 22–9. Average monthly wage on sale, maintenance and repair of motor vehicles and motorcycles by economic activities
- 22–10. Average monthly wage in wholesale by economic activities
- 22–11. Average monthly wage in retail trade by economic activities
- 22–12. Selected indicators in internal trade by size structure of enterprises
- 22–13. Retail network in organizations with 20 and more employees as of December 31, 2005
- 22–14. Turnover in hotels and restaurants by economic activities
- 22–15. Average registered number of employees in hotels and restaurants by economic activities
- 22–16. Average monthly wage in hotels and restaurants by economic activities
- 22–17. Network of outlet centres of catering with 20 and more employees as of December 31, 2005

23. Transport

- 23–1. Selected indicators on transport
- 23–2. Basic data on transport network as of Dec. 31
- 23–3. Motor vehicles as of Dec. 31
- 23–4. Average registered number of employees for incorporated enterprises with 20 and more employees
- 23–5. Railway transport
- 23–6. Railway transport of goods by commodity groups
- 23–7. Road transport
- 23–8. Selected indicators in road public transport by size structure of enterprises
- 23–9. Road public transport of goods by commodity groups
- 23–10. Inland waterway transport
- 23–11. Inland waterway public transport of goods by commodity groups
- 23–12. City transport
- 23–13. Air transport
- 23–14. Pipeline transport

24. Posts, Telecommunications, Information Society

- 24–1. Selected indicators on posts and telecommunications
- 24–2. Post offices
- 24–3. Other post offices
- 24–4. Telecommunications as of Dec. 31
- 24–5. Information and communication technology in enterprises with 20 and more employees
- 24–6. ICT in enterprises in enterprises of finance and insurance (NACE J)
- 24–7. ICT in households and by individuals

25. Real Estate, Renting, Business Activities and other Services

- 25–1. Basic indicators for real estate, renting, business activities and other services
- 25–2. Turnover for real estate, renting, business activities and other services by size structure of enterprises
- 25–3. Average registered number of employees for real estate, renting, business activities and other services by size structure of enterprises
- 25–4. Average monthly wage for real estate, renting, business activities and other services by size structure of enterprises
- 25–5. Turnover for real estate, renting, business activities and other services

26. Tourism

- 26–1. Capacity and performances of accommodation facilities
- 26–2. Capacity and performances of accommodation facilities in selected towns in 2005
- 26–3. Foreign visitors in accommodation facilities of tourism
- 26–4. Active tourism organized by travel agencies in the SR
- 26–5. Passive tourism organized by travel agencies in the SR
- 26–6. Foreign tourism by sections of borders
- 26–7. Number of entries of foreign visitors by the visa requirement

27. Environment

28. Science and Technology

27. Environment

- 27–1. Protected territories
- 27–2. National parks and protected landscape areas as of Dec. 31, 2005
- 27–3. Penalties
- 27–4. Environmental expenditures together
- 27–5. Tree species area and their age structure as of Dec. 31, 2005
- 27–6. Damage to forests caused by immisions as of Dec. 31, 2005
- 27–7. Degree of damage to forests by tree species as of Dec. 31, 2005
- 27–8. Damage to forests caused by abiotic and biotic factors as of Dec. 31, 2005
- 27–9. Data on hunting grounds as of Dec. 31
- 27–10. Hunting and spring stock of game
- 27–11. Xenobiotics in foodstuffs
- 27–12. Municipal waste generation: by subgroup of Waste Catalogue
- 27–13. Waste selected sections of economic activity
- 27–14. Emissions of major pollutants by economic activity – particulates
- 27–15. Emissions and weighted emissions in districts according to the highest amount of weighted emissions in 2004
- 27–16. Immissions in selected localities in 2005 – annual average concentrations
- 27–17. Numbers of exceedances of immission limit values in 2005
- 27–18. Regional air pollution in 2005
- 27–19. Levels of surface ozone in selected monitoring stations
- 27–20. Regional pollution of precipitation in 2005

- 27–21. Water courses and waterworks under the administration of water management organizations as of Dec. 31
- 27–22. Public water-supply and sewage systems as of Dec. 31
- 27–23. Waste water drained off into water courses in 2005
- 27–24. Generation of waste water in 2005
- 27–25. Water quality in water courses by river-basins in 2005
- 27–26. Water quality in significant water courses in 2005 – quality categories
- 27–27. Water quality in the mouths of significant water courses in 2005

28. Science and Technology

- 28–1. Research and development (R&D) personnel
- 28–2. Research and development personnel in FTE by sectors and field of science
- 28–3. Structure of activities of research and development institutions by current expenditures
- 28–4. Expenditures on research and development
- 28–5. Expenditures on research and development by socio-economic objectives
- 28–6. Expenditures on research and development by sectors and fields of sciences
- 28–7. Licences
- 28–8. Applications concerning industrial legal protection
- 28–9. Granted and registered kinds concerning industrial legal protection
- 28–10. Applications concerning inventions according to the international patent classification
- 28–11. Foreign applications concerning inventions and PCT according to the international patent classification
- 28–12. Granted patents according to the international patent classification
- 28–13. Applications concerning trademarks by country of origin
- 28–14. Registered trademarks by country of origin
- 28–15. Certified products and certified quality management systems in corporations with 20 and more employees – total
- 28–16. Certified products and certified quality management systems in corporations with 20 and more employees – new in current year
- 28–17. Innovation activity in industry and selected services

29. Crime-rate and Justice

30. Accidents and Natural Disasters

29. Crime-rate and Justice

- 29–1. Crime-rate
- 29–2. Development of criminal offences by basic groups and kinds
- 29–3. Cases settled by courts
- 29–4. Results of criminal proceedings and legally passed sentences
- 29–5. Persons convicted of selected crimes
- 29–6. Juveniles convicted of selected crimes
- 29–7. Civil cases
- 29–8. Sued and convicted persons in penitentiary institutions
- 29–9. Convicts in penitentiary institutions by reformatory and reclamation groups (as of Dec. 31)
- 29–10. Convicts in penitentiary institutions by reformatory and reclamation groups, education and sex (as of Dec. 31)
- 29–11. Convicts in penitentiary institutions by duration of custodial sentence and reformatory and reclamation groups (as of Dec. 31)
- 29–12. Convicts in penitentiary institutions by age and sex (as of Dec. 31)

30. Accidents and Natural Disasters

- 30–1. Road traffic accidents
- 30–2. Road traffic accidents by cause
- 30–3. Road traffic accidents by main causes
- 30–4. Road traffic accidents by place of origin
- 30–5. Fires
- 30–6. Fires by branches of the economy
- 30–7. Killed and injured persons in fires by observed categories
- 30–8. Floods effects on the property, environment, people and animals

Preface ● Primary Economic Indicators ● Territory and Climate ● Demography and Social Statistics ● Macroeconomic Statistics ● Business Statistics ● Multisectoral Statistics ● Criminality, Justice, Accidents and Natural Disasters ● **International Statistics** ● Electoral Statistics ● Graphs ● Measuring Units, Symbols and Abbreviations

START

31. International Surveys

31. International Surveys

- 31-1. Surface area, population and population density in 2003
- 31-2. Marriage
- 31-3. Divorces
- 31-4. Natality
- 31-5. Mortality
- 31-6. Natural increase (decrease) in population
- 31-7. Infant mortality
- 31-8. Life expectancy
- 31-9. Urban population
- 31-10. Youth education attainment level
- 31-11. Total employment growth
- 31-12. Employment rate
- 31-13. Employment rate of older workers
- 31-14. Unemployment rate
- 31-15. Long-term unemployment rate
- 31-16. Gross domestic product per capita in purchasing power standards (PPS)
(EU-25 = 100)
- 31-17. Labour productivity per person employed (EU-25 = 100)
- 31-18. Gross domestic expenditure on research and development
- 31-19. Greenhouse gas emissions
- 31-20. Industrial production index

- 31–21. Consumption of petroleum
- 31–22. Consumption of natural gas
- 31–23. Energy intensity of the economy
- 31–24. Agricultural production (average from 1999 – 2001 = 100)
- 31–25. Cereals
- 31–26. Potatoes
- 31–27. Pulses
- 31–28. Production of vegetables and fruit
- 31–29. Cattle as of Dec. 31
- 31–30. Pigs as of Dec. 31
- 31–31. Meat production
- 31–32. Structure of meat production by kind in 2005
- 31–33. Production of milk
- 31–34. General consumer price indices
- 31–35. Consumer price indices of foodstuffs
- 31–36. Comparative price levels
- 31–37. Imports, exports and balance by main countries
- 31–38. Balance of payment (current account)
- 31–39. International reserves (minus gold)

32. Elections to the Bodies of Self-government Regions

33. Elections to the National Council of the Slovak Republic

32. Elections to the Bodies of Self-government Regions

- 32–1. Results of the elections to the bodies of self-government regions in 2005
- 32–2. Turnout in elections to the bodies of self-government regions in 2005

33. Elections to the National Council of the Slovak Republic

- 33–1. Summary outcome of the elections to the National Council of the Slovak Republic in 2006
- 33–2. Share of valid votes for political parties and number of mandates of political parties in elections to the National Council of the Slovak Republic in 2006
- 33–3. Share of valid votes for political parties, which passed into the National Council of the Slovak Republic in 2006

- Graph 1 Age structure of population as of Dec. 31, 1996 and as of Dec. 31, 2005
- Graph 2 Natural increase of population
- Graph 3 Life expectancy at birth
- Graph 4 Age structure of the population
- Graph 5 Average monthly wage in selected categories of economic activity in 2005
- Graph 6 Employed in the economy of the SR as of Dec. 31
- Graph 7 Unemployment rate by regions SR as of Dec. 31, 2005
- Graph 8 Consumption of selected kinds of food per capita/year
- Graph 9 Structure of students of higher education institutions by subject of studies in 2005
- Graph 10 Average percentage of disability to work
- Graph 11 Average monthly level of pensions paid
- Graph 12 Structure of radio broadcasting in 2005
- Graph 13 Gross domestic product
- Graph 14 Gross domestic product per capita by regions SR (at purchasing power standard) in 2003

Merné jednotky

b. j.	= bytová jednotka
cm	= centimeter
cm ³	= centimeter kubický
°C	= stupeň Celzia
čtkm	= čistý tonový kilometer
g	= gram
GJ	= gigajoule
h	= hodina
ha	= hektár
hl	= hektoliter
hrtkm	= hrubý tonový kilometer
J	= joule
kg	= kilogram
kg č. ž.	= kilogram čistých živín
kgoe	= kilogram olejového ekvivalentu
kg ž. hm.	= kilogram živej hmotnosti
kJ	= kilojoule
km	= kilometer
km ²	= kilometer štvorcový
kW	= kilowatt
l	= liter
m	= meter
mil.	= milión
mg	= miligram
mld.	= miliarda

Measuring units

= dwelling unit
= centimetre
= cubic centimetre
= centigrade
= net ton kilometre
= gram
= gigajoule
= hour
= hectare
= hectolitre
= gross tonkilometre (grtkm)
= joule
= kilogram
= kilogram of pure nutrient
= kilogram of oil equivalent
= kilogram of live weight
= kilojoule
= kilometre
= square kilometre
= kilowatt
= litre
= metre
= million
= milligram
= milliard (a thousand million), billion

mm	= milimeter	= millimetre
m n. m.	= metre nad morom	= metres above sea level
m ²	= meter štvorcový	= square metre
m ³	= meter kubický	= cubic metre
m ³ /s	= meter kubický za sekundu	= cubic metre per second
ng/m ³	= nanogram na meter kubický	= nanogram per cubic metre
MW	= megawatt	= megawatt
µg	= mikrogram	= microgram
s	= sekunda	= second
t	= tona	= metric ton
t č. ž.	= tona čistých živín	= ton of pure nutrient
t. j.	= tehlová jednotka	= brick units
t ž. hm.	= tona živej hmotnosti	= ton of live weight
tis.	= tisíc	= thousand
tis. m ³	= tisíc metrov kubických	= thousand cubic metres
b. k.	= bez kôry	= under bark
tis. t/r	= tisíc ton za rok	= thousand tons per year
TJ	= terajoule	= terajoule
tkm	= tonový kilometer	= ton-kilometre

Značky a skratky

%	= percento
‰	= promile
Ø	= priemer
€	= euro
a. a.	= absolútny alkohol
a pod., ap.	= a podobne
atď.	= a tak ďalej
b. c.	= bežné ceny
detto	= to isté, rovnaké
i. n.	= inde nezaradený
kap.	= kapitola
max.	= maximum
min.	= minimum
m. j.	= merná jednotka
MR	= minulý rok
napr.	= napríklad
netto	= čistá hmotnosť
pH	= kyslosť
resp.	= respektíve
r. o.	= ručenie obmedzené
s. c.	= stále ceny
s. š.	= severná šírka
tab.	= tabuľka
t. j.	= to jest
tzn.	= to znamená

Symbols and abbreviations

= per cent
= per mille
= average
= euro
= absolute alcohol
= etc., and others
= etc.
= current prices
= ditto
= n. e. c.
= chapture (chap.)
= maximum
= minimum
= measuring units (m. u.)
= previous year (PY)
= e. g.
= net weight
= acidity
= resp.
= limited liability
= constant prices
= North latitude (N)
= table
= i. e.
= i. e.

tzv.	= takzvaný	= so called
vr.	= vrátane	= including
v. d.	= východná dĺžka	= East longitude (E)
Zb.	= zbierka (zákonov)	= Code (of Acts)
Z. z.	= zbierka zákonov (od roku 1993)	= Code of Acts (since 1993)
BSK	= biochemická spotreba kyslíka	= Biochemical oxygen demand (BOD)
COFOG	= Klasifikácia výdavkov verejnej správy	= Classification of the Functions of the Government
COICOP	= Klasifikácia individuálnej spotreby podľa účelu použitia	= Classification of Individual Consumption by Purpose Use
CIF (c. i. f.)	= cena, poisťné, dopravné	= Cost, insurance and freight
DPH	= daň z pridanej hodnoty	= Value added tax
EIB	= Európska investičná banka	= European Investment Bank
EMEP	= Európska monitorovacia sieť	= Cooperative Programme for the Monitoring and Evaluation of the Long Range on of Air Pollutants in Europe
EMS	= Európsky menový systém	= European Monetary System
EMÚ	= Európska menová únia	= European Monetary Union
EPP	= Európsky porovnávací program	= European Comparable Program (ECP)
ESNÚ 95	= Európsky systém národných a regionálnych účtov 95	= European System of National and Regional Accounts in the Community 1995 (ESA 95)
ESU	= Európska veľkostná jednotka	= European Size Unit
EÚ	= Európska únia	= European Union

EUROSTAT	= Štatistický úrad Spoločenstva	= Statistical Office of the European Communities
EZVO	= Európske združenie voľného obchodu	= European Free Trade Association (EFTA)
FISIM	= nepriamo merané služby finančného sprostredkovania	= Financial intermediation services indirectly measured
FNM	= Fond národného majetku	= National Property Fund
FOB (f. o. b.)	= franco paluba	= Free on board
FTE	= ekvivalent plného pracovného času	= Full-time Equivalent
GFS	= štatistika vládnych financií	= Government finance statistics
GSM	= digitálny bunkový rádiatelefonný systém	= Global System for Mobile Communications
HDP	= hrubý domáci produkt	= Gross Domestic Product (GDP)
CHSK	= chemická spotreba kyslíka	= Chemical oxygen demand (COD)
IKT	= informačné a komunikačné technológie	= Information and Communication Technology
ILO	= Medzinárodná organizácia práce	= International Labour Organization
ISCO	= Medzinárodná štandardná klasifikácia povolání	= International Standard Classification of Occupations
ISIC	= Medzinárodná typová odvetvová klasifikácia všetkých ekonomických činností	= International Standard Industrial Classification of All Economic Activities
KP	= Štatistická klasifikácia produkcie	= Classification of Products by Activity (CPA)
KS	= Klasifikácia stavieb	= Classification of Types of Construction (CC)
KTJ/I	= počet jednotiek tvoriacich kolónie z 1 litra vody	= Number of units forming colonies in 1 litre of water

KZAM	= Klasifikácia zamestnaní	= Classification of Occupations (ISCO-88)
MF SR	= Ministerstvo financií Slovenskej republiky	= Ministry of Finance of the Slovak Republic
MMF	= Medzinárodný menový fond	= International Monetary Fund
MPS	= metóda materiálneho produktu	= System of Material Product Balances
MPSVR SR	= Ministerstvo práce, sociálnych vecí a rodiny Slovenskej republiky	= Ministry of Labour, Social Affairs and Family of the Slovak Republic
MKCH	= Medzinárodná štatistická klasifikácia chorôb a príbuzných zdravotných problémov	= International Statistical Classification of Diseases and Related Health Problems
MV SR	= Ministerstvo vnútra Slovenskej republiky	= Ministry of Interior of the Slovak Republic
MZ SR	= Ministerstvo zdravotníctva Slovenskej republiky	= Ministry of Health of the Slovak Republic
MŽP SR	= Ministerstvo životného prostredia Slovenskej republiky	= Ministry of Environment of the Slovak Republic
NACE	= Klasifikácia ekonomických činností Európskeho spoločenstva	= General Classification of Economic Activities of the European Community
NCZI	= Národné centrum zdravotníckych informácií	= National Health Information Centre
NL	= nerozpustné látky	= Insoluble compounds
NMT	= analogový bunkový rádiový systém	= Nordic Mobile Telephone
NR SR	= Národná rada Slovenskej republiky	= National Council of the Slovak Republic
NST/R	= Klasifikácia prepravovaného tovaru	= Classification of Goods in Transport

NZISD	= neziskové inštitúcie slúžiace domácnostiam	= Non-profit institutions serving households (NPISH)
OECD	= Organizácia pre hospodársku spoluprácu a rozvoj	= Organization for Economic Cooperation and Development
OKEČ	= Štatistická odvetvová klasifikácia ekonomických činností	= Statistical Branch Classification of Economic Activities (NACE)
OP	= obchodná parita	= Trade parity
PCT	= Zmluva o patentovej spolupráci	= Patent Cooperation Treaty
PE	= polyetylén	= Polyethylene
PH	= pridaná hodnota	= Value added
PKS	= parita kúpnej sily	= Purchasing Power Standard (PPS)
PRODSLOV	= Zoznam priemyselných výrobkov	= Production Communautaire – Community production (PRODCOM)
PVC	= polyvinylchlorid	= Polyvinyl chloride
RAS	= rozpustné anorganické soli	= Soluble inorganic salts
RL	= ropa a ropné látky	= Oil and oil products
RNÚ	= ročné národné účty	= Annual National Accounts
SD	= spotrebná daň	= Excise duties
SGM	= Štandardný hrubý zisk	= Standard Gross Margin
SITC	= Štandardná medzinárodná klasifikácia obchodu	= Standard International Trade Classification
SR	= Slovenská republika	= The Slovak Republic
STN	= Slovenská technická norma	= Slovak Technical Norm
SVLZ	= spoločné vyšetrovacie a liečebné zložky	= Associated bodies of examination and treatment
SZČO	= samostatne zárobkovo činné osoby	= Self-employed persons

ŠPP	= štátne pokladničné poukážky	= Treasury bills
ŠÚ SR	= Štatistický úrad Slovenskej republiky	= Statistical Office of the Slovak Republic
TDP	= tabuľky dodávok a použitia	= Supply and Use Tables
UN SD	= Štatistická divízia OSN	= United Nations Statistics Division
USA	= Spojené štáty americké	= United States of America
VV	= výskum a vývoj	= Research and development (R&D)
VZPS	= výberové zisťovanie pracovných síl	= Labour force survey (LFS)
ZPČ	= zvláštne práva čerpania	= Special Drawing Rights (SDRs)

ZÁKLADNÉ NÁRODOHOSPODÁRSKE UKAZOVATELE

⁴⁾ In 2004 for all enterprises

⁵⁾ Excluding city transport

⁶⁾ Excluding dwelling pipes

2. Territory and Climate

Methodological notes

Selected data on location, area and the highest mountains of the Slovak Republic, meteorological data on selected stations, hydrological data on selected water courses, data on main rivers on the territory of the SR, areas of their basins and length of water courses creating a border of the SR on neighboring countries Statistical Office obtained from non-statistical sources on the basis of measurement, records and methodology used in corresponding institution.

Source

The Statistical Office of the Slovak Republic acquired geodesic data from the Geodesic and Cartographic Institute and from the publication Environment of the Slovak Republic published by the Ministry of Environment of the Slovak Republic. Meteorological and hydrological data were granted by the Slovak Hydrometeorological Institute.

More information can be obtained in given institutes.

2–1. Rozloha, hranice a povrch Slovenskej republiky v roku 2005
Area, borders and surface of the Slovak Republic in 2005

Ukazovateľ	V absolútnych čísloch In absolute numbers	V percentách In per cent	Indicator
Rozloha k 31. 12. (km ²)	49 034	x	Area as of December 31, (km ²)
Hustota obyvateľstva na 1 km ²	110	x	Population density per km ²
Obvod (km)	1 663	100	Perimeter (km)
Dĺžka hranice (km) s			Length of the border (km) on:
Českom	251,8	15,1	Czech Republic
Maďarskom	664,7	40,0	Hungary
Poľskom	541,1	32,6	Poland
Rakúskom	106,7	6,4	Austria
Ukrajinou	98,5	5,9	Ukraine
Najnižšie položené miesto – vyústenie rieky Bodrog zo SR (m n. m.)	94	x	Altitude of the lowest place – place where the river Bodrog is leaving the Slovak Republic (metres above sea level)
Najvyššie položené miesto – Gerlachovský štít (m n. m.)	2 655	x	Altitude of the highest place – Gerlachovský štít (metres above sea level)
Výškový rozdiel reliéfu – vo vzdialenosti 153 km (m)	2 561	x	Altitude difference of relief – in distance 153 km (m)
Najvyššia vyhasnutá sopka – Poľana (m n. m.)	1 458	x	The highest extinct volcano – Poľana (metres above sea level)
Najväčšia nížina – Podunajská nížina (km ²)	10 000	20,4	The largest lowland – Podunajská nížina (km ²)
Najväčší riečny ostrov – Žitný ostrov (km ²)	1 236	2,5	The largest river island – Žitný ostrov (km ²)
Výškové stupne povrchu (km ²) nížiny (94 – 300 m n. m.)	20 045	41,0	Altitude degrees of surface (km ²) Lowlands (94 – 300 metres above sea level)
nízke vysočiny (301 – 750 m n. m.)	22 089	45,0	Low highlands (301 – 750 metres above sea level)
stredvysočiny (751 – 1 500 m n. m.)	6 350	13,0	Middle highlands (751 – 1 500 metres above sea level)
vysoké vysočiny (1 501 – 2 655 m n. m.)	552	1,0	High highlands (1 501 – 2 655 metres above sea level)
Najdlhšia dolina – Bielowodská (km)	10	x	The longest valley – Bielowodská (km)
Rozloha krasu (km ²)	2 700	5,5	Area of karst (km ²)
Najhlbšia jaskyňa – Starý hrad (m)	432	x	The deepest cave – Starý hrad (m)
Najdlhšia jaskyňa – Systém Demänov- ských jaskýň (km)	30	x	The longest cave – Demänovské jaskyne System (km)
Celková dĺžka evidovaných tokov – riečna sieť (km)	49 775	x	Length of registered water courses in total – river net (km)
Najdlhšia rieka – Váh (km)	378	x	The longest river – Váh (km)
Najväčšie jazero – Veľké Hincovo pleso (ha)	20,08	x	The largest lake – Veľké Hincovo pleso (ha)
Najvyšší vodopád – Kmeťov (m)	90	x	The biggest waterfall – Kmeťov (m)
Prírodné liečivé zdroje	54	x	Natural curative sources
Využiteľné množstvo podzemných vôd (m ³ .s ⁻¹)	74,37	x	Available volume of subsoil waters (m ³ .s ⁻¹)
Výskyt geotermálnych vôd (lokality)	106	x	Finding places of geothermal waters (localities)

2–2. Poloha územia Slovenskej republiky
Location of the Slovak Republic's territory

Medzná súradnica Limiting coordinates	Poloha Location	
	Okres District	Obec Municipality
Južná 47°43'54" s. š. Southern 47°43'54" N	Komárno	Patince

3. Population

Methodological notes

Data on population change are obtained from statistical reports processing about demographic population phenomena (marriages, divorces, births and deaths) producing statistical survey contents on population. Data cover all inhabitants residing permanently in Slovakia regardless of their citizenship as well as citizens of the SR with permanent residence in the SR during their temporary residence abroad. Demographic statistics includes the statistics on spontaneous and induced abortions, which is processed from data of the Ministry of Health of the Slovak Republic.

Migration statistics includes internal migration (permanent address changes between municipalities, districts and regions) and foreign migration, which means a change of the country of residence, irrespective of citizenship.

Data from the Population and Housing Census make up the foundation for balancing of the number and structure of the population by age, marital status and ethnic nationality in the next ten years term on the basis of population change and foreign migration of the population.

The methodology and the content of demographic statistics is internationally comparable. The processing by classification point of the view is done according to the code-lists of ethnic nationalities and marital status, the Statistical code-list of countries and Register of the spatial units. Since 1994 death causes at departed have been processed according to the International Statistical Classification of Diseases and Related Health Problems, the tenth revision. Names of the countries are used according to the international standard ISO 3166-93.

Definitions

Mid-year population is the number of the population as of July 1 of the reference year.

A live-born child is a child showing at least one of the following signs of life at birth such as breathing, beating of the heart, pulsation of the umbilical cord, active movement of muscles though the umbilical cord has not been cut or the placenta has not been born. At the same time, the birth weight is

a) 500 and more grams or

b) 499 grams and less if a child survives 24 hours after its birth.

Abortion is premature spontaneous or artificially induced termination of pregnancy including extra-uterine pregnancy where the fetus does not show signs of life and its birth weight is below 1 000 grams, or the fetus shows some sign of life and its birth weight is below 500 grams but it does not survive 24 hours, or if the weight of the fetus cannot be established and duration of gestation is below 28 weeks.

Induced abortion is artificially induced termination of pregnancy including extra-uterine pregnancy.

Spontaneous abortion (miscarriage) is spontaneous termination of pregnancy, i.e. an abortion due to biological causes, without an obvious external intervention.

Natural increase in the population shows the difference between the number of live-born children and number of the deceased.

Net migration is the difference between the number of immigrants and the number of emigrants.

Total increase is the sum of natural increase and net migration.

Ageing index is represented by the number of persons aged 65 and more per 100 persons aged 0 to 14 years.

Mean age is the weighted arithmetic mean of the number of years lived by members of a given population till a given point of time; it is a mean age of the living population.

Total fertility rate is the mean number of live-born children per one woman throughout her whole reproduction period (from 15 to 49 years of her age), provided that the fertility rate level in the reference year was kept on and the mortality rate level was represented by the value of zero.

Gross reproduction rate is the mean number of live-born girls that would be delivered by one woman throughout the whole reproduction period (from 15 to 49 years of her age), provided that the fertility rate level in the reference year was kept on and mortality rate level was represented by the value of zero.

Net reproduction rate is the mean number of live-born girls that would be delivered by one woman throughout the whole reproduction period (from 15 to 49 years of her age), provided that the levels of fertility and mortality rates in the reference year were kept on.

Life expectancy at certain age (expectation of life) is the mean number of additional years a person of a given age would live if current mortality trends were to continue.

Life expectancy at birth is the mean number of additional years a person who has just been born would live if current mortality trends were to continue.

Source

All published data for demographic statistics are the result of the collection and the processing in the Statistical Office of the SR, except primary data relating abortions, which are obtained from the sector surveying of the Ministry of Health of the Slovak Republic realized by the National Health Information Centre in Bratislava and consequently processed by the Statistical Office of the Slovak Republic.

More detail information can be found in publication State and Movement of the Population, Age Structure of the Population; Balance of Movement of the Population by Communities; Balance of Movement of the Population by Nationality; Life tables, Movement of the Population and Development of the Population of the SR.

4. Labour Market

Methodological notes

Labour force sample survey is a permanent monitoring of labour force on the basis of a direct surveying in selected households. The survey is based on a random selection of dwellings in all districts of the Slovak Republic. Every quarter the sample covers 10 250 dwellings, which is 0.6 % of the total number of permanently occupied dwellings in the Slovak Republic. The survey covers all persons aged 15 and over who live in the households of the selected dwellings without regards to permanent, temporary or unregistered stay, institutionally population excepted. Each selected household remains in the sample for 5 subsequent quarters. All surveyed figures are recalculated by the current data on the population of the SR incurred from statistical surveys about population movement.

In processing by classification viewpoints there are Classification of Occupation, Classification of Education and others applied.

The methodology of the survey is recommended by the International Labour Organizations and by the Eurostat.

Employment and wages by enterprise reporting are surveyed in the framework of monitoring of the SR economy development. Persons on maternity and parental leave and armed forces are not included among employees. Processed data for organizations with 20 and more employees are classified by regions and districts, by staff categories, by kind of property and by legal form of organization. Numbers of employees are presents in persons.

Basic information on the development of wages is completed with data on the structure of gross nominal monthly wages obtained by sample survey on the structure of employees wages in the Slovak Republic. In processing by classification viewpoints there are Classification of Occupation, Classification of Education, the Code-Lists of Regions, Sex and Age of employees applied.

Wages statistics also includes the survey on total labour costs of employers in the Slovak Republic. The more detailed classification of the labour costs uses the Code-Lists of Regions, Staff Categories, Kind of Property and Legal Form of Organization.

The methodology of the sample survey on the structure of wages and total labour costs is recommended by the Eurostat and responds to the related European regulations.

Till January 2002 job applicant from school leavers ranks was graduate registered at labour

offices, social affairs and family during the period of one year and since February 2002 registered during the period of two years since the end of continual professional training. Since 2004 that is unemployed citizen younger than 25 years, who finished continual professional training in full time study before less than two years and not obtained first periodically paid employment.

The processing of selected labour market indicators uses the Statistical Branch Classification of Economic Activities (NACE).

Definitions

Economically active population by labour force sample survey (LFS) are persons aged 15 and over who are civilian employed, unemployed or members of the armed forces (conscripts and professionals in military service).

Economically inactive population by LFS are persons who have no job in the reference week because they are students and apprentices, pensioners, persons keeping household, persons in re-training course and therefore they do not seek a job actively during the last four weeks or they are seeking a job but they are not able to start work within two weeks. Persons on parental leave, discouraged workers (they would like to work but they do not seek a job because they do not believe to find adequate job) and persons younger than 15 years are also included.

Economic activity rate by LFS is calculated according to the following formula:

$$\text{Economic activity rate in per cent} = \frac{\text{Economic active population}}{\text{Population aged 15 and more}} \times 100$$

Employed by LFS are all persons aged 15 and over who are working at least one hour for pay or profit (full-time or part-time job, permanent, temporary, casual or seasonal job) in the reference week, as well as contributing (unpaid) family workers, professionals in military service, persons in civil service and persons working abroad. Data on employed include contributing family workers, who not received for our work any wage and allowance, professional members of the armed forces, as well as persons in civil servant, persons not working in the reference week due to illness, holiday, maternity leave, study, weather conditions and strike or

dispute, except persons on long-term unpaid leave of work. Persons on parental leave are not included among employed.

Employees by LFS are persons aged 15 and over who work in the reference week at least one hour and who receive compensations in the form of wage or salary, including members of productive co-operatives. Employees according to the enterprise reporting are all the stable as well as temporary employees regardless of their citizenship who have a contract of employment, service, state employment or membership with the employing organization. Students attending vocational secondary schools, persons performed on compulsory military or civil service, persons on maternity and parental leave and persons working upon contract are not included among employees. The number of employees in the economy of the Slovak Republic does not include members of the armed forces.

Self-employed by LFS are entrepreneurs with employees (employers), entrepreneurs without employees (own-account workers) and contributing (unpaid) family workers.

Employment rate 15 – 64 by LFS is calculated according to the formula:

$$\text{Employment rate 15 – 64 in per cent} = \frac{\text{Number of employed persons at the age of 15 – 64}}{\text{Number of population at the age of 15 – 64}} \times 100$$

Unemployed by LFS are persons aged 15 and over who are not working for pay or profit during the reference week, who are actively seeking job during the last four weeks (or who found a job before and who will take up the work within 3 month) and who are able to start work in the next two weeks. Those persons can, but need not be registered at labour offices, social affairs and family as job applicants.

Unemployment rate by LFS is calculated according to the following formula:

$$\text{Unemployment rate in per cent} = \frac{\text{Number of unemployed persons by LFS}}{\text{Economically active population by LFS}} \times 100$$

Economically active population in the denominator of the formula excludes persons on parental leave.

Duration of unemployment by LFS is defined as the shorter of the following two periods: the duration of search for work, or the length of time since last employment.

Applicant for a job is a citizen, which want to work and is looking for a job and after a submission of a written application for intermediation of convenient job is placed into an register of applicants for a job on employment office, social affairs and family situated in a territorial district, where he has a residence. This citizen is not in a working, a public servant or a member attachment, in a service relation or an inceptor in full-time study of inceptor study; he does not perform an individual gainful occupation; he does not perform a gainful occupation in the member state of EU or abroad; he can perform gainful occupation at most 16 hours weekly and his wage for this performance does not exceed 800 SKK weekly. There are not stated applicants for a job, which are employees, but they are looking for another job or they want to change or improve their qualification through education and preparation for a job market. A citizen, which is systematically prepared for an occupation, is temporarily unable to work, he has a right to maternity benefits, he has granted old-age pension or he was excluded from the register of applicants for a job on the base of his requirement to be excluded from this evidence and because of work performance without working relation, non-cooperation with employment office or he has granted work permit in the member state of EU or abroad; he is not included in the register of applicants for a job. The Ministry of Labour and Social Affairs of the SR determines a methodology of indicators and it is included in the Act Nr. 5/2004 Code of Acts on employment services.

Rate of registered unemployment is calculated from a number of disponsible applicants for a job, which can immediately report to work after submission of an offer of convenient job vacancy in accordance with Agreement of International Labour Organisation.

The registered unemployment rate (methodology of the Ministry of Labour, Social Affairs and Family of the SR) is calculated according to the following formula:

$$\text{Registered unemployment rate in per cent} = \frac{\text{Disponible job applicants}}{\text{Economically active population}} \times 100$$

Economically active population in the denominator of the formula covers employed from LFS for previous year (including persons on maternity leave) plus job applicants.

A job vacancies is defined as a post (newly created, unoccupied or about to become vacant) for which the employer is taking active steps to find a suitable candidate from outside the

enterprise concerned and is prepared to take more steps and which the employer intends to fill within 3 months. An occupied post that become vacant due to long-term absences – maternity leaves or long-term sicknesses (4 weeks) is included into job vacancy.

Average gross nominal monthly wage consists of basic (tariff) wage set by wage rules including basic components of contracted wages and salaries for working overtime, compensation of wage for hours not worked, monthly and long-term bonuses paid according to the performance and evaluation criteria, extra payments for working overtime, the night work, work during Saturdays and Sundays, holidays, for environment damaging health, noise, risky and hard work, in-kind wages express in financial terms and other wage in the form of wage advantages whose level and periodicity are set in advance regardless of the situation in an enterprise.

Total labour costs represent a sum of cost spent by employer to recruit and train their employees, remunerate their work as well as to ensure their social welfare according to obligations adopted. Total labour costs include both direct labour costs and indirect labour costs minus subsidies. Direct labour costs are the sum of wages and wages compensation, payments to employee's savings schemes, compensation for being on call to work, bonuses based on profit after taxation and other direct costs. Indirect labour costs include statutory and supplementary social security contributions paid by employer, social allowances, employer's social contributions for apprentices, social benefits, vocational training costs paid by the employer, taxes linked to wages paid by employer and other expenditures paid by the employer. Subsidies are the sum of all amounts received in the form of subsidies, which are intended to refund a part or all of the cost of direct remuneration.

Data on total labour costs are surveyed in annual periodicity; annual labour costs and monthly labour costs are published and according to the number of working-hours hourly labour costs also.

Source

All published data are the result of the statistical surveys carried out by the Statistical Office of the Slovak Republic, except data relating applicants for a job. This data are supplied by the Central Office of Labour, Social Affairs and Family.

More information can be obtained in quarterly publications Employees and Average Monthly Wages; Labour Force Sample Survey Results and in annual publications Structure of Wages and Total Labour Costs.

5. Income, Expenditure and Consumption of Households

Methodological notes

In this part are published the output from household budget surveys, statistics of income and living conditions and from statistics of food consumption.

Household Budget Surveys is regular surveys of income and expenditure of private households.

Up to 2003 at the formation of the reporting unit was used quota criteria: region (8 groups); social group of households which is assigned by the social status of the head of household (5 groups); net money income per capita and month (2 groups); number of dependent children in the households where the head is an economically active person (4 groups), number of members in pensioner's households (2 groups) and sex in one-member pensioner's households.

In 2004 data obtained by randomly selected units network. As support for units selection served the aggregate of all households in permanently occupied dwellings surveyed in Census on population, houses and dwellings 2001. For survey was selected the same number of households in every region, at which structure of the number of households in segmentation according to size structure on municipalities in region remains the same. The other changes concerned the encoding of member of households, there was applied classification of consumption expenditure recommended by Eurostat, have been realized changes in classification on money and natural income of households.

Consumption expenditure are given by the Classification of Individual Consumption of Purpose for needs on household budget.

Gross and net money income and expenditure on private households up to 2003 was estimated as weighted arithmetical mean from the values covering households of employees, i. e. persons having the status of an employee, not working pensioners and self-employers. Since 2004, data has been weighted by household structure defined from support selection.

Data on net money income were supplemented with development indices.

Statistics on Income and Living Conditions (EU SILC) is the survey whose aim is to obtain information on income distribution, level and structure of poverty and on social exclusion. The survey is implemented under the Commission Regulation (EC) No 1177/2003 of the European Parliament and of the Council concerning Community statistics on Income and

Living Conditions. The survey provides data on income (labor, social and others), information on opinions of households on their financial position, especially information on indicators of material deprivation for different types of households.

Basic unit of this survey is jointly managed household sharing of expenditures.

Part of obtained data is used for calculation of Laeken indicators, through which monetary poverty is evaluated. Indicators of monetary poverty are:

- at-risk-of poverty rate – by age, sex, activity status, household type, accommodation tenure status, before all social transfers and before social transfers including old-age and survivor's benefits
- income quintile ratio (S80/S20)
- Gini coefficient
- dispersion around the risk-of poverty threshold
- at-risk-of poverty threshold.

Data on consumption of food and alcoholic beverages per capita are calculated by using the balance method. Consumption is computed per mid-year population. Main data inputs used for the calculation are data on domestic production, imports, exports, initial and final stocks. Calculation of individual data on consumption of food is based on statistical information of the Statistical Office of the SR and the Ministry of Agriculture of the SR as well as information from some food industry unions.

Daily consumption of energy and the most important nutritive ration per 1 capita are calculated on the base of food consumption data, which were calculated by balance method after excluding consumption in food industry for further processing and from the nutritive values of food given in the tables. The result is expressed in gross terms, i. e. including losses (as purchased).

Meat and meat products consumption is given in terms of carcass weight including entrails.

Fats total are expressed in terms of net fat.

Vegetable, vegetable products, fruits and fruits products are expressed in terms of fresh product.

Definition

Private jointly managed household consists of the people, who permanently occupy to-

gether one dwelling and reimburse together the household expenditure (food, current necessary household expenditure, maintenance of the dwelling, etc.). Member of household is also a person who is not relative with other members of household but he permanently shares one dwelling and all household expenditure with them.

Gross money income of private jointly managed households represents the total sum of money received by any member of a household. It is the sum of the money income from employment (from wages and compensations for work activity in non-agricultural and agricultural branches from employer, resp. co-operative), financial amounts assigned by self-employer from his/her business income for the needs of the household, social income, financial givings, compensations from insurance companies, gains from lotteries, withdrawals of loans and the like.

Income from the property of private jointly managed households is created by the financial amounts from bond, shares and coupon dividends, from sales of farming products, from real-estate lease, etc.

Net money income of private jointly managed households consists of:

- net earnings, i. e. income from employment without income tax and compulsory contributions to the Social Insurance Agency and health insurance companies;
- part of income from private business running used by an entrepreneur for household providing;
- social income, i. e. old-age pension security benefits, sickness insurance benefits, state social benefits, social aid benefits and unemployment allowance;
- other income, i. e. income from property, income from institutions and income from private persons, income from sales of farming products and income from abroad and withdrawn new loans.

Gross money expenditure of private jointly managed households is the sum of financial amounts spent on purchase of goods and services including all types of insurance (consumption expenditure) and of transfer of all payments (other expenditure) including income tax and loans payments. The consumption expenditure does not contain under the item “miscellaneous goods and services” expenditure of households on compulsory personal insurance, i. e. contributions of health and sickness insurance and old-age pension security and contributions of insurance in unemployment (they are involved in the item “other expenditure”).

Net money expenditure of private jointly managed households is recalculated as the sum of

expenditure on consumer goods and services and other net expenditure. Income tax, compulsory contributions to Social Insurance Agency and health insurance companies are excluded.

Social category of jointly managed household corresponds with social category of person at the head of household, which is derived from the position in occupation, from type of economic activity and from the form of compensation.

Employee is working for wage, salary or other kind of compensation in state enterprise, in private enterprise, in agriculture company or other cooperative organization, in other employer.

Self-employed (entrepreneur, associate, tradesman, self-employed farmer, free enterprise; household budget) is a person who works economic activity for the purpose of earning a profit without reference to work any other person or not.

Not-at working retired is a person who draw a old-age pension and he/she is not employed.

Main activity status is defined by own deliberation of person (besides at-work) i. e. self-defined status of economic activity is intended on the basis of principle most time spent.

At work is a person who works at least 1 hour during a week.

Unemployed is a person who had not employment during income reference period, but he/she looked active, and it is not decisive if he/she is registered or not on employment agency.

Retired is a person in retirement or early retirement if he/she left his/her work for age or other reason.

Other inactive person is a person who live from other sources, e. g. military service and civil service, housewife, students, apprentices, persons not included in the work process, persons working in a family business without pay, etc.

Dependent child is defined as a household member aged 0 – 15 or aged 16 – 24 who is economically inactive and living with at least one parent.

Total disposable household income is the sum of gross personal income components for all household members plus gross income components at household level (e. g. income from rental of a property or land, inter-household cash transfers received from other households) minus regular taxes on wealth, regular inter-household cash transfers paid (e. g. alimony, regular cash support from other households), tax on income and social insurance contributions.

Equivalent scale is used for calculation of equivalent household size. For calculation of indicators of poverty is used modified OECD scale, where coefficient 1 is assigned to the first

adult household member, 0,5 to the second one and each adult household member, 0,5 to persons 14 years old and more and 0,3 to each child younger than 14 years old.

Equivalent disposable income – is defined as the total disposable income of household divided by the equivalent number of household members.

At-risk- of poverty rate is share of persons with an equivalent disposable income below 60 % of the national equivalent median income.

Income quintile ratio (S80/S20) is ratio of total income received by the 20 % of the country's population with the highest income (top quintile) to that received by the 20 % of the country's population with the lowest income (lowest quintile).

Gini coefficient – inequality of income distribution is the relationship of cumulative shares of the population arranged according to the level of income to the cumulative share of the equivalent disposable income received by them.

Dispersion around the risk-of poverty threshold is the percentage of persons with an equivalent disposable income below 40 %, 50 % and 70 % of the national median income.

At-risk-of poverty threshold is the value of the at-risk-of-poverty threshold (60 % median national equivalent income).

Median of equivalent disposable income is the value of the equivalent disposable income, which divides the population according to income amount into two equally numerous parts according to number of persons.

The average consumption of selected kind of food and alcoholic beverages is total amount of the commodity available in the country as human food during given year per capita. The consumption of surveyed kinds of food also involves the consumption in food industry for further processing (meat for production of smoked products, sugar for confectionery production, e. g.).

Source

Money income and expenditure of private households data are the result of the statistics on the household budget survey carried out by the Statistical Office of the SR. More information is available in the publications Structure, Incomes and Expenditures of Private Households and Incomes, Expenditures and Consumption of Private Households.

In statistics of incomes and living conditions are presented preliminary results from survey

on incomes and living conditions of households for 2004. Detailed data will be published in a special publication.

Food consumption and its nutritive evaluation were processed by the Statistical Office of the SR. Data on nutritive value of consumption were elaborated with cooperation with the Research Food Institute in Bratislava. Next information can be found in annual publications Food Consumption.

6. Education

Methodological notes

According to the Act on the System of Basic and Secondary Schools No 29/1984 Code (Act on Education) in the wording of later regulation, the system of basic and secondary schools consists of basic school, basic school with kindergarten, vocational school, vocational secondary school, grammar school, specialized secondary school and special schools. Educational facilities (Act No 279/1993 on the Educational Facilities in the last wording) as well as higher education institutions (Act No 131/2002 Code of Acts on the higher education institutions in the last wording) are also the part of the educational system.

The school years presented in the tables are indicated by the years in which they started, e. g. the year 2005 refers to the school year 2005/2006.

Data on church and private schools are included in the tables related to the individual types of schools and are published separately at the end of the chapter.

Data concerning secondary schools include health schools of Ministry of Health of the SR. Data concerning higher education institutions do not cover the schools of the Ministry of Defence of the SR, Ministry of the Interior of the SR and Ministry of Health of the SR.

Schools where upbringing and education are carried out in the language of the minority in addition to the Slovak language are reported as the schools with several teaching language which means that in such schools there are classes with the Slovak teaching language and classes with the minority teaching language established.

Internal teachers including school directors are included in the number of teachers except vocational secondary schools where are included only internal teachers.

Shift teaching expresses the share of pupils and classes involved in classes held in the second shift.

Definitions

Associated secondary schools was established according to the Act No 216/2001 Code of Acts amending Act No 29/1984 Code on system of basic and secondary schools (school act) in the wording of later regulations. They originated from specialized secondary schools and

vocational secondary schools, generally with identical or similar educational content, with a view to effectively administrate of educational system, to improve of special education and to use the personal and material support of this schools. They started one's activity in school-year 2002/2003.

The education of pupils with special pedagogical and educational requirements is provided in special schools if their handicap does not allow their education in other schools according to Act No 29/1984 Code of Act on the system of basic and secondary schools, as amended. It is performed by special forms and methods with possible use of compensatory aids with the purpose of integrating the pupils into the working process and social life. Special schools includes: kindergartens, basic schools, special basic schools, grammar schools, secondary specialized schools, vocational secondary schools, specialized and practical schools.

The role of special educational establishments is to protect the children against social-pathological effects, to prevent problematic and delinquent development of children, and to provide institutional and protective education. Special educational establishments are establishments of educational prevention and establishments of substitutional education. For the needs of this statistical yearbook special educational establishments include re-educative child home, re-educative youth home, therapeutical-educational sanatorium, diagnostic centre for children, diagnostic centre for youth, re-educative home for mothers with children.

Source

Source of data are the sector statistical surveys carried out by the Ministry of Education of the SR (the Institute of Information and Prognoses of Education). Source of financial data are the statistical surveys carried out by SO SR.

More information can be found in publications Basic Data on Schools and School Establishments in the SR and Selected Indicators of Non-Market Services or to be obtained from the Institute of Information and Prognoses of Education.

6–1. Materské a základné školy Kindergartens and basic schools

7. Health

Methodological notes

Data on health care and health employees are summarily published for the branches of the Ministry of Health of the SR, the Ministry of Defence of the SR, the Ministry of Interior of the SR, the Ministry of Justice of the SR, The Ministry of Transport, Posts and Telecommunications of the SR.

The group of health facilities – hospitals includes I., II. and III. types hospitals, children hospitals of II. type, psychiatric hospitals, children psychiatric hospitals, hospitals with policlinics of I., II. and III. type, teaching faculty hospitals, teaching faculty hospitals with policlinics and children teaching faculty hospitals with policlinics.

Special therapeutic institutes cover tuberculosis and respiratory diseases sanatoriums, rehabilitation, oncology, cardiology, endocrinology and rheumatology institutes, institutes of preventive and clinical medicine, institutes of nourishment, geriatric and chronic illness institutes, institutes in branch of gynaecology and obstetrics, Centre for Treatment of Drug Additions, Centres for Treatment of Drug Additions for Children, Geriatric Centre, special therapeutic institutes for children and children convalescent centres.

Institutional health care establishments comprises hospitals (including psychiatric), special therapeutic institutes (except convalescent centres), high-specialised institutes and institutes for treatment.

Data about employees working in health services classified according Classification of occupations (ISCO).

Infectious diseases data are obtained from the compulsory announcements. There are only newly notified cases presented. Newly notified cases of tuberculosis are surveyed including relapses.

Average number of persons covered by sickness insurance comprises the insured employees, members of manufacturing and farming co-operatives, self-employed persons – artists and others (scientific workers, journalists and the like). Persons on maternity and parental leave, persons on compulsory military service and prisoners placed in penitentiary institutions are not included in the average number of persons covered by sickness insurance.

Expenditures paid by health insurance companies are obtained by statistical survey in health insurance companies. More information is given in the section 12. Finance and currency.

Health expenditures paid by citizen ship are obtained by the sample survey in households. The strong increase of the expenditure paid by citizen in 2004 reflects several factors: change of methodology of the statistical survey, introduction of the dues for issuing of drugs on prescription, increase of patient interest on the drugs payment as well as increase of the shopping on vitaminic and nourishment complements.

Data on drugs consumption are obtained from individual pharmacies. Drugs consumption is surveyed by drugs categories, producers, producer countries and it is given in number of consumed packs and financial value.

Definitions

Physician's post is an indicator of rate of providing health services in a particular branch and a particular area. It is determined by the number of contract duty hours of physicians where 40 working hours per week or 33,5 working hours per week in dangerous work-places, respectively, are considered as one physicians' post according to the particular rules (up to 2001 it was 42,5 and 36 hours). Partial or additional duties are converted to the whole physicians' posts.

Day of stay is all calendar day, when a patient was provided with all of the services, which a sleeping establishment can provide, i. e. treatment including accommodation and broad. The first and last calendar day in bed establishment is calculated as one day of stay.

Average length of stay in days is a ratio of the number of days of stay and number of hospitalised patients.

Treatment (examination) is the set of all activities done by physician or nurse according to instructions and under control by treatment (examination) of one patient in the same outpatient department (working place at flat of ill) by one visit of patient.

Public pharmacy provides pharmacy care for public including of individually prepared drugs. In the framework of pharmacy care a pharmacy provides drugs and prepares, checks, stores, gets out and sells drugs, gives special information about drugs and consultation on determination and monitoring of therapeutic method.

Average duration of disability to work is the number of days of disability to work per one case.

Average percentage of disability to work per year is calculated as a ratio of calendar days of disability to work due to illness and injury and average number of employed covered by sickness insurance, multiplied by the number of calendar days of the year.

Expenditures paid by health insurance companies are payments of health insurance companies for health care provided to their insured in accordance with the valid Therapeutic Regulation.

Expenditures paid by citizenship include the expenditures of population for health and pharmaceutical products, therapeutic devices and for out-patients and hospitals health services.

Average price of drug per pack is defined as a ratio of value of consumed drugs and number of packs of consumed drugs. The value of consumed drugs is expressed in Slovak crowns and for its calculation is used maximal price determined by the Ministry of Finance of the SR in the period of drug consumption.

Source

Data are obtained from processing of sector statistical surveys of the Ministry of Health (National Health Information Centre) of the SR and from the processing of the State Institute for Control of Drugs (drugs consumption). There are also used the administrative sources of Regional Office of Public Health Banská Bystrica (infectious diseases) and Social Insurance Agency.

Published data on disability to work due to disease and injury and figures on expenditure in health sphere paid by citizens and health insurance companies are the result of the statistical surveys carried out by SO SR.

More information can be found in the annual publications Selected Indicators on Health Care; Selected Indicators of the Compulsory Social Insurance and Disability to Work Due to Disease and Injury.

8. Social Security

Methodological notes

Social security consists of the social insurance, state social benefits and social assistance.

Pension insurance according to the Act No 461/2003 Code of Acts on Social Insurance is comprised of the old-age insurance for secured income at old-age and in case of death and invalidity insurance in case of decline ability carry out gainful activity in consequence of long-term unfavourable health condition of insured person and in case of death. The pension insurance covers employees, employers, compulsory pension insured self-employed persons, voluntary pension insurance persons, state and Social Insurance Agency.

Pension insurance system includes an old-age and early old-age pensions, invalidity pensions, widow's, widower's and orphan's pensions. Since January 1, 2004 pensions for extended employment is paid as invalidity pensions. Spousal pensions, social pensions, increase of pension in case of disability and increase of pension as the sole source of income are state benefits refunded by government.

Benefits of sickness insurance include four systematic benefits: sickness insurance benefits, family member attendance allowance, maternity financial allowance and equalizing allowance. Since 2004 employee obtained sickness entitlement refunded by Social Insurance Agency from 11th day of temporary incapacity from work. The first ten days is refunded by employer. Self-employed persons obtained sickness entitlement from 1st day of temporary incapacity from work.

Injury insurance is insurance in case health damage or death as a result of working accident and occupational disease.

Guarantee insurance is insurance in case of employers insolvency for employee claim satisfaction.

Insurance in unemployment is insurance in case of income loss from employee activity in consequence of unemployment and for income security in consequence of unemployment.

Social security benefits includes state social benefits is such as children allowance, parental allowance, provider allowance, funeral allowance, child-birth allowance, allowance to parents and from benefits of social care to state social benefits have been transformed foster parents rewards (one-off allowance for settlement children needs, recurring allowance for settlement

children needs, foster parents rewards). Since 2005 housing contribution is count among social assistant benefits.

There have been changes in the branch of the social care resulting from the transformation of social security. According to the Act No 195/1998 Code of Acts on Social Assistance the system change occurs in the branch of benefits granting to persons in material destitution. Allocated benefits of social care addressed to different groups of persons were transformed to the one-off benefit of social assistance. Expenditures for social assistance are classified according to the Budgetary Classification valid for particular year.

Services of social assistance and material needs benefits are given to the persons for reducing and getting over material needs with their active participation.

Institutional care is provided in the facilities of social services according to the Act No 195/1998 Code of Acts on Social Assistance. According to the Act No 416/2001 Code of Acts on the transfer of some competencies from the state-administration bodies to the municipalities and higher territorial units, most of facilities were transferred to the field of activity of self-governing regions and municipalities.

Definitions

Old-age pension is the fundamental benefit of pension insurance. Insured person has entitlement for old-age pension, when was insured at least 10 years and reached pension age.

Insured person have entitlement for early old-age pension, when was insured at least 10 years and the sum of early old-age pension by the day by which pension awarded is higher than 1,2 times the subsistence level sum for one full-aged natural person.

Invalidity pension is allocated for insured person, who became disability and obtained necessary number of pension insurance years and on the invalidity formation day didn't realized conditions of demand for old-age pension and was not him award early old-age pension.

Orphan's pension is allocated to the dependent children due to death of a parent or adoptive parent. Full orphan benefit is allocated to children whose parents (or adoptive parents) both died. These benefits do not depend on employment duration.

Widow's pension is allocated as the partial replacement of deceased husband's income.

Widower's pension is allocated as the partial replacement of deceased wife's income during care for at least one dependent child.

Wife's pension is the pension security benefit refunded by government available to married

women who are fully disabled or have reached 65 years of age but who do not qualify for benefits based on their own pension schemes and earn no income.

Social pension is allocated to persons without subsistence who do not qualify for pension.

Increase of pension in case of immobility is the allowance for replacement of increased costs relating to the need of serving and taking care of him/her by another person.

Increase of pension in case of sole source of income is the state benefit of pension security granted in case that, old-age, invalidity, widow's, widower's or full orphan's pension is the only income source and do not reached 1,1times the subsistence level.

Sickness benefits temporary compensate to insured person for loss of income due to sickness or accident.

Family member attendance allowance is claimed when caring for a sick child under the age of 10 or caring for another sick member of the family when the provision of such care by another person is necessary.

Maternity benefits compensates to woman for loss of income during 28 weeks in last period of pregnancy and after delivery. It is paid 37 week in case of an employee who is single or who has given two or more children.

Equalizing allowance is paid during pregnancy and until the end of the nine month from delivery to a woman who is transferred to a different job because her original work was dangerous or threatened her pregnancy or maternity.

Children's allowance provides to all dependent children at the same amount regardless of children age and income of family members according to the law.

Parental allowance is repeated benefit entitled to the parent or person for permanent personal and proper care of at least one child up to the age of 3 years or up to the age of 7 years for child recognised as suffering from long-term severe health impairment.

Allowance to parents of which together born three or more children or which during two years frequently born twins is state social benefits which state once a year contribute on increased expenditures.

Child-birth allowance is a single benefit given to the mother who gave birth to the child or is given to the father of the child or to the another person meeting the conditions according to the law.

Foster care benefits is a one-off or recurring benefits paid to the children in fosterage.

Funeral allowance is a single benefit given as the partial replacement of expenditure for the funeral of a person under the social security.

Material needs benefits (up to 2003 – benefit of social assistance) is a single or repeated benefit allocated to the person in material destitution to provide basic living condition of this person.

9. Culture and Religion

Methodological notes

Statistical data presented in the chapter refer to the network and activity of the state, municipal and private cultural institutions.

All kinds of professional theatres of the Ministry of Culture of the SR (including theatres for the youth and puppet ones).

Data for galleries included state, self-government and private institutions.

The term “Musical ensembles” contains data on state musical ensembles and state ensembles of songs and dances.

The indicators Radio broadcasting and TV broadcasting includes providers on the basis of the law – public broadcasters and providers on the basis of the licence – private broadcasters.

The indicator “number of titles” includes local publications if they are different from main publications, parts of newspapers sold separately, special publications, morning and evening papers with own name and registration, different language versions of the same periodical. There are not included local issued papers of the same papers, if they are not different from each other and parts of papers, if they are not sold separately.

The indicator circulation includes also non-sold pieces.

According to the housing and population census the religiosity means an activity of population in some church or a relation to some church. Religiosity of children under 15 was given by their parent decision.

Figures on religion show selected indicators on five most frequent registered churches.

Definitions

Broadcasted program presents all programs broadcasted through the own independent networks (including national broadcasting), local or outside production.

General news cover regularly daily news and commentaries to main events, including sports news.

Loans to users include the loans of all library units, i. e. books, periodicals, other documents and information sources to readers, i. e. without inter-library loan service.

Periodical publication is periodical press or another periodical issued at least two times per year with the same title, periodicity indication and standard layout for the publication.

Branch office of the museum refers to the detached parts of museum (including monuments belonging to museum), which are out-of the museum residence and create administrative entity with the museum.

Exposition is the whole installation placed in one building and opened for public.

Sacral buildings include temples, churches, chapels and vestries.

Membership in civil associations, professional organizations, trade unions etc. is given in accordance with their rules.

Source

Source of data on culture is annual statistical survey in several ministries. The Ministry of Culture obtains data for theatres, musical ensembles, museums, galleries, audio-visual works, libraries (except university libraries), radio and TV broadcasting, observatories, planetariums, astronomic cabinets, periodical press, preservation of monuments and churches. Data on the university libraries and botanical garden are obtained from the Ministry of Education of the SR and zoological gardens data are reported by the Ministry of Environment of the SR.

Data on caves are obtained from administrative sources of Slovak caves administration and the Slovak Museum of Nature Protection and Speleology.

Data on the membership in civil associations SO SR obtained from central bodies of civil associations by questionnaire method.

More information can be obtained at mentioned ministries and organizations as well as on their Internet web-sites.

4) od roku 2004 zrušenie povinného členstva

1) Estimate

2) Since 2002 without nurses and midwives

3) Since 2002 compulsory membership

4) Since 2004 cancelled compulsory membership

10. Physical Training and Sport

Methodological notes

Physical training and sport according to the Act No288/1997 Code of Acts on Physical culture and on change and amendment of Act No 455/1991 Code on tradesman (Act of tradesman) in wording of later rules is understood as (both) – an organized or non-organized, individual or collective activity connected with physical training, sport, hiking and active recreation activity of people. Physical culture according to this Act is carried out by relevant authorities of Government, bodies of self-government and civil association and other legal persons and their community associations (Slovak Association of Physical Culture and Association of Technical and Sporting Activities of the SR).

Number of members of individual unions of the Association of Technical and Sporting Activities of the SR is given only for years, when they were its members.

Definition

Juniors include sportsmen who have not reached the age in which they can attend races for adults category. Various sports have different age for the category of adults. In gymnastics it is the age of 16, in different sports it is varying up to 23 year of the age.

Source

Data are obtained from the statistical surveys of the Ministry of Education of the SR (Institute of Information and Prognoses of Education) and administrative data taken from the Association of Physical Training Unions and Clubs of the SR as well as from the Association of Technical and Sporting Activities of the SR. Detailed data can be granted by organizations mentioned above.

11. National Accounts

Methodological notes

In the part “Primary Economic Indicators” is published revised historic time data series of selected aggregates of national accounts since 1995 at current and constant prices (2000 = 100) according to the methodology ESA 95 (European System of National and Regional Accounts in the Community 1995). Data for 2003 and 2004 are preliminary, for 2005 by the Quarterly National Accounts. Data are comparable in full time series.

The Quarterly National Accounts are compiled on the basis of the ESA 95 methodology and are after the revision which has been made based on the results of the national accounts for 2000 – 2005. Selected indicators of quarterly national accounts are expressed at current and constant prices. GDP as balance aggregate item is recalculated into constant prices on the side of formation as the sum of value added of branches (reached by twice deflation as difference of production and intermediate consumption at constant prices) plus taxes on products reduced by subsidies on products at constant prices. On the uses side GDP at constant prices is balance item between final use (domestic and foreign demand) and imports, which are recalculated into constant prices. Than GDP price deflator expresses share between calculated GDP at current and constant prices.

Rate of exchange USD and EUR used for GDP recalculation is average annual exchange rate given by the National Bank of Slovakia.

Revision of annual national accounts for 1995 to 2004 was focused especially for this components:

- calculation of consumption of fixed capital in all sectors of the economy using PIM method (perpetual inventory method),
- allocation of financial intermediation services indirectly measured into the user sectors,
- application of the rule 50 % in classification of organizations included into relevant sectors,
- treatment of financial leasing according to the rules of the ESA 95,
- treatment of inward processing regime,
- improvement of estimates of housing services production (imputed rent),
- adjustments of the financial sector data based on obtaining new backgrounds from the relevant institutions.

Annual National Accounts represent a compatible accounting framework for the systematic and detailed description of the total economy as well as particular sectors and sub-sectors where all stages of the economic process are recorded (output, generation and distribution of income, use of income, accumulation). In line with the methodology, each account has the resource side and the use side and the balancing item of each account has its own economic contents. Transactions represent economic operations and the related flows carried out between economic units. According to their nature, they can be broken down into four main groups:

- transactions in goods and services (code P) which are related to production (national output or imports), exchange and use of goods and services (intermediate consumption, final consumption, capital formation or exports),
- distributive transactions (code D) by means of which the value added generated by residents is being distributed and the income or wealth is redistributed,
- financial transactions (code F) (transactions in financial means) are related to changes in financial assets and liabilities in particular sectors,
- other flows in accumulation accounts (code K), for instance, consumption of fixed capital (K.1), acquisition less disposal of non-financial non-produced assets (K.2).

The code B is assigned to balancing items, which express the difference between the resources and use in the current accounts and the difference between assets and liabilities in the capital and financial accounts.

Balance items in the tables are given in gross term, i. e. including fixed capital consumption or in net term, i. e. without fixed capital consumption. The code for balance item in gross term is created by the code of item and by the letter “g”. Also the letter “n” is linked to the code relating the net balance item. Item code with sign “*” creates balance item for economy in total.

The balancing item of Production Account is gross domestic product at market prices (B.1*g) for economy in total which is the final result of activities of resident producers. In the sector classification the balance item is gross value added B.1 g. After subtracting of fixed capital consumption both items are created in net term.

Net operating surplus (B.2n) is balancing item of the Generation of Income Account, which include distributive transaction linked to production. Net operating surplus corresponds to the net domestic product at market prices less the rewards of employees and net taxes on production and imports. In the sector of households it also represents the net mixed income (B.3n). It includes profit and compensation for work of entrepreneurs not registered in the Business

Register. Distinction of the two items can be done by gross estimate and therefore it is not applied.

The balancing item of the Allocation of Primary Income Account is net national income (B.5*n). According to the sector classification the balancing item is net balance of primary income (B.5n). The balancing item of Secondary Distribution of Income Account is net disposable income (B.6n) which expresses the income of the country (or the given sector) usable for the final consumption and saving.

The Redistribution of Income in Kind records flows related to the use of particular goods and services which these households obtain free of charge. The balancing item is net adjusted disposable income (B.7n).

Net saving (B.8n) are the balancing item of the Use of disposable Income Account.

The balancing item of the Capital Account, which records the acquisition less disposal of non-financial assets of resident units and measures the changes in the net worth due to saving (the last balance item of current accounts) and capital transfers, are net lending (+) or net borrowing (-) (B.9) for total economy which are the sum of net lending and net borrowing of institutional sectors. They represent net resources which the total economy lends abroad (if they are plus) or borrows from abroad (if minus). The net lending (+) or borrowing (-) for total economy are equal, however with the opposite sign, to the net borrowing (-) or lending (+) from abroad. Net lending (+) or borrowing (-) should correspond to B.9 item's value in the Financial Account. The differences between items are caused by using of different data sources in non-financial and financial accounts and timing difference.

Changes in the net worth due to saving and capital transfers (B.10.1) are not balancing item in the system structure. But it is important part of changes of net worth, therefore it is coded together with others balancing items.

External Account of Goods and Services records imports of goods and services on resources side of the account and exports of goods and services on the uses side. The difference between resources and uses is balancing item called external balance of goods and services (B.11).

External Account of Primary Incomes and Current Transfers is determined by current external balance (B.12), which in the structure of the system corresponds to saving by the institutional sectors.

The Supply and Use Tables provide a background for a detailed analysis of the process of generation of resources of goods and services, their use and generation of income linked to

the production process. Methodological basis for the compilation of commodity by industry tables is the ESA 95 methodology. In tables, there are indicators aggregated into categories broken down by commodities and main activity. The gross output and value added are expressed at basic prices while the intermediate consumption at purchaser's prices. Data on gross output are based on the Supply table and intermediate consumption indicator results from the 1. quadrant of the Use table. Other indicators (final consumption, formation of gross fixed capital are given at purchaser's prices) are the part of the 2. quadrant of the Use table. Time series of indicators for years 1995 – 2002 is compiled at current prices and at constant prices for years 1995 – 2002 (2000 = 100). Supply and Use tables have been revised at full extent as annual national accounts.

The generation and use of income in the sector of households are calculated at current prices by ESA 95 methodology and that is after revision, which realized on the basis of the results of the annual national accounts. Data 2005 is according to the quarterly national accounts. The table contains basic items of the receipts and expenditures of the sector of households, which includes individual citizens as final consumers (a consumer household) and natural persons – entrepreneurs which carry out their business activities according to the Tradesmen Act or other legislative rules and are not registered in the Business Register.

Definitions

Output represents the value of goods and services, which are the result of the activity of resident units during the accounting period in the territory of the Slovak Republic. Production according to the ESA 95 is broken down into market production, own account production and other non-market production.

Intermediate consumption consists from services and goods of a short-term use which have been consumed or transformed by the production process within the accounting period.

Value added is a balancing item and is calculated by a subtraction of intermediate consumption from production of individual sectors or branches.

Domestic product at market prices expresses the final result of the production activity of resident producers for economy in total. It corresponds to the total production (at basic prices, i.e. it includes other net taxes on production) of resident producers after subtracting their intermediate consumption and adding the net taxes on products.

Within the final consumption, two types of consumption are distinguished: expenditures on

final consumption, which include expenditures on the consumption of goods and services and may occur in the sector of government, households and non-profit institutions serving households and actual final consumption related to the acquisition of consumer goods and services, which can be of a nature of the collective or individual consumption.

Gross fixed capital formation for total economy consists from expenditures on new tangible and intangible fixed assets or from other specific expenditures, which the producers spend on goods and services in order to retain, increase or expand their production capacity or to create new production possibilities in the future. In the framework of sector classification except costs on purchase of new tangible and intangible fixed assets (without lands, valuables, and valuable rights) there are included costs on purchase of used tangible and intangible fixed assets. Formation value is reduced by sale of tangible and intangible fixed assets, transfer by barter exchange or natural capital transfer.

Change in inventories is defined as a difference between the acquisition and disposal of inventories of the particular time period. Inventories include the stored material, work in progress, semi-finished goods of the own-production, goods, animals and stored goods.

Valuables are non-financial assets bought or held by people for purpose of saving value.

Consumption of fixed capital represents the amount of fixed assets consumed for surveyed period in consequence of normal depreciation and foreseeable obsolescence.

Exports and imports of goods and services include exports and imports of goods surveyed in the framework of the trade balance and exports and imports of services surveyed in the framework of the balance of services. Exports and imports of services include all services related to the foreign activity (services of freight, passenger and other transport, insurance and other services).

Compensation of employees covers total compensation in a monetary form (or in kind) which is paid by an employer to the employee as a compensation for work being done by the employee during the given accounting period. Compensation of employees is broken down into wages and salaries and social contributions of employers. Social contributions of employers are further broken down into actual social contributions of employers and imputed social contributions of employers.

Taxes on production and imports are compulsory unrequited payments, in cash or in kind, which are levied by general government. They are divided into taxes on products and other taxes on production.

Subsidies are current unrequited payments, which general government make to resident producers. They include subsidies on products and other subsidies on production.

Property income results from the ownership of financial assets, i. e. deposits, bonds or tangible non-produced assets (land and sub-soil assets) which the owner obtains as a compensation for providing them to or making them available for another institutional unit. Property income includes interest, distributed income of corporations (dividends, withdrawals from the income of quasi-corporations), re-invested profit from foreign direct investment, property income attributed to insurance policy holders and rent.

Current taxes on income and wealth, etc. are of the same nature as tax on income (of households, from the profit of corporations, of non-profit institutions), as well as the tax on wealth which are being paid regularly each tax period (on the contrary to the taxes on capital which are being levied irregularly). The transfers are in question because the government does not provide any counter-value to the individual unit paying taxes. Current taxes on income and wealth do not include inheritance taxes, death duties or taxes on gifts, occasional or exceptional levies on capital or wealth, taxes on land, buildings or other assets (owned or rented) which are used for production.

Social contributions and benefits are broken down into social contributions (actual and imputed), social benefits other than social transfers and social transfers in kind which the government units and non-profit institutions serving households provide to individual households.

Other current transfers cover non-life insurance premiums and claims, transfers within general government, current international co-operation and miscellaneous current transfers which represent transfers to non-profit institutions, transfers between households, fines and penalties, lottery, winnings and bets, etc.

Adjustment for the change in net equity of households in pension funds reserves is a item harmonizing households savings and a change in net equity of households in pension funds reserves in the financial account.

Financial transactions are transactions in financial assets and liabilities between institutional units and between them and the rest of the world by mutual agreement involving simultaneous creation or liquidation of a financial asset and the counterpart liability or a change of ownership of a financial asset or assumption of a liability.

Monetary gold and special drawing rights. Monetary gold includes gold held by monetary authorities or other institutions under supervision of monetary authorities as foreign exchange

reserve. Special drawing rights include all transactions with international reserve assets created by the International Monetary Fund.

Currency and deposits. There are included currency (notes and coins in circulation), transferable deposits, which are immediately convertible into currency or which are transferable by cheques, banker's order, debit entry or the like both without any kind of significant restriction or penalty. There are included other deposits not negotiable, in national or in foreign currency (e. g. time deposits, savings certificates, savings books, etc.).

Securities other than shares. They cover debt securities as bills, bonds, certificates of deposit, commercial paper, debentures, financial derivatives and similar instruments normally traded in the financial market.

Loans are unconditional debts to the creditor which have to be repaid at maturity and which are interest-bearing. There are included bank credits, financial assets or liabilities of all sectors and the rest of the world.

Shares and other equity. These financial assets generally entitle the holder to a share in the profits of the corporation or quasi-corporation and to share in their net assets in the event of liquidation. There are divided on shares and other equity excluding mutual funds shares, which represent property rights on corporations or quasi-corporations and generally entitle the holders to a share in the profits and to share in their net assets in the event of liquidation. Mutual funds shares include shares issued by funds regardless they are open-end, semi-open, closed-end funds. They may be quoted or unquoted.

Insurance technical reserves cover net equity of households in life insurance and pension funds reserves, prepayments of insurance premium, reserves for outstanding claims. In the Financial Account the prepayments of insurance premium recorded between policy holders and insurance corporations consist of those parts of the premiums that are payable in the current accounting period and that are intended to cover risks outstanding within the following period.

Other accounts receivable include trade credits and advances, which create financial claims relating to the delivery of goods and services, where payment has not taken place. Other accounts receivable/payable arise from timing difference between distributive transactions or financial transactions on the secondary market and the corresponding payment.

Source

The compilation of the National Accounts is based on the following data sources:

- annual and quarterly state statistical surveys,
- banking information, e. g. monetary overview, balance of payments, banking statistics data,
- accounting statements and administrative data sources of the Ministry of Finance of the SR and other next ministries and central bodies,
- expert estimates of data based on the methodological recommendations of experts from Eurostat.

Detailed information is presented in the publications of the Statistical Office of the SR, in the quarterly publication Macro-economic Indicators of the Quarterly National Accounts and Value Added and in annual publications National Accounts of the SR; Supply and Use Tables by Commodities and Industries in the SR.

12. Finance and Currency

Methodological notes

This chapter includes data on general government finance, data on non-financial and financial corporations, financial and insurance institutions, social security funds and direct foreign investments, too.

General government sector are divided into subsector of the central state administration, the local self-government and the social security funds. Since 2005 revenues and expenditures subjects of the general government sector not comprises financial operations on revenues and expenditures.

Revenues of local budgets (municipalities and higher territorial units) are without received credits, resources balance from the last year and without transmissions from financial funds. Expenditures are without principals repayments. Data based on cash rule include really reached revenues and really reached expenditures necessary for providing their functions and tasks of the mentioned bodies.

Revenues of state budget are without received credits. Expenditures are without principals repayments of received credits. Real revenues and expenditures are based on the cash rule.

In the Slovak Republic the area of compulsory social security is performed by the following institutions: Social Insurance Agency and health insurance companies.

Non-financial corporations are incorporated entrepreneurial subjects running business to make profit in all branches of activity except banking and insurance. Subsidized organizations covering their expenditures by more than 50 % of revenues are also included. Those enterprises which are not corporations (households, tradesmen, freelancers and farmers) are excluded.

Financial corporations are subjects, which realize especially financial intermediation and supporting financial activities. The financial corporations sector includes the National banks of Slovakia, commercial banks, financial leasing subjects, exchange offices, administration company, commercial insurances, shares funds.

Banking includes selected indicators on activity of the National Bank of Slovakia, commercial banks, administration companies and participations funds; data on insurance sector include figures on commercial insurance companies.

Direct foreign investments in the Slovak Republic and investments of the Slovak Republic abroad express equity capital and reinvested profit.

All figures are given at prices and in methodology and organization structure of the current year.

Definitions

State budget expresses centralized financial fund of central government by which the state finances are created, divided and used.

Local budgets are compiled by local authorities (municipalities and higher territorial units) or by them established subsidized organizations.

General government debt (Maastrichts debt) expresses accumulated financial liabilities of the general government sector that are the consequence of obligations emitting, bank credits and other loans receiving in currency value in accordance with ESA 95 methodology for evaluation of maastrichts criteria.

Incomes from premium collection (for health insurance, sickness insurance, pension insurance – divided into old-age and disability insurance, accident insurance, insurance in unemployment, security insurance, insurance collection into reserve fond) include payments according to the valid laws.

Other payments include incomes of the Social Insurance Agency from outstanding insurance, fines, penalties, requital for remitted debts, gifts and other receipts.

Sickness benefits (sickness insurance benefits, attendance allowance, equalising allowance and maternity allowance) are provided from sickness insurance.

Pension benefits, since January 1, 2004 are provided from pension insurance, divided into old-age insurance (old-age, early old-age pension, orphan's pensions, widow's, widower's pension and from invalidity insurance (invalidity pension, orphan's pensions, widow's, widower's pension).

Accident benefits (accident allowance, accident annuity, single compensation, heritage annuity, single retribution, working rehabilitation and rehabilitation, retraining, pain's compensation and compensation of costs for the treatment, compensation of costs for the funeral) are provided from accident insurance.

Benefits of guarantee insurance are provided from guarantee insurance.

Unemployment benefits are provided from insurance in unemployment.

Social insurance benefits paid by state include costs of Social Insurance Agency for wife's pension, social pensions, increase of pension in case of sole source income, increase of pension in case of disability, increase of pension in case of fight against fascism and rehabilitation, other pensions declared before January 1, 1957, compensation of working accidents and industrial diseases, cancelled by employers, which a founder was a state or National Property fund of the Slovak Republic and accident allowances to natural persons according to legal acts. Since January 1, 2004 without health resonance.

The insured in health insurance companies refer to the summarized data from registers of insured persons in the individual health insurance companies.

Costs present the sum of costs on operation, financial transactions and extraordinary costs.

Profit/loss expresses the result of economic activity of reporting unit for the reference period. It is calculated as a subtraction of revenues from expenditures and has character of profit or loss. For statistical purposes it is given before taxation.

Liabilities express payment obligation of a debtor to domestic or foreign creditors. They express foreign investments for financing of current operation. Bank credits and short term-financial subsidy are excluded.

Turnover represent revenues from own products, services and revenues from merchandise, which are realised by enterprise for all its activities. Data are aggregated by main economic activity of enterprise and are without VAT and excise duties.

Balance of payment contains the sum of all transactions (material as well financial) coming to the country and all transactions leaving the country abroad for the reference period.

Money M1 – a money aggregate (mass of money) in the narrower sense of the word consists of the currency in circulation (after deduction of cash kept in bank teller's departments) and demand deposits (without the off-budget means of the governmental sector and the National Property Fund). Quantity of money in broader sense of the word – M2 (liquid liabilities) includes, in addition to all M1 components, also the so called "quasi money" QM i. e., time deposits (without the off-budget means of the governmental sector and the National Property Fund) and foreign currency deposits (only deposits of residents converted by the actual exchange rate).

Capital market is a form of credits providing, which repayability is longer than one year. The number of series of the securities issued is given by the Act No 566/2001 Code of Acts on

Securities as amended and supplemented. Subscribed securities express the value of actually sold securities in a particular year.

Direct foreign investments in the Slovak Republic and investments of the Slovak Republic abroad is the foreign investment state since the beginning of the SR existence to the end of the relevant year. Foreign investment state as of December 31, 2005 is updated by state as of May 3, 2006. Data cover the capital part of the entrepreneurial subjects where the value of foreign assets and liabilities was more than 500 thousand SKK at the end of period and the value of invested capital was higher than 500 thousand SKK while the investment was direct or mediated through an investor. Data also include subjects with invested capital lower than 500 thousand SKK if other receivables and payables against abroad were higher than 500 thousand SKK and subjects fulfilled the reporting obligation.

Supplementary pension insurance of employees enables to obtain a supplementary old-age, invalidity, survivor's pension by insured or by his/her survivors in case of death. Activity of supplementary pension insurance companies is determined by the Act No. 123/1996 Code of Acts in the last wording.

Source

Source of published data on general government budgets are the national accounts and information from the Ministry of Finance of the SR. Data source in financial sector is the National Bank of Slovakia and state statistical survey realised by the Statistical Office of the SR in this branch regardless of the number of employees.

All published data for the branch of non-financial corporations and the branch of compulsory social security are the result of the statistical survey of the SO SR.

Data on revenues and expenditures of the health insurance companies and the Social Insurance Agency are obtained from the annual statistical surveys. The head-quarters of the organizations on the compulsory social security are the reporting units.

Data for branch of supplementary pension insurance have been obtained from administrative sources through the Ministry of Labour, Social Affairs and Family of the SR.

More information can be obtained in publication Selected Indicators on the Compulsory Social Insurance.

13. Foreign Trade

Methodological notes

Foreign trade statistics generally covers the movement of goods between Slovak Republic and the rest of the world, realized by entrepreneurial subjects. Total imports include goods entering Slovak Republic intended for a domestic consumption, and also for processing and subsequently re-exported. In the total exports, there are included goods permanently leaving territory of the Slovak Republic or goods leaving the territory for processing and subsequently re-imported.

Since accession of the Slovak Republic into European Union (EU), i. e. since May 1, 2004 foreign trade statistics have been composed of data from EXTRASTAT system and INTRASTAT system. EXTRASTAT system furnishes information on exchange of commodities with non-member countries of the EU based on documents prescribed for customs procedure, INTRASTAT system contains information on commodity transactions with EU member states as partner countries obtained from statistical surveys.

Customs administration provides for collection of data and processing of information on trade with non-member countries of EU on the basis of documents prescribed for customs procedure according to community legislation and legislation of the Slovak Republic (e. g. Council Regulation [EEC] No 2913/1992 establishing the Community Customs Code or the Act No 199/2004 Code of Acts).

Collection and processing of information on trade between EU member states is realized by the Decree SO SR No. 572/2003 Code of Acts and Act No 250/2003 Code of Acts.

Data are collected and processed by Combined Nomenclature, which was published by Customs Tariff till April 30, 2004. This nomenclature was fully compatible with the nomenclature used by the EU. Data are also published according to the Standard International Trade Classification, Revision 3, (SITC, Rev. 3).

Data are published by country of origin and country of destination, which is in compliance with the international methodology of presentation of foreign trade data. Values of imported and exported goods are compiled as FOB-type values. According to the methodology valid from May 1, 2004 the value of goods, which is the subject of temporary operations, is not included to the value of foreign trade for the year 2004. Value of goods for repair and after repair

and related spare parts is excluded from the statistics of foreign trade from 1. 1. 2005. For time series comparability are used conversion bridge of 2004 year.

Data are published by countries according to the Community Nomenclature of countries and territories for the statistics of foreign trade valid for 2005. However publishing of some information is limited because of individual data protection.

Definitions

Country of origin is the country, where goods were completely produced or obtained, or where goods were substantially transformed.

Country of destination is the country, where goods will be used, consumed or processed, or it is the last known country, where goods will be transported.

FOB-type value are included the transaction value of goods and the values of services (e. g. transport, insurance, transfer, storing of the goods etc.) performed to deliver goods to the border of the exporting country.

Economical associations consist of the next countries:

EU-15 (till April 30, 2004): Belgium, Denmark, Finland, France, Greece, Netherlands, Ireland, Luxembourg, Germany, Portugal, Austria, United Kingdom, Spain, Sweden, Italy;

EU-25 (since May 1, 2004): Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Greece, Netherlands, Ireland, Lithuania, Latvia, Luxembourg, Hungary, Malta, Germany, Poland, Portugal, Austria, Slovakia, Slovenia, Spain, Sweden, Italy, United Kingdom;

EFTA: Iceland, Liechtenstein, Norway, Switzerland;

OECD: Australia, Belgium, Czech Republic, Denmark, Finland, France, Greece, Netherlands, Ireland, Iceland, Japan, Canada, Republic of Korea, Luxembourg, Hungary, Mexico, Germany, Norway, New Zealand, Poland, Portugal, Austria, Slovakia, Spain, Switzerland, Sweden, United Kingdom, United States, Italy, Turkey.

Source

A source of data within EXTRASTAT system is customs procedure (single customs documents) which checking and registration in accordance with the legal regulation mentioned above are done by custom bodies.

The main source of data within INTRASTAT system are the reports of INTRASTAT-SK, which are provided by receivers and senders of goods, collected by custom bodies. Other source data are imputations for realized business of reporting units, which make default their reporting duty and grossing up of those reporting units, which this duty they have not with regard to a little volume of trade with goods. This data is calculated by SO SR, which is responsible for foreign trade data processing and publishing.

More detailed information on foreign trade can be obtained in monthly publication Foreign Trade of the Slovak Republic and in the Yearbook of Foreign Trade of the Slovak Republic.

14. Prices

Methodological notes

Price indices in production branch express the rate of production price changes of inland producers realised on domestic market and since 2002 of goods for export too, resp. in total for inland and export.

Within the harmonization with EU statistics was created a model of price indices of industrial products, realized in export by analogy of models of price indices on the domestic market. The weights structure of domestic price indices and export price indices is projected into new weight pattern for calculation total industrial producers price indices.

In 2005 the scheme of industrial producers price index contains app. 4 000 representatives (products) of inland serial industrial production resp. further 1 800 products for export classified into sections 10 to 41 of the Classification of Products by Activity (CPA). Constant weights derived from the structure of industrial receipts for year 2000 are used for the aggregation of individual products indices into higher classification levels. Since 1997 the calculation of index of industrial producers prices has also covered the observation of drinking water prices. Price index of sewage water and its purification is surveyed individually. The base price period is December 2000.

Products prices are surveyed for selected industrial producers on “primary market” i. e. during first market transaction between producer and customer. Prices do not comprise value added tax and excise duties.

Price index of raw wood covers 14 selected products (representatives) of leafy and coniferous raw wood assortments (CPA 02). The index is calculated by using of constant weights derived from the sale structure in 2000. This index is published with 2000 average = 100 as a base. Prices of selected assortments of coniferous and leafy wood (excluding value added tax) are surveyed for selected more important producers.

The price index of agricultural products contains information on price level development for 93 main agricultural products (crop, livestock, fruit, vegetables) and fishes classified in CPA 01 and CPA 05. Indices are calculated from surveyed prices of production assigned for further processing or sale. Calculation of aggregates is based on constant weighting system derived from the average structure of agricultural production sales from 1996 to 2000. Prices

of individual months of 2000 are the basis for price index calculation. The prices of agricultural products are surveyed in selected producers during the sale to a first customer (i. e. primary market) without value added tax.

Data on average prices of selected agricultural products are the average for selected qualities (without a non-standard) for crops and animals products and in fruit and vegetables for 1st quality.

The scheme of price indices of construction works is compiled from app. 2000 representatives – selected items of construction works (CPA 45). Weights system reflects the structure of construction production in 2000. The price base is average of 2000. Selected construction suppliers grant the prices for representatives without value added tax. Price of construction work per one measuring unit includes all costs needed to build a construction, i. e. materials, semi-finished goods, costs of the operation of construction machines, costs of transport, indirect costs (except equipment in the construction site) and profit. Indices has been published according Classification of Products by Activity (CPA) and Classification types of Construction (CC). Total price index of construction work consists of the price index of new construction and of the price index of repair and maintenance.

The price indices of supplies of goods and services into agriculture and the price indices of materials and components used in construction express the rate of price changes on input side.

The price index of supplies of goods and services into agriculture includes products and services purchased by agricultural producers and consumed by agricultural production. It is calculated from surveyed prices of 101 kinds of important purchased products and services (selection of respondents is identical with the selection for the price index of agricultural products) and from price indices of selected groups, or CPA classes, taken from industrial producers price index, price index of drinking and drainage water, construction works price index and the price index of communication performances. The index is published with 2000 average = 100 as a base. Value added tax is excluded from the purchase prices of products.

The price index of (production) materials and components consumed in construction contains price indices for selected materials and products (74 groups of CPA) taken from price index of inland industrial producers. The weights for index calculation were derived from the value of consumed construction materials in construction process in 2000. The base period is average of 2000.

The indices of consumer prices and living costs are calculated from the prices of individual

representatives collected from the network of selected shops and service business. The base period for calculating of consumer prices indices is December 2000.

Since January 2005, after comprehensive revision of consumer price indices, the development of consumer price indices has been surveying on an universal consumer basket established on the set of 712 representatives – selected goods and services paid by the population. A new, revised consumer basket was discussed and consented by the representatives of the statistical bodies, ministries, trade unions and others.

Consumer price index presents the price development on a generally averaged level. Living costs indices are also the price indices that show how the different expenditure structures of individual social groups of households influence their changes. The coverage of representatives in the consumer price index as well as in living costs indices is the same besides that some products and services are excluded from those households in which their consumption is insignificant.

Representatives of consumer basket are updated yearly. Consumer basket is divided by COICOP (Classification of Individual Consumption by Purpose Use) used by the countries of the European Union. Breakdowns of indices were designed in harmony with methodology of Eurostat; universal consumer basket is divided into 12 divisions.

Several standards required for calculation of harmonised consumer price index of member countries of the European Union are applied in processing of consumer price index.

Since January 2005 the consumer price index (based on December 2000) is calculated by chaining using December of a previous year as a linking period. Weights for the elementary aggregates have to be annually revised to ensure that they reflect current expenditure patterns and consumer behaviour. The important feature of a chain index formula is that it allows weights to be annually updated and facilitates the introduction of new items and sub-indices and the removal of obsolete ones.

In order to be able to link the old and the new series, an overlapping (link) period is needed in which the index has to be calculated using both the old and the new set of weights. The SO SR stated as a link period December of a previous year, i. e. December 2004 is a link period for the compilation of indices in the year 2005. December 2004 is a last period, for which the index is calculated using the previous consumer basket and system of weights and at the same time is the price reference period for an updated consumer basket. Thus December of a previous year is a link period between the new and the old index and these indices create (compile) a chain index.

A chain index may have two or more links. Between each link period, the index may be calculated as a fixed weight index.

The disadvantage of a chain index is that chaining leads to non-additivity. When the new series is chained onto the old, the higher-level indices after the link cannot be obtained as weighted arithmetic averages of individual indices using the new weights.

Average consumer prices of selected products refer to averaged prices for the SR calculated from the prices surveyed in selected shops and service business.

Core and net inflation quantifies growth rate of price level on incomplete consumer basket. From the consumer basket there are excluded those items with regulated prices and items with prices influenced by other administrative measurements. The items which will be changed due to tax amendments (e. g. change of VAT, precise of duties, subsidies) stay a part of consumer basket, but influence of tax amendments is eliminated. Total inflation is divided into core inflation (influence of items with market prices), influence of items with regulated prices and influence of indirect duties (elimination of tax amendments). Contribution of core inflation represents the information by how much percentage should the price level be changed, if there is no price change due to administrative interference. It means that if there are no changes of administrative prices, contribution of core inflation is equal with total inflation. Contribution of core inflation (in percentual points) to total inflation is further divided in to contribution of net inflation and contribution of foodstuff prices. Reason for putting aside share of foodstuff from net inflation was the fact that foodstuff prices in the past were determined by considerable seasonality as well as non-market measurements (e. g. changes of guaranteed prices for the first producers, subsidies, import duties, quotas).

Definitions

The price indices are created as sample indices of constant structure (influence of structure change onto price index level is excluded). Summary indices are calculated by aggregation of individual simple price indices of representatives by convenient weights system, i. e. structure of receipts from sales of products (expenditure of households for goods and services) in the basic year. The index schemes (system of weights, representatives and respondents systems) are regularly (5-years interval) revaluated and adapted to actual structures. Since 2002 price indices are calculated against December 2000 or average of 2000. For calculation of price indices is used Laspeyres formula.

Producers price refers to contract price agreed between producer and inland customer invoiced for more important business transaction realised in the middle of current month excluding value added duty and costs for transport to purchaser and costs related to transport.

Export value is contract price agreed between producer and foreign customer according to the qualitatively agreed conditions, terms of payments and delivery conditions. Invoiced price to customer is recalculated by valid rate of NBS from relevant currency unit to SKK and she is presented without value added tax and excise tax.

Consumer price is contract price agreed between seller and final consumer. It includes producer price, price of business performance (wholesale or retail trade margin), value added tax and other duties (e. g. excise tax).

Source

All published data are the result of regular surveys and processing realised by the Statistical Office of the SR.

Data source for calculation of price indices in production branch is the state statistical questionnaires submitted by selected reporting units. More information can be found in monthly publications Price Indices of Industrial Producers, Drinking and Drainage Water; Price Indices in Forestry (Raw Wood); Agricultural Products Price Indices; Price Indices of Construction Works, Materials and Products Consumed in Construction and in quarterly publication Price Indices of Products and Services Supplies to Agriculture.

Consumer prices of goods and services for calculation of average prices and indices of consumer prices are surveyed in selected shops and service business in the Slovak Republic. More information on consumer prices indices can be obtained in monthly publication Consumer Price Indices.

15. Fixed Assets

Methodological notes

Fixed assets (capital assets) data cover the value of the assets of all legal entities. They do not include the value of fixed assets of tradesmen, population and fixed assets owning by churches in case that the legal procedure and pricing has not been finished. The data on fixed assets for 2004 were presented for the economy in total in the summary table containing basic indicators and in the table at reproduction prices; all other tables present the corporations with 20 and more employees.

Branch classification is given according to main economic activity of reporting subjects. Ownership is aggregation of included owners of fixed assets into particular groups according to the main kind of ownership.

Fixed assets are given at purchase prices i. e. in prices, for which fixed assets were purchased or produced in time of acquisition. The data express residual price of fixed assets after deduction of consumption, i. e. value of fixed assets yearly permanently consumed in consequence of physical depreciation and foreseeable obsolescence including security from losses of fixed assets.

Since 1993 input price of fixed assets several times increased: since January 1, 1993 tangible fixed assets was value 10 thousand SKK and more, intangible fixed assets 20 thousand SKK and more; since January 1, 1999 input price of tangible fixed assets was value 20 thousand SKK and more, intangible fixed assets 30 thousand SKK and more.

Since January 1, 2003 in connection with new act on accounting was substituted previous definition of fixed assets and was supplemented some new component, other existing was specified. The input price of tangible assets was increased on 30 thousand SKK and more and intangible fixed assets on 50 thousand SKK and more. This changes are projected in this part.

In line with methodology ESA 95 the fixed assets at replacement prices expresses price, for which the fixed assets was acquired as new in time of accounting.

Definitions

Fixed assets consist of all assets of intangible and tangible character on which an economic subject has the right of ownership or right of management. Fixed assets consist of two groups of assets: intangible and tangible.

Intangible fixed assets consist of incorporation expenses, capitalization development costs, software, valuable rights, goodwill, low-value intangible fixed assets and other intangible fixed assets, whose value in individual cases is more than 50 thousand SKK, the service life is more than 1 year. Intangible assets whose individual components have the value of 50 thousand SKK and less while the service life is longer than one year may be included into low-value intangible fixed assets if so decided by an accounting unit.

Tangible fixed assets are the real estates and separate things in possession or sets of things in possession whose value is more than 30 thousand SKK in individual case and the operational and technological function is longer than one year. The accounting unit may set that the tangible fixed assets also include low-value tangible fixed assets whose purchasing price is less than 30 thousand SKK and operational and technological function is longer than one year.

Completed dwellings are those that were passed as acceptable by an approving officer after construction completion. It refers to completed dwellings in constructions intended for living, i. e. in housing buildings, family houses and in polyfunctional buildings. There are included also dwelling in constructions undisposed for living, for example in administrative buildings, banks, posts, stations. Completed dwellings refer to dwellings acquired by new construction, improvements or another construction repairs.

Average living area of completed dwelling expresses housing space (m²) per one completed dwelling.

Useful floor area of completed dwelling is the area of all rooms of completed dwelling. There are not included common non-housing space serving for all users of dwelling (staircase) and non-housing rooms used by dwellings users (cellars, room for prams, common laundry) and balconies or loggias.

Decrease of dwellings includes dwellings that were eliminated from dwelling fund by particular decision of construction office.

Fixed assets at purchasing price express the value of their acquisition including costs spend for their acquisition. It can be a purchase of new or fixed assets used before by another sub-

ject, own-account production, restitution of property based on legal regulations (restitution, legal decisions), dedication, transfers between corporations. The change is, on the other hand, influenced by disposals of fixed assets occurring during the year, e. g. a sale, transfers by legal regulations, liquidation of fixed assets caused by full depreciation or dedication of fixed assets to another corporation or subject.

Fixed assets in residual value express the value of assets after deduction of depreciation from purchasing price or it is difference between purchasing price of fixed assets and amount of created depreciations. Evaluation of fixed assets is given by account data.

Fixed assets by groups include all kinds of tangible and intangible fixed assets.

Consumption of fixed assets represents depreciation – the amount of fixed assets used up during the year as a result of production activity as well as service providing.

16. Organizational Statistics

Methodological notes

Data on organizational structure of the economy are compiled on the basis of data kept in the Register of Organizations of the Statistical Office of the SR. The register is created and updated by the Statistical Office of the SR according to the Act No 540/2001 Code of Acts on Government statistics in wording of later regulations. The Register of Organizations of the SO SR is regularly updated by data from Business Register, Tradesmen Register and from statistical surveys. It contains identification and classification characteristics on legal persons and natural persons-entrepreneurs.

Data concern only those legal and natural persons-entrepreneurs specified in the Register of Organizations of the SO SR as economically active.

Definitions

Legal persons are legal entities. The law adjusts their existence independently on individuals or institutions that are their owners or their members.

Natural persons-entrepreneurs non incorporated are persons, who undertake on their own liability according to special rules. These are tradesmen (persons running business on the basis of the tradesmen law), persons with freelance professions (persons running business on the basis of a law other than tradesmen law e. g. lawyers, physicians, auditors and others) and self-employed farmers.

Enterprises are legal persons performing systematic activity to make profit. There are included corporations (enterprises in ownership of groups of subjects e. g. joint stock companies, co-operatives, limited partnerships etc.) and quasi-corporation (enterprises in ownership of one subject).

Non-profit oriented institutions are legal persons serving to financial and non-financial corporations, government and households e. g. budgetary organizations, subsidized organizations, whose receipts don't exceed 50 % of presented costs, associations, political parties, churches and others.

Public sector includes enterprises in state, municipal and international ownership being under the state control.

Private sector includes enterprises in ownership of private inland and foreign legal persons as well as natural persons-entrepreneurs and enterprises with foreign interest not being under the state control.

Foreign ownership includes subjects founded and controlled by a foreign legal person or natural person-entrepreneur.

International ownership includes the subjects that were founded jointly by a inland and a foreign legal person or a natural person-entrepreneur.

Non-financial corporations are corporations and quasicorporations, whose essential activity is production of products and providing services of nonfinancial character.

Financial corporations are all corporations and quasicorporations carrying out especially financial intermediation or auxiliary financial activities.

17. Agriculture

Methodological notes

Agriculture includes all legal entities (legal and natural persons) which are active in crop and livestock production, in related service activities and fish-hatcheries.

The basic statistical unit for the purposes of the statistics on soil fund and crop production, is considered as:

- a) total of agricultural land with the area larger than 0,10 ha;
- b) total of agricultural land with the area up to 0,10 ha
 - if the products from this land are usually sold
 - if there is a vineyard on the land with the area larger than 0,05 ha;
- c) total of the forest land or ponds with the area larger then 0,10 ha if these cultures are not a part of the agricultural establishments under the point a).

Every breeder of farming animals who breeds them for sale or for next processing including agricultural enterprises and other breeders without agricultural land or with agricultural land up to 0,10 ha in area are basic statistical units for the purposes of the livestock production statistics.

All recalculations concerning intensity of agricultural production take into account either agricultural or arable land belonging exclusively to agricultural establishments.

Summary data on gross agricultural production (see part 1. Primary economic indicators) are for agriculture in total, i. e. including calculation for small enterprises and population. The structure of gross agricultural production is given for incorporated entrepreneurial entities employing 20 and more employees.

Root crops in the structure of land use includes potatoes, sugar-beet and feeding root crops. Industrial crops includes oil seeds, fibre plants, tobacco, hops, succory root, medical and root plants. Other agriculture crops area includes horticulture, experimental fields, seed plots. Sown area – seeds includes seeding and planting on feeding root crops, sugar beet and vegetables, seeds of fodders lasting more years.

In crop production data on sown area and data on crops production are given for agriculture in total.

Production of agricultural crops represents a total yield of the given crop which was harvested under standard humidity by Slovak Technical Standards and purity without harvest

losses including species of minor quality used for feeding (background grain, small potatoes etc.) excluding seedlings and saplings. Beet harvest is given without reduction for impurities. The crop of feed-stuffs is recalculated to the value of hay according to conversion coefficients. Vegetable production is represented by the total crop of vegetables also from repeated areas including forced early sorts.

Harvested areas of particular sorts of vegetables include also areas where vegetable has been sown or planted as a main crop as well as all resowings and reseeds including covered areas and domestic garden plot (since 2001 without domestic garden plot).

The number of fruit trees includes all fruit trees regardless of age and shape namely bearing trees, newly planted ones or superannuated, non-bearing ones.

The surveying on balance of cereals covers only the agricultural enterprises growing cereals. The increase of cereals includes own crop, purchase, imports and another receipts. The consumption of own seeds, sales of perquisites to their own members and employees, sales to the trading and processing organizations, exports, fodder consumption and others are included in decrease.

Consumption of fertilizers is surveyed without private plot owners for the economic period, i. e. from 1 July of the current year until 30 June of the following year.

In the animal production cows, sows and ewes are the breeding ones that at least once farrowed (without sows excluded from breeding and included in feeding). Poultry involve hens, cocks, goose, ducks, drakes, turkey-hens, turkeys including young ones of these species.

Meat production includes the total volume of sales (by primary producers) of slaughtered cattle, calves, pigs, sheep and goats in live weight delivered to slaughter increased by other sales and self-sufficiency. Besides total sales, milk production includes self-sufficiency and also milk that has been sucked or fed by calves. Production of sheep milk covers only milked sheep milk from incorporated agricultural enterprises and from selected self-employed farmers.

Fishing includes freshwater fish determined for consumption and market purposes.

Sales data cover sales of incorporated agricultural enterprises and selected self-employed farmers with reporting duty. Data on sales of all products are surveyed for a calendar year. Sales of cow milk include also the sales of cream. Sales of consumer eggs include all hen eggs without eggs for hatching.

The level of agriculture production for year 2001 is given per area from agriculture census and since 2002 from register of sown areas. Livestock for year 2001 is given per area from

agriculture census and since 2002 from register of sown areas. The level of agriculture production per capita is calculated on the mid-year population at the current year.

Oil plants group includes all oil plants except for flax and hemp seed. Group of total slaughtered animals includes the production of slaughtered cattle, calves, pigs, sheep, goats and horses.

Numbers of machines and means of mechanization are surveyed for all agricultural enterprises and selected non-incorporated self-employed farmers. Recalculation of machines and means of mechanization per utilized area is given for the area of all agricultural enterprises. Cereals, potato and beet harvesters are calculated per harvested area and potato planter per sown area.

The number of farms by type and category of economic size for 2001 is from Structural census of farms processing and for 2003 from Agriculture structural farm survey processing. The farm's type and category of economic size was calculated only for units complies with farm's criteria.

Definitions

Utilized agricultural land is the sum of independent kinds of lands, which were really exploited in growing season in agricultural production, for crop production. There are excluded non utilized and abandoned areas, which in previous period was agricultural used, but from social, economic, eventually other reasons there are not working already and which not used in system of crops rotation, but without heavy expenses it would be their possible again cultivated.

Arable land is created by lands for growing cereals, root-crops, industrial crops, vegetables and another agricultural crops according to the specified sown methods. There are included lands temporary overgrown with grass or used for growing of fodder lasting more years as well as hotbeds and hothouses if they are built up on arable land. Fallow land is arable land withdrawing from rotation of crops and leave for regeneration on one growing season, during which time they were not seed another crops or just crops for green manure, eventually is on its spontaneous vegetation, which would possible used or plough under.

Gross agricultural production is the sum of sales out of enterprise, sales within the enterprise and changes in stocks at the beginning and at the end of the year (Gross Turnover Method). It is calculated at natural units (pieces) and at constant prices of the year 2000 or at current prices.

Area sown refers to a spring productive area (i. e., arable land area, sowing area in orchards

and gardens including home gardens and the area of grass lands and pasture lands temporarily ploughed for reclaiming), expected to bear a crop in the current year. The following kinds of areas belong here:

- a) areas of winter wheat sown in autumn of the previous year and preserved until the spring sowing in the current year
- b) areas of spring corn sown in spring of current year
- c) areas of many years lasting crops sown in past years and preserved until the completion of sowing in the current year
- d) areas that were not sown due to unfavourable climatic conditions as well as fallow land (up to 2000 inclusive areas temporarily fallow).

Hectare yield refers to average yield from 1 hectare and it is calculated as a ratio of total yield of given crop and area on which the crop was gathered.

The average annual milk yield expresses the volume of milked and sucked milk per one cow. It is calculated for average number of cows per year excluding meat breed cows (without market milk production).

An average egg-laying per one hen expresses the number of totally annual laid eggs recalculated per one hen.

Rearing of calves, pigs and lambs expresses the difference between live-birth and dead young (including all confiscation) for an average number of cows, sows and ewes.

Loss-rate of calves and lambs is counted until the age of 3-months and of pigs until weaning.

Livestock unit is the weight of 500 kilograms for which individual farming animal species and their categories are recalculated.

Regular employees are those, whose job in an agricultural enterprise is a single or a major activity and who have a labour contract (contract on labour conditions). Here also belong those crop production workers with whom a contract was made for a minimum of 150 working days in a calendar year. The days actually worked out and days considered to be as work days are being included in those 150 working days.

Type of farm reflects production orientation and it is determined by share of the individual branches and total standard gross margin of farm.

Standard Gross Margin (SGM) is average value of production from 1 ha or from 1 pc of animal less variable costs spent on this production. It expressed a gross profit produced per unit of production of individual branches of plant and animal production.

ESU (European Size Unit) is applied for the economic size of enterprise, is defined by value 1 200 EUR.

Economic account for agriculture is the basic methodological instrument for performance rating on agriculture sector, resp. on agriculture basic industry within national economy. Their basic components are this aggregate:

output of the agriculture industry, which expressive the value of agriculture products and agriculture services, produced by related units of that branches plus additional inseparable activities,

intermediate consumption expressive the value of products, goods and services consumed in production process and served as main indicator of production intensity of agriculture industry,

gross value added, which expressive final effect of agriculture branch, is calculated by a subtraction of value of intermediate consumption from production of agriculture branch,

net value added is value, created by all agriculture units after deduction of fixed capital consumption.

Source

Published data are the result of the statistical surveys of the SO SR except data on apiculture taken from the Ministry of Agriculture of the SR, from the Slovak Association of Apiarists and Society of Apiarists of Slovakia. Data on the consumption of fertilizers were taken from the Central Control and Testing Agricultural Institute. Economic accounts for agriculture is elaborated at a cooperation with the Ministry of Agriculture of the SR.

Further information can be obtained from publications Animal Production and Sales of Farming from Primary Production and Balance of Crops, Selected Economic Indicators and Employees in Agriculture, Census of Area Sown with Crops as of May 20, of Current Year; Final Data on Crops, Final Data on Harvest of Fruit and Vegetables, Register of Farm Animals, Machines and Equipment in Agriculture as of December, 31; Gross Turnover – Selected Indicators on Agriculture, Structure of Employees in Agriculture and Farm Structure Survey 2003 – Complete Results I. and II., Typology.

Data on yields of agricultural crop, vegetables, fruit, animal production and livestock, machines and equipment in agriculture for 2001 are published in publication Farm Structure Census – Farm Typology.

18. Forestry

Methodological notes

The branch of forestry includes basic data on structure of utilized forest land, basic data on work in silviculture activities, on regeneration and protection of forests, basic data on logging activities and timber deliveries. The data are given for state forest enterprises, military forests enterprises, forests of industrial and farming companies, municipal forests and organizations covering private forests as well as land associations (land-registers, composesorates, cot-tar forests and other) including entities non-incorporated in the Business or the Tradesmen Register.

Definitions

Timber land covers all tree species lands serving for the fulfilment of forest functions and the lands on which the forest stands were temporarily removed with aim of their regeneration or establishment of forest nurseries or forest seed plantation.

Commercial forests are those, whose main purpose is a production of quality timber while ensuring other roles of the forest.

Protective forests include forest stands with prevailing protective functions. The aim of economy is to guard permanent filling of relevant ecological functions.

Forests of special purpose are those having functions resulting from specific important social needs by which is conducted the way of management.

Land designed for afforestation comprises the whole area designed for afforestation including land taken over to be afforested (former non-forest – mainly agricultural – land). Unsuccessful afforestation increment comprises areas of unsuccessful plantations in observed and previous years.

Afforestation stands for land actually afforested by sowing and planting (including established plantations). It comprises areas afforested for the first time as well as enrichment planting recalculated per area of full afforestation.

Production of plants includes the number of plants taken from forest tree nurseries for afforestation and sale purposes in observed year.

Forest tree nursery is the land designed for the production of planting stock.

Cleaning is usually the first silviculture intervention in young immature stands.

Thinning includes mainly regulations of stand composition, shape tending and stand stabilisation.

Logging includes logged mass of wood in thousand cubic metres under bark that was received as a final assortment or as a green trunk including logged mass from so called “self-production”. The mass is included regardless of type of silviculture or logging interventions it was received from, including salvage felling. Self-production stands for volume of harvested timber left to the subject who felled it for a fee to cover self-supplying of inhabitants with fuel wood.

Timber deliveries comprise mass of wood (full-size timber, non full-size timber) in thousand cubic meters under bark designed for a sale to domestic and foreign customers and delivered for own consumption regardless of delivery place.

Source

Published data of selected indicators in forestry are completed from the materials of the National Forest Centre – Forest Management Planning Institute Zvolen.

More information on forest management can be obtained from annual publication SO SR – Forest Management in SR and in publications of National Forest Centre in Zvolen.

19. Industry

Methodological notes

Industry includes activities connected with extraction of minerals, manufacturing, production and distribution of electricity, gas and water. It is divided according to the Branch Classification of Economic Activities, ownership, size category by number of employees and by the Main Industrial Groupings.

Industrial production index (IPI) is calculated according to the methodology valid in the European Union on the base of the Standard on Short-term Indicators. IPI calculation is based on the change of selected products volume and on the two-step weight system. The index expresses a change in industrial production in current year in comparison with base year. It is calculated from statistical survey results in reporting units (enterprises) with the main industrial activity and with 20 and more employees regardless of legal form and in the selected enterprises with non-industrial main activity or with number of employees up to 19.

Production of selected industrial commodities is given in the aggregation of products according to the list of industrial products PRODSLOV, which is elaborated on the base of international classification of products PRODCOM.

Turnover are given without value added tax and excise tax.

Data on financial indicators are presented in the part 12. Finance.

Definitions

Receipts from sales for export include the sale to a foreign customer that is realized by the manufacturing enterprise or by an intermediary organization. The sold products are transported directly from the store of the manufacturing enterprise abroad.

Industrial production index expresses the change of production volume given in physical terms.

Production of selected industrial commodities includes the products intended for sale outside the enterprise as well as those consumed for manufacturing purposes (i. e. intra-plant consumption) and for industrial services (i. e. adaptations, repairs, maintenance, installation, contract treatment) and they are intended for outside sale.

Monthly labour productivity based on turnover is expressed by volume of the turnover per one employee in industry per month.

Source

All published data are the result of the statistical surveys of the SO SR.

More detailed information can be obtained in monthly publications Selected Indicators of Industrial Organizations and Industrial Production Index, in publications Results of Quarterly Surveys in Industry SR and Production of Selected Goods, Results of Annual Surveys on Industry of the SR, Production and Sales of Selected Goods by Enterprises and Establishments and in Yearbook of Industry.

20. Energy

Methodological notes

Data on energy sources have been taken from the producers, importers, exporters and fuel and energy traders. Data on use are obtained from statistical units consuming individual kinds of fuel and energy, from distributors and with imputations.

Balance of solid fuel includes hard coal, brown coal, coke, briquettes.

Balance of gaseous fuels includes natural gas, coke-oven gas, blast furnace gas, oxygen steel, furnace gas.

Balance of crude oil and petroleum product includes crude oil, NGL, refinery feedstock, refinery gas, ethane, LPG, gasolines, diesel oil, fuel oils, lubricants, waxes, bitumenes, petroleum coke, other refinery products.

Balance of renewables of fuels and wastes includes wood, wood waste, other biomass, municipal solid wastes, biogas, industrial wastes (solid, liquid and gaseous). Hydroenergy and windenergy are involved in electricity balance and geothermal heat in heat balance.

Definitions

Gross inland consumption includes primary production (brown coal, lignite, crude oil, natural gas, heat and electricity) and it is modified by recovered products, by balance of imports and exports and by drawing of stocks. It also includes the balance of imports and exports and drawing of the other resources stocks such as hard coal, coke, brown-coal briquettes, diesel oil, gasolines, light and heavy fuel oils, kerosene, coke-oven gas, blast furnace gas and other solid, liquid and gaseous fuels.

Transformation – input is amount of fuels transformed to obtain derived fuels or electricity and a part of fuels consumed for heat production. The total amount of fuels used in public power, CHP and heat plants is reported. Autoproducer's fuel consumption for electricity production is reported. There is also included a part of fuels which corresponds to heat sold from autoproducer's CHP and heat plants production. Fuels which were used for autoproducer's heat production for own consumption is reported in energy sector or other sectors which covers autoproducer's main activity.

Transformation – output is amount of produced fuels and energy obtained by upgrading of other fuels and energy. Individual items of output meet items of transformation – input.

Exchanges and transfers, backflows are amount of products which were reclassified to feedstocks or to other products and amount of products returned from petrochemical industry for further processing.

Consumption of the energy sector are fuels used by the energy industry to support the mining (mining coal, oil and gas production) or transformation activity.

Distribution and transmission losses figure a difference between fuels and energy input into the long-distance transport systems (pipelines, gas-lines and public electricity and heat distribution) and output from them (intra-plant losses being a part of consumption are excluded). Well-founded losses caused by depreciation or destruction are included.

Final consumption is calculated like: gross inland consumption

- transformation – input
- + transformation – output
- + exchanges and transfers, backflows
- consumption of the energy sector
- distribution and transmission losses

Final non-energy consumption is energy products used as raw materials in the different sectors; i. e. is not consumed as a fuel or transformed into another fuel.

Final energy consumption is final consumption minus final non-energy consumption. See also transformation – input.

Consumption of fuels and energy is consumption including charging and operational consumption in the process of generation of electricity and production of heat as well as in the fuel improvement processes. Electricity consumption also includes consumption of energy for pumping.

Source

All published data are the result of the statistical surveys of the Statistical Office of the SR. More information can be found in annual publication Energetics.

21. Construction

Methodological notes

The production of the construction branch covers construction works realized on the territory of the Slovak Republic and abroad by supplier construction enterprises with the major activity in the field of building and construction registered in the Slovak Republic (including tradesmen) and by construction establishments of non-construction enterprises. Prevailing building and construction activity of the enterprise is determined by its registered appurtenance to section 45 of Branch Classification of Economic Activities (NACE).

Data on contractually agreed inland construction production in new construction, reconstructions and modernisations are structured into particular branches of construction types by the Classification of Types of Constructions (CC). Data on construction production carried out by own employees by the Classification of Products by Activity (CPA) are divided by individual kind of construction activities.

Data are presented in methodology and organization structure of the current year, at current prices and constant prices converted on the average of 2000.

Definitions

Construction production carried out by own employees is the value of construction production realized by employees included in the registered number of employees of the given construction enterprise as well as by persons working with the enterprise upon contract (including productive work of apprentices). Included is also the production within own capital construction as well as production for other suppliers of construction production including production produced abroad.

Contractually agreed construction production is the value of construction production based on a delivery contract for a customer. It is the sum of own performances from construction activity including the production carried out by sub-contractors.

New construction, reconstructions and modernizations is the value of construction inland production connected with acquisition of the new tangible fixed assets and with rebuilding, extension or reconstruction of the existing ones.

Maintenance and repairs are the value of works realized on existing buildings or construction parts of tangible fixed assets removing partial depreciation or damage by repairs to make them functional.

Other construction production comprises all production that cannot be included in new construction, reconstructions, modernizations and repairs. It includes, for example, construction work for geological survey, removing of mined earth carried out by contractors and demolition work (in the site where another construction will not be erected instead), etc.

Completed dwellings by construction technology represents the number of dwellings built by suppliers in the new buildings for habitation classified by used material of vertical load-bearing construction. Completed dwellings in family houses realized “on key” (fully completed dwelling construction) are also included in this number.

Workers carrying out construction work comprise employees (workers) from the average registered number of employees included in groups 7, 8, 9 of the Classification of Occupations who are involved fully or mainly in construction activities of the enterprise.

Average monthly wage is calculated from the total wages (without other personnel costs).

Labour productivity is expressed as the amount of the construction production per one employee or worker engaged in construction work.

Source

All published data are the result of the statistical surveys carried out by the Statistical Office of the SR.

More information can be obtained in monthly publication Construction Production, Employees and Wages in Construction Enterprises, in quarterly publication Stock of Orders and Financial Indicators of Construction Enterprises and in Yearbook of Construction.

22. Trade, Catering and Accommodation

Methodological notes

The branch of internal trade includes entrepreneurial subjects with the following prevailing activity:

- Sale, maintenance and repair of motor vehicles and motorcycles; Retail sale of automotive fuels,
- Wholesale trade and sales on a fee or contract basis except of motor vehicles,
- Retail trade, except of motor vehicles and motorcycles; Repair of personal and household goods.

Sale, maintenance and repair of motor vehicles and motorcycles includes all activities (except manufacture and renting) related to motor vehicles and motorcycles, including lorries and trucks. This division also includes retail sale of automotive fuel and lubricating or cooling products.

Wholesale trade and sales on a fee or contract basis except of motor vehicles and motorcycles includes sale of new and used goods to next sale or processing or eventually wholesale on a fee or contract basis for commission. This division also includes usual manipulations involved in wholesale such as assembling, sorting and grading of goods according to quality and largeness in large lots, repacking, bottling, redistribution in smaller lots, storage, refrigeration, etc.

Retail trade, except of motor vehicles and motorcycles includes sale of new and used goods, eventually own products to final consumers for personal or household consumption or utilization, realized mainly in units of retail network (i. e. shops, stands, department stores, petrol stations), and as consignment sale, hawkers etc. Retail trade includes also other supplementary services, e. g. transport of purchased consumer goods, repairs of consumer goods and their installation.

Catering and accommodation includes entrepreneurial subjects with prevailing activity:

- hotels and restaurants.

Hotels and restaurants comprises the provision of short-stay accommodation in the hotels type facilities, guest-houses (hotels, camping sites, youth hostels, tourist hostels and chalets, campuses, boarding houses, etc.) and catering (nutrition, refreshment, eventually social

and funny activity) and activities of other specific purposes canteens (restaurants, fast food shoppings, buffets, confectioners, bars, nightclubs, beer parlors, winerooms, canteens, works, schools and students canteens, food production and deliveries, treat etc.).

Detailed classification all above mentioned activities is used by the Statistical Classification of Economic Activities.

Data on internal trade and on hotels and restaurants are surveyed for incorporated legal persons and for natural persons running business on the base of the Tradesmen Licence or another licence.

Data on retail network and on network of outlet centres of catering are surveyed for incorporated legal persons with 20 and more employees.

Definitions

Retail network consists of shops in which retail activity is carried out. Units of retail network are classified into assortment types by receipts in particular assortment (e. g. department stores, shopping centers, hypermarkets, general shops supermarkets etc.).

Selected services description of assortment type:

Department store is retail unit, which forms a complex of selling departments under joint operation, concentrated in one object. Department store offers wide assortment of goods (minimum foodstuffs, clothing, consumer goods), generally also community feeding and complementary services. Minimal extent of floor space is 1 500 m², in rural areas exceptionally 1 000 m².

Shopping centres is wide-assortment retail unit, which provided sale at least of three basic assortment group of goods (foodstuffs, clothing, consumer goods) namely at least in two individual selling departments within one object. Selling departments have the same operator. Shopping centre has floor space greater than 250 m² and less than 1 000 m² (quantitative line 300, 600, 900 m²), in cities exceptionally as many as 1 500 m².

Hypermarket (indoor help-yourself department store) is high density help-yourself retail unit, offerer wide assortment of foodstuff and non- foodstuff goods in the form of selfservice. Hypermarket is characterized by selling area above 2 500 m² and accumulating payment (cash boxes are situated at exit from selling hall and no in individual selling departments, how is it at department store). Hypermarket is located in single till two-storied hall, generally away from core city.

General shop is shop offerer wide assortment of foodstuff and non-foodstuff goods and is not possible expressly defined centre of assortment. The proportion of foodstuffs and non-foodstuff assortment is roughly acquitted, it comes to this, that proportion of foodstuffs and non-foodstuff don't decreases in annual average below 40 % of turnover. The selling area of general shop is generally less than 1 000 m². Consumer's cooperatives in this assortment type shows classic general shops with selling area 75, 100, 150 m².

Supermarket (big shop of foodstuff) is retail unit offered wide assortment of foodstuff goods, supplemented by non-foodstuff convenience goods. The supermarket selling area are moving between 400 up to 2 500 m². Selfservice with accumulating payment is prevailing form of sales (cash partitions enclose the selling areas). Moreover they have also sales with attendant at the specialized selling sections (e. g. delicacies, meat- smoked-meat products, fruit-vegetable, etc.). Houses of foodstuff (they belong to the foodstuff of wide assortment) and supermarkets within department store and shopping centres are excluded.

Foodstuff – wide assortment offered wide assortment of foodstuff goods, often supplemented by non-foodstuff goods of daily consumption (the share of non-foodstuff is always essentially less than 40 % of the total turnover). The sales is selfserving, with service or combined. There are included also the wide assortment foodstuff shops with less than 400 m² of selling area, perhaps even foodstuff shops excess this size limit, if don't complies criteria for integration among big shops of foodstuff (they have not selfservice with accumulating payment).

Non-foodstuff – wide assortment offered collected sales of non-foodstuff assortments. The offered assortment is conditioned by location, by measure of space and operating concentration of commercial services and size unit. The sales is selfserving, with service or combined.

Immobile stands are places of business with a separate place for goods and shop-assistant but not for customers. Petrol stations and car services have no selling area too. Units for sales of fuels and construction materials don't report their selling area if they have no sales room and they sell directly on storage area.

Receipts in manufacturing units of retail trade are presented in sale prices for year (including value added tax).

The network of outlet centres of catering consists of centres of catering providing catering services, social and entertaining activities as well as supplementary catering services. According to the period of operation the outlet centres are divided into year-round and seasonal ones. A seasonal unit operates less than 9 months during the year.

Receipts of outlet centres of catering are presented in sale prices for year (including value added tax).

23. Transport

Methodological notes

The branch of transport includes entrepreneurial subjects providing services in the fields of public and non-public transport.

Public transport includes enterprises with transport as prevailing activity carrying out the inland or international transport of goods and passengers including supporting and auxiliary activities in the transport for external needs (excluding travel agencies).

Data on public transport are for all incorporated transport enterprises and tradesmen enrolled in Tradesmen Register.

Road transport of goods includes transport of goods by all freight means of transport registered in Register of vehicles in the Slovak Republic, realizing for hire or reward and own account. Transport activity for own account includes the transport of goods for own production. Transport activity for hire or reward account is paid transport service according to the legal relationship based on the agreement between transport operator and natural or legal persons whom the transport of goods, another things will be realized for payment.

Transport of goods given in tons and performances given in ton-kilometres are surveyed according to the Classification of Goods in Transport NST/R which contains 24 commodity groups.

Roads and motorways are divided for roads I., II. and III. class and motorways.

Local communications include data for local roads for class I. to IV. and they are surveyed once within five years.

City transport is ensured by the branches of the city transport companies in Bratislava, Košice, Prešov and Žilina. In other towns of the Slovak Republic the city transport is carried out by companies of the road passenger transport.

Inland waterway transport and air transport is presented since 2002 and railway transport since 2004 for all enterprises performing air transport regardless their prevailing activity given in the Business Register.

Definitions

Receipts for freight and passenger transport without VAT at current prices express revenues for provided services in transport for enterprises and tradesmen with transport as main activity.

Roads and motorways are connected line structure serving for transport connection between residence units and centres of inland or international value. Cross-roads, resting places, bridges and tunnels are included.

Local communications include all accessible and used streets, roads and public places excluded from roads and motorways network lying in built-up municipal areas or in areas intended to be built-up.

Other land transport includes road transport, taxi and the city transport.

Transport of goods expresses real mass of transported goods (load) realized by means of particular kind of transport by the transit line. They are surveyed according to the commodity groups.

Performances in ton-kilometres present value of total transported performances in ton-kilometres carried out by freight transport means of particular kind of transport. They are calculated (tons x kilometres) for every journey individually.

Net ton-kilometres in railway transport express a net transport performances of locomotives by actually covered distance.

Gross ton-kilometres of traction in railway transport represent product of gross weight of train and train-kilometres in goods resp. passengers transport.

Loading expresses a mass of loaded goods intended for inland transport or exports. Loading as activity is the beginning of transport process realized by the agreement.

Average static load in railway transport is a ratio of loading in tons and number of loaded train units.

Transported passengers present the total number of transported persons in inland or international transport.

Passenger-kilometres express the value of transport performances in passenger transport. One passenger-kilometre is equal to transport of one person per 1 kilometre distance.

Seat-kilometres express carriage capacity of city transport. This indicator is a product of vehicle driven kilometres and static vehicle capacity rate for every drive individually.

Source

All published data are the result of the statistical surveys of the Statistical Office of the SR, except data on the length of roads, number of motor vehicles, which are taken from the Ministry of Transport, Posts and Telecommunications of the SR and from the Ministry of Interior of the SR.

More information can be obtained in Yearbook of Transport, Posts and Telecommunications and in Yearbook of Transport and Environment.

24. Posts, Telecommunications, Information Society

Methodological notes

The branch of posts and telecommunications includes incorporated enterprises providing post transport, financial services, ensured electronic communication, electronic communication network and services. Data are presented for state post, courier activity, telecommunication services in fixed and mobile telephone network, technical equipment within telecommunication and radiocommunication service.

The sectional survey about information and communication technology (ICT) includes all incorporated enterprises with 20 and more employees without regard to prevailing activity. The separate survey are realized in enterprises of banking and insurance. Information and communication technology data in households are surveyed through individual survey on ICT households.

Definitions

Post office is the independent postal establishment on determined place carrying out receiving and delivery service. Some post offices also provide clearing service.

Post Partner is a contact point, in which an eligible person is allowed to pick up a postal item based on agreement with provider of mandatory postal services.

Dispatched letter items are all kinds of items containing paper documents or tiny objects sent by post offices or by mail boxes.

Deposits of financial services include deposits sent by post cheques (cash or direct), international cheques, deposits for the Post Bank, telecommunication remittances, coupons and others.

Withdrawals of financial services express the number of paid inland and international post cheques, withdrawals for the Post Bank, withdrawals of pensions as well lottery prizes.

Main telephone lines are subscriber lines as a set of technical facilities for the public telephone services access network in both fixed network and exchange termination of the relevant service nodes.

Mobile telephones are lines of public radiotelephone network (NMT – Nordic Mobile

Telephone, GSM – Global System of Mobile Communication), which call number is registered in the organizations which operate public radiotelephone network NMT, GSM.

Digital exchanges are devices with electronic structural members, digital changing of signals and automatic controlled connecting processes.

Internet is a complex computer network enabling communication between the public and private networks on different types of communication media and different technical platforms.

Intranet is internal company communications network using Internet protocol allowing communications within an organisations.

E-mail is electronic transmission of messages, including text and attachments, from one computer to another located within or outside of the organisation.

Web-side is location on the World Wide Web identified by a Web address.

Source

All published data are the result of the statistical surveys of the Statistical Office of the SR, except performance data on posts and telecommunications, which are taken from the Ministry of Transport, Posts and Telecommunications of the SR.

More information can be obtained in Yearbook of Transport, Posts and Telecommunications and in annual publication on ICT.

25. Real Estate, Renting, Business Activities and other Services

Methodological notes

Area of real estate, renting, business activities and other services covers those entrepreneurial entities that provide paid services to enterprises and the population mainly in the field of real property, renting of machines and devices, computer and related services, other business services (such as legal, tax and account consultancy, architectural design and engineering, technical testing and analyses, advertising, labour recruitment, searching and safeguarding services, waste treatment and other various business services), adult education, waste disposal, recreation, cultural and sport activities and other public and personal services (such as laundry and dry-cleaning, hairstyling and cosmetic care, funeral services, body relaxation activities and other services prevailing of personal character).

Data on real estate, renting, business activities and other services includes data for legal persons and data for natural persons.

Turnover for real estate, renting, business activities and other services are surveyed without VAT and are divided according to the Statistical Branch Classification of Economic Activities. The number of enterprises includes only legal persons.

Definitions

Turnover for real estate, renting, business activities and other services express the value of receipts from selling of goods, own products and services realised in the reference period and specified for inland and foreign customers. The indicator includes receipts of enterprise from its all entrepreneurial activities.

Source

All published data are the result of the statistical surveys carry out by the SO SR.

More information can be obtained in quarterly publication Basic Indicators for Selected Market Services.

26. Tourism

Methodological notes

The activities of accommodation facilities, tourism and foreign tourism are surveyed within the framework of tourism.

Foreign visitors accommodated in the tourism facilities are surveyed by the country of residence.

Data on accommodation and tourist services have been obtained from statistical units entered in the Business Register and from natural persons entered in the Tradesmen Register.

Names of the countries are used according to the ISO standard No 3166.

Definitions

Accommodation facilities of tourism are those which provide temporary accommodation for visitors regularly or occasionally. They include hotels, boatels, motels, inns with accommodation services, tourist hostels, chalet camps, camping sites, other collective accommodations and accommodation in private. Only complete cottage colonies and camping sites are considered as accommodation facility but individual chalets, cabins or tents of provider are not.

Beds in accommodation facilities of tourism include all beds determined for overnight lodging of visitors including occasional beds. The beds intended for the owner and for staff of accommodation facility are excluded.

Places on free area are basic camp units for tents, tent and passenger car, caravan, motor caravan multiplied by 4. Four people can be accommodated per one camp unit.

A visitor in accommodation facility of tourism is a person (except staff and owner) using services of temporary accommodation facility regardless of country of permanent residence. Children are also included in the number of visitors. The visitor uses accommodation services for the reason of holiday, business trip, participation in sport events, training, courses, symposium, stay in spa and convalescent centres, visit of friends or relatives, participation in church events, etc. There is also included accommodation of children in out-door schooling and in summer and winter holiday camps for children. Domestic and foreign employees working in

Slovakia who use the accommodation facility temporarily as a hostel are not considered to be visitors. The period of temporary accommodation should not exceed 1 year.

Receipts for accommodation services include the receipts with value added tax obtained from overnight stays of visitors (domestic and foreign), receipts from setting of the tent, motor vehicle or caravan, connecting to electric network, etc., (regardless of the way of the payments for accommodation). Receipts from services relating to accommodation (e. g. washing and cleaning of laundry, using of bathroom, etc.) are also included. Receipts from services of personal character e. g. cosmetics, hairdresser's, manicure and chiropody services are excluded.

Foreign visitor accommodated in an accommodation facility is a person who visits the country and is not the resident of the country. Children are also included in the number of visitors. Foreign visitor can use accommodation services for the reason of holiday, business trip, participation in sport events, training, courses, symposium, stay in spa and convalescent centres, visit of friends or relatives, participation in church events, etc. Exceptions are those people who are coming to do a job, to prepare themselves for a profession (a long-term study) or to become a resident of the country. Members of diplomatic corps and armed forces being on duty in the country are also excluded.

Participant in the active tourism is foreign visitor using services of tourism during travelling in the Slovak Republic and he is not the resident of the Slovak Republic.

Participant in the passive tourism is the Slovak citizen using services of tourism during travelling abroad.

Participant in the active or passive foreign tourism is a person travelling for the reason of holiday, business trip, participation in sport events, training, courses, symposium, stay in spa and convalescent centres, visit of friends or relatives, participation in church events, etc. Exceptions are those people who are coming to do a job, to prepare themselves for a profession (a long-term study) or to become a resident of the country. Members of diplomatic corps and armed forces being on duty in the country are also excluded. A temporary stay of participant in the active or passive foreign tourism must not be longer than 1 year.

Arrivals of foreign visitors into the SR include numbers of all arrivals of foreign visitors who entered the Slovak Republic for any reason.

Travels abroad of the Slovak citizens include numbers of all travels abroad of the Slovak citizens for any reason.

Source

All published data are the result of the statistical surveys of the SO SR excluding data on arrivals of foreign visitors to Slovakia and on travel abroad of Slovak citizens by the sections of borders and airports which are processed from the statistical information received from the border crossing points and airports of the Slovak Republic and granted by the Department of Border and Alien Police of the Presidium of Police of the SR.

More information can be obtained from quarterly publications Basic Indicators of Tourism of the SR for Accommodation Facilities; Foreign Tourism and in annual publication Organized Tourism of the SR.

27. Environment

Methodological notes

In total number of protected territories are included all categories of protected territories of a nature and of a landscape: protected landscape areas, national parks, natural reserves, national natural reserves, natural monuments, national natural monuments and protected areas.

Some protected territories from categories natural reserve, national natural reserve, natural monument, national natural monument and protected area are also located in the area of protected landscape areas or national parks, therefore their area is included into the area of these categories, too.

Penalties for air pollution as well as in the sector of water management, waste management and nature protection are imposed on legal entities for breaking their duties provided by the relevant laws and administrative orders.

Environmental costs are financial resources spent in period under consideration on the erecting, purchase or provision of long time intangible and tangible assets, used on protection of environment (i.e. protection of the air, waters, land and other factors of environment) as well as on the costs connected with this assets operation.

Intensity of immission load in interaction with ecological factors is expressed by zones of endangered forests – categories A, B, C, D:

Zone A comprises areas with a strong long-term load in the localities exposed to intensive air streams from immission sources (local and from long-distance pollutant transport).

Zone B includes areas under the same immission conditions as Zone A but under better ecological conditions in the localities partially protected against direct air streams from immission sources.

Zone C comprises areas under more favourable ecological conditions with a lower immission load.

Zone D are protected fluvial areas of various altitudes with a low immission load and low level of air pollution.

Endangered zones are those parts of forest ecosystems where intensity of load together with ecological conditions and climatic factors causes their dynamic damages. Attributes of

these zones are the level of immission load and longevity of stands of a specific species composition derived from the model for mature spruce stands.

Degrees of damage to stands are derived from the state of stands and are based on the evaluation of defoliation and depigmentation of trees. A qualification scale of the international health monitoring is applied:

- 0 – Healthy trees, damage (0 – 10 %)
- 1 – Slightly damaged trees (10.1 – 25.0 %)
- 2 – Medium damaged trees (25.1 – 60.0 %)
- 3 – Heavily damaged trees (60.1 – 90.0 %)
- 4 – Dying and dead trees (90.1 – 100 %)

Abiotic injurious factors (drought, wind, snow) are important from the point of view of volume of salvage felling. Together with immissions produce conditions for further activation of biotic factors.

The most important biotic injurious factors are insect, vertebrate animals (mainly game animals) and fungal diseases.

Categorization of game to commercial and predacious animals is from practical point of view relative and is important mainly from economic standpoint. For this reason a notion of “predacious animals” started to be used under which belong individual game species (predators) that cause damage to commercial game (it is a component of the food chain). Division of game into furred and feathered one is a species division and is of biological importance.

Data on xenobiotics in foodstuff were received from records on individual cases during the reference year.

As a limit is defined the highest acceptable amount of xenobiotics in the given foodstuff; is determined by the Bulletin of the Ministry of Health of the Slovak Republic, Part 9 to 13, of July 15, 1996.

Values presented as average represent an average content of xenobiotics in concerning foodstuff calculated from individual contents.

Data on waste originating in the territory of the Slovak Republic are surveyed according to the Act No 223/2001 Code of Acts, by the Decree No 283/2001 Code of Acts and by the Decree No 284/2001 Code of Acts.

The separate table shows the amount of municipal waste and similar waste not treated by municipality and which was produced in activities of legal or natural persons entitled to enterprising in particular branches of the economy of the SR.

Data on emissions of major pollutants by economic activities cover pollution of air by injurants produced by industry, energetics, agriculture, transport, housing and municipal spheres. The quality of air depends on the level of emissions from individual sources of air pollution and is expressed as immissions monitored by individual monitoring stations.

Data on emissions for energetics and process combustion include data for emissions from process combustion and from stationary units for fuel combustion with thermal output of 0.2 to 5 MW which are the part of technological units.

Local heating facilities also include central heating with the output up to 0.2 MW.

Emissions from industrial technological processes are the sum of emissions from relevant technological processes and emissions from combustion processes which are the part of the source (boiler house).

Levels of emissions and specific emissions in selected districts with largest specific emissions are only for stationary sources of pollution.

Levels of immissions in selected localities are assessed on the basis of a continual measurement done at individual monitoring stations.

Data on regional air pollution are presented for the four monitoring stations (Chopok, Liesek, Stará Lesná, Starina), which are the part of the European monitoring network EMEP.

Levels of surface ozone in selected monitoring station are assessed on the basis of the eight-hour concentration (time of measurement is from 9 a. m. to 5 p. m.). The target value for the protection of human health is $120 \mu\text{g}/\text{m}^3$.

Regional pollution of precipitation informs on acidity and chemical composition of precipitation obtained from regional monitoring stations and from city station in Bratislava.

Water-supply systems and sewage include waterworks activities related to the administration and operation of water-supply and sewage systems, i. e. production and supplies of drinking water and drainage of sewage water and its purification.

Length of dikes protecting against flooding is measured in the axis of a dike and on each bank separately. Length of artificial canals and intakes includes also canals and intakes kept in covered profiles.

Values of individual pollutants drained off into the water courses are presented for the water plants and sewage companies as well as for the river-basin companies.

Values of the water pollution are shown for producers monitored by the water plants and sewage companies as well as river-basin ones.

Categorization into individual quality categories by five groups of indicators is done by the STN 75 7221 Classification of the Surface Water Quality.

A set of indicators – oxygen balance

B set of indicators – basic physical and chemical indicators

C set of indicators – nutrients

D set of indicators – biological indicators

E set of indicators – microbiological indicators

Surface water by water quality is categorized into the following 5 categories:

Category 1 – very pure water

Category 2 – pure water

Category 3 – polluted water

Category 4 – heavily polluted water

Category 5 – very heavily polluted water

Definition

Protected territory is geographically defined territory determined or controlled and administrated for the purpose to reach the specific aims of protection.

Current cost is the sum of internal and external environmental costs, recoverable by other subject.

Hunting ground is continual hunting land up to 500 ha at least.

Xenobiotics in foodstuff are those that are not a natural component of foodstuffs and they are not characteristic for the given kind of foodstuff or their amount can have a negative impact on the human health.

Waste is an article, its owner wants to get rid of or things, which must be removed from the point of view of care on proper living conditions and protection of environment.

Municipal waste is the waste originating in municipalities and is treated further by the municipality. Households waste and waste produced in activities of municipality, legal entities, transport, recreation and sport are included.

Mobile sources of air pollution are the road, railway, water and air transport equipment with explosion engine or other driving engines.

Stationary sources of air pollution are all the other sources emitting pollutants.

PM10 are dust particles with aerodynamic diameter of beads less than 10 µm.

Regional air pollution is a pollution of the atmosphere boundary layer in the countryside sufficiently far from the local industrial and urban sources. Injurants in this layer of the atmosphere are getting involved into the global circulation.

Dam is an inflating construction damming up the river-bed or, exceptionally, valley that serves for formation of a reservoir to get a permanent or temporary inflation of the water for various waterworks purposes.

Water reservoirs are these from which water offtake for public water supply is realized.

Controllable volume of water reservoirs is a total controllable capacity of reservoirs where it is possible, regardless of tributaries to the reservoir, to accumulate and to empty the water as necessary.

Retentive volume of water reservoirs is a controllable protective capacity of the reservoir.

Reserve volume of water reservoirs is a part of the total reservoir capacity that serves for improving flow and for securing water taking in drought areas.

Area of territory endangered by floods includes the area that is endangered by the high water. High water is 10 years old water (Q 10) and 100 years old water (Q 100). We give approximate figures.

Area of the territory protected against floods includes the area that would be flooded because of higher flows of the water in water-courses in case that the retentive capacities of reservoirs, adjustments to water courses or preventive dikes were not built.

Production of drinking water includes total amount of drinking water produced in water-supply stations themselves under the administration of companies of water plants and sewage and municipalities after adding an amount of drinking water taken from other waterworks organizations or from other water suppliers (legal persons) and after subtracting an amount of drinking water delivered free of charge to waterworks organizations (e. g. among units of water plants and sewage companies).

Invoiced water includes the amount of drinking water sold to direct customers.

Non-invoiced water includes losses of the water in the pipe network, own water consumption or possible free water supplies, e. g. for fire protection purposes.

Sewage disposal plants are facilities purifying sewage water, applying mechanical and biological way of purification or the so-called third stage of purification applying mechanical and biological additional purification. Sewage disposal plants do not include facilities for rough pre-purification of sewage (sand-traps, oil-traps, etc.), septic tanks, cesspools and simple facilities that are not observed and served regularly.

Suspended solid pollutants are substances determined by water filtration and dehydration of the rest (on filter) at 105 °C to constant weight.

Oil pollutants are the substances extracted from water excluding polar substances that can be separated from the extract by a standard way.

Biochemical oxygen demand (BOD) is the volume of oxygen consumed in aerobic biochemical decomposition process of organic compounds present in the water for the period of 5 days at standard conditions.

Chemical oxygen demand (COD) is a consumption of oxygen (O₂) by dichromate method.

Source

Data on protected territories and national parks are provided by the Ministry of Environment of the SR. Data on hunting ground, hunting and spring stock of game are taken from materials of the Ministry of Agriculture of the SR. Further information can be obtained in these organizations.

Data on municipal waste and environmental costs are the results of the statistical survey of the SO SR. Data on waste in the economy of the SR are taken from administrative sources of the Ministry of Environment of the SR. More information can be obtained in the publication Waste in the Slovak Republic and Environment in the Slovak Republic.

All data on air quality are taken from the Slovak Hydrometeorological Institute, where further information is available.

Data on water management are obtained from the surveys carried out by the Statistical Office of the SR and data on water quality are taken from the Slovak Hydrometeorological Institute and from the State Health Institute.

More information can be obtained in the publication Water Management and in the organizations mentioned above.

28. Science and Technology

Methodological notes

Research and development (R&D) surveys are realized by legal and natural persons in which research and development is their prevailing activity, as well as legal and natural persons whose prevailing activity is different from research and development, but their R&D potential calculated to the full time equivalent (FTE) is equal at least to one man/year.

R&D activities include basic research, applied research and experimental development.

Methodology and content of R&D statistics is comparable with international statistics of the European Union.

Licence statistics includes licence contracts between an inland and a foreign partner, content of which is the intellectual property. Licence surveys are carried out in all enterprises with 20 and more employees, which have valid licence contract with a foreign organization during the whole period of validity of the licence contract till year, when the validity of the last licence is expired.

Data are presented for licence contracts made in the current year, as well as for all licences that were in force in the given period.

Industrial legal protection statistics contains patents, utility models, designs and trademarks.

Statistical survey on certification includes certified products and certified quality management systems. Reporting units are the corporations with 20 and more employees with annual receipts for turnover 100 millions SKK and more, with prevailing activity in the industry and in the branches of services.

The data are presented for the new products introduced and certified in the current year and for new organizational parts of the reporting unit that obtained a certificate for their quality management system by the ISO 9000 standards in the current year, as well as for certificates granted in the past years which were valid in the given year.

Surveys methodology about innovation in the SR is harmonized with EU countries. The surveys was a sample surveys in enterprises with 10 and more employees in industry and selected services. Selective sample included approximately one third from total number of enterprises in the given branches and size classes of enterprises.

Data are presented in the prices and by methodology of the current year.

Definitions

The number of R&D employees includes only persons employed directly in the field of research and development as well as persons providing direct services to research and development. Total number of R&D employees includes also pedagogical staff at higher education institutions who within the framework of their work to a certain extent participate in research and development.

Category of “researchers” comprises employees essentially important to the creation and use of the scientific knowledge.

Technicians and equivalent personnel includes employees participating in research projects by performing scientific and technical tasks usually under the supervision of researchers.

Supporting staff includes qualified and non-qualified workers, secretaries and other employees participating in the work on R&D projects. Further there are included other managers and administrative workers dealing with personnel and financial matters whose activities are qualified as a direct service supporting research.

Expenditures on research and development comprise total amount of expenditures spent in an organization on R&D activities, i. e. they are internal expenditures. Expenditures spent out of the organization include only those serving for support to the internal research and development (for instance purchase of equipment for R&D institutions). Depreciation of buildings, machines and equipment is excluded from statistical observation of internal expenditures on R&D.

Current expenditures comprise costs of own activities of organizations and workplaces for research and development and costs for tasks solved by the own capacity of an organization and a workplace. (It is a sum of operational and financial costs related to R&D activities).

Licence is a contract between a domestic organization and a foreign partner for the acquisition (purchase) or provision (sale) of the right to the use of: an invention under copyright, industrial design, a trademark of an original owner and know-how. Licences are divided from the point of view of their purchase or sale into:

a) Passive licence is a licence bought from abroad, on the basis of which domestic organizations produce or use it.

b) Active licence is a licence sold abroad.

According to the Act No 527/1990 Code patents shall be granted for inventions which are new, involve an inventive step and are susceptible of industrial application.

It is possible to protect as utility models technical solutions which are new, exceed the framework of the mere professional ability and are susceptible of industrial application but do not comply with the strict terms for the granting of a patent. Contrary to the protection by a patent, neither process or production nor biological reproductive matter shall be protected by a utility model.

External appearance, which shall be new and susceptible of industrial application is considered as a design. The external appearance shall comply with these conditions: it shall be two- or three-dimensional and have the unique features in particular of its shape, contour, design, colour arrangement or combination thereof.

Trademark shall be denomination consisted of the words including personal names, letters, numbers, designs, product's shape or its packing or combination thereof as well as colour combinations, which are capable of distinguishing goods and services of different entrepreneurs and which have been registered in the trademarks register.

Classification of inventions by subject is based on the international patent classification.

Certified products are the products with a valid certificate issued either by an accreditation place on the basis of the Act No 264/1999 Code of Acts on Technical requirements for products and on appraisal agreement and on change and amendment some acts or by a foreign organization. A certificate verifies that the properties of a certified product are in conformity with the relevant standards, technical documents or laws.

Certified quality management system is a system of quality provision of a proposal, development, production, assembly, installation and service in a productive organizational component of a reporting unit. This system was certified by a Slovak certification body or a foreign organization.

Innovation is a new or significantly improved product (good, service) introduced to the market or introduction of a new or significantly improved process within an enterprise. Innovations are based on the results of new technological developments, new combinations of existing technology or the utilization of other knowledge acquired by the enterprise. Innovations may be developed by the innovating enterprise or by another enterprise; however purely selling innovation wholly produced and developed by other enterprises is not included as an innovation activity. Innovations should be new to the enterprise concerned; for product innovations they

do not necessarily have to be new to the market and for process innovations the enterprise does not necessarily have to be the first to have introduced the process.

Product innovation was realized when a product (good, service) which is new or significantly improved with respect to their fundamental characteristics, technical specifications, incorporated software or other immaterial components, intended uses or user friendliness. Changes of a solely aesthetic nature and pure sale of product innovations wholly produced and developed by other enterprises are not included.

Process innovation includes new or significantly improved production technologies or new and significantly improved methods of supplying services and delivering products. The outcome of such innovations should be significant with respect to the level of output, quality of products (good or service) or costs of production and distribution. Purely organizational or managerial changes are not included.

Enterprises with innovation activity are enterprises that have had any kind of innovation activity during the surveyed period, i. e. have introduced new products or processes or have had on-going or abandoned innovation activity.

Successful innovators introduced product innovation or process innovation.

Source

Published data on R&D, licences, certified products, certified quality management systems and on innovations are the result of the statistical survey of the SO SR. Data on industrial legal protection are kept by the Statistical Office of the SR from the informational system of the Industrial Property Office of the SR.

More information can be obtained from annual publications Yearbook of Science and Technology and from monothematic publication Innovation activity in industry and in selected services in the Slovak Republic.

29. Crime-rate and Justice

Methodological notes

Data on criminality are surveyed in the framework of the Registration Statistical System of Criminality. There are registered announcements on a suspicion from commission of crimes, data on crimes and data on known perpetrators of criminal acts.

The statistical tables also contain the data registered by the Railway Police of the SR, the Office of Military Police of the General Staff of the Army of the Slovak Republic and the General Directorate of Union for Prison and Justice Guards of the SR. Data about agenda flow and results of judgement are taken from department of the Ministry of Justice of the SR.

Definitions

Criminal offence is for society danger act, of which characters is presented in Criminal Act.

Homicide is a criminal offence by which perpetrator knowingly death by another person.

Robbery is a criminal offence of perpetrator when he takes possession of the things owned by another person under the threat of immediate violence.

Battery is a criminal offence of perpetrator when he causes damage the health to another person with consequence of disability to work of this person in duration at least 7 days.

Violence criminality includes violence criminal offences: homicide, robbery, battery, blackmail, common coerce, burglary etc.

Moral criminality includes criminal offences relating to the laws on morality breaking: rape, sexual abuse, imperiling of morality, procuring, etc.

Economic criminality is specific kind of criminality causing economic damages to the country, to legal and natural persons by breaking the enactments of economic relations.

Cases mean an indication of cases registered in particular register and being on the agenda at the courts. One case can involve more persons.

Criminal cases are cases being on the agenda at the courts on the basis of suit ceded to the courts by the prosecutor's office, within which the decisions on guilt, punishment, protective measures and compensation of damages caused by criminal activity are made.

Fill is total number of criminal cases that entered the courts during the calendar year, even-

tually cases registered in particular register as a consequence of application of revisions. In civil cases and in care for minor children, fill represents the number of proposals recommended to the court to be dealt with and the courts register them into a particular register.

Defendant is a person against whom a legal action was brought to the court.

Settled is total number of cases completed in the course of the calendar year by legal decision on conviction, acquittal, abolition of the criminal prosecution or conveying to another body.

Unsettled is number of cases that were not completed legally for some reason in the course of the calendar year. These data are always referring to December 31, of given year.

The main part of civil cases consists of cases regulated by the Civil Code, Law on Family, Law on Land and Labour Code.

Sued person is a person sued for committing particular criminal offence, if particular bodies started criminal charge. Accompanying the term "sued for committing a serious criminal offence" there is used the term "detaining", which is directed in written by a judge on submission of prosecutor.

Convict is a person on whom a sentence was passed that came into force.

Sentence without suspension is sentence to imprisonment in penitentiary institutions administered by the Ministry of Justice of the SR.

Suspended sentence is sentence to imprisonment that is suspended for 1 to 5 year's probation.

Banned profession is forbidden to operate in certain occupations, professions, functions or activities. The duration of this sentence is limited to the period of 1 to 10 years. The sentence can be passed on convicted juveniles only in case if it does not prevent them from the preparation for their future profession.

Habitual offender is person on whom the sentence was passed by the court taking into account his/her previous conviction as an exacerbating circumstance.

In addition to the duration of sentence to imprisonment without suspension according to the seriousness of the committed crime, the court imposes also the reformatory and reclamation group into groups 1st till 3rd to convicts while serving their sentences. It is executed that the higher is the rank of the reformatory and reclamation group the smaller is the extent of rights of convicts and the larger is the extent of limitations.

Source

Statistical data source on criminality are administrative data of the Ministry of Interior of the SR. Data on justice are taken from basic materials of the Ministry of Justice of the SR.

More information is given in annual publication Selected Indicators on Criminality, Road Traffic Accidents and Fires or in above mentioned ministries.

30. Accidents and Natural Disasters

Methodological notes

Killed persons are persons who died in the place of accident or in the place of fire, when being transported to hospital or by 24 hours after the accident.

Material loss is level of arose loss set by the police on the basis of the values indicated by parties involved in the accident.

Direct material loss is sum of losses calculated from residual value of tangible fixed assets, materials and other means destroyed by the fire, estimated.

Rescued valuables are sum of values of tangible fixed assets and other valuables rescued from fire.

Evacuees persons (animals) presents the number of persons (animals) evacuated before flood yet, resp. tightly before flood from area, where expects expansion of the flood.

Rescue persons (animals) presents the number of persons (animals), which as a consequence of flood get to the immediate danger at the area, where are processing the flood.

Source

Source of statistical data on traffic accidents and fires is the Ministry of Interior of the SR, the Office of Fire Prevention, Presidium of Fire and Rescue Corps and his section the Institute of Fire Technics and Expertises.

More information can be found in publication Selected Indicators on Criminality and Fires, on the Ministry of Interior of the SR, resp. on the Presidium of Fire and Rescue Corps.

31. International Surveys

Methodological notes

The data are either taken from the sources below or are calculated by the Statistical Office of the Slovak Republic from the data reported in the sources. Some data on the Slovak Republic have been obtained from the sources of the Statistical Office of the Slovak Republic. They are processed by the national methodology, therefore the data are not fully comparable with data of other countries.

Starting from the year 2004, Statistical Office of the Slovak Republic provides its users selected indicators in which uniform methodology of compilation for international comparisons is ensured. Included among them are especially structural indicators compiled by Eurostat from national statistics.

Source of data is mentioned below the tables.

Names of countries are given in abbreviated widely used forms that are not always in compliance with official full names of the countries.

Data for 2004 are, in most cases, preliminary.

Definitions

Life expectancy is defined as the average number of years of life remaining to persons, if subject to mortality conditions of the year indicated.

Employment rate expresses a share employed persons aged 15 – 64 from the total population of the same age group.

Employment rate of older workers is employed persons aged 15 – 64 as share of the total population of the same age group.

Long-term unemployment rate is defined as the duration of unemployment during 12 months and more.

Youth education attainment level expresses the share of the young people aged 20 – 24 having completed at least upper secondary education from the total population of the same age group.

Unemployment rate is present by the labour force sample survey (methodology of the International Labour Organization, ILO).

The volume index of gross domestic product per capita in Purchasing power standards is expressed in relation to the European Union average set to equal 100 (EU 25 = 100).

Total emissions of 6 greenhouse gases listed in the Kyoto Protocol converted into an aggregate value using CO₂ equivalents and expressed by means of indices as a percentage change since the base year of 1990 (i.e. index 1990 = 100). The indicator is compiled to monitor the fulfilment of the targets to reduce the emissions according to the Kyoto Protocol and the Council Decision for the years 2008 to 2012.

The indicator energy intensity of the economy is the ratio between the gross inland consumption of energy and the gross domestic product for a given calendar year. It measures the energy consumption of an economy and its overall energy efficiency. The GDP figures are taken at constant prices to avoid the impact of the inflation, with base period 1995 (ESA 95).

Comparative price levels are the ratio between Purchasing power parities and market exchange rate for each country. The ratio is shown in relation to the EU average (EU 25 = 100). If the index of the comparative price levels shown for a country is higher (lower) than 100, the country concerned is relatively “expensive” (“cheap”) as compared with the EU average.

32. Elections to the Bodies of Self-government Regions

Methodological notes

The legal base for the elections to the bodies of self-government regions is the Act No 303/2001 Code of Acts on Elections to the Bodies of Self-government Regions and the amending of the Civil Procedure Code from July 4, 2001. Elections were declared by the Chairman of the National Council of the Slovak Republic by the Decree No 235 from June 3, 2005. Elections were held on Saturday November 26, 2005. On the basis of the results of elections held in November 26, 2005 the Chairman of the National Council of the SR declared 2nd turn of the elections in December 10, 2005.

According to the Act on Elections to the Bodies of Self-government Regions the Statistical Office of the Slovak Republic is responsible for issuing the methodology of processing elections results and the processing of elections results.

Next abbreviations for the names of political parties and political movements are used in published results:

Abbreviations	Name of political party or movement
ANO	Aliancia nového občana
DS	Demokratická strana
HZD	Hnutie za demokraciu

Definitions

Number of registered entitled voters is the total number of persons, who can vote to the bodies of self-government regions according to the act. They are citizens of the Slovak Republic and foreigners who has permanent residence in a municipality belonging to the area of self-government region or who has permanent residence in military districts, which belong to the area of self-government region for purpose of elections and they are at least 18 years old on polling day.

Number of voters with distributed envelopes is the total number of voters, who in the day of elections came into the corresponding polling station and whom were given envelopes and ballots by the ward election committee.

33. Elections to the National Council of the Slovak Republic

Methodological notes

The legal base for the elections to the National Council of the Slovak Republic is the Act No 333/2004 Code of Acts on Elections to the National Council of the Slovak Republic in wording of latter rules. According to the section 55, subsection 2 of this act the Statistical Office of the Slovak Republic is responsible for issuing the methodology of results processing in the elections to the National Council of the Slovak Republic as well as the processing of elections results. Elections were declared by the Chairman of the National Council of the Slovak Republic by the Decree No 89/2006 of 15 February, 2006. Elections were held on 17 June, 2006.

Next abbreviations for the names of political parties are used in published results.

Abbreviations	Name of political party or movement
KDH	Kresťanskodemokratické hnutie
SMK-MKP	Strana maďarskej koalície – Magyar Koalíció Pártja
ĽS-HZDS	Ľudová strana – Hnutie za demokratické Slovensko
SDKÚ-DS	Slovenská demokratická a kresťanská únia – Demokratická strana
SMER	SMER – sociálna demokracia
SNS	Slovenská národná strana

Definitions

Registered voters are persons, who can vote to the National Council of the Slovak Republic according to the act. They are citizens of the Slovak Republic, they are at least 18 years old on polling day.

Number of voters who participated in voting (with distributed envelopes) is the total sum of voters who in the day of elections came into the polling station and whom were given envelopes and ballots by the ward election committee and number of voters who sent return envelopes from abroad.

Number of voters who sent return envelopes from abroad is the number of voters, who in

the time of elections kept outside the area of the Slovak Republic and in elections they voted from abroad.

Valid votes are all valid ballots delivered for political parties.

Share of valid votes is calculated from the number of valid votes for all political parties and the number of developed envelopes.

Share of valid votes for individual political party is calculated from the number of valid votes delivered for the corresponding political party and the total number of valid votes delivered for all political parties.

Number of mandates is the number of places in parliament, which were allocated to the corresponding political party at the base of valid votes number obtained in elections.
