GOVERNMENT OF GIBRALTAR

INTRODUCTION

This is the fifteenth annual Abstract of Statistics to be published. The Abstract is a well established and widely used source of major economic and social statistics on Gibraltar.

The object of the Abstract is to provide a selection of statistics, in one compact volume, on topics thought to be of current interest. The tables contain notes and definitions which should be read, particularly if the statistics are to be used and interpreted properly. Further information on these statistics may be obtained from the Economic Planning and Statistics Office on written application. Suggestions on future editions are welcome and will be considered.

It is hoped that the Abstract offers a useful feedback of the information which is collected and processed by the Economic Planning and Statistics Office.

Notes: (i) See Notes to Table 2.

(ii) The 1961 figures show a significantly greater number of females than males. This is due partly to an imbalance in the Gibraltarian population and partly to the counting of Service families but not Servicemen. These two factors still count in the later figures but have been outweighed by the increase in labour from overseas, which is predominantly male.

45	27.5	31.5
55	18.0	22.3
65	11.1	13.5
75	7.5	8.3

These figures are based on the average number of deaths for each age group over the years 1980 and 1981 and the estimated population by age group at 1 January 1981. Given the variability of the number of deaths from year to year the above life expectancy must not be taken as exact and constant figures over time. It is however reasonable to assume that the expectancy of life at birth for men is at least 70 and for women 75.

The above table is taken from the Gibraltar Census Report 1981 which provides more detailed information on Population, Manpower, Housing and Traffic. Copies of the Census Report can be obtained from Government Secretariat, priced £4.

Notes: (i) The table is based upon the Index of Retail Prices using a yearly average index figure for each year. The estimated purchasing power of the pound has been calculated for each of the years taking the value as £1.00 in each year in turn. The figures given in the rows of the table can be used to express changes in a slightly different way. For example using the 1980 row a £1.00 could purchase what it required 59p to purchase in 1976, or using the 1976 row, it required £1.71 in 1980, to purchase what a pound could purchase in 1976.

(ii) The table applies to purchases in Gibraltar only.
