Southern Sudan Centre for Census Statistics and Evaluation

Statistical Yearbook for Southern Sudan 2009

Southern Sudan Centre for Census Statistics and Evaluation

This Statistical Yearbook was produced by the Southern Sudan Centre for Census Statistics and Evaluation in collaboration with various data providers including GOSS Ministries and agencies whose cooperation we greatly appreciate. The source for all information is attributed in the Yearbook; readers are encouraged to contact us for any assistance required.

Responsibility for the authenticity of the data lies with the source organization.

We appreciate the support of UNDP in facilitating the publication of this document.

7 GOSS Budget Outturns and Budget Estimates (Block Transfers to the States)	89
8 Average Value of Donor Projects	90
9 Projected Funding by Sector by 2009	91
10 GOSS Oil Revenue	92
11 Total Revenue from Oil Exports	92

Chairperson's Foreword

It gives me great pleasure to present to you the Statistical Yearbook 2009, the first such official publication in Southern Sudan.

The Southern Sudan Centre for Census Statistics and Evaluation (SSCCSE) was established in 2004 with a mandate as the official statistical agency of the Government of Southern Sudan. In particular, under the provisions of the CPA and the Interim Constitution of Southern Sudan, it was assigned responsibility for conducting the 5th Sudan Population and Housing Census in 2008. The 5th SPHC has been the single most important statistical activity in Southern Sudan because it is a benchmark in the transition period and provides critical inputs for implementation of the CPA. Besides, it has provided a sampling frame for the Centre's future surveys enabling sophisticated sample surveys to be carried out in the future with scientific precision.

However, the Centre's mandate extends much beyond the implementation and analysis of the Census to the collection and compilation, analysis and dissemination of statistics on a broad range of subjects. In this regard, the Centre has already embarked on an ambitious programme to produce extensive economic and socio-demographic data. It has held two major national sample surveys – the Sudan Household Health Survey (2006) and the National Baseline Household Survey (2009) – the latter based on the sampling frame from the Census and focusing especially on estimation of poverty incidence and monitoring some of the Millennium Development Goals.

This Statistical Yearbook attempts to bring together the available information on different aspects of Southern Sudanese development. Apart from compiling statistics collected in primary data-gathering activities of the Centre, it also draws heavily on information provided by other producers of statistics including other GOSS institutions and UN agencies; it is our first attempt at drawing on the reservoir of information available with other partners and presenting it in an accessible and easily understandable reference. I would like to thank the many contributing agencies for their unhesitating support in this endeavour.

Being the first publication of its type in Southern Sudan, the Yearbook 2009 includes also information collected in previous years and covers information from 2005 onwards i.e. the post-CPA period, as this information has not previously been presented in a single reference book. The Yearbook is envisaged to be an important source of social, economic and demographic data/information for the Southern Sudan statistical system; and successive yearly issues will provide updates on key findings resulting from the Centre's most recent work involving surveys, censuses and administrative data sources from

other statistical producers in Southern Sudan. In particular, I would like to encourage all agencies collecting comprehensive information in their area of work to share it with us so that we can assist them in reaching the broadest audience possible.

We have also tried to provide here a brief introduction to the Centre's administrative structure and functions to familiarize users and partners with our organization. We endeavour to be a helpful and approachable organization which can both assist in providing information and in designing appropriate methods to collect such information where unavailable. We also look forward to collaborating on a range of activities with partners and encourage you to contact us for any assistance that we may be able to provide.

Finally I would like to thank the many development partners who have assisted SSCCSE in fulfilling its mandate towards Southern Sudan through much assistance – financial, logistical and technical – and also our staff members for their untiring efforts without which it would not have been possible to successfully complete any of our major activities.

I sincerely hope that this publication will be of use to all those who wish to know about Southern Sudan; we will, as always, appreciate any comments aimed at improving the quality of this and future issues of the Statistical Yearbook.

Isaiah Chol Aruai

The Southern Sudan Centre for Census Statistics and Evaluation

Functions and Organization

Introduction

The origins of the Southern Sudan Centre for Census Statistics and Evaluation (SSCCSE) date back to 1995 when it served as a Database and Monitoring Unit under the Sudan Relief and Rehabilitation Association (SRRA).

In 2005, following the signing of the Comprehensive Peace Agreement (CPA) and the promulgation of the Southern Sudan Interim Constitution, the Centre was legalised and has since assumed the roles specified in the SSCCSE Act, 2004.

The same Act defines the governing bodies, the guiding principles, goals, objectives and functions of the Centre.

The Management of the Centre is under the direct responsibility of the **Chairperson** as Chief Executive. The chairperson is assisted in his/her day to day management responsibilities and duties by the **Deputy Chairperson**.

The **Deputy Chairperson** is responsible for the day to day implementation of the decisions of the Board and supervision of staff.

The Guiding Principles.

The Centre has some guiding principles including:

- Impartiality
- Fulfillment of citizens' entitlement to public information.
- Decisions made strictly on professional considerations, scientific principles and professional ethics regarding the methods and procedures for collection, processing, storage and dissemination of statistical data
- Choice of the right sources of statistical data drawn from various sources such as surveys or administrative records on the basis of quality, timeliness, costs and the burden on respondents.
- Ensuring that individual data collected for statistical compilation shall be strictly confidential and used exclusively for statistical purposes
- Adhering to the use of international statistical concepts, standards and methods so as to promote consistency and efficiency of the statistical system.

The Overall Goals and objectives of the Centre are to:

- Collect, compile, analyze and publish all official statistics on economic, social, demographic, environmental and general activities and conditions of the people of Southern Sudan
- Conduct all censuses and surveys that are carried out throughout Southern Sudan
- Monitor and evaluate social impacts of public policies, projects and programs
- Monitor the progress of poverty eradication and the attainment of the Millennium Development Goals, and

- Establish statistical standards and ensure adherence by all producers of statistics

The Specific Functions of the Centre

The functions of the Centre are spelt out in the Act, 2004 and are:

- Carry out Censuses and relevant surveys in the Southern Sudan
- Promote and develop integrated socio-economic statistics pertaining to Southern Sudan and each region thereof and co-ordinate plans for the integration of those statistics and keep these plans under review.
- Establish statistical standards and their use by all producers of statistics so as to facilitate integration and comparison.
- Co-ordinate statistics and data collection activities so as to avoid duplication, ensure economic use of resources and reduce the burden on respondents.
- Collect, compile, analyse and disseminate statistics and related information on social, economic, demographic and environmental activities.
- Maintain an inventory of available and relevant information in the Southern Sudan.
- Assist users of statistical information in obtaining international statistics and information.
- Provide statistical, monitoring and evaluation services and professional assistance to official bodies, civil society, researchers and international institutions and the public in general.
- Provide the contact point for international organizations and researchers in need of statistics and information on Southern Sudan.
- Act as a contact point for international organizations and foreign institutions in the need of statistics on matters relating to Southern Sudan.

Organization of the SSCCSE

To reflect the main goals and objectives of the Centre and to make sure that its work is carried out in a cost effective way, the SSCCSE has:

- An Organizational Chart
- A number of subject matter specialists to be recruited consistent with the Organizational Chart of the Centre.
- A data collection system for vital records, surveys and censuses, with the corresponding specialized functions like questionnaire design, sampling, field management, cartography etc

In order to be able to carry out the principal functions, a number of support functions have also been put in place.

Thus the Head Office in Juba has four main technical departments viz. Census and Surveys Department, Economic Statistics Department, Social and Demographic Statistics Department and Geographical Information Systems (GIS) Department. Additionally, there are three support departments – Finance Department, Administration Department and Information Technology (IT) Department.

The Juba and Rumbek Offices

The SSCCSE has its headquarters in Juba where most of its activities are supervised from. It also has a data processing centre in Rumbek where all census and other data processing is executed.

Additionally, State Statistical offices have been established in every one of the ten (10) states. These offices are central to the Centre's ability to mount large-scale South-Sudan-wide statistical activities; they are also our focal communication links with various State and local authorities in different states.

Contact addresses of officials of the Centre are provided at the back of this Yearbook for ease of future collaboration.
