Highway Statistics 1997

**Office of Highway Information Management
Office of Policy Development
Federal Highway Administration**

January 4, 1999

Dear Data Users:

Please insert the attached errata sheet for Table FA-4A into your Highway Statistics 1997 publication. Table FA-4A has been modified to better reflect the specific details of the TEA-21 legislation and to correct some minor errors in the published table. We regret any inconvenience this may have caused.

Gary E. Maring
Director, Office of Highway
Information Management

**APPORTIONMENT FORMULAS - FEDERAL-AID HIGHWAY PROGRAM
FISCAL YEAR 1998**

NOVEMBER 1998

REVISED TABLE FA-4A

FUND	FACTORS	WEIGHT	STATUTE 1/	MINIMUM APPORTIONMENT
Interstate Maintenance (IM)	Interstate System lane miles Vehicle miles traveled on the Interstate System Annual contributions to the Highway Account of the Highway Trust Fund attributable to commercial vehicles	33 1/3% 33 1/3% 33 1/3%	104(b)(4)	1/2 percent of Interstate Maintenance and National Highway System apportionments combined
National Highway System (NHS)	\$36,400,000 to the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands Remainder apportioned as follows: Lane miles on principal arterial routes (excluding the Interstate System) Vehicle miles traveled on principal arterial routes (excluding the Interstate System) Diesel fuel used on highways Total lane miles on principal arterial highways divided by the State's total population	 25% 35% 30% 10%	104(b)(1)	1/2 percent of Interstate Maintenance and National Highway System apportionments combined
Surface Transportation Program (STP)	Total lane miles of Federal-aid highways Total vehicle miles traveled on Federal-aid highways Estimated tax payments attributable to highway users paid into the Highway Account of the Highway Trust Fund	25% 40% 35%	104(b)(3)	1/2 percent
Bridge Replacement and Rehabilitation Program (BRR)	Relative share of total cost of to repair or replace deficient bridges	1	144(e)	1/4 percent (10 percent maximum)
Congestion Mitigation and Air Quality Improvement Program (CMAQ)	Weighted nonattainment and maintenance area population	1	104(b)(2)	1/2 percent
Recreational Trails Program (RT)	Equal shares to each eligible State Nonhighway recreational fuel use during the preceding year	50% 50%	104(h)	None
Metropolitan Planning (MP)	Urbanized area population 2/	1	104(f)(2)	1/2 percent
Minimum Guarantee	Specific share specified in law of the aggregate apportionments for IM, NHS, BRR, CMAQ, STP, MP, RT, Appalachian Development Highway System, and Minimum Guarantee and allocations for High Priority Projects. 3/	1	105	\$1 million
State and Community Highway Safety Grants	Total population Public road mileage	75% 25%	402(c)	1/2 percent, 1/4 percent for American Samoa, Guam, Virgin Islands, and the Commonwealth of the Northern Mariana Islands, 3/4 percent for Secretary of the Interior (Bureau of Indian Affairs)

1/ Denotes appropriate section in title 23 U.S. Code.

2/ Usually places of 50,000 or more persons. Definition contained in 23 U.S.C. 101(a).

3/ Formula shown is for FY 1998 only. For FYs 1999-2003, the shares specified in law will be adjusted to ensure that each State's share of apportionments for the specified programs is at least 90.5 percent of its percentage contributions to the Highway Account of the Highway Trust Fund. The shares of States falling below the minimum return will be increased and the shares of the remaining States will be decreased so that the shares continue to total 100 percent.

* SI is the symbol for the International System of Units. Appropriate rounding should be made to comply with Section 4 of ASTM E380.

(Revised September 1993)

Preface

This publication was prepared by the Office of Highway Information Management, Federal Highway Administration. The 53rd of an annual series, it presents the 1997 analyzed statistics of general interest on motor fuel, motor vehicles, driver licensing, highway-user taxation, State highway finance, highway mileage, and Federal aid for highways; and 1996 highway finance data for municipalities, counties, townships, and other units of local government. Starting with the 1992 edition, a section on International data has also been included. A listing of the data is given in the table of contents and a brief description is given in the text accompanying each section.

The *Highway Statistics* series has been published annually beginning with the year 1945. All but the most recent year edition are now out of print. Limited quantities of this edition are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402:

Introduction		1
Important Information for Highway Users		3
Selected Measures for Identifying Peer States	PS-1	5

SECTION I MOTOR FUEL

Discussion		I-1
Analysis of motor-fuel use:		
Motor-fuel use	MF-21	I-3
Nonhighway use of gasoline	MF-24	I-4
Monthly gasoline reported by States	MF-33GA	I-5
Estimated use of gasohol	MF-33E	I-6
Special fuel as a percent of total highway use of motor fuel	(Chart)	I-7
Rates and revenues:		
Motor-fuel volume taxed by States	MF-2	IV-57
State tax rates on motor fuel	MF-121T	IV-58
State motor-fuel taxes and related receipts	MF-1	IV-62
Disposition of State motor-fuel tax receipts	MF-3	IV-63
State tax rates on motor fuel 1981-1995	MF-205	IV-60
Federal excise taxes on highway motor fuel	FE-21B	IV-28

SECTION II MOTOR VEHICLES

Discussion		II-1
Vehicle registration:		
State motor-vehicle registrations	MV-1	II-3
Publicly owned vehicles	MV-7	II-4
Truck and truck-tractor registrations	MV-9	II-5
Bus registrations	MV-10	II-6
Trailer and semitrailer registrations	MV-11	II-7
Licensed drivers, vehicle registrations, and resident population	(Chart)	II-8
Rates and revenues:		
State motor-vehicle and motor-carrier tax receipts	MV-2	IV-64
Disposition of State motor-vehicle and motor-carrier tax receipts	MV-3	IV-65

SECTION III

DRIVER LICENSING

Discussion		III-1
Driver Licensing:		
Vehicle registrations, fuel consumption, and vehicle-miles of travel	(Chart)	III-2
Motor-vehicle driver licenses	DL-1	III-3
Licensed drivers--Ratio of licensed drivers to population	DL-1C	III-10
Licensed drivers, by sex and percentage in each age group	DL-20	III-11
Licensed drivers, by State, sex, and age group	DL-22	III-12

SECTION IV

HIGHWAY FINANCE

Discussion		IV-1
Highway finance summaries:		
Funding for highways and disposition of highway-user revenues, all units of government--summary	HF-10	IV-9
Funding for highways and disposition of highway-user revenues, 1995 revised	HF-10A	IV-10
Total receipts for highways, by governmental units	Chart	IV-11
Total disbursements for highways, by governmental units	Chart	IV-12
Disposition of receipts from highway user taxes and tolls	HDF	IV-13
Revenues used for highways, all units of government	HF-1	IV-14
Total disbursements for highways, all units of government	HF-2	IV-15
Highway expenditures, all units of government, current and constant dollars	Chart	IV-16
Long-term highway obligations, all units of government	HB-2	IV-17
Federal highway finance:		
Status of the Federal Highway Trust Fund	FE-10	IV-18
Status of the Federal Highway Trust Fund	(Chart)	IV-19
Status of the Federal Highway Trust Fund 1957-1996	FE-210	IV-20
Federal Highway Trust Fund receipts attributable to highway users in each State	FE-9	IV-22
Comparison of Federal Highway Trust Fund receipts attributable to the States and Federal-aid apportionments and allocations from the highway account	FE-221	IV-24
Highway use of motor fuel--1995	MF-27	IV-25
Federal excise tax rates on motor fuels and lubricating oil	FE-101A	IV-26
Federal excise tax rates on motor vehicles and related products	FE-101B	IV-27
Federal highway user fees	FE-21B	IV-28
Federal-aid highway fund apportionments	FA-4	IV-29
Federal-aid highway apportionment formulas	FA-4A	IV-30
Selected apportionment data--1999	FA-4E	IV-31
Federal-aid highway fund allocations	FA-4D	IV-32
Obligation of Federal-aid highway funds	FA-4B	IV-33
Obligation of Federal-aid highway funds by functional system	FA-4C	IV-35
Expenditure of Federal funds administered by the Federal Highway Administration	FA-3	IV-36
Receipts and expenditures for highways by Federal agencies--summary	FA-5	IV-38
Receipts and expenditures for highways by Federal agencies--summary 1995 revised	FA-5R	IV-39
Receipts and expenditures for highways by Federal agencies (by State)--summary	FA-21	IV-40

Contents

	<i>Table</i>	<i>Page</i>
Obligation of National Highway System and Surface Transportation Program		
funds by improvement type	FA-6	IV-41
Obligation of Federal-aid highway funds by improvement type	FA-10	IV-42
Miles of roadway projects underway	(Trend Chart) ...	IV-43
Roadway project obligations	(Trend Chart) ...	IV-44
Miles of roadway projects underway by improvement type	(Trend Chart) ...	IV-45
Roadway project obligations by improvement type	(Trend Chart) ...	IV-46
Bridge project obligations by improvement type	(Trend Chart) ...	IV-47
Uses of Surface Transportation Program funds for projects not on the National Highway System (by improvement category)	STP-1	IV-48
Uses of Surface Transportation Program funds for projects not on the National Highway System (by functional system)	STP-1A	IV-51
Price trends for Federal-aid highway construction (and chart)	PT-1	IV-52
Average distribution of costs on contracts completed	(Chart)	IV-53
Usage factors for major highway construction materials and labor	PT-4	IV-54
Direct on-site employment rates on Federal-aid highway construction projects	PT-6	IV-55
 State highway finance:		
Disposition of receipts from State imposts on highway users	DF	IV-56
Motor-fuel volume taxed by States	MF-2	IV-57
State tax rates on motor fuel	MF-121T	IV-58
State tax rates on motor fuel 1981-1996	MF-205	IV-60
Motor-fuel taxes and related receipts	MF-1	IV-62
Disposition of State motor-fuel tax receipts	MF-3	IV-63
Motor-vehicle and motor-carrier tax receipts	MV-2	IV-64
Disposition of State motor-vehicle and motor-carrier tax receipts	MV-3	IV-65
Disposition of receipts from State and highway-user imposts, including tolls	SDF	IV-66
State funding for highways--summary	SF-21	IV-67
Revenues used by States for highways	SF-1	IV-68
Disbursements by States for highways	SF-2	IV-69
Receipts and disbursements for highways	(Chart)	IV-70
Revenues used by States for State-administered highways	SF-3	IV-71
Disbursements by States for State-administered highways	SF-4	IV-72
Disbursements by States for State-administered, classified by function	SF-4C	IV-73
Funding for State grants-in-aid for local roads and streets	SF-5A	IV-74
Revenues used by States for local roads and streets	SF-5	IV-75
State expenditures and grants-in-aid for local roads and streets	SF-6	IV-76
State capital outlay and maintenance, classified by functional system and area	SF-12	IV-77
State capital outlay and maintenance, classified by improvement type	SF-12A	IV-81
State capital outlay, classified by Federal-aid system	SF-12B	IV-84
State Obligations for highways (total), issued or assumed during year	SB-1	IV-85
State Obligations for highways (total), Change in indebtedness during year	SB-2	IV-87
State Obligations for highways (total), funding for debt service	SB-3	IV-88
State Obligations for local highways, change in indebtedness during year	SB-2L	IV-89
State Obligations for local highways, funding for debt service	SB-3L	IV-89
Change in indebtedness of State toll road and crossing facilities	SB-2T	IV-90
Funding for debt service of State toll road and crossing facilities	SB-3T	IV-91
Receipts of State toll road and crossing facilities	SF-3B	IV-92
Disbursements of State toll road and crossing facilities	SF-4B	IV-94
 Transit:		
Funding for direct State mass transit activities	MT-1A	IV-96
Funding for State grants-in-aid for mass transit	MT-1B	IV-97
Transit operator receipts and disbursements for capital outlay	MT-2A	IV-98
Transit operator receipts and disbursements for operations	MT-2B	IV-99

	<i>Table</i>	<i>Page</i>
Local government highway finance:		
Disposition of local government receipts from State and local highway-user imposts, including tolls	LDF	IV-100
Local government funding for highways --summary	LGF-21	IV-101
Revenues used by local governments for highways	LGF-1	IV-102
Disbursements by local governments for highways	LGF-2	IV-103
Local obligations for highways (total), change in indebtedness during year	LGB-2	IV-104
Change in indebtedness during year of local toll facilities	LGB-2T	IV-105
Receipts of local toll facilities	LGF-3B	IV-106
Disbursements of local toll facilities	LGF-4B	IV-108
Disposition of Highway-User Revenue:		
Funding for highways and disposition of highway-user revenues, all units of government--summary	HF-10	IV-9
Funding for highways and disposition of highway-user revenues, 1994 revised	HF-10A	IV-10
Disposition of receipts from highway user taxes and tolls	HDF	IV-13
Disposition of receipts from State imposts on highway users	DF	IV-56
Disposition of local government receipts from State and local highway-user imposts, including tolls	LDF	IV-100
Toll facility finance:		
Receipts of State toll road and crossing facilities	SF-3B	IV-92
Disbursements of State toll road and crossing facilities	SF-4B	IV-94
Receipts of local toll facilities	LGF-3B	IV-106
Disbursements of local toll facilities	LGF-4B	IV-108
Obligations for highways:		
Long-term highway obligations, all units of government	HB-2	IV-17

U.S. TERRITORIES**

Highway statistics for Puerto Rico and the U.S. Territories:

Motor fuel, motor vehicles, driver licenses, and highway finance	R-1	VI-1
Population, land area, Federal-aid mileage and travel, and motor vehicle crashes (see individual HM tables for Puerto Rico data)	R-2	VI-2

**SECTION VII
INTERNATIONAL**

Discussion	VII-1
------------------	-------

1993 International Data for Selected Countries:

Social and demographic characteristics	IN-1	VII-3
Road system measures	IN-2	VII-4
Transportation indicators	IN-3	VII-5
Vehicle travel	IN-4	VII-6
Fuel prices and economic indicators	IN-5	VII-7
Fatalities and fatality rates	IN-6	VII-7

**SECTION VIII
NATIONWIDE PERSONAL TRANSPORTATION SURVEY**

Discussion	VIII-1
------------------	--------

Nationwide Personal Transportation Survey:

Analysis of trip chaining		
From home to work, percent of people who stop	NPTS-1A	VIII-2
From work to home,, percent of people who stop	NPTS-1B	VIII-2
Number of stops between home and work	NPTS-2A	VIII-3
Number of stops between work and home	NPTS-2B	VIII-3
Percent of stops by purpose, home to work	NPTS-3A	VIII-4
Percent of stops by purpose, work to home	NPTS-3B	VIII-4
The Top five reasons for trips to serve a passenger	NPTS-4	VIII-5
Annual person trips per licensed driver	NPTS-5A	VIII-6
Annual person miles of travel per licensed driver	NPTS-5B	VIII-6
Distribution of households by age of vehicle	NPTS-6A	VIII-7
Driver age and vehicle age: Who's driving the older vehicles?	NPTS-7	VIII-7
Annual miles of travel by driver's age	NPTS-8	VIII-8

**SECTION IX
METRIC TABLES**

Metric Tables:

Motor-fuel use	MF-21M	IX-1
Estimated use of gasohol	MF-33EM	IX-2

Public road length in the United States, classified by:

jurisdiction	HM-10M	IX-3
type of surface and jurisdiction/functional system (national summary)	HM-12M	IX-4
jurisdiction and Federal-aid highways (national summary)	HM-16M	IX-5
functional system and Federal-aid highways (national summary)	HM-18M	IX-6
functional system	HM-20M	IX-7

Federal-aid highway data:

Federal-aid highway length, classified by:

jurisdiction	HM-14M	IX-8
system	HM-15M	IX-11
traffic lanes and access control (national summary)	HM-36M	IX-12

National Highway System length, classified by:

open and not open to traffic	HM-30M	IX-13
------------------------------------	--------------	-------

Functional system data:

Jurisdiction	HM-50M	IX-14
Rural and urban lane-kilometers, estimated	HM-60M	IX-18

Highway usage and performance:

Vehicle distance of travel in kilometers, by highway category,

vehicle type, and related data	VM-1M	IX-19
Vehicle-kilometers of travel, by functional system	VM-2M	IX-20
Vehicle-kilometers of travel, by Federal-aid highways	VM-3M	IX-21

Motor vehicle traffic fatalities:

Fatalities and injuries by functional system and Federal-aid highways	FI-1M	IX-22
---	-------------	-------

INTRODUCTION

This publication brings together annual series of selected statistical tabulations relating to highway transportation in three major areas: (1) highway use--the ownership and operation of motor vehicles; (2) highway finance--the receipts and expenditures for highways by public agencies; and (3) the highway plant--the extent, characteristics, and performance of the public highways, roads, and streets in the Nation.

The arrangement of contents follows this general order, with the first three sections devoted to motor-fuel use and taxation, vehicle ownership, and driver licensing. The fourth section deals with financing of highways by all government agencies; the fifth section provides data on highway mileage and performance; the sixth section gives statistics for the U.S. Territories and the Commonwealth of Puerto Rico; the seventh section shows selected international data; the eighth section contains information from the 1995 Nationwide Personal Transportation Survey; and the ninth section contains metric tables.

Statistics in this publication have been analyzed and reported using procedures that provide comparability of values among States. Therefore, some values reported here may differ from values reported by other agencies for similar items.

The cooperation of Federal, State, and local agencies in providing the basic data from which these statistical series are derived is acknowledged and greatly appreciated.

While the Office of Highway Information Management is responsible for the preparation of this publication, a number of the statistical summaries are prepared by other units within the Federal Highway Administration (FHWA) as indicated by notes on the tables involved.

Responsibility for administering the highway network of the United States, providing funds for its continued improvement and maintenance, and regulating its use is a complex affair involving Federal and State agencies, together with nearly 39,000 county, township, and municipal governments and, to a limited degree, the private sector. These agencies work in concert in many ways in the management of the Nation's highway plant.

FEDERAL LEGISLATION

The Transportation Equity Act for the 21st Century (TEA-21), Public Law 105-178, is the principal Federal legislation currently authorizing Federal highway programs for Fiscal Year 1998-2003.

Prior to TEA-21, the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) was the principal Federal legislation. It created the National Highway System (NHS) and other Federal-aid highway categories. The congressional approval of the final system occurred on November 28, 1995.

FEDERAL AGENCIES

The FHWA is the principal highway agency of the Federal Government. Under the Federal-aid highway program, the initiative for selecting routes eligible for improvement with Federal-aid funds rests with the States. These routes continue to remain under the jurisdiction of the State or local governments which are responsible for administering and maintaining them as part of the State or local highway systems.

The FHWA also administers the Federal Lands Highways Program. This program is funded from the Federal Highway Trust Fund and consists of three separate programs: Park Roads and Parkways, Indian Reservation Roads, and Public Lands Highways.

The Department of Defense and the Bureau of Land Management in the Department of the Interior provide funds for the construction of roads leading to military installations, timber areas, etc., but these funds are usually transferred to the FHWA to manage the construction program.

Some Federal agencies also provide funds for road and bridge work which is incidental to their major functions. For example, the Corps of Engineers (Department of the Army) and the Bureau of Reclamation (Department of the Interior) expend funds for highway and bridge construction and reconstruction on projects involving water resources and navigable rivers. Other Federal agencies, such as the Forest Service and the Bureau of Land Management, provide funds through a policy of sharing with States and counties some of the income derived from timber sales and oil and mineral royalties on Federal lands, a portion of which is placed in road funds.

Additional Federal funds are provided from the General Treasury to States, counties, and cities through the programs of other Federal agencies such as Urban Development Block Grants for various purposes including highways. The different Federal assistance programs for highways are summarized in the latest version of FHWA publication, *Highway Taxes and Fees, How They Are Collected and Distributed*, table F-106.

The Treasury Department's Internal Revenue Service collects the Federal road-user taxes and deposits the revenues in the Federal Highway Trust Fund. Amounts dedicated by Congress for mass transportation are credited to a separate mass transit account.

STATE AGENCIES

In the Federal Highway Administration's analyses, special State commissions and authorities, both toll and nontoll, as well as State highway and transportation departments, are classified as State highway agencies. Other executive branches of State governments also have been included when, and to the extent, they are responsible for the collection and distribution of road-user taxes or perform highway and related functions.

Highway Statistics 1997

Examples of these executive agencies are treasury and revenue departments, motor-vehicle departments, public-safety departments (highway police and law enforcement activities), and conservation departments when they are responsible for roads within State parks, forests, or reservations. The District of Columbia is treated as a State.

LOCAL GOVERNMENTS

Local governments include: counties, townships, and municipalities. Included with local governments are subordinate agencies, road districts, commissions, and authorities, both toll and nontoll.

All States have organized county governments except Connecticut and Rhode Island. Counties, however, have limited or no responsibility for roads in the New England States, or in Delaware, North Carolina, Virginia (with some exceptions), and West Virginia. In Alabama and Maryland, the State has assumed responsibility for roads in certain counties. Counties are called parishes in Louisiana, boroughs in Alaska, municipios in Puerto Rico, and townships are known as towns in New England, New York, and Wisconsin.

A municipality is a political subdivision where a municipal corporation has been established to provide general local government for a specific population concentration in a specified area. Some counties have boundaries coextensive with cities. Generally, these counties retain their identities only for certain administrative purposes. Because some counties are entirely urban in nature or have merged with municipalities, they are classified as municipalities. A county may also be classified as a municipality when its area consists predominantly of incorporated cities, towns, and villages.

Although generally considered to be rural governments, many townships, particularly in the Northeast, serve heavily populated areas and perform the functions of a municipal government.

URBAN AREAS

The term "urban" is used in the summary tables to denote the Federal-aid legislation definition of an area. Such areas include, at a minimum, a census place with an urban population of 5,000 to 49,999 or a designated urbanized area with a population of 50,000 or more (or portions thereof within State boundaries). The Federal-aid boundaries are fixed by responsible State and local officials, subject to the approval of the Secretary of Transportation. These Federal-aid urban areas may extend beyond incorporated (with some exceptions) and census boundaries, and thus are not necessarily coextensive with municipal boundaries.

INDIVIDUAL UNIT STATISTICS

In general, the statistical series present summary data primarily on a State-by-State basis. However, in the highway finance section, special tabulations are included for individual toll

authorities. The roadway extent section includes two tables detailing information for urbanized areas. While a number of States compile selected motor vehicle and mileage statistics on a county basis, this is not universal and tabulations of these data are, therefore, not included in this publication. Inquiries for information on a county-by-county basis should be directed to the respective State highway agencies.

DUPLICATIONS

Users of these data must be careful to avoid "double counting" of the statistical data that could result from the effect of intergovernmental relationships. This is particularly so with reference to tables in the finance and mileage sections, because of the overlapping of Federal-aid activities with the State and local highway activities, and the effects of grant-in-aid programs. Examples are Federal-aid payments, which are in turn reported as State receipts and included in State expenditures; and Federal-aid highway system mileage, which are parts of the State and/or local highway systems, and are also included in those systems. Summary tables that give national statistics have been included at the beginning of the finance and mileage sections, and eliminate "double counting" or duplication. These are then followed by table series that reflect the transactions of each level of government, but which are not necessarily cumulative to national totals.

CONVERSION TO METRIC

In accordance with Public Law 100-418 requiring Federal agencies to use the metric system, we are also providing some tables in metric format (metric tables contain an "M" at the end of the title). The chart in the front of this book (back of the Technical Report Documentation page) may be useful in preparing your spreadsheets for metric/English conversion.

CHANGES IN TABLES

The following changes have been made in the *1997 Highway Statistics*:

Highway Finance: Table FE-221 has been revised and now also shows the minimum guarantee analysis in TEA-21. Table FA-4E shows the factors used in the apportionment of Federal-aid funds to the States.

Roadway Extent, Characteristics, and Performance: Table HM-45 has been deleted. Table HM-46 has been deleted; the data are available in tables HM-20, HM-60, VM-2, and in the new apportionment table—FA-4E. Table HM-48 is now in the same format as its companion tables—HM-15 and VM-3. Table HM-67 has been deleted; surface-type data are now included in table HM-51.

1995 Nationwide Personal Transportation Survey: A section with pertinent tables/charts from the Survey has been added to this issue.

IMPORTANT INFORMATION For Users of *Highway Statistics*

PURPOSE OF INFORMATION

The Federal Highway Administration (FHWA) collects from the States and publishes in *Highway Statistics* information necessary to support its responsibilities to the Congress and the public. This information is used in the development of highway legislation at both the Federal and State levels. The information is also used in preparing legislatively required reports to Congress, in calculating and evaluating Federal fund apportionments, in keeping State governments informed, and, in general, as an aid to highway planning, programming, budgeting, forecasting, and fiscal management. It is also used extensively in the evaluation of Federal, State, and local highway programs. **From an FHWA perspective, the information in *Highway Statistics* meets the Federal need of providing a national perspective on highway program activities.** Since this information was developed primarily to meet FHWA and State needs in administering the Nation's highway programs, other users need to exercise thoughtful care in using this information for other purposes.

Quality Considerations

Information published in *Highway Statistics* comes from a number of sources. These sources include various administrative agencies within the 50 States, over 30,000 units of local government, the FHWA, other Federal agencies, and the five U.S. territories.

Information included in *Highway Statistics* is the result of a cooperative effort between the FHWA and the States. Nearly all of the data provided to FHWA, including the Highway Performance Monitoring System (HPMS) data, come through State Departments of Transportation from existing data bases or business records of many individual State and local governmental agencies, including metropolitan planning agencies (MPOs). The existing data bases and record keeping systems of these governmental units were designed and are maintained to meet their individual business needs.

Data quality and consistency of information published in *Highway Statistics* are, therefore, dependent upon the programs, actions and maintenance of sound data bases by numerous data collectors, manipulators and suppliers at the State, local and metropolitan area levels. In general, specific data items that are used by the collecting agency are likely to be of better quality than data items which are collected solely for the FHWA. Data quality and consistency are also dependent upon the nature of the individual data items and how difficult they are to define, collect, etc.

HPMS data are collected in accordance with the *Highway Performance Monitoring System Field Manual for the Continuing Analytical and Statistical Database*. This document contains standard codes for the various data items to be reported in a consistent format.

Highway statistical data other than the HPMS are collected in accordance with *A Guide to Reporting Highway Statistics* (the Guide). Reporting procedures contained in the Guide are not rigid standards; rather, they represent a reporting reference system that the FHWA recommends the States use in collecting and reporting State and local highway data to the FHWA.

Nearly all of the State reported data are analyzed by FHWA for consistency and for adherence to reporting guidelines. In a number of cases, data are adjusted to improve consistency and uniformity among the States. The analysis and adjustment process is accomplished in close working relationship with the States supplying the data.

Using Data for Comparisons

Even when data are consistently collected and reported, users need to recognize that highway statistical information is not necessarily comparable across all States. For many of the data items reported in *Highway Statistics*, a user should not expect to find consistency among all States, due to many State to State differences. When making State level comparisons, it is inappropriate to use these statistics without recognizing those differences that impact comparability.

Use of reported State maintenance expenditures provides a clear example. Maintenance expenditures per mile can vary between States depending upon a number of factors including differences such as climate and geography, how each State defines maintenance versus capital expenditures, traffic intensity and percent trucks, degree of urbanization, types of pavement being maintained, and the level of system responsibility retained by the State versus that given to other levels of government. It would be inappropriate, therefore, when using data from *Highway Statistics* to compare per mile maintenance costs across all States to draw any conclusions without taking into account the differences that should be expected in these parameters based upon differing State conditions.

If choosing to compare State data, the user must be prepared to thoughtfully select a set of peer States that have similar characteristics in relationship to the specific comparison being made. Improperly selected peer States are likely to yield invalid data comparisons.

Highway Statistics 1997

Differences that the user needs to consider in determining suitability of peer States for data comparison purposes include characteristics such as urban/rural similarities, population density, degree of urbanization, climate, geography, differing State laws and practices that influence data definitions, administrative control of the public road system, similarity of the basic State economies, traffic volume similarities, and the degree of State functional centralization.

To facilitate the selection of peer States for possible comparative purposes, a table listing a number of data items which might be considered follows this discussion. Most of these data items are available in other tables in *Highway Statistics*, but are included here for the user's convenience. Finally, additional special considerations that the user should be aware of in using the information in *Highway Statistics* are included in the discussion that precedes each of the individual data sections.

SELECTED MEASURES FOR IDENTIFYING PEER STATES

Section I

MOTOR FUEL

The tables in this section show the volume of motor fuel used for highway and nonhighway purposes. The term "motor fuel" applies to gasoline and all other fuels, including special fuels, coming under the purview of the State motor-fuel tax laws. "Special fuels" include diesel fuel and, to the extent they can be quantified, liquefied petroleum gases such as propane. Gasohol, a blend of gasoline and fuel alcohol, is included with gasoline in all motor fuel tables in this section except table MF-33E.

MOTOR-FUEL USE

Analyses of 1996 motor-fuel consumption are given in tables MF-21 and MF-24. These tables do not include data on fuel purchased by the Federal Government for military use or fuel exported from the United States. In table MF-21, adjustments have been made to allow for losses from destruction, evaporation, spillage, etc. Additional detail has been added to table MF-21 so that consumption is completely cross classified. The highway use by fuel type split formerly available from tables MF-25 and MF-26 may now be found in table MF-21.

Table MF-33GA shows, by month, gross gasoline volumes which have been reported in the publication, *Monthly Motor Fuel Reported by States*. Since the data in this table are taken from monthly reports issued by State fuel-tax agencies, and few year-end adjustments have been made, the totals will not agree with those shown in table MF-21. Adjustments are made in the annual data to exclude percentage losses in excess of 1 percent and to reflect usage rather than tax collections.

Table MF-33E shows Federal Highway Administration (FHWA) estimates of the amount of gasohol used in each State. The national totals were developed from Internal Revenue Service reports of tax collections. The stratification by State is estimated by the FHWA using data reported by the States and other factors. This table replaces table MF-33GLA which contained State-reported volumes of 10-percent gasohol.

STATE MOTOR-FUEL TAXATION

The volume of motor fuel exempt from and subject to State taxation is shown in table MF-2. This table is intended for use in revenue analyses and shows fuel volumes without regard to the type of use. The motor-fuel tax collections for all States are given in table MF-1, and the disposition of these revenues is given in table MF-3. These three tables can be found in the highway finance section. In most States, the tax on aviation fuel is either refunded or placed in a special fund for aviation purposes. Similarly, some States place in a separate fund all or

part of the tax paid on fuel used by marine craft and use these funds for the improvement of marine facilities. When revenue from fuels used for nonhighway purposes is dedicated for expenditure for specific nonhighway purposes, it is shown in column 6 of table MF-1. Table MF-3 shows the disposition of the highway-user revenues shown in column 7 of table MF-1.

Tax rates in effect for the latest calendar year for gasoline and other motor fuels are given in table MF-121T in the highway finance section.

The words "exemption" and "refund" are not used interchangeably. In this publication, exemption is applied when the State purposely did not collect the tax, and refund has been applied when the State collected the tax and later returned it, in whole or in part. Exemptions are most frequently granted on motor fuel purchased by the Federal Government; they are also granted as allowances for loss through evaporation, spillage, etc. Refunds are often granted for nonhighway uses of motor fuel such as for agriculture, aviation, manufacturing, construction, and marine purposes. In most States, gasoline used for nonhighway purposes is taxed but the tax is refundable, but special fuels used for nonhighway purposes are exempt from taxation. Historical data on State and Federal motor fuel gasoline and diesel taxes are included as table-MF-205. Historical data on Federal motor fuel and related taxes can be found in tables FE-101A and FE-101B.

A separate publication entitled *Highway Taxes and Fees, How They Are Collected and Distributed* provides additional information on motor fuel. The provisions governing the disposition of motor-fuel tax receipts can be found in table MF-106. Tables MF-101 through MF-105 summarize the more important State provisions for administering gasoline and special-fuel taxes, and tables MF-107 through MF-110 give the State licenses and fees imposed on wholesalers, dealers, and users of motor fuel and the liquid-fuels inspection fees.

As of September 30, 1996, all States and Canadian Provinces have become participating members in International Fuel Tax Agreement (IFTA). IFTA replaced individual State motor-fuel tax provisions on Interstate motor carriers with a uniform method of reconciling motor-carrier taxation among member jurisdictions. The uniform method simplified motor-fuel tax reporting by allowing a motor carrier to report and pay motor-fuel taxes owed to the States and Canadian Provinces to a single base jurisdiction, typically their home State or Province. Under IFTA an Interstate motor carrier only needs a single IFTA fuel tax license for each of its qualified motor vehicles.

The base State or Province uses a clearinghouse arrangement to forward the portion of motor-fuel taxes owed to other member States and Provinces. Payments for qualified motor vehicles are made quarterly in all jurisdictions.

The publication Highway Taxes and Fees describes the IFTA process in more detail, and provides further data on motor carrier tax rates in table MF-104.

INFORMATION FOR USERS

The records of State agencies that administer the State taxes on motor fuel are the underlying source for most of the data presented in these tables. The FHWA estimates highway use of gasoline by subtracting estimated nonhighway use from the total use reported by the States.

Over the last several years, there have been numerous changes in State fuel tax laws and procedures that have resulted in improved fuel tax compliance, especially for diesel fuel. The improved compliance has resulted in increased fuel volumes being reported by the States to FHWA. The trends shown in the tables reflect both improvements in tax compliance and changes in consumption.

MOTOR-FUEL USE - 1997 1/

SEPTEMBER 1998

1/ This table is one of a series giving an analysis of motor-fuel consumption, based on reports from State motor-fuel tax agencies. Gasohol is included with gasoline. In order to make the data uniform and complete, public use and nonhighway use were estimated by the Federal Highway Administration. These estimates may not be comparable to data for prior years due to revised estimation procedures. The resulting volumes differ in many cases from the unadjusted data reported in table MF-2. For some States, data are not comparable to prior years due to changes in data analysis and/or improvements in reporting procedures. All data are subject to review and revision.

2/ Some States make a flat percentage allowance for losses in storage and handling, and others allow for actual losses not to exceed a specified percentage. Still others permit distributors to claim stock losses in reconciliations of inventories, thus exempting the lost volume from taxation. Losses by destruction, where reported separately, are also included in this column. The maximum allowance used in the analysis to cover losses in storage and handling was 1 percent. Because of accounting methods losses can be reported as a net gain.

PRIVATE AND COMMERCIAL NONHIGHWAY USE OF GASOLINE - 1997 1/

1/ This table is one of a series giving an analysis of motor-fuel consumption. A complete and uniform classification of nonhighway use is not possible due to differences among the States as to what classes of nonhighway use are eligible for exemptions or refunds and because some eligible refunds are not applied for. In order to make the data uniform and complete, nonhighway uses of gasoline were estimated by the Federal Highway Administration or data were obtained from other sources. These estimates may not be comparable to data for prior years due to revised estimation procedures. All data are subject to review and revision.

2/ Excludes aviation jet fuel.

3/ An amount is shown in this column only when reported by the State and when it could be determined that the State-reported figure did not include fuel represented in other categories.

1/ This table shows gross volume of gasoline reported by sellers, usually at the terminal or wholesale level, in each State. The data are taken from State taxation reports and may reflect time lags of 6 weeks or more between the report level and the time of retail sale. The data include highway use, nonhighway use, and losses. The gross volumes shown in this table will not agree with that in table MF-21. Table MF-21 reflects adjustments

made to eliminate exports and military use and to limit percentage loss allowances to a maximum of 1 percent. In States where jet fuel was initially included with aviation gasoline, the jet fuel has been deducted.

2/ The total may not equal the sum of the months due to independent rounding.

1/ This table shows Federal Highway Administration estimates of gasohol use. The gasohol volumes shown include both the ethanol and the gasoline components. The Energy Policy Act of 1992 expanded the definition of gasohol effective January 1, 1993. Prior to the Act, gasohol was defined as a blend of gasoline and at least 10 percent, by volume, fuel alcohol. Under the Act, three types of gasohol were defined: (1) 10-percent gasohol, which corresponds to the definition before the Act; (2) 7.7-percent gasohol, which contains at least 7.7 percent alcohol but less than 10 percent; and (3) 5.7-percent gasohol which contains at least 5.7 percent alcohol but less than 7.7 percent.

2/ The amount of ethanol used in gasohol is estimated from gasohol tax collections, refunds, and credits reported by the Internal Revenue Service, U.S. Department of the Treasury.

3/ For most States, the figures shown for 10-percent blends are State data.

4/ 7.7-percent gasohol is generally used to meet the requirements for oxygenated fuel to reduce winter carbon monoxide emissions.

SPECIAL FUEL AS A PERCENT OF TOTAL HIGHWAY USE OF MOTOR FUEL - 1997

Section II

MOTOR VEHICLES

VEHICLE REGISTRATIONS

The annual vehicle registration date varies among the States. Although many States continue to register specific vehicle types on a calendar year basis, all States use some form of the "staggered" system to register motor vehicles. The "staggered" system permits a distribution of the renewal workload throughout all months. Most States allow preregistration or permit "grace periods" to better distribute the annual registration workload.

In order to present vehicle registration data uniformly for all States, the information is shown as nearly as possible on a calendar-year basis. Insofar as possible, the registrations reported exclude transfers and reregistrations and any other factors that could otherwise result in duplication in the vehicle counts.

Registration practices for commercial vehicles differ greatly among the States. Some States register a tractor-semitrailer combination as a single unit; others register the tractor and the semitrailer separately. Regardless of how they were registered, only the power units have been included in the truck count in table MV-1. Some States register buses with trucks or automobiles; many States do not report house and light utility trailers separately from commercial trailers or semitrailers; and some States do not require registration of car or light utility trailers. In some instances, the Federal Highway Administration (FHWA) has supplemented the data supplied by the States with information obtained from other sources.

Motor-vehicle registrations are reported by major vehicle classes: automobiles, buses, trucks, and motorcycles. The truck category includes light trucks to the extent they can be identified and separated from automobiles. Data on trucks, buses, trailers, and semitrailers are given in tables MV-9, MV-10, and MV-11, respectively. Although the detail of motor-vehicle data has improved in recent years, it is not yet possible to obtain from all States separate data on single-unit trucks and combinations. Some States provide data for light trucks and truck tractors, but for many States, the FHWA estimates this information using other data sources, such as the Truck Inventory and Use Survey conducted by the Bureau of the Census. The table MV-9 light truck category includes pickups, vans (full-size and mini), utility-type vehicles, as well as other vehicles (panel trucks and delivery vans generally of 10,000 pounds or less gross vehicle weight). Registrations of publicly owned motor vehicles are reported in table MV-7.

REGISTRATION TAXES AND FEES

Taxes and fees connected with State motor-vehicle registrations and special taxes on motor carriers are given in table MV-2, and the disposition of these taxes is given in table MV-3. These tables can be found in the highway finance section. The diversity of taxes and fees collected has made it necessary to group them into broad general classes, the most important being registration fees. The amounts shown are those collected solely as highway-user revenues and do not include any amounts, such as personal property levies, that are derived from taxes other than those related to motor-vehicle ownership and operation. (Although portions of these revenues are later used in some States for nonhighway purposes, it is the source rather than the expenditure of the revenues that has determined their inclusion here.) Motor-vehicle registration fee schedules (table MV-103) and administrative provisions governing the disposition of State motor-vehicle and motor-carrier receipts (table MV-106) appear in a separate FHWA publication entitled *Highway Taxes and Fees, How They Are Collected and Distributed*. A comprehensive comparison of taxes and fees among the States for 14 selected vehicles can be found in the separate FHWA publication entitled *Road-User and Property Taxes on Selected Vehicles*.

USE OF DATA

All State reported data are analyzed by FHWA for completeness, reasonableness, consistency, and compliance with data reporting instructions contained in *A Guide to Reporting Highway Statistics*. State reported data is adjusted if necessary to eliminate mistakes and to improve data uniformity among the States. The analysis and adjustment process is accomplished in cooperation with the States supplying the data.

In some instances, corrections or revisions have been made in previously published data; consequently the figures shown in *Highway Statistics Summary to 1995* supersede those in *Highway Statistics Summaries, 1945, 1955, 1965, 1975, and 1985*, as well as the annual issues of *Highway Statistics*.

In addition, FHWA and the National Highway Traffic and Safety Administration (NHTSA) use different registration data sources and different vehicle definitions. FHWA requests that it be provided data specifically identifying the various types of passenger carrying highway vehicles. For example, the State reported data is to specify if passenger vans have been reported as passenger vehicles or light trucks. While a State

Text

may report minivans, station wagons on truck chassis, and utility-type vehicles as passenger cars to FHWA these vehicles are considered as trucks in both FHWA and NHTSA data series.

The FHWA data include all vehicles which have been registered at any time throughout the calendar year. Data include vehicles which were retired during the year and vehicles that were registered in more than one State. In some States, it is also possible that contrary to the FHWA reporting instructions, vehicles which have been registered twice in the same State may be reported as two vehicles. The NHTSA data include only those vehicles which are registered as of July 1 of the given year. Therefore, they do not include vehicles registered in the last half of the calendar year or vehicles that may only be registered for a part of a year such as those for farm use.

1/ For additional details of publicly owned vehicles and of trucks, buses, and trailers registered, see tables MV-7, 9, 10, and 11, respectively. Where the registration year is not more than one month removed from the calendar year, registration-year data are given. Where the registration year is more than one month removed, registrations are given for the calendar year. In some instances, corrections or revisions have been made in previously published data; consequently the figures shown in Highway Statistics Summary to 1995 supersede those in Highway Statistics Summaries, 1945, 1955, 1965, 1975, and 1985, as well as the annual issues of Highway Statistics.

2/ Includes Federal, State, county, and municipal vehicles. Vehicles owned by the military services are not included.

3/ The numbers of private and commercial buses given here are estimates by the Federal Highway Administration of the numbers in operation, rather than the registration counts of the States.

4/ The following farm trucks, registered at a nominal fee and restricted to use in the vicinity of the owner's farm, are not included in this table: Connecticut, 6,938; New Hampshire, 4,781; New Jersey, 6,647; New York, 30,227; Pennsylvania, 22,670; and Rhode Island, 1,133.

1/ Vehicles of the civilian branches of the Federal government are given in this table. Vehicles of the military services are not included. Distribution by State is estimated by the Federal Highway Administration.
 2/ This information, compiled chiefly from reports of State authorities, is incomplete in many cases. Some States give State-owned vehicles only, others exclude from registration certain classes, such as

fire apparatus and police vehicles. For the States not reporting State, county, and municipal vehicles separately from private and commercial vehicles and those reporting unsegregated totals only, classification by vehicle type has been approximated on the basis of other available data or estimated.

TRUCK AND TRUCK-TRACTOR REGISTRATIONS - 1997 1/

1/ The registrations given in this table are as reported by the States in most instances, but have been supplemented in some cases by estimates based on data from other sources. In some instances, corrections or revisions have been made in previously published data; consequently the figures shown in Highway Statistics Summary to 1995 supersede those in Highway Statistics Summaries, 1945, 1955, 1965, 1975, and 1985, as well as the annual issues of Highway Statistics.

2/ In this partial classification a vehicle may be included more than once; for instance, a truck-tractor in farm use could appear in both columns.

3/ The figures in these columns may vary substantially from the numbers shown for prior years. This results from new information, such as the 1992 Census of Transportation Truck Inventory and Use Survey, and changes in the estimating procedures, and is not because of substantial vehicle registration changes during

1997. Where data reported by the States were incomplete for these vehicles, estimates were made by the Federal Highway Administration. Truck-tractors may include some large trucks used regularly in combination with full trailers.

4/ Except for Georgia and Mississippi (Footnote 5), farm registrations are shown for all States that have a special "Farm" classification. The numbers of vehicles shown do not necessarily represent the total number of registered vehicles used on the farm. The following farm trucks, registered at a nominal fee and restricted to use in the vicinity of the owner's farm, are not included in this table: Connecticut, 6,988; New Hampshire, 4,781; New Jersey, 6,647; New York, 30,227; Pennsylvania, 22,670; and Rhode Island, 1,133.

5/ Although Georgia and Mississippi have a special "Farm" classification, their registration reports do not show a complete segregation of farm trucks from private carriers.

1/ The numbers of private and commercial buses given here are estimates by the Federal Highway Administration of the numbers in use, rather than the registration counts of the States.

2/ This column consists primarily of publicly owned school buses but includes a few privately owned school, institutional, and industrial buses registered free or at a reduced rate. Municipally owned transit buses are included with commercial buses. This information, compiled chiefly from reports of State authorities is incomplete in many cases.

3/ In some instances church, industrial and other private buses are included here; and in other instances privately-owned school buses could not be segregated from commercial buses, and are included with the latter.

1/ The completeness of data on trailer registrations varies greatly. Data are reported to the extent available and in some cases are supplemented by estimates of the Federal Highway Administration.

2/ This column includes all commercial type vehicles and semitrailers that are in private or for-hire use.

3/ Several States do not require the registration of light farm or automobile trailers.

4/ Mobile homes and house trailers are shown in this column for States which require them to be registered and are able to segregate them from other trailers. In States where this classification is not available, house trailers are included with light car trailers.

VEHICLE REGISTRATIONS, FUEL CONSUMPTION, AND VEHICLE-MILES OF TRAVEL AS INDICES

Section III

DRIVER LICENSING

Each State and the District of Columbia administers its own driver licensing system. Since 1954 all States have required drivers to be licensed, and since 1959 all States have required examination prior to licensing. Tests of knowledge of State driving laws and practices, vision, and driving proficiency are now required for new licensees. The summary of State driver licensing requirements has previously been in a separate biennial publication, *Driver License Administration Requirements and Fees*. This publication is being combined with a companion publication entitled *State and Provincial Licensing System Comparative Data* by the American Association of Motor Vehicle Administrators. The combination of these two reports will eliminate any duplication in effort and give you all information pertinent to obtaining an operator or commercial license in any State or Province of Canada. You may view this report on our website: <http://www.fhwa.dot.gov/ohim>.

LICENSES ISSUED AND IN FORCE

Table DL-1 shows the number of learner permits and driver licenses issued by each State during the calendar year, length of term, renewal date, fees, and the number of driver licenses in force by class at the end of the year.

MALE-FEMALE LICENSE HOLDER AND RATIO TO POPULATION

DL-1C displays not only the number of male/female license holders, but also the relationship of licensed drivers to total population and to driving-age (age 16 and over) population. This table also shows the ratio of licensed drivers to registered private and commercial vehicles.

Since there will always be persons of driving age who will not be licensed, by choice, or because of physical or mental infirmities, the relationships shown normally should never reach 1,000. However the following conditions can make the relationships higher than expected:

- (1) Although efforts are made to minimize it, drivers who move from one State to another are sometimes

counted in both States until the license from the previous State of residence expires.

- (2) Some persons obtain their driver licenses in States other than those of legal residence.
- (3) Some persons fraudulently obtain multiple licenses. Some State authorities doubt whether all persons who drive are licensed. Where this problem exists, those that are unlicensed would partially offset any duplicate licenses issued and inactive licenses. The degree to which this occurs is unknown.
- (4) The purging of expired licenses or licenses from deceased persons is not done on a continual basis.

The distribution of total U.S. licensed drivers, by sex and age group, is shown in table DL-20.

DL-22 displays the number of drivers by sex and age groups for each State. For the States that do not provide the driver license data broken out to the top age bracket of 85 and over, we have redistributed the last age bracket provided by each State according to the Census population data for those particular age brackets in that particular State.

USE OF DATA

Since 1990, a strict standard has been used to determine the number of unrestricted drivers under the age of 16 on the road: a driver must be able to drive inclusively between the hours of 5:00 A.M. and 12 Midnight without another licensed driver in the vehicle. This standard cut the number of drivers from 1988 to 1996 substantially in the "under 16" category and one must keep this in mind when comparing the data from earlier years.

Please note that Louisiana stopped issuing licenses to persons under the age of 16 in 1996.

MOTOR-VEHICLE DRIVER LICENSES - 1997 1/

October 1998

DL-1
Sheet 7 of 7

DL-1 FOOTNOTES

1/The numbers of learner permits and driver licenses issued are not available in States where N/A is shown. For purposes of this report, when there are combined licenses by endorsement, the licensee has been counted in the highest class license that he/she holds.

* For States with an asterisk, see notes below:

ALABAMA--Includes local issuance fee of \$.25 on learner permits, \$.50 on duplicates, \$1.50 on driver licenses; second or subsequent duplicate is \$3.50 to \$13.50. Examination fees in addition to the original license fee: \$5 each for written and road test.

ARIZONA--Operator license is good until 60th birthday. Fees based on age: 16-39, \$25; 40-44, \$20; 45-49, \$15; 50+, \$10. Testing can be done by third party. Vision testing and new photo required every 12 years.

CALIFORNIA--The original license fee covers the cost of a learner permit. First-time license in California is issued for 4 years. All renewals started on or after 10/1/97 will be issued a 5-year license. All renewals started before 10/1/97 regardless of when application is completed) will be issued a 4-year license.

COLORADO--No fee for renewal of motorcycle endorsement. Minor licenses expire 20 days after 18th birthday; provisional licenses expire 20 days after 21st birthday. Did not submit 1997 data.

CONNECTICUT--Examination fees in addition to the original license fee: \$15 for operator and \$3.50 for public service license.

DELAWARE--Learner permits included with new applicant.

FLORIDA--Original license fee is \$20; "safe drivers (no convictions within the preceding 3 years)" may renew in person for \$20 for 6 years.

GEORGIA--Regular license fee is \$8 for organ donors and \$15 for nondonors. Did not submit 1997 data.

ILLINOIS--\$10 of permit fee credited to operator license. Issues special license to minors (persons 18-20 years of age) which expire when 21 years old plus 3 months; 4-year--\$10 and minor fees--\$5.

INDIANA--\$10 of permit fee credited to operator license. Issues 3-year licenses to aged persons.

KANSAS--\$2 examination fee in addition to the original license fee. Class M includes combo motorcycle licenses, i.e., Class AM, etc.

MAINE--Did not submit 1997 data.

MARYLAND--Approximately 40% of learner permits are converted to licenses at no additional fee.

MASSACHUSETTS--Examination fees in addition to the original license fee: \$5 each for written and road test.

MICHIGAN--Persons age 60 and over may renew at \$4 annually, original motorcycle endorsement--\$6.

MINNESOTA--Number listed for school bus drivers is the number of exams administered during the year.

MONTANA--For CDL, fees are charged based on Type 1 or Type 2, and not by Class. Class A, B, C are a further breakdown of Types 1 and 2.

NEW HAMPSHIRE--Net licenses in force double count those individuals holding a motorcycle or moped license along with their CDL or operator.

NEW MEXICO--Persons 75 years or over renew annually at \$2.50.

NEW YORK--43-54 month licenses are issued in order to place the licenses into his/her month of birth; fees prorated accordingly. Fees will not exceed amount specified.

OHIO--Those under 21 are issued probationary licenses in both CDL and regular categories that expire on their 21st birthday; fees are based accordingly.

OKLAHOMA--Additional \$4 to \$25 fee for the license application before obtaining the original license. License fees: 62-year olds--\$11.25, 63--\$7.50, 64--\$3.75, 65 and over is free of charge.

PENNSYLVANIA--Drivers over 65 renew for 2 years at \$11.50.

TENNESSEE--Examination fees in addition to the original license fee: \$5.

TEXAS--Licenses issued to those under 18 expire on 18th birthday; the fee is prorated with a \$5 minimum. CDL licenses included in regular Class A, B, C licenses.

WEST VIRGINIA--Commercial class includes all CDL licenses issued including provisional licenses previously issued.

WISCONSIN--Examination fees in addition to the original license fee: \$5 each for written and road test.

2/ Licensed drivers estimated by FHWA.

3/ Data for older age groups have been estimated based on the last breakout provided by that State against the Census population figures for that State and age group.

Section IV

FINANCE

The tables in this section show highway receipts, disbursements, debt status, and other financial information of Federal, State, and local governments. Federal and State highway finance data are for 1997. Please note that highway finance data for local governments are for 1996.

COMBINED FINANCES

The first tables in this section give combined summaries of highway finances for all levels of government. The summary tables are followed by specialized tables showing Federal, State, and local government data separately. While intergovernmental transfers have been eliminated from the summary tables, the specialized tables are not additive without appropriate adjustments for intergovernmental payments. For example, Federal payments to States for highways are reported as an expenditure on the Federal tables, while the States' expenditures of those funds are reported as expenditures on the State finance tables.

Table HF-10 combines, for all levels of government, receipts and disbursements for highways (with local government data and some Federal data estimated). Table HF-10 also includes information on gross collections and disposition of highway-user revenue and identifies intergovernmental payments by level of government. Table HF-10A revises table HF-10 as published in *Highway Statistics, 1996*. Table HDF presents total collections of highway-user imposts and distributions of highway-user revenue to highway and other purposes by State. Tables HF-1 and HF-2 eliminate intergovernmental payments and summarize total receipts and disbursements for highways by State in 1996, the latest year that finance data for all levels of government are available. Table HB-2 summarizes the highway debt status of State and local governments.

FEDERAL FINANCING

The Federal-aid highway program is financed from the proceeds of motor-fuel and other highway-related excise taxes deposited in the Federal Highway Trust Fund (HTF). The Federal-aid highway program is a federally assisted, State-administered program which distributes Federal funds to the States for the construction and improvement of urban and rural highway systems. On Federal-aid highway projects, a State develops the plans, lets the contracts, and supervises the construction. The roads remain under the administrative control of the State or local government responsible for their operation and maintenance.

Evolution of the Federal-aid Program

Although Federal aid for highways began in the late 1800's, Federal assistance was not provided uniformly to all States with the purpose of developing an integrated network of highways until 1916. In 1921, Federal aid was restricted to a limited connected system of principal roads which became the Federal-aid Primary Highway System. Provision was made in 1944 for the designation of a Federal-aid Secondary System of principal farm-to-market and feeder roads. Also in 1944, for the first time, specific authorization of Federal-aid funds was made for urban extensions of the Primary System, and in 1954, for urban extensions of the Secondary System. In 1973, funding for a separate Urban System program was established. Part of the authorized funding was specifically earmarked for urbanized areas with a population of 200,000 or more.

The Eisenhower System of Interstate and Defense Highways, a dominant feature of the Federal-aid program, was identified in 1944; however, prior to 1956, only modest funds were provided. The Federal-aid Highway Act of 1956, as subsequently amended, provided funding on a 90-percent Federal, 10-percent State matching basis. Subsequent legislation has extended the Interstate authorizations.

In recent years, increased attention has been directed to the preservation and reconstruction of the Nation's highways and bridges. Although regular Federal-aid funds may be used by the States for the rehabilitation and replacement of deficient bridges, a special bridge rehabilitation and replacement program with separate authorizations began in 1970.

Beginning in 1976, a special category of Interstate funds was authorized specifically for resurfacing, restoration, and rehabilitation (3R) work. In 1981, the program was amended to include reconstruction (4R) and funding was substantially increased. Under the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA), resurfacing, restoration and rehabilitation are funded under the Interstate Maintenance (IM) program. The Federal share of IM projects is 90 percent.

The ISTEA eliminated the historical Federal-aid system designations of Primary, Secondary, and Urban, and it created the National Highway System (NHS). The NHS includes the existing Interstate System routes, a large percentage of urban and rural principal arterials, the Strategic Highway Network, and major connectors. The ISTEA also created a new flexible funding program, the Surface Transportation Program (STP), that can be used for roads and streets not functionally classified as local or rural minor

collector, for bridges on any public road, and for transit capital projects. The Transportation Equity Act for the 21st Century (TEA-21), PL 105-178, enacted June 9, 1998, extends ISTEA program structure through Fiscal Year 2003 at higher program levels.

The Federal Highway Trust Fund

The Federal HTF is the funding source for the Federal-aid highway program. The HTF was established by the Highway Revenue Act of 1956. Changes in the Federal excise tax structure have occurred periodically. Tables FE-101A and FE-101B provide a historical summary of Federal excise tax rates, including rates currently in effect. Table FE-21B provides additional detail on Federal motor-fuel taxes.

Effective April 1983, the Highway Revenue Act of 1982 created the Mass Transit Account within the HTF. The Act provided that the equivalent of one cent per gallon of the motor-fuel taxes would be deposited in the Mass Transit Account for transit system capital expenditures. Tables FE-101A and FE-21B trace the history of the taxes dedicated to the Mass Transit Account.

TEA-21 makes important changes in Federal Highway Trust Fund legislation. Significantly, TEA-21 keys Federal-aid highway funds to receipts of the Highway Account of the HTF. In addition, TEA-21 provides that after September 30, 1998, the HTF would no longer earn interest on balances and that balances in the Highway Account would be transferred to the General Fund. Provisions for deposit of almost all highway-user taxes is extended through September 30, 2005. The Transit Account share of fuel tax is changed to 2.86 cents per gallon (from 2.85 cents) to correct an error in previous legislation.

Federal HTF revenues are derived from various Federal excise taxes on highway users. The attribution of these revenues to highway users in each State is shown in table FE-9. Since these revenues cannot be directly related to payments by highway users in each State, the receipts attributable to highway users in each State are estimated by the FHWA based on highway fuel consumption.

Table FE-221 shows a comparison, by State, of HTF Highway Account receipts attributable to highway users and apportionments and allocations from the Fund. This table reflects a concerted effort to include all funds apportioned or allocated to the States from the Highway Account in the HTF. It also shows the TEA-21 minimum guarantee analyses which ensures States 90.5 percentage return. Table MF-27 shows the 1996 highway motor fuel gallonage used to attribute the 1997 HTF receipts to the States in table FE-221.

Federal Aid to State and Local Governments

The Federal-aid highway program is administered by the Federal Highway Administration (FHWA) as a grant-in-aid program. Funds are apportioned to States in accordance with formulas legislated in TEA-21. Certain programs administered by the FHWA are funded from Federal general funds. Other Federal agencies may transfer funds to the FHWA to administer for highway improvement projects. Details of the Federal-aid funding process can be found in the FHWA publication, *Financing Federal-aid Highways*.

Annual appropriations of Federal-aid funds for the various programs are apportioned among the States using the formulas and factors shown in table FA-4A. For most programs, these funds are matched by State or local governments on an 80 percent Federal share to a 20-percent State share basis. Amounts apportioned to the States pursuant to authorizations by Congress for a fiscal year are not to be confused with payments to the States for work completed. Although Federal-aid funds are apportioned by year, a grace period before obligating is permitted to allow the States time for orderly planning, budgeting, and execution of their highway programs.

Table FA-4E shows the highway information data factors used in the final apportionment. TEA-21 expands the use of State-reported highway information as factors in the apportionment of Federal-aid funds to the States. Under TEA-21, the Interstate Maintenance (IM) component of the IM/NHS will apportion most of its funds based on 1/3 States' share of all Interstate lane miles, 1/3 States' share of certain Interstate travel, and 1/3 States' share of commercial vehicle contributions to the Highway account of the HTF. The NHS component of the IM/NHS will apportion most of its funds based on 25 percent States' share of principal arterial lane miles, 35 percent States' share of principal arterial travel, 30 percent States' share of highway use of diesel fuel, and 10 percent States' share of per capita lane miles. The Surface Transportation Program will apportion most of its funds based on 25 percent States' share of Federal-aid Highway System lane miles, 40 percent States' share of Federal-aid Highway System travel, and 35 percent States' share of contributions to the Highway account of the HTF.

State and local governments also receive funds for their highway activities from programs administered by other Federal agencies. Some Federal funds are distributed through State governments to local governments. Federal agencies' direct work on highways represents only a small portion of Federal assistance to highways. The different Federal assistance programs for highways are summarized in table F-106 in the FHWA publication *Highway Taxes and Fees, How They Are Collected and Distributed*.

Payments to contractors for work on Federal-aid projects are initially made from State or local funds. The Federal share is reimbursed to the States as work progresses. The final reimbursement payment is made after completion of the project.

Most payments are reimbursements to the States. Some funds are expended directly by FHWA. Tables FA-3, FA-5, and FA-21 provide information on the expenditure of Federal funds. The FA-21 consolidates and summarizes all highway receipts and disbursements to the Federal Government. The FA-4 table series and table FA-6 provide information on the apportionment and obligation of Federal funds. Table FA-10 provides information on Federal-aid highway program accomplishments for Federal-aid projects initiated in fiscal year 1996. A revised FA-5 for 1996 is also included.

Obligation of STP funds for projects off the NHS are included in the summary tables STP-1 and STP-1A. These tables are intended to show expected products or accomplishments to be achieved with this category of Federal-aid highway funds. Beginning with Highway Statistics 1995, these tables reflect financial data from FHWA's Fiscal Management Information System (FMIS); previous years' data has been directly reported by the States.

Financial and other data on several trend charts have been re-estimated to reflect improved data available from FMIS. In particular, FMIS reconstruction data is now split between capacity and preservation projects and has been used to reestimate 1991-1994 data.

STATE FINANCING

The SF and SB table series show the highway finance activities and debt status of State highway agencies. Table SF-21 consolidates and summarizes all highway receipts and disbursements of the States. The remaining tables in the SF series provide further details and breakdowns of all highway receipts and disbursements of the States, including data on State toll facilities. The SB table series provides details of the highway debt transactions of the States.

The MT table series shows State mass transit activities. Tables MT-1A and MT-1B show State funding for direct State mass transit activities and State grants-in-aid for mass transit.

Federal Transit Administration (FTA) information on mass transit operators is shown in tables MT-2A and MT-2B.

State aid to local governments

States provide assistance to the highway, road, and street programs of local governments primarily through the transfer or sharing of highway-user revenue. However, State aid is not

limited to highway-user revenue. Many States also transfer other State revenues or redistribute Federal funds to local governments. Some States also perform a significant amount of work on roads and streets under the jurisdiction of local governments.

For uniformity in FHWA analyses, all State-imposed taxes and fees on highway-users are considered to be collected and distributed by the States. The local governments' shares of State highway-user revenue, if any, are shown as intergovernmental payments from the State.

Many local governments collect State motor-vehicle taxes and retain a portion before forwarding the remaining receipts to the State. The retained amounts are also shown as a State intergovernmental payment to local governments.

In 1997, the statutes of 46 States provided for the sharing of State-collected highway-user tax revenue with local governments for road and street purposes. This assistance is in the form of direct grants-in-aid and shared revenue. Alaska, Georgia, New York, Rhode Island, and West Virginia did not have such a statute.

Some transactions that involve a transfer of funds from States to local governments are shown as direct State expenditures, rather than as intergovernmental payments. These transactions include: (1) amounts paid to local governments under contractual agreements for construction or maintenance work on the State highway system for the State highway agency; and (2) payments on local debt obligations assumed by the State as reimbursement for the cost of local roads added to the State highway systems.

Numerous other State transactions or activities benefiting local governments do not involve a transfer of funds and are not treated as intergovernmental payments. These transactions include: (1) advisory, consulting, and supervisory services, engineering assistance, and aid-in-kind (e.g., free provision of road materials or loans of equipment); (2) State assumption of the responsibility for construction and maintenance of former county roads or municipal streets; (3) direct State payments for materials or to contractors for the State's share of the cost of joint State-local projects on local road systems; and (4) direct work by the State on locally controlled roads and streets.

LOCAL FINANCING

The highway finance activities of local governments are shown in the LGF table series. Debt status for local governments is given in table LGB-2. Table LGF-21 consolidates and summarizes all highway receipts and disbursements of local governments. Some States use sampling to develop highway finance data for local governments.

Most local governments are constrained by their State governments to the taxation of real and personal property as their primary source of revenue. Because there are limits to the amount of revenue that can be derived from property taxation, many States share revenues with local governments.

Recently, more highway-user revenue is being reported from local governments as States permit that form of taxation. Local highway-user taxation is usually in the form of local option taxes on motor fuel. With a local option tax, the State allows local governments to decide whether to levy a tax to be added to the State tax rate. Typically the local option tax is then collected and administered along with the State tax. Regional gasoline taxes are considered to be local highway-user taxes unless levied uniformly throughout the State. See the discussion under "Classification of Highway Receipts."

Local government transfers to States

Receipts and disbursements on Federal-aid projects are usually considered transactions of the State. However, local funds may be expended on such projects. When local governments provide the matching share and the State administers the project, the payments to the State are considered to be intergovernmental transfers.

In some States, a portion of the local share of State tax revenues is not paid directly to local governments. The revenues are retained by the State to match Federal funds for locally controlled road and street projects, or to reimburse the State for work performed at the request of the local government. When the State retains such tax revenue, the transactions do not appear as intergovernmental payments in the State or local finance series of tables.

CLASSIFICATION OF HIGHWAY-USER REVENUES

Taxes and fees imposed on the owners and operators of motor vehicles for their use of public highways are highway-user revenues. Most highway-user revenues are used for highways, but some are used for mass transit or nonhighway purposes. Tables HDF, SDF, DF, MF-3, MV-3, and LDF show the disposition of highway-user revenues.

The clearest example of a highway-user tax or fee is a toll. Before either entering or exiting a toll facility, the driver of a motor vehicle must pay a toll for the use of the highway.

Most motor fuel taxes are classified as highway-user revenues. In most States, the tax is initially paid by wholesale distributors, and the costs are ultimately passed down to motor fuel users.

To qualify as a highway-user revenue in FHWA tables, a motor-fuel tax must be levied per unit of volume, e.g., per

gallon. It must also apply only to motor fuel—as opposed to all petroleum products, or all hazardous materials—or provide a separate rate for motor fuel.

The motor fuel revenue data reported by the States may include small amounts of revenues generated from the nonhighway use of motor fuel. In many States, nonhighway use is tax exempt or subject to refund. In other States, nonhighway use is taxed, but the revenues are separately identifiable, and may be dedicated to special accounts for nonhighway purposes. For example, tax revenues generated from boating use are frequently dedicated for improvement of boating facilities. In cases where nonhighway use is taxed and the revenues are commingled with receipts from highway use, the revenues from nonhighway use will appear in FHWA tables. An example is the gasoline used in lawnmowers, which is not separately identifiable from that used for highways.

Motor-vehicle registration fees, certificate-of-title fees, driver-license fees, and other miscellaneous vehicle fees are all highway-user revenues, since they are imposed on owners and operators as a condition prior to use of a motor vehicle on the highways. Weight-distance taxes, oversize-overweight permits and trip permits are even more directly related to highway use.

Additional special fees imposed on registrations are counted as highway-user revenue although they may not be viewed as such by some States. These additional fees include surcharges for vehicle emission programs or emergency medical services.

Not all taxes paid by highway users are highway-user revenue. Those taxes and fees that target a broader base than highway users are considered to be part of the general tax structure of the State, and are not considered to be highway-user revenues. Most sales and use taxes, gross receipts taxes, and ad valorem property taxes are not targeted specifically at highway users. They are imposed on all sales transactions, business receipts or property.

For example, special environmental taxes imposed equally on all petroleum products, or all hazardous materials, are not considered to be highway-user revenue. Although highway users indirectly pay some of these taxes, they are not being targeted for their use of highways. These taxes are being imposed on a broader group of users of materials that potentially can cause environmental damage. However, environmental fees that are imposed solely on motor fuel or that provide a separate tax rate for motor fuel, are considered to be specifically targeted at highway users and are then classified as highway-user revenue.

State sales taxes imposed on motor vehicle sales typically are not highway-user revenues, because they usually target all

sales transactions. When motor vehicle sales are charged a separate tax rate from that imposed on general sales transactions, the motor-vehicle sales tax is considered a highway-user revenue. The sales tax is specifically directed at highway-users.

CLASSIFICATION OF HIGHWAY RECEIPTS

Highway receipts shown in the HF, SF, and LGF table series include highway-user revenue and all other receipts that are expended for highway purposes, regardless of source. Highway-user revenues that are used for other purposes are excluded.

Funds attributable to highway users

Many States have legislatively dedicated highway-user revenues to specific purposes. For example, a State might dedicate 70 percent of its motor-fuel tax revenues for highway construction, 10 percent for State highway debt service, and 20 percent for schools. Under these circumstances, the SF table series would reflect the construction and debt service dedications, but would not include the amount dedicated for schools.

When highway-user revenues are dedicated to multipurpose funds and mixed with other revenue, it is impossible to precisely identify how revenues from particular sources are used. In this case, the FHWA would assign motor-fuel and motor-vehicle revenue proportionally to each type of expenditure made by the multipurpose fund.

Some States allocate highway-user revenue to the State general fund and then appropriate general funds to highway purposes. In the FHWA analyses, the amount flowing into and out of the State general fund has been offset, so that the highway-user revenues are treated as if they went for highways directly. Tables DF, MF-3 and MV-3 show the amounts that were offset in this fashion.

Tables MF-106 presents the legislative and administrative provisions for allocating State motor-fuel taxes. Table MV-106 provides similar information for motor-vehicle registration fees, driver-license fees, and motor-carrier taxes. These tables are published in the FHWA publication, *Highway Taxes and Fees, How They Are Collected and Distributed*.

Other taxes and fees

All taxes that are dedicated for highways, but are not classified as highway-user revenues, are shown as other taxes and fees. The most common of these taxes are general sales and use taxes, gross receipts taxes, ad valorem property taxes, and severance taxes. Only the amounts allocated to highway purposes from other taxes and fees appear in the tables.

Specific dedications and appropriations for highway purposes from State taxes and fees, are shown in table S-106 in the FHWA publication, *Highway Taxes and Fees, How They Are Collected and Distributed*.

Investment income and miscellaneous receipts

By investing surplus or unused highway funds, many highway agencies are able to realize interest income or profit on the purchase and sale of securities. Other miscellaneous income includes: private donations (including cash contributions and transfers of real property); sign fees; insurance recoveries; rentals; fines and penalties; and permit fees.

Income from sale of bonds and notes

Short-term note issues (a maturity of 2 years or less) have been omitted from all revenue and expenditure tables. Although local governments use short-term debt financing frequently, short-term note issues and redemptions are only included in table LGB-2 for the local finance (LGF) table series. Note interest payments for short-term debt are included in the highway finance summary tables.

Tables that give details of State obligations (SB table series) and local obligations (table LGB-2) have been included. Separate tables have been provided for State and local toll obligations and for State obligations for local roads and streets.

Some bond issues combine borrowing for more than one purpose. The highway share of combined debt in the tables may be estimated.

General funds

Funds from a number of sources are deposited into State and local general funds and effectively lose their identities. Except for highway-user revenues, no effort is made to track the ultimate revenue source of general fund appropriations that are used for highways.

CLASSIFICATION OF HIGHWAY EXPENDITURES

Expenditures for highways have been grouped into the following major classes: capital outlay, maintenance, highway and traffic services, administration, highway law enforcement and safety, debt service, and intergovernmental payments.

Capital outlays are those costs associated with highway improvements, including: land acquisition and other right-of-way costs; preliminary and construction engineering; construction and reconstruction; resurfacing, rehabilitation, and restoration costs of roadway and structure; system

preservation activities; and installation of traffic service facilities such as guard rails, fencing, signs, and signals.

Maintenance costs are those required to keep highways in usable condition. The service life of a highway is not extended beyond the original design.

Highway and traffic service costs are those associated with the operation and management of highways. These costs are classified into three types. The first type involves traffic control operations which includes expenditures for operating traffic control and surveillance systems for monitoring and controlling traffic flow. The second type includes the cost of snow and ice removal. The third type includes miscellaneous costs for highway beautification, litter control, vegetation management, erosion control, and air quality programs.

Administration costs are the general expenses of administering a State or local highway program, including general overhead, engineering, and research costs that are not assignable to specific road projects. They also include expenses associated with highway planning and research, highway litigation, and highway publications.

Highway law enforcement and safety expenditures are: traffic supervision activities of State highway patrols; programs for driver education and training and motorcycle safety; vehicle inspection programs; and enforcement of vehicle size and weight limitations. General police expenses associated with drug interdiction, criminal investigation, and security activities are excluded from the tables.

Debt service costs are the expenses incurred from borrowing funds for highway, road, and street projects. Debt service includes expenditures incidental to the sale of highway bonds, bond administration expenses, interest and redemption payments.

Intergovernmental payments are transfers of funds between different levels of government. A description can be found in the preceding discussions on Federal Aid to State and local governments, State aid to local governments, and local government transfers to State.

INFORMATION FOR USERS

Highway finance information in *Highway Statistics* is statistical in nature and does not represent an accounting or audit statement of State and local governments. The published highway finance information presents a general overview of the funding of highway programs, highway-user taxation and the disposition of highway-user revenues.

All reports and information provided to FHWA are examined for completeness, reasonable consistency within present and past data reporting, and with data reporting instructions contained in a *Guide To Reporting Highway Statistics*. The

FHWA analysis process includes reclassification of State data to achieve greater consistency in the presentation of the data.

The reporting of information varies from State to State. How consistent States are in reporting data according to instructions contained in *A Guide To Reporting Highway Statistics* has an impact on the reliability of comparing the data of different States.

Reporting period

Federal government highway finance data are based on the Federal fiscal year. State government highway finance data may be either fiscal or calendar year at the option of each State's highway agency. Local government highway finance information is based on the variety of fiscal and calendar years used by local governments. Therefore, data shown for any particular year actually represent a mix of data for calendar and fiscal years ending during the reporting period.

Because of the difficulty States encounter in gathering and developing local government highway finance data, the reporting of local government information lags one year behind State government highway finance information.

Interagency coordination

The information in *Highway Statistics* on State government highway finance is based on reports coordinated through State highway agencies from data prepared by State personnel in the State highway agency and in a variety of other State agencies that have highway functions, such as tax and revenue agencies, motor vehicle agencies, public utility commissions, public safety departments, and highway police organizations. The completeness and consistency of State government level data is dependent upon the degree of cooperation among State agencies.

Different State agencies have different accounting and information systems which can lead to timing differences in the recording of revenues and expenditures. Timing differences are most apparent in the transfer of funds among the State agencies responsible for collecting revenues and the State agencies responsible for expending those revenues.

The information in *Highway Statistics* on local government highway finance are based on reports coordinated through State highway agencies from data provided by local governments. States have the option of providing local highway finance data on either an annual or biennial basis with the FHWA estimating the years not reported by the States.

Some State highway agencies develop their local highway finance reports, in part or whole, from central State sources that routinely collect local finance data through legislated local government reporting requirements.

Local highway finance information tends to be more consistent for States which provide data each year and which have legislated local government reporting requirements. The reliability of local highway finance data is highly dependent on the degree of cooperation between State and local governments.

Sampling

States have the option of using a sampling methodology as an alternative to a complete survey of all local governments. Some States use surveys and sampling to supplement centrally collected data.

Sampling programs are developed by the State highway agency to fit FHWA reporting needs, the State's needs, available State resources, and local government structure.

Jurisdictional responsibilities

Differences exist among States depending on the governmental level of responsibility for highway functions and the variation in agencies that perform the functions. Some States have jurisdictional authority over almost all highways in the State and perform almost all highway functions. In other States, local governments have jurisdictional authority over a significant portion of the highways. Comparisons are difficult to make among State governments which have vastly different highway responsibilities. Local government data also tend to vary among States depending upon the degree of local government responsibility for highways.

Some States share a significant amount of highway-user revenue with their local governments. Other States assist local governments by transferring other revenue or by performing direct work on local jurisdiction roads. States performing direct work on local roads tend to report higher levels of capital outlay, maintenance and administration for the amount of revenues raised.

Financing mechanisms

Differences exist between States as to the types of revenues used in funding highways. State and local governments do not impose the same taxes and fees. The tax structure and distribution of tax revenues varies from State to State, and from local government to local government. These differences are often found in how States choose to finance their highway systems and in how States classify revenues.

For example, some States extend paying for a project into the future through bond financing. Large bond sales can greatly inflate the amount of revenue for highways in the year the bonds were sold, especially when total revenues are compared to prior and subsequent years. Similarly, total disbursements can vary greatly with the expenditure of the bond funds.

States which do not use bond financing pay for projects by either accumulating sufficient funds before beginning the project, or paying for the project from current revenues. Those States tend to have a more consistent level of revenues and disbursements than States which use bond financing.

Another example involves toll financing. Not all States have toll facilities, and the size and financial scope of toll facilities varies significantly. A small toll facility may raise and spend a few thousand dollars a year. Some large toll facilities have cash flows of several hundred million dollars to over a billion dollars a year. Toll facilities can represent a significant portion of a State's highway revenues and expenditures. Toll facilities also represent a significant source of revenues for mass transit and other purposes.

Revenue classification

The classification of revenues varies from State to State. FHWA reclassifies some State revenue data to present tables with more uniform definitions. Revenues generated by taxes and fees that are specifically targeted at highway-users are classified as highway-user revenue. See the discussion on "Highway-User Revenue" for details on the FHWA definition. Taxes that are imposed more broadly, such as State sales taxes, are classified as "Other State Taxes," even if the taxes fall on the highway user.

Full data on the collection and disposition of highway-user revenues are included in *Highway Statistics*. However, revenues from other taxes and fees are shown only to the extent that their proceeds are used for highways. Therefore, it is not appropriate to draw conclusions about the total amounts of taxation in these other areas, since only a portion of the proceeds is accounted for.

Revenues whose origins are unidentified are also typically classified as general funds. For example, when State highway agencies receive payments from other State agencies for expenditure on highways, it may not be possible to determine the original source of revenue of the transferred funds.

Expenditure classification

State accounting and information systems assign expenditures based on internal State categories and definitions. To develop their expenditure reports to FHWA, States modify their internal data to correspond to FHWA categories and definitions. The reliability of the reconfigured data is dependent on the detail present in existing State records, and the amount of variation between State and FHWA definitions.

One area in which States have difficulty in recompiling data is in defining types of capital improvements. Project records in some States do not contain a full breakdown of work types. This forces these States to manually assign projects to categories based on narrative descriptions of each project.

Such narratives are of varying levels of detail and are subject to interpretation. This may cause data classification to be less consistent. States use a variety of definitions for capital outlay and physical maintenance. In some States, work performed by maintenance crews may be classified as physical maintenance, even if the project was extensive enough to meet the FHWA definition of capital outlay.

Another problem area is the assignment of indirect costs. FHWA requests that States assign incidental costs related to specific construction and maintenance projects to those categories. For example, salaries and benefits for engineers and construction workers detailed to a construction project should be assigned as construction expenditures. However, many State accounting systems do not assign costs in this manner. For example, salaries may be assigned to capital outlay while employee benefits may be assigned to general administration.

The treatment of pensions for highway agency employees is a significant source of variation. In some States, the pension system is completely independent and separate from the highway program, and pension payments are not shown as highway expenditures. In other States, highway agencies are required to make pension fund payments as their liabilities are incurred. In this case, pension fund payments are shown as a highway expenditure, and should be assigned to capital

outlay, maintenance, or administration in the same manner that salaries are assigned. In a few States, the State highway program is charged for current benefits to retired employees. Since it is impossible to tie these benefits to specific construction and maintenance areas, these costs are reported as general administrative costs.

The combined effect of variations in indirect cost allocations, and the differences in State highway program structures causes the general administration numbers to vary widely among the States. For these reasons, the administration data are not a suitable measure for comparisons of State administrative efficiency.

Trends

Any examination of highway finance information needs to take into account the normal changes that occur because of changes in revenue policies, program emphasis or funding, e.g., tax rate increases or greater tax compliance, establishment of a State highway trust fund, reallocation of highway-user revenue distributions, or special construction programs. Information on highway program changes is available in *Highway Taxes and Fees, How They Are Collected and Distributed*.

FUNDING FOR HIGHWAYS AND DISPOSITION OF HIGHWAY-USER REVENUES, ALL UNITS OF GOVERNMENT, 1997 1/

1/ This table summarizes data reported in greater detail in the FA, FE, SF, and LGF table series. Some data are preliminary. Table HF-10A contains final data for all units of government for 1996.

2/ Includes the Mass Transit Account of the Highway Trust Fund. Also includes Federal Highway Administration activities funded by general funds and all other agencies and funds that make appropriations for highways or that receive highway-user revenues. See Table FA-5 for additional information.

3/ Data for local governments are estimated. Amount reported for General Fund Appropriations in the Local column includes some State funds that could not be identified at this time. These figures will be revised in Table HF10A in next year's Highway Statistics.

4/ Represents gross receipts less refunds and loss allowances.

5/ Federal column amount represents net collections less transfers to the Highway and Mass Transit accounts of the Highway Trust Fund. Due to timing differences between collections and transfers to the Highway Trust Fund, the amount will not correspond exactly to distributions for deficit reduction.

6/ Includes only those collection and administrative costs paid from motor-fuel and motor-vehicle tax receipts. Operational costs of toll facilities are reported as traffic services. Federal collection expenses are excluded since they are paid for by the General Fund. Local expenses are excluded, because local motor-fuel and motor-vehicle tax data are reported net of collection expenses.

7/ Amounts shown represent Federal payments to territories, and Federal expenditures in territories for highways and mass transit. Territories' funding for highways are excluded from the highway finance table series. See Table R-1 for details on territories.

8/ Proceeds and redemptions of short-term notes and refunding issues are excluded.

9/ Negative numbers indicate that funds were placed in reserves.

10/ Includes small amounts of engineering and equipment costs not charged to capital outlay and maintenance.

1/ This table revises preliminary data in Table HF-10 in last year's "Highway Statistics".
 2/ Includes the Mass Transit Account of the Highway Trust Fund. Also includes Federal Highway Administration activities funded by general funds and all other agencies and funds that make appropriations for highways or that receive highway-user revenues. See Table FA-5 for additional information.
 3/ Some local government data are estimated.
 4/ Represents gross receipts less refunds and loss allowances.
 5/ Federal column amount represents net collections less transfers to the highway and mass transit accounts of the Highway Trust Fund. Due to timing differences between collections and transfers to the Highway Trust Fund, the amount will not correspond exactly to distributions for deficit reduction and for the Leaking Underground Storage Tank (LUST) Fund.
 6/ Includes only those collection and administrative costs paid from motor-fuel and motor-vehicle tax receipts. Operational costs of toll facilities are reported as traffic services. Federal collection expenses are excluded since they are paid for by the General Fund. Local expenses are excluded, because local motor-fuel and motor-vehicle tax data are reported net of collection expenses.
 7/ Amounts shown represent federal payments to territories, and federal expenditures in territories for highways and mass transit. Territories' funding for highways are excluded from the highway finance table series. See Tables R-1 for details on territories.
 8/ Proceeds and redemptions of short-term notes and refunding issues are excluded.
 9/ Negative numbers indicate that funds were placed in reserves.
 10/ Includes small amounts of engineering and equipment costs not charged to capital outlay and maintenance.

TOTAL RECEIPTS FOR HIGHWAYS, BY GOVERNMENTAL UNITS
1945-1997

TOTAL DISBURSEMENTS FOR HIGHWAYS, BY FUNCTION 1945-1997

DISPOSITION OF HIGHWAY-USER REVENUES, ALL LEVELS OF GOVERNMENT - 1996 1/

1/ This table summarizes highway-user revenues and their disposition for all levels of government. See Tables SDF and LDF for details on State and local imposts.

2/ Total Federal receipts based on gross tax liabilities and refunds reported by the U.S. Department of the Treasury. Payments attributable to highway users in each State are estimated by the Federal Highway Administration (FHWA).

3/ Amounts shown for each State include only those transfer payments and direct Federal work, which are funded by the Highway Trust Fund's highway-user revenues, rather than Trust Fund interest income, or general funds. See Table FA-21 for full details on Federal funding of highways.

4/ Payments to each State are partially estimated based on each State's percentage of total obligations for transit.

5/ Amounts shown represent total Federal highway-user revenues collected in each State less amounts received

by the State from the Highway Trust Fund for highways and mass transportation. States with negative numbers receive more from the Highway Trust Fund than the amount of collections attributed to those States.

6/ Gross allocations of highway-user revenues to State general funds were reduced by the amount of appropriations for highways from State general funds. See Table DF for details.

7/ Amounts shown represent direct Federal expenditures that can not be attributed to any single State and the net increase or decrease in the Highway and Mass Transit Accounts of the Highway Trust Fund. See Tables FA-21 and HF-10 for more details.

8/ Data for Territory imposed taxes are excluded. See Table R-1.

1/ See Tables FA-21, SF-21, and LCF-21 for details on highway funding of Federal, State and Local Governments.
 2/ Excludes amounts allocated for collection expenses and nonhighway purposes.
 See Table HDF for information on gross highway-user revenue collections.
 3/ Amounts shown reflect Highway Trust Fund revenues attributable to highway-user

taxes that were expended for highways in each State. The total excludes amounts expended for highways in territories. See Table FE-9 for State-by-State attribution of Highway Trust Fund receipts.
 4/ Includes interest earned on Highway Trust Fund reserves.
 5/ Excludes short-term notes and refunding bond issues.

TOTAL DISBURSEMENTS FOR HIGHWAYS, ALL UNITS OF GOVERNMENT - 1996 1/

OCTOBER 1998

(THOUSANDS OF DOLLARS)

1/ Disbursements are classified by system on which expended, rather than by expending agencies, e.g., capital outlay on local rural roads includes expenditures from Federal, State and local funds. Data includes estimates. See Tables FA-21, SF-21, and LSF-21 for details on

highway disbursements by each level of government.

2/ Excludes short-term notes and refunding bond issues.

TABLE FE-10

ITEM	HIGHWAY ACCOUNT	MASS TRANSIT ACCOUNT 2/	TOTAL
I. Opening balance:	\$12,117,818,017.48	\$9,524,581,736.30	\$21,642,399,753.78
II. Receipts:			
A. Excise taxes (transferred General Fund receipts)			
1. Gasoline	12,855,183,246.00	2,486,383,207.00	15,341,566,453.00
2. Gasohol	454,229,064.00	433,644,019.00	887,873,083.00
3. Diesel and Special motor fuels	5,211,582,331.00	702,360,389.00	5,913,942,720.00
4. Tires	299,745,000.00	-	299,745,000.00
5. Trucks and trailers	1,674,348,000.00	-	1,674,348,000.00
6. Federal use tax	761,759,580.00	-	761,759,580.00
7. Fines and penalties	5,853,428.73	-	5,853,428.73
8. Total excise taxes	21,262,700,649.73	3,622,387,615.00	24,885,088,264.73
B. Deduct - reimbursement to General Fund receipts (refunds and tax credits)			
1. Diesel powered vehicle rebate	11,331,644.00	-	11,331,644.00
2. Diesel fuel used in buses	29,085,075.00	-	29,085,075.00
3. Diesel fuel-other	456,231,636.00	51,872,000.00	508,103,636.00
4. Gasohol	13,270,140.00	-	13,270,140.00
5. Gasoline used to make gasohol	(134,437,930.00)	146,822,000.00	12,384,070.00
6. Gasoline-other	188,712,940.00	33,664,000.00	222,376,940.00
7. Total	564,193,505.00	232,358,000.00	796,551,505.00
C. Transfers			
1. To Land and Water Conservation Fund	857,000.00	143,000.00	1,000,000.00
2. To Aquatic Resources Trust Fund	188,329,000.00	32,208,000.00	220,537,000.00
3. Total	189,186,000.00	32,351,000.00	221,537,000.00
D. Net excise taxes	20,509,321,144.73	3,357,678,615.00	23,866,999,759.73
E. Interest			
1. On investments	802,095,389.80	638,059,493.56	1,440,154,883.36
2. Under Cash Management Improvement Act (net)	2,654,951.00	3,942.00	2,658,893.00
3. Total	804,750,340.80	638,063,435.56	1,442,813,776.36
F. Total receipts	21,314,071,485.53	3,995,742,050.56	25,309,813,536.09
III. Expenditures: (checks written basis)			
A. Federal Highway Administration			
1. Highways (Federal aid)	20,464,647,226.23	-	20,464,647,226.23
2. Right-of-way revolving fund	1,711,968.87	-	1,711,968.87
3. Highway related safety grants	96,953,023.75	-	96,953,023.75
4. Highway safety research and development	173,801.93	-	173,801.93
5. Trust Fund share other highway programs	865,812.70	-	865,812.70
6. National Park Service construction	2,116,993.50	-	2,116,993.50
7. Other	49,723,364.22	-	49,723,364.22
9. Total	20,616,192,191.20	-	20,616,192,191.20
B. Federal Transit Administration	-	3,662,696,553.19	3,662,696,553.19
C. National Highway Traffic Safety Administration	233,129,458.16	-	233,129,458.16
D. Federal Railroad Administration	7,428,101.29	-	7,428,101.29
E. Total expenditures	20,856,749,750.65	3,662,696,553.19	24,519,446,303.84
IV. Balances in Trust Fund: 4/			
A. Investments			
U. S. Treasury special certificates of indebtedness 3/	12,513,353,000.00	9,827,277,000.00	22,340,630,000.00
B. Undisbursed balances			
1. Available for investment	(338,417,060.15)	149.06	(338,416,911.09)
2. Highways (Federal aid)	291,837,139.93	-	291,837,139.93
3. Right-of-way revolving fund	17,744,040.20	-	17,744,040.20
4. Highway related safety grants	15,153,752.11	-	15,153,752.11
5. Highway safety research and development	170,341.04	-	170,341.04
6. Trust Fund share other highway programs	2,342,230.34	-	2,342,230.34
7. National Park Service construction	16,349,452.92	-	16,349,452.92
8. Mass Transit Account	-	30,350,084.61	30,350,084.61
9. National Highway Traffic Safety Administration	37,352,845.09	-	37,352,845.09
10. Federal Railroad Administration	9,876,912.52	-	9,876,912.52
11. Other	9,377,098.36	-	9,377,098.36
12. Total	61,786,752.36	30,350,233.67	92,136,986.03
C. Total balance	\$12,575,139,752.36	\$9,857,627,233.67	\$22,432,766,986.03

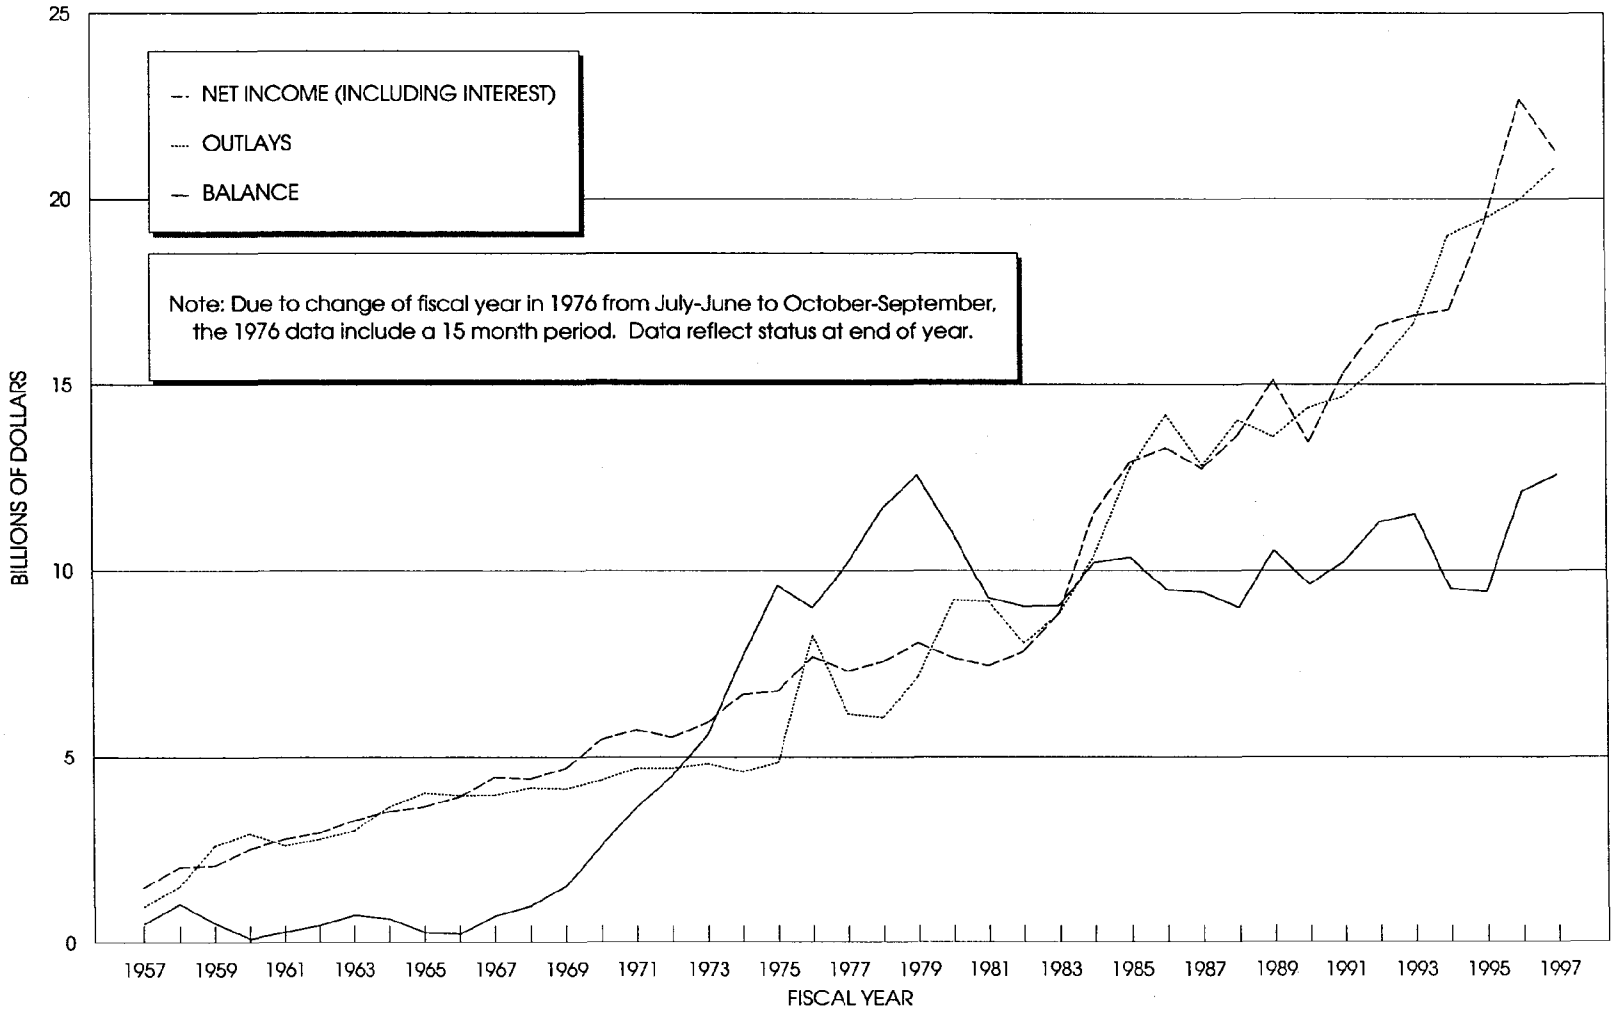

1/ The Fund was created June 29, 1956 with the enactment of the Highway Revenue Act of 1956. The total tax receipts and Highway Account tax receipts shown reflect revised financial statements issued in December 1997.

2/ The Mass Transit Account was established April 1, 1983 with enactment of the Surface Transportation Assistance Act of 1982.

3/ Certificates held September 30, 1997 for \$22,340,630,000.00 bore interest at 6.58 percent.

4/ As of October 1, 1998, the balance of the Highway Account of Highway Trust Fund will be reduced to \$8 billion and interest accrual to the Fund will cease. The balance above the \$8 billion, and the interest that formerly accrued to the fund, will be placed in Treasury's General Fund. These provisions were mandated by the Transportation Equity Act for the Twenty-First Century, section 9904(a).

1/ All amounts are net after payment of refunds and transfers. See tables FE-101A and FE-101B for explanation of the various taxes deposited in the Trust Fund.
 2/ Totals may not equal sum of parts due to independent rounding.
 3/ The transition quarter includes the months of July, August, and September 1976.
 4/ Effective April 1, 1983, 1 cent per gallon of the motor-fuel tax is deposited in the Mass Transit Account within the Federal Highway Trust Fund. Effective December 1, 1990, the deposit was raised to 1.5 cents per gallon. Effective October 1, 1995, the deposit was 2 cents per gallon. Effective October 1, 1997, the deposit is 2.86.
 5/ Includes refunds of repealed taxes on inner tubes, tread rubber, lubricating oil, and truck parts and accessories.

1/ The highway use of fuel shown in this table was used in the development of 1997 tables FE-9 and FE-221. The data reflect revisions made since the publication of "Highway Statistics, 1996."

2/ As shown here, gasohol is defined to be a blend of gasoline and fuel alcohol where the alcohol is 5.7 to 10 percent by volume, of the blended product. These figures are estimated by the Federal Highway Administration.

FEDERAL TAX RATES ON MOTOR FUELS AND LUBRICATING OIL 1/

1/ The focus of this table is on the Federal taxes on motor fuels used on highways. The detail provided for other uses is incomplete. Most of the revenue raised by the taxes described is dedicated to the Federal Highway Trust Fund for the financing of highway and transit programs.

2/ Includes the product commonly or commercially known or sold as gasoline and suitable for use as a motor fuel with an octane level of at least 75. The gasoline tax applies to all fuel volume imported or produced. Gasoline used by State and local governments and nonprofit educational institutions is not taxed or tax is refunded if paid.

3/ Until April 1, 1983, the tax applies to all diesel fuel used in a highway vehicle registered for highway use. Diesel fuel used for farming is not taxed, or if the tax has been paid, it is fully refundable. Diesel fuel used by State and local governments and nonprofit educational institutions is not taxed or tax is refunded if paid.

4/ Special fuels include liquefied petroleum gases (propane, butane), benzol, benzene, and naphtha and other liquid (except gasoline, gasohol, and diesel fuel otherwise taxable, kerosene, gas oil or fuel oil) when used in a taxable way. The rates shown are for propane, the most commonly used special fuel. Through March 31, 1983, the tax applies to all special fuels used in a highway vehicle registered for highway use. Effective April 1, 1983, the tax applies to special fuel used in a motor vehicle or motorboat. Special fuels used for farming is not taxed, or if the tax has been paid, it is fully refundable. Special fuel used by State and local governments and nonprofit educational institutions is not taxed or tax is refunded if paid.

5/ The tax originally applied to all lubricating oil regardless of use.

6/ Gasohol was not defined in Federal tax law until January 1, 1979. The products later defined as gasohol were taxable, to the extent they existed, under the provisions of the gasoline tax. Effective January 1, 1979, gasohol was defined to be a blend of gasoline and at least 10 percent (by volume) alcohol, excluding alcohol made from petroleum, natural gas or coal. As so defined, gasohol is exempt from taxation from January 1, 1979 through March 31, 1983.

7/ Cutting oil is exempt from stated taxes. The entire tax on other lubricating oil became refundable for nonhighway use.

8/ Effective December 1, 1978, school buses along with intercity and local buses used to transport the general public for compensation on scheduled routes (or 20 or more passenger buses on nonscheduled routes) are exempt from the stated taxes for motor fuel and lubricating oil. Effective August 1, 1984, the exemption for diesel and special fuel used by these buses is 3 cents per gallon less than the prevailing rate unless used by qualified local buses which are fully exempt.

9/ Effective January 1, 1979 through March 31, 1983, the 2-cent refund or credit for nonhighway gasoline use is permitted only for off-highway business use; special fuel is taxed at the full rate except tax is 2 cents for off-highway business use, and the tax on lubricating oil is refundable only for off-highway use. Effective January 1, 1979 through December 31, 1982 the tax paid on motor fuel used in certain taxicabs is fully refundable.

10/ The diesel fuel tax is imposed on any liquid suitable for use as a fuel in a diesel-powered vehicle or train. Off-highway business use is exempt from stated taxes. Effective January 1, 1983 through September 30, 1988, a 4-cent refund can be claimed for certain taxicab use.

11/ After January 1, 1985 and before August 21, 1996, a one-time diesel differential payment is made to the original purchaser of a diesel automobile of \$102, and of a diesel truck or van, 10,000 pounds gross weight or less, \$198. The payment decreases by one-sixth for each prior model year vehicle and is not made for 1978 or earlier model year vehicles.

12/ Includes 0.1 cent per gallon tax for the Leaking Underground Storage Tank Trust Fund effective January 1, 1987. Collection of the tax was suspended for the period September 1 through December 1, 1990, and expired January 1, 1996. The fund is reinstated on October 1, 1997, and will expire on March 31, 2005.

13/ Includes 2.5 cents per gallon tax for deficit reduction.

14/ Where two rates are shown, the first is for ethanol blends and second is for methanol blends. Effective January 1, 1993, the definition of gasohol is expanded. The original definition is retained and called 10 percent gasohol and continues to be taxed at the rates shown. Blends with at least 7.7 percent alcohol but less than 10 percent are taxed at 9.942 cents and 9.48 cents. Blends with at least 5.7 percent alcohol but less than 7.7 percent are taxed at 11.022 cents and 10.68 cents. Effective October 1, 1993, the rates for 7.7 percent gasohol are 14.242 cents and 13.78 cents respectively for ethanol blends and methanol blends; the rates for 5.7 percent gasohol are 15.322 cents and 14.98 cents. Effective January 1, 1996, the rates for 7.7 percent gasohol are 14.142 and 13.68 cents respectively for ethanol and methanol blends; the rates for 5.7 percent gasohol are 15.222 and 14.88 cents.

15/ Includes 5.8 cents per gallon for deficit reduction. Effective October 1, 1995, 2.5 cents of the 6.8 cents is dedicated to the Federal Highway Trust Fund.

16/ Until October 1, 1993, compressed natural gas was not taxed. Thereafter it is taxed at 48.54 cents per thousand cubic feet for deficit reduction.

17/ Proceeds of the 4.3 cents-per-gallon tax on highway motor fuel formerly deposited in the General Fund for deficit reduction are now deposited in the Highway Trust fund effective October 1, 1997.

18/ Several alternative fuels are taxed at reduced rates effective October 1, 1997. Liquefied petroleum gases are taxed at 13.6 cents-per-gallon, liquefied natural gas is taxed a 11.9 cents-per-gallon, and M85 (85 percent methanol and 15 percent gasoline) is taxed at 9.25 cents-per-gallon.

1/ The focus of this table is on the Federal taxes on motor vehicles and related products used on highways. The detail provided for other uses is incomplete. Most of the revenue raised by the taxes described is dedicated to the Federal Highway Trust Fund for the financing of highway and transit programs.

2/ Percent of manufacturer's sales price through March 31, 1983; percent of retailer's sales price thereafter.

3/ Percent of manufacturer's sales price to February 26, 1926; re-enacted effective June 21, 1932, on a cents-per-pound basis, but applicable to all tires and tubes, not limited to those for automotive vehicles. Tires and tubes for toys exempted effective November 1, 1951. The additional 3 cents per pound, effective July 1, 1956, and 2 cents per pound, effective July 1, 1961, apply to tires for highway vehicles only. Laminated tires are taxed 1 cent per pound effective July 1, 1965. Effective January 1, 1984, tires of 40 pounds or less are exempt.

4/ Applies to tires "of the type used on highway vehicles."

5/ The following are exempt from the stated taxes: effective November 1, 1951, house trailers, effective June 22, 1965, school buses, camper bodies, motor homes, truck and trailer bodies designed for seed, feed, and fertilizer, small three-wheeled vehicles; effective September 23, 1971, trucks, buses, and trailers 10,000 pounds or less gross weight; and, effective December 11, 1971, local transit buses in urban use and trash container bodies for trucks.

6/ The tax applies to the entire gross weight of a vehicle or combination if its gross weight exceeds 26,000 pounds. Buses used in local transit service are exempt.

7/ Although the "basic" tax on automobiles was 7 percent of the manufacturer's wholesale price until January 1, 1966, the 10-percent

rate that became effective on a temporary basis November 1, 1951 remained in effect through periodic extensions.

8/ Automobile parts and accessories are exempt from stated taxes.

9/ Taxes paid on buses purchased after April 19, 1977 are refunded. Effective December 1, 1978, bus parts and accessories are exempt and school buses along with intercity and local buses used to transport the general public for compensation on scheduled routes (or 20 or more passenger buses on nonscheduled routes) are exempt from the stated taxes for tires, tubes, and tread rubber.

10/ Although the "basic" tax is 5 percent of the manufacturer's wholesale price, the 8-percent rate that became effective on a temporary basis November 1, 1951, remained in effect through periodic extensions until the tax was repealed.

11/ The tax on nonhighway tires is 4.875 cents per pound except laminated tires are taxed at 1 cent per pound.

12/ Trucks 33,000 pounds or less gross vehicle weight, trailers 26,000 pounds or less gross vehicle weight and rail/highway trailers are exempt from stated taxes. Effective July 18, 1984, piggyback trailers are taxed at 6 percent through July 17, 1985.

13/ The effective date for the rate change for small owner-operator with 5 or fewer taxable trucks is July 1, 1985. Rate is reduced by 25 percent for logging trucks. Trucks used less than 5,000 miles (farm trucks 7,500 miles) per taxable year on public highways and trucks with gross weights under 55,000 pounds are exempt. Effective July 1, 1987, trucks based for registration purposes in Canada or Mexico shall be taxed at 75 percent of the rate before they can operate in the United States. Previously these vehicles were exempt.

	15.322	10/01/97	9.862	2.86	0.1	2.5
Other Taxes - All Proceeds to Highway Account						
Tires	0-40 pounds, no tax Over 40-70 pounds, 15 cents per pound in excess of 40 Over 70-90 pounds, \$4.50 plus 30 cents per pound in excess of 70 Over 90 pounds, \$10.50 plus 50 cents per pound in excess of 90					
Truck and trailer sales 7/	12 percent of retailer's sales price for tractors and trucks over 33,000 pounds gross vehicle weight (GVW) and trailers over 26,000 pounds GVW					
Heavy vehicle use	Annual tax: Trucks 55,000-75,000 pounds GVW, \$100 plus \$22 for each 1,000 pounds (or fraction thereof) in excess of 55,000 pounds Trucks over 75,000 pounds GVW, \$550					
<p>1/ Source: Office of Highway Information Management, Federal Highway Administration.</p> <p>2/ Special fuels include benzol, benzene, naphtha, liquefied petroleum gas, casing head and natural gasoline, or other liquid used fuel in a motor vehicle except diesel, kerosene, gas oil, fuel oil, or a product taxable under the gasoline tax provisions. Prior to October 1, 1997, most special fuels were taxed at a single rate. Exceptions were LPG, which was not subject to the LUST tax, and neat alcohols, which are taxed at various rates depending on type and source of alcohol. Beginning October 1, 1997, LPG and LNG are taxed based on their energy content relative to gasoline. Other special fuels, with the exception of neat alcohols, are taxed at the basic special fuels rate.</p> <p>3/ Neat alcohol made with alcohol derived from petroleum products (M85) is taxed as a special fuel.</p> <p>4/ In 1996, only \$166,000 was collected by Internal Revenue Service for taxes on neat alcohol and some other miscellaneous sources. There is no accurate way to distribute miscellaneous taxes to specific funds or accounts.</p> <p>5/ Compressed natural gas is taxed 48.54 cents per thousand cubic feet (MCF), with the Mass Transit Account receiving 9.7 cents per MCF and the Highway Account receiving 38.83 cents per MCF. Roughly converting these amounts to cents per gallon results in the entries in the table above.</p> <p>6/ Section 1920 of the Energy Policy Act of 1992 expanded the definition of gasohol effective January 1, 1993. Prior to the Act, gasohol was defined as a blend of gasoline and at least 10 percent fuel alcohol (by volume), and blends containing less than 10 percent alcohol were taxed as gasoline. Under the Act, the product now called 10 percent gasohol corresponds to the old definition. Two additional types of gasohol are also defined. The term 7.7 percent gasohol includes gasoline-alcohol blends where the alcohol content is at least 7.7 percent but less than 10 percent. The term 5.7 percent gasohol includes gasoline-alcohol blends where the alcohol content is at least 5.7 percent but less than 7.7 percent.</p> <p>7/ Section 1401 of the Taxpayer Relief Act of 1997 replaced a mechanism by which the fair market value of tires exceeding 40 pounds was deducted from the fair market value of a truck and replaced it with a credit for the excise tax paid. This provision was effective January 1, 1998.</p>						

APPORTIONMENT OF FEDERAL FUNDS ADMINISTERED BY THE FEDERAL HIGHWAY ADMINISTRATION FOR FISCAL YEAR 1998 1/

OCTOBER 1998

(THOUSANDS OF DOLLARS)

1/ Apportioned pursuant to the Transportation Efficiency Act of 1998 (TEA-21) as amended by the TEA-21 Restoration Act. Does not include funds from the Mass Transit Account of the Highway Trust Fund.
 2/ Does not include funds from the following programs: emergency relief, Federal lands Highway programs, Commonwealth of Puerto Rico highway programs, high priority projects.

Woodrow Wilson Bridge, National Byways, construction of ferry boats and ferry terminal facilities, and intelligent vehicle-system, among others. These funds are allocated from the Highway Trust Fund.
 3/ Under TEA-21, Puerto Rico received a stand-alone authorization of \$92,910,083 for FY 1998.

1/ The data reported in this table are from the Fiscal Management Information System. Due to rounding, the data may not agree with the summary of obligations contained in Report M79 prepared by the Office of Fiscal Services. Negative numbers indicate adjustments to projects.
2/ Projects identified in Sections 1103-1108 of the Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991.
3/ Programs discontinued under ISTEA.
4/ Programs no longer receive separate apportionments. Under ISTEA, these programs are included in the Surface

Transportation Program (STP). Obligations shown are for old funding. Obligations of new funding are included in STP column.
5/ Includes miscellaneous programs funded by the Highway Trust Fund and general funds administered directly by FHWA and expenditure of funds transferred to FHWA by other agencies.
6/ Includes FHWA administrative and research costs, and studies.

1/ All expenditures are for the Federal fiscal year. Data not available for shaded areas.
 2/ Includes timber sales, lease of Federal lands, and oil and mineral royalties.
 3/ Differences between amounts in this column and those shown on Table SF-21 are due to differences in reporting years and funds in transit.
 4/ Includes Federal-aid account expenditures administered jointly with other agencies.
 5/ Does not include work performed within the confines of military reservations.
 6/ Includes all expenditures for highways from the Highway Trust Fund that are not included in

FHWA accounting records. Jointly-administered programs are shown as FHWA expenditures.
 7/ Excludes Forest Development Trails Program trails for timber access and forest management that do not provide full public access.
 8/ States are permitted to shift a portion of the funds received from the Highway Account to mass transit purposes. Amount shown includes funds administered by the Federal Highway Administration, Federal Transit Administration and Federal Railroad Administration for mass transit purposes. Excludes Transit Account.

1/ The data reported in this table are from the Fiscal Management Information System. Due to rounding, the data may not agree with the summary of obligations contained in report M79 prepared by the Office of Fiscal Services. Negative numbers indicate adjustments to projects.

2/ Projects not identified as urban or rural.
3/ Includes projects not otherwise included in the remaining improvements types, such as transit.

MILES OF FEDERAL-AID ROADWAY PROJECTS UNDERWAY 1/

From 1993 to 1997, an average of 16,389 miles had Federal-aid roadway improvement projects underway.

1/ Data source is the Fiscal Management Information System. Capacity addition improvements include Relocation, some Reconstruction, Major Widening, and Reconstruction-added capacity. The portion of reconstruction miles resulting in capacity improvements is estimated for 1993-1994-based on new detail available beginning with the 1995 data. System preservation improvements include some Reconstruction, Minor Widening, Restoration and Rehabilitation, Resurfacing, and Reconstruction-no added capacity. Excludes certain improvement types such as Safety/Traffic/Traffic System Management, Environmentally-related Projects, Special Bridge Programs and Other projects.

OBLIGATION OF FEDERAL FUNDS FOR ROADWAY PROJECTS UNDERWAY 1/

(THOUSANDS OF DOLLARS)

Obligation of Federal funds for roadway projects underway averaged \$8.4 billion per year from 1993 to 1997.

1/ Data source is the Fiscal Management Information System. Capacity addition improvements include Relocation, some Reconstruction, Major Widening, and Reconstruction-added capacity. The portion of reconstruction miles resulting in capacity improvements is estimated for 1993-1994-based on new detail available beginning with the 1995 data. System preservation improvements include some Reconstruction, Minor Widening, Restoration and Rehabilitation, Resurfacing, and Reconstruction-no added capacity. Excludes certain improvement types such as Safety/Traffic/Traffic System Management, Environmentally-related projects, Special Programs, and Other projects.

MILES OF FEDERAL-AID ROADWAY PROJECTS UNDERWAY BY IMPROVEMENT TYPE 1/

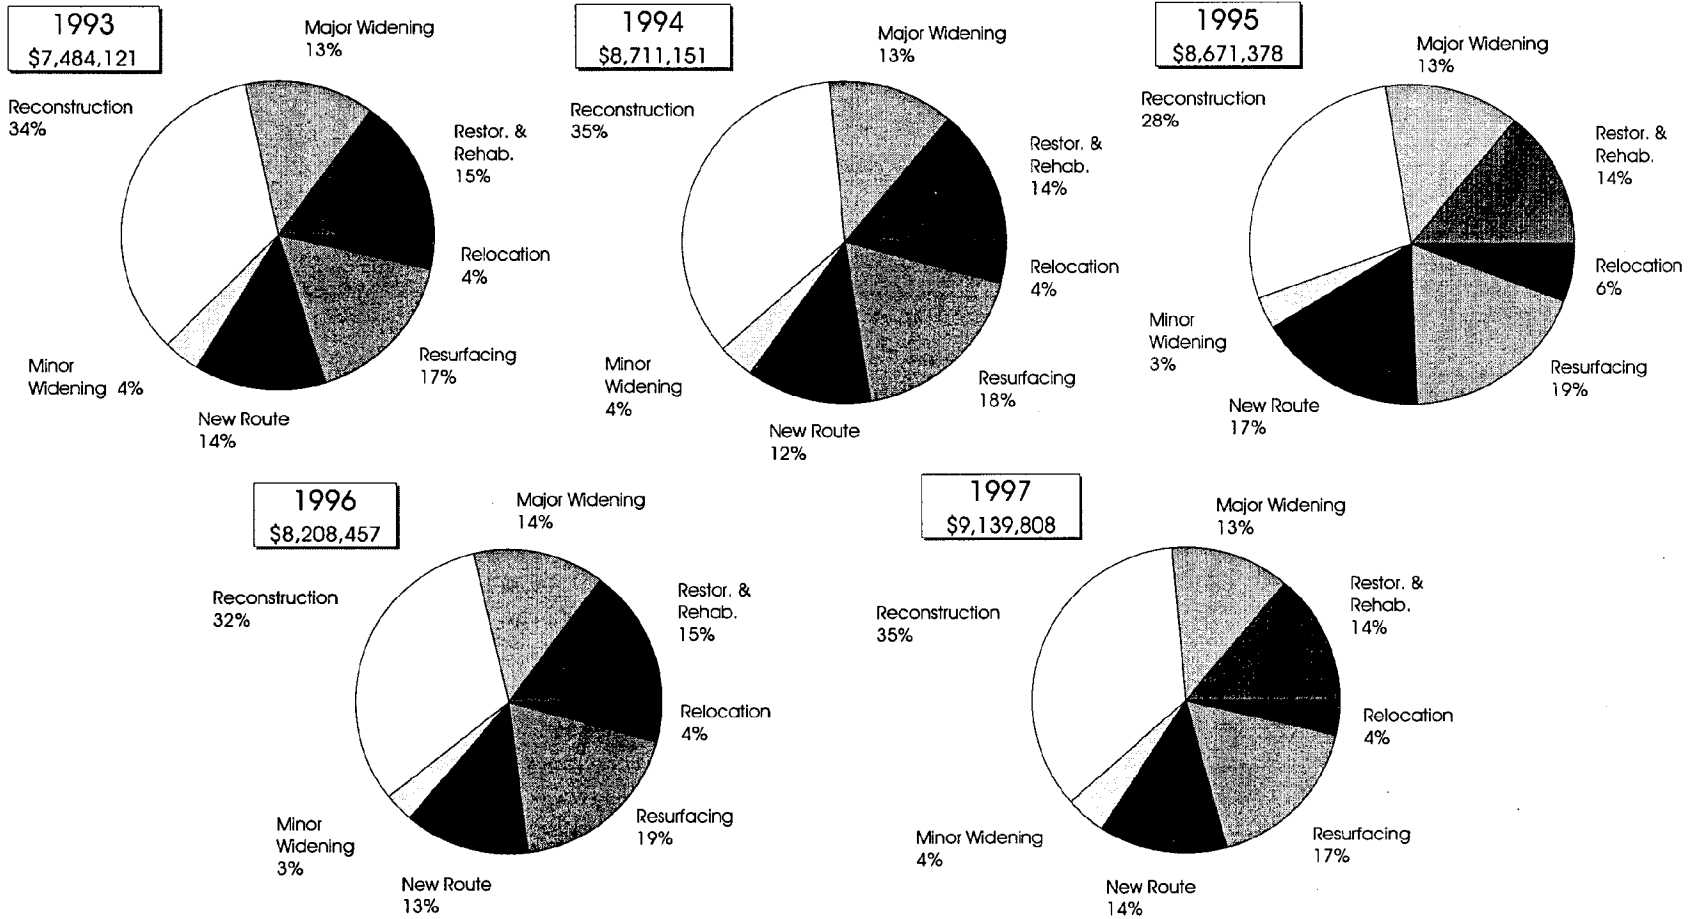

From 1993 to 1997, an average of 16,389 miles had Federal-aid roadway improvement projects underway.

1/ Data source is the Fiscal Management information System.

OBLIGATION OF FEDERAL FUNDS FOR ROADWAY PROJECTS UNDERWAY BY IMPROVEMENT TYPE 1/ (THOUSANDS OF DOLLARS)

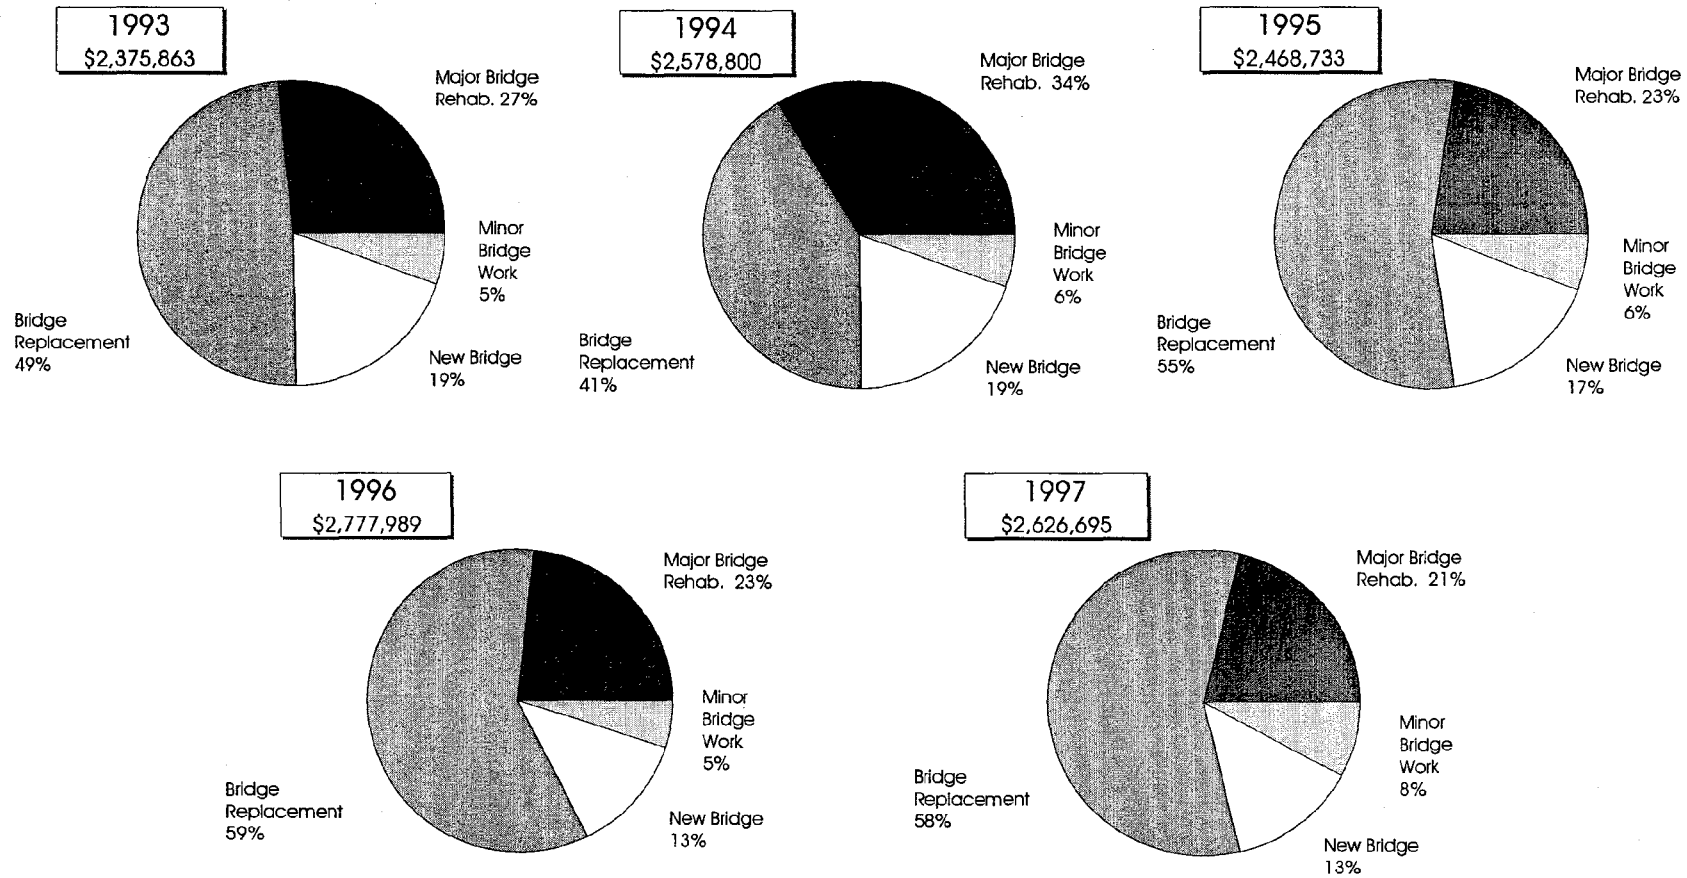

Obligation of Federal funds for roadway projects underway averaged \$8.4 billion per year from 1993 through 1997.

1/ Data source is the Fiscal Management Information System.

OBLIGATION OF FEDERAL FUNDS FOR BRIDGE PROJECTS UNDERWAY BY IMPROVEMENT TYPE 1/ (THOUSANDS OF DOLLARS)

Obligation of Federal funds for bridge projects underway averaged \$2.6 billion per year from 1993 through 1997.

1/ Data source is the Fiscal Management Information System.

USES OF SURFACE TRANSPORTATION PROGRAM FUNDS FOR PROJECTS NOT ON THE NATIONAL HIGHWAY SYSTEM, BY IMPROVEMENT CATEGORY 1/ FISCAL YEAR 1997 OBLIGATIONS OF FEDERAL FUNDS

Table with columns for STATE, AREA, ROADWAY (Federal Funds, Lane Miles), BRIDGE (Federal Funds, Number of Bridges), TRANSIT (Federal Funds, Number of Vehicles), SAFETY 2/ (Federal Funds, Number of Projects), TRAFFIC OPERATIONS (Federal Funds, Number of Projects), ENHANCEMENTS 3/ (Federal Funds), OTHER 4/ (Federal Funds), and TOTAL (Federal Funds). Rows include states like Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, and Ohio.

TABLE STP-1
SHEET 3 OF 3

Table with columns for STATE, AREA, ROADWAY, BRIDGE, TRANSIT, SAFETY, TRAFFIC OPERATIONS, ENHANCEMENTS, OTHER, and TOTAL. Includes rows for various states like Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming, and U.S. Total.

1/ Most highway projects are multi-year. Obligation of funds may occur throughout the life of the project. In this table, obligations of funds are reported for the year in which they occur. Deobligations of prior year Federal funds are subtracted from the amounts shown. Negative numbers for a category indicate that deobligations of prior year funds exceed obligations of current year funds.
2/ Includes only projects funded with monies set aside for roll-highway crossings and the hazard elimination programs under Sections 130 and 152 of Title 23 US Code.
3/ This category includes projects such as bicycle or pedestrian facilities, beautification programs, historic preservation, and mitigation of pollution from highway run-off.
4/ Includes engineering, right of way, planning and other similar obligations.

1/ Detailed information is available from the Federal Highway Administration in its quarterly publication "Price Trends for Federal-aid Highway Construction," prepared by the Federal-aid and Design Division, Office of Engineering.

DISTRIBUTION OF COSTS ON FEDERAL AID HIGHWAY CONSTRUCTION CONTRACTS OVER \$1,000,000 ON THE NATIONAL HIGHWAY SYSTEM REPORTED DURING CALENDAR YEAR 1997 AS COMPLETED

1/ Equipment includes fuel and lubricants 2-5%, but excludes operators' and mechanics' wages. Overhead includes contractors' on-site expenses such as mobilization, office, rental, licenses, insurance, ect.

2/ Aggregates consist of sand, gravel, slag, crushed stone, ect., for use in bases, portland cement concrete and bituminous surfaces, and portland cement concrete structures.

3/ For both roadway and structures.

4/ For various types of bituminous surfaces and bases.

5/ Includes structural, reinforcing, culvert and miscellaneous steel.

6/ Gross earnings of contractors' employees in the following classifications: Administrative and Supervisory, Skilled, Intermediate, and Unskilled labor.

Source: Federal-Aid and Design Division
Office of Engineering, FHWA
(202) 366-4636

**USAGE FACTORS FOR
MAJOR HIGHWAY CONSTRUCTION MATERIALS AND LABOR 1/**

**U.S. WEIGHTED AVERAGES FOR ALL FEDERAL-AID HIGHWAY CONSTRUCTION
CONTRACTS OVER \$1,000,000 ON THE NATIONAL HIGHWAY SYSTEM
REPORTED AS COMPLETED DURING CALENDAR YEARS 1995, 1996, 1997**

OCTOBER 1998

TABLE PT-4

TYPE OF MATERIALS AND LABOR	UNIT	NUMBER OF UNITS PER MILLION DOLLARS OF CONSTRUCTION COST 2/
Cement (excludes cement in concrete pipe)	Ton	738
Bituminous material	Ton	441
Aggregates 3/		
Purchased (by contractors)	Ton	14,354
Produced (by contractors)	Ton	3,479
Steel		
Structural (shapes, plates, H and sheet piling)	Ton	24
Reinforcing (pavement and structural reinforcement)	Ton	45
Culvert pipe (corrugated metal and structural plate, pipe arches and arches)	Ton	2
Miscellaneous (joint devices, tubular piling, etc.)	Ton	3
Concrete pipe (plain and reinforced)	Ton	73
Clay pipe and tile (includes some pvc pipe)	Ton	-
Lumber (all lumber products except timber piling)	Board foot	6,980
Petroleum products 4/	Gallon	22,966
Guardrail (all types)	Linear foot	740
Bridge railing (all types)	Linear foot	156
Corrugated aluminum culvert	Pound	119
Signs (complete in place)	Dollar	10,473
Lighting (complete in place)	Dollar	11,673
Labor	Employee-hour	11,647

1/ For comparable standards of design, the usage of materials and labor on Federal-aid work is not appreciably different from their usage on non-Federal-aid work. The data in this table are obtained from Form FHWA-47, prepared by the Federal-Aid and Design Division in the Office of Engineering.

2/ Right-of-way, preliminary engineering, and construction engineering costs excluded.

3/ Includes sand, gravel, clay gravel, slag, crushed stone, etc.; used for all highway construction including bases, subbases, concrete surfaces, bituminous surfaces, structural concrete, and drainage work.

4/ Fuel and lubricants for equipment and trucks. Grease converted to gallons on basis of 8 pounds per gallon.

1996	6,951	81,233	11,687	50,771	7	1,350	16.62
1997	4,875	52,302	10,729	32,689	7	1,004	19.20

1/ Data comes from reports submitted by contractors to the Federal-aid Division in the Office of Engineering upon completion of projects costing at least \$1 million. Prior to ISTEA, data were not collected for projects on the Federal-aid secondary (FAS) system or off the Federal-aid systems. Since ISTEA, only NHS data are collected.

2/ The year shown is the year FHWA received the report of the completed project.

3/ Labor hours shown are for "on-site" work only, and do not include off-site work at materials plants, suppliers, office staff, management, etc.

4/ Number of jobs equals total hours divided by 1600.

TAX RATES ON MOTOR FUEL - 1997¹

TABLE MF-121T
SHEET 2 OF 2

SEPTEMBER 1998

STATE	SALES TAX	
	PERCENT	REMARKS
Alabama	4	Applies to fuel not taxable under volume tax laws.
Arizona	5	Applies to fuel not taxed under the motor-fuel or use-fuel taxes. Liquefied petroleum gas sold, used or stored in State is exempt.
Arkansas	4.5	Special fuel for municipal buses and gasoline are exempt.
California	6	Applies to sales price including Federal and State motor-fuel taxes.
Colorado	3	Applies to fuel not taxable under volume tax laws.
Dist. of Col.	5.75	Applies to fuel not taxable under volume tax laws.
Georgia	4	A 3-percent "second motor-fuel tax" and a 1-percent sales tax apply to sales price including Federal motor-fuel tax.
Hawaii	4	Applies to sales price excluding Federal and State motor-fuel taxes. Alcohol fuels are exempt.
Idaho	5	Fuels subject to the motor fuel volume tax are exempt.
Illinois	6.25	Applies to sales price excluding Federal and State motor-fuel taxes. For gasohol, only 70 percent of the price is subject to sales tax.
Indiana	5	Applies to sales price excluding Federal and State motor-fuel taxes.
Iowa	5	Fuel on which the volume tax was paid and not refunded is exempt. Gasohol is exempt.
Kansas	4.9	Applies to fuels not taxable under the volume tax laws.
Kentucky	6	Applies to sales price, exclusive of Federal tax, of fuels not taxable under the volume tax laws.
Louisiana	4	Fuels subject to volume tax are exempt. Gasohol is exempt if alcohol produced in State.
Maine	6	Applies to motor fuel not taxed at the maximum rate for highway use under the volume tax laws.
Maryland	5	Applies to motor fuel not taxed under other Maryland laws.
Massachusetts	5	Applies to fuels not taxable under the volume tax laws.
Michigan	6	Applies to sales price including Federal volume tax except when used in a passenger vehicle with capacity of 10 or more for hire over regularly scheduled routes in State.
Minnesota	6	Applies to fuels not taxable under the volume tax laws.
Nebraska	5	Gasoline is exempt. Diesel and alternative fuels subject to the volume tax are exempt.
New Mexico	5	Applies to fuels not taxable under the volume tax laws. Ethanol blends deductible under the gasoline tax laws are exempt.
New York	4	Applies to sales price including Federal motor-fuel tax.
North Dakota	5	Applies to fuels not taxable under the volume tax laws.
Ohio	5	Applies to fuels not taxable under the volume tax laws.
Oklahoma	4.5	Applies to fuels not taxable under the volume tax laws.
Pennsylvania	6	Applies to fuels not taxable under the volume tax laws.
South Carolina	5	Applies to sales price of aviation gasoline only.
South Dakota	4	Applies to fuels not taxable under the volume tax laws.
Tennessee *	6	Gasoline on which the volume tax has been paid and not refunded and motor fuel subject to the use fuel tax are exempt.
Texas	6.25	Applies to fuels not taxed or exempted under other laws.
Utah	4.875	Applies to fuels not taxable under the volume tax laws.
Washington	6.5	Applies to fuels not taxable under the volume tax laws. Certain providers of public transportation of handicapped persons are exempt.
Wisconsin	5	Applies to fuels not taxable under the volume tax laws.
Wyoming	4	Applies to sales price of LPG. Gasoline and diesel subject to volume tax are exempt.

1/ This table shows motor-fuel tax rates in effect as of January 1, and any subsequent changes that have occurred through the date shown in the title. Only taxes that are levied as a dollar amount per volume of motor fuel are included on sheet 1. Taxes that apply to all petroleum products without distinguishing motor fuel are omitted. Local option taxes are included only when they have been adopted uniformly Statewide. For States marked with an asterisk, see the notes below:

- Alabama - The gasoline, gasohol, and diesel rates include a 2¢ per gallon inspection fee. Alabama-registered LPG vehicles pay an annual fee based on vehicle type in lieu of the volume tax.
- Arizona - There is an 8¢ per gallon surcharge on use fuel used to propel a use class motor vehicle. A use class motor vehicle is a truck with more than two axles or with a declared gross vehicle weight over 26,000 pounds.
- Arkansas - The gasoline, gasohol, and diesel rates include 0.2 ¢ per gallon Environmental Assurance Fee. Applicants for LPG user permits must pay a fee based on vehicle size and weight in lieu of the volume tax.
- California - LPG users may pay an annual fee in lieu of the volume tax.
- Colorado - Owners of LPG vehicles registered in the State must pay an annual fee in lieu of the volume tax.
- Delaware - Rates are variable, adjusted annually.
- Florida - Tax rates are variable, adjusted annually. For gasoline and gasohol, in addition to the rates shown, there is a State-imposed State Comprehensive Enhanced Transportation System (SCETS) tax that varies by county from 0-5.0¢ per gallon. All but 1 county levy the SCETS tax on gasoline, but 10 levy less than the maximum rate. LPG vehicles registered in the State pay an annual fee in lieu of the tax on alternative fuels and the SCETS tax.
- Idaho - LPG users may pay an annual fee based on vehicle weight in lieu of volume tax.
- Illinois - Motor carriers pay an additional 6.3¢ per gallon on gasoline, 6.5¢ on diesel, and 5.9¢ on LPG.
- Indiana - Motor carriers pay an additional 11¢ per gallon. LPG vehicles pay an annual fee.
- Kansas - LPG users may pay an annual fee based on mileage and gross vehicle weight in lieu of the volume tax.
- Kentucky - Tax rates are variable, adjusted quarterly. A 2¢ surtax is imposed on gasoline and 4.7¢ on special fuels for any vehicle with 3 or more axles. The gasoline, gasohol, and diesel rates include 1.4¢ per gallon Petroleum Environmental Assurance Fee.
- Louisiana - Owners of LPG vehicles of 10,000 pounds or less gross vehicle weight pay an annual fee based on mileage.
- Massachusetts - Tax rates are variable, adjusted quarterly.
- Michigan - Rate may be adjusted by the Commissioner of Revenue; law does not specify basis. There is a 6¢ per gallon discount if diesel is delivered into the fuel supply tank of a commercial vehicle licensed under the motor-carrier fuel tax.
- Minnesota - There is a credit to the wholesaler of 15¢ per gallon of alcohol used to make gasohol.
- Mississippi - The gasoline, gasohol, and diesel rates include 0.4¢ per gallon dedicated to the Groundwater Protection Trust Fund.
- Missouri - LPG vehicles 18,000 pounds or less gross vehicle weight registered in the State pay an annual fee in lieu of the volume tax.
- Montana - LPG vehicles registered in the State pay an annual fee based on gross weight in lieu of the volume tax. Out-of-State vehicles purchase trip permits. There is an alcohol distiller credit of 30¢ per gallon of alcohol produced in the State with State agricultural products and used to make gasohol.
- Nebraska - Rates are variable, adjusted quarterly. The gasoline and gasohol include 0.6¢ per gallon and diesel rate includes 0.2¢ per gallon Petroleum Release Remedial Action Fee.
- New Hampshire - The gasoline, gasohol, and diesel rates include 0.7¢ per gallon Oil Discharge and Disposal Cleanup Fee. This fee is collected until the Fund reaches a ceiling and is then suspended until a Fund minimum is reached and the fee restored. Alternative fueled vehicles pay twice the usual registration fee in lieu of the volume tax.
- New Jersey - In addition to the rates shown, there is a Petroleum Products Gross Receipts Tax. The tax is computed on a cents-per-gallon basis and is applicable to a wide variety of petroleum products.
- New Mexico - The gasoline, gasohol, and diesel rates include the Petroleum Products Loading Fee of \$150 per 8,000 gallons (1.875¢ per gallon). Rate was \$80 per 8,000 gallons (1¢ per gallon) prior to 7/1/96. Owners of LPG-powered vehicles up to 54,000 pounds gross vehicle weight may pay an annual fee in lieu of the volume tax.
- New York - Rates are variable, adjusted annually. There is an additional tax on motor carriers of 8.5¢ per gallon of gasoline and 9.6¢ on diesel. Rates include the Petroleum Business Tax of 14¢ per gallon. The gasoline rate includes a 0.5 mil (0.05¢) per gallon Petroleum Testing Fee.
- North Carolina - Rates are variable, adjusted semi-annually. No adjustment was made this mid-year.
- North Dakota - A special excise tax of 2% is imposed on all sales of special fuel (diesel or LPG) that are exempted from the volume tax if the fuel is sold for use in the State. There is a producer credit of 40¢ per gallon of agriculturally derived alcohol produced in the State and used to make gasohol.
- Ohio - Commercial vehicles formerly subject to the highway use tax pay an additional 3¢ per gallon. Dealers are refunded 10¢ per gallon of each qualified fuel (ethanol or methanol) blended with unleaded gasoline.
- Oklahoma - Rates shown include 1¢ per gallon tax dedicated to the Petroleum Underground Tank Release Environmental Cleanup Indemnity Fund. When the Fund reaches specified balance, future tax revenues will be deposited in a highway fund. The gasoline, gasohol, and LPG rates include 0.08¢ for fuel inspection. LPG users may pay an annual fee in lieu of the volume tax.
- Oregon - The diesel and LPG rates shown are paid by users for vehicles not under the jurisdiction of Public Utility Commission. Vehicles under the jurisdiction of the Public Utilities Commissioner and paying motor-carrier fees are exempt from payment of the motor-fuel tax.
- Pennsylvania - Rates include the Maintenance and Construction Oil Franchise Tax, a variable rate tax adjusted annually. Effective 10/1/97, motor carriers do not pay a 6¢ per gallon surcharge.
- Rhode Island - Rates are variable, adjusted quarterly. Rates include 1¢ per gallon tax for the Underground Storage Tank Financial Responsibility Fund.
- South Dakota - There is a credit at the rate of the gasoline tax to distributors blending gasoline with ethanol to produce gasohol. There is also a producer incentive payment of 20¢ per gallon.
- Tennessee - LPG users without permits must pay in advance at the beginning of the fiscal year; others pay quarterly. Fee is based on vehicle weight and fuel efficiency. Sales tax rate on aviation fuel is 4.5 percent.
- Texas - Owners of LPG vehicles registered in the State must pay an annual fee in lieu of the volume tax.
- Utah - LPG is tax exempt if user purchases annual exemption certificate.
- Vermont - Diesel vehicles 10,000 pounds and over pay 26¢ per gallon. LPG vehicles are subject to a registration fee 1.75 times the usual fee. The gasoline, gasohol, and diesel rates include 1¢ per gallon for the Petroleum Cleanup Fund.
- Virginia - Motor-carrier road tractors, tractor trucks and straight trucks with more than 2 axles pay an additional 3.5¢ per gallon.
- Washington - Owners of LPG vehicles pay an annual fee.
- West Virginia - Rates are variable, adjusted annually.
- Wisconsin - Rates are variable, adjusted annually.
- Wyoming - LPG is subject to sales tax. The gasoline, gasohol, and diesel rates include 1¢ for the Underground Storage Tank Corrective Action Account.

2/ The gasohol rates shown are for gasoline blended with 10 percent ethanol.

STATE MOTOR-FUEL TAX RATES, 1983 - 1997 1/

GASOLINE

1/ This table includes the revenues from State taxes on all motor-vehicle fuels and related receipts in connection with motor-fuel taxation and administration. In many States, however, the tax on special fuels (fuels other than gasoline and gasohol) is applicable only to the amount used on the highways. For the States that apply the tax to all fuel sold, the revenue and refunds covering the nonhighway portion of these special fuels have been excluded. All data are subject to further review and revision.

2/ Includes, in some States, receipts in the form of tax credits for refund claims accepted by distributors acting as agents of the State and refund credits to users who are licensed as distributors.

3/ For tax rates as of January 1, 1997 and rate changes during the year, see table MF-121T. States with variable

rates are also identified in table MF-121T.

4/ These are proceeds from taxes on nonhighway uses of gasoline dedicated for the improvement of facilities other than highways. They are generally revenues from taxes on gasoline for aviation and motorboat use, but in some States, include taxes on gasoline used in off-highway recreational vehicles and snowmobiles. In California, receipts from the tax on gasoline used for agricultural purposes are included.

5/ These are fees for inspection of motor-vehicle fuel. Insofar as possible, fees for inspection of fuels not used on highways have been eliminated.

DISPOSITION OF STATE MOTOR-VEHICLE AND MOTOR-CARRIER TAX RECEIPTS - 1997

1/ See Table MV-2 for details of receipts. Differences between amounts shown and Table MV-2 are due to timing differences and funds in transit.

2/ Collection expenses in many States include service charges deducted by county and local collectors.

3/ The distributions shown include both specific dedications and the prorated share of motor-vehicle and motor-carrier revenue distributions from common funds with multiple revenue sources.

4/ Includes expenditures for county roads under State control.

5/ Some allocations for local general purposes may have been used in part for highways.

6/ Includes only allocations for specific nonhighway purposes.

7/ Gross allocations of highway-user revenues to State general funds were reduced by appropriations for highways from State general funds. These amounts are included with allocations for State highway purposes.

8/ In these States, most highway-user revenues are placed in the State general fund. For a discussion of general fund States' financing, see "Highway Finance" text under "Funds Attributable to Highway Users."

DISPOSITION OF STATE HIGHWAY-USER REVENUES - 1997 1/

1/ Tables SF-1 and SF-2 show the receipts and disbursements by the State for highways.
 See Table SF-21 for general note on SF series. This table is compiled from reports of State authorities.
 2/ Includes expenditures for local roads and streets under State control. Most local roads

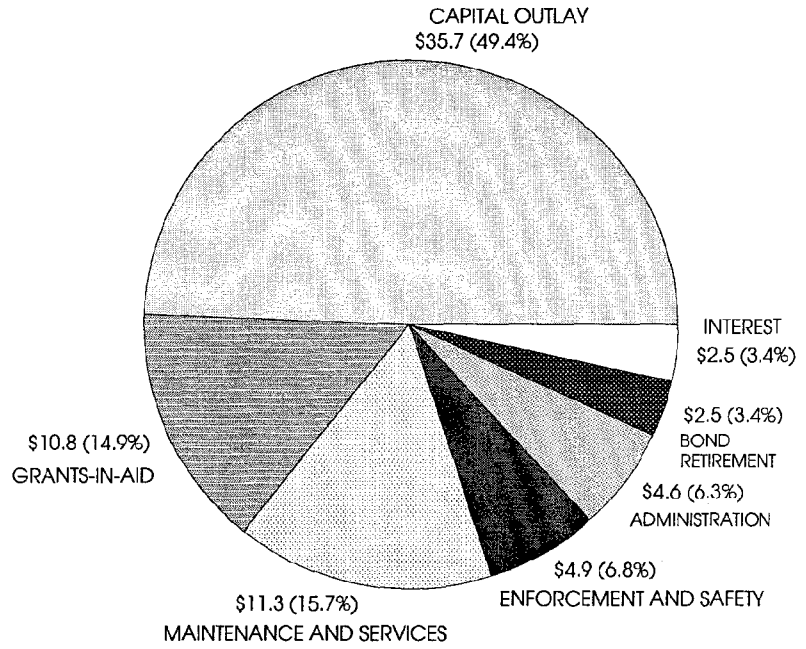

are under State control in Delaware, North Carolina, Virginia, and West Virginia.
 3/ See SB tables for additional information on State debt for highways.

STATE FUNDING FOR HIGHWAYS - 1997

(BILLIONS OF DOLLARS)

TOTAL RECEIPTS
\$75.4 BILLION

TOTAL DISBURSEMENTS
\$72.3 BILLION

DISBURSEMENTS FOR STATE-ADMINISTERED HIGHWAYS - 1997 1/

1/ Tables SF-3 and SF-4 summarize receipts and disbursements for State-administered roads and bridges. See general note on Table SF-3 for details. See Table SF-21 for general note on SF series. This table is compiled from reports of State authorities.

2/ The classification of administration and miscellaneous expenditures is not uniform for

all States because of indeterminate amounts charged to construction and maintenance projects.

3/ Includes redemption by refunding. See Table SB-2 for details.

1/ Tables SF-5 and SF-6 summarize State receipts and disbursements applicable to local roads and streets not under State control. Data for local roads under State control are included in Tables SF-3 and SF-4. See Table SF-21 for general note on SF table series. This table is compiled from reports of State authorities.
 2/ Any differences between beginning balances and the ending balances on last year's Table SF-6 are the result of accounting adjustments, inclusion of funds not previously reported, etc.

3/ Amounts shown represent only those highway-user revenues expended on local roads. See Table DF for the full amount of and disposition of highway-user revenues.
 4/ Gross general fund appropriations for highways were reduced by the amount of highway-user revenues placed in the State General Fund. See Tables SF-1 and DF.
 5/ Includes sales and use taxes, severance taxes, and other State taxes.

1/ Tables SF-5 and SF-6 summarize State receipts and disbursements applicable to local roads and streets not under State control. Data for local roads under State control are included in tables SF-3 and SF-4. See Table SF-21 for general note on SF table series. This table is compiled from reports of State authorities.
 2/ Most local roads are under State control in Delaware, North Carolina, Virginia

and West Virginia. Expenditures on these roads are included in Table SF-4.
 3/ Includes expenditures on Federal-aid projects that are located off the State system.
 4/ For the District of Columbia, the administration and highway police column includes administration, engineering and miscellaneous \$6,598,000 and highway police \$9,295,000.

1/ Table SF-12 shows capital and maintenance expenditures by functional system and area. The data from this table are compiled from the records of State governments.

2/ Area subtotals do not include expenditures on roads functionally classified as local.

3/ Includes Other Freeways and Expressways.

1/ Table SF-12A shows capital outlay for the Interstate, Arterial, and Collector systems by area and improvement type. This table does not include expenditures for roads functionally classified as local. Entries for some States may include estimates. Data reported for urban areas include both small urban and urbanized areas.

2/ In some instances, the subcategories group a number of improvement types. New Construction includes

both New Route and Relocation. 3R includes Minor Widening, Restoration, Rehabilitation, and Resurfacing. Bridge Work includes New Bridge, Bridge Replacement, Major Bridge Rehabilitation, and Minor Bridge Rehabilitation. Safety and other includes Safety, Traffic Operations, TSM and Environmentally Related improvement types.

1/ This table is one of a series giving available information concerning State and quasi-State obligations incurred for highway purposes. Table SB-2 contains data on changes in indebtedness. Table SB-3 contains receipts and disbursements for debt service. Tables SB-2T and SB-3T are subsets of Tables SB-2 and SB-3, showing data for individual State toll facilities. Tables SB-2L and SB-3L are also subsets of Tables SB-2 and SB-3, showing data for State obligations for local roads. When bonds were issued for multiple purposes, their par value is assigned to State highways, local roads and streets, and nonhighway purposes on the basis of the initial distribution of net bond proceeds. The nonhighway portion is excluded from these tables. Also omitted are obligations with terms of less than 2 years; however, interest payments for short-term obligations are included in Table SB-3. This table is compiled from reports of State authorities.

2/ A portion of proceeds from refunding bonds may be expended for current debt service. That portion is included with original issues.
3/ Payment by bond purchaser for interest accrued from date of issue to date of sale.
4/ "Posted rate" is declared rate printed on bonds.
5/ When an asterisk appears in this column, the bonds are understood to be secured by the full faith and credit of the State, in addition to the specific revenues dedicated by law to debt service.
6/ Amount shown reflects only estimated highway portion of \$703,140,000 multi-purpose bond issue.

1/ Table summarizes State receipts and disbursements for debt service of all State bond issues, including the toll facility issues shown in table SB-3T and the State issues for local roads shown in Table SB-3L. See Table SB-1 for general note on SB table series. This table is compiled from reports of State authorities.

2/ Any differences between beginning balance and last year's closing balance are the result of accounting adjustments, or inclusion of funds not previously reported.

3/ May include general funds, other State taxes, Federal funds and local funds.

1/ This table shows the status of State obligations issued to fund local highways. State expenditures on local roads and transfer payments appear in Table SF-6. Amounts shown are included in Table SB-2. Only States with outstanding bonds issued for local roads are included. See Table SB-1 for general note on SB series. This table is compiled from reports of State authorities.

2/ See Table SB-1 for additional information on specific bond issues.

3/ Amounts in this column represent funds available for future principal and interest payments.

1/ This table summarizes debt status of State and quasi-State toll facilities. Only facilities with outstanding bonds are included. See Table SB-1 for general note on SB Table series. This table is compiled from reports of State authorities.

2/ Amounts in these columns include all funds available for future principal and interest payments.
3/ See Table SB-38 for names of bridges and tunnels included.

RECEIPTS OF STATE-ADMINISTERED TOLL ROAD AND CROSSING FACILITIES - 1997 1/

OCTOBER 1998

	Grand Total		5,678,065	1,588,572	348,567	4,121,791	127,667	441,002	300,420	2,877,487	8,216,934

1/ Tables SF-3B and SF-4B are concerned solely with receipts and disbursements for State and quasi-State toll facilities. See Tables LGF-3B and LGF-4B for data on public and quasi-public facilities operated by or for local governments. See Tables SB-2T and SB-3T for information on toll facility bond indebtedness. See Table SF-21 for general note on SF table series. This table is compiled from reports of State authorities.

2/ Any differences between beginning balances and previous year's closing balances are the result of accounting adjustments, or inclusion of funds not previously reported.

3/ Private companies have contracted with the State to build and operate these facilities. At a later date, they will be transferred to the State. The amounts shown represent only the State's oversight costs.

4/ Include the Caraquez, Benicia-Martinez, Antioch, and Richmond-San Rafael Bridges.

5/ Includes the San Francisco-Oakland Bay, San Mateo-Hayward, and Dumbarton Bridges.

6/ Includes Chesapeake Bay, Francis Scott Key, Potomac River and Susquehanna River Bridges; Baltimore Harbor and Fort McHenry Tunnels.

7/ Includes the Trenton-Morrisville, New Hope-Lambertville, Interstate 78, Easton-Phillipsburg, Portland-Columbia, and Millford-Montague Bridges.

8/ Includes the Newburgh-Beacon, Mid-Hudson, Rip Van Winkle, Kingston-Rhinecliff and Bear Mountain Bridges.

9/ Includes the George Washington, Bayonne and Goethals Bridges; Holland and Lincoln Tunnels.

10/ Includes the Walt Whitman, Ben Franklin, Betsy Ross and Commodore Barry Bridges.

11/ Full name of the authority is West Virginia Parkways, Economic Development and Tourism Authority.

DISBURSEMENTS OF STATE-ADMINISTERED TOLL ROAD AND CROSSING FACILITIES - 1997 1/

1/ Tables SF-3B and SF-4B are concerned solely with receipts and disbursements for State and quasi-State toll facilities. See Tables LGF-3B and LGF-4B for data on public and quasi-public facilities operated by or for local governments. See Tables SB-2T and SB-3T for information on toll facility bond indebtedness. See Table SF-21 for general note on SF table series. This table is compiled from reports of State authorities.

2/ Includes direct expenditures for nonhighway purposes and transfers to other agencies for both highway and nonhighway purposes. The amount used for nonhighway purposes can be determined by taking total tolls from SF-3B and subtracting tolls used for highways on Tables SF-21 and tolls used for mass transportation on table MF-1.

3/ Private companies have contracted with the State to build and operate these facilities. At a later date, they will be transferred to the State. The amounts shown represent only the State's oversight costs.

4/ Include the Carquinez, Benicia-Martinez, Antioch, and Richmond-San Rafael Bridges.

5/ Includes the San Francisco-Oakland Bay, San Mateo-Hayward, and Dumbarton Bridges.

6/ Includes Chesapeake Bay, Francis Scott Key, Potomac River and Susquehanna River Bridges; Baltimore Harbor and Fort McHenry Tunnels.

7/ Includes the Trenton-Morrisville, New Hope-Lambertville, Interstate 78, Easton-Phillipsburg, Portland-Columbia, and Milford-Montague Bridges.

8/ Includes the Newburgh-Beacon, Mid-Hudson, Rip Van Winkle, Kingston-Rhinecliff and Bear Mountain Bridges.

9/ Includes the George Washington, Bayonne and Goethals Bridges; Holland and Lincoln Tunnels.

10/ Includes the Walt Whitman, Ben Franklin, Betsy Ross and Commodore Barry Bridges.

1/ Table MT-1A is the first in a series of tables on mass transit. Table MT-1A includes only direct State expenditures for transit projects. This table does not include State-owned or State-contracted mass transit operators. Table MT-1B shows State transfers to mass transit operators. Table MT-2A

shows transit operators' funding of capital expenditures. Table MT-2B shows transit operators funding for operating expenditures. NOTE: Information contained in Tables MT-2A and MT-2B is one year behind that contained in Tables MT-1A and MT-1B.

1/ Operators are classified by location of their headquarters. Receipts and disbursements of multistate operators are not split by State. Compiled from the records of the Federal Transit Administration.
 2/ Includes taxes directly levied by transit agencies, profits from charter service, advertising revenue,

and private donations.
 3/ Includes tolls.
 4/ Includes taxes levied by special transportation districts.

1/ This table summarizes local governments' receipts from motor-fuel taxes, motor-vehicle fees, special imposts on motor carriers, and tolls. This table includes receipts from State imposts that are transferred to local governments for distribution. See Tables LGF-21 and LGF-3B for details. Local government reporting is on a biennial basis with even-numbered years optional. This table is compiled from reports of State and local governments.

2/ Differences between amounts shown here and in the "Highway Statistics, 1996" Tables DF and SF-5A are caused by State delays in transferring revenues dedicated to local governments, and by local governments' reallocations of State funds.

3/ Estimated by FHWA.

LOCAL GOVERNMENT FUNDING FOR HIGHWAYS - SUMMARY - 1996 1/

OCTOBER 1998

(THOUSANDS OF DOLLARS)

TABLE LGF-21

Table with columns for STATE, RECEIPTS (LOCAL HIGHWAY-USER TAX REVENUES, ROAD AND CROSSING TOLLS, APPROPRIATIONS FROM GENERAL FUNDS, PROPERTY TAXES, OTHER LOCAL IMPOSTS, MISCELLANEOUS INCOME, BOND PROCEEDS 3/), PAYMENTS FROM STATE GOVERNMENT, FEDERAL GOVERNMENT, TOTAL RECEIPTS, CAPITAL OUTLAY, MAINTENANCE AND TRAFFIC SERVICES, ADMINISTRATION, HIGHWAY POLICE AND SAFETY, INTEREST, BOND RETIREMENT 3/, PAYMENTS TO STATES, TOTAL DISBURSEMENTS.

1/ This table is one of a series on Local Highway Finance. Table LGF-21 summarizes the receipts and disbursements of local governments for highways. Local government reporting is on a biennial basis with even-numbered years optional. This table is compiled from the reports of State and local governments. 2/ The amounts shown are identical with the receipts allocated for highways as shown on Table LDF. 3/ Bonds issued for and retired by refunding are excluded. Tables LGF-1 and LGF-2 include original and refunding issues. See Table LGS-2 for further information on the status of local highway debt. 4/ Estimated by FHWA.

1/ Tables LGF-1 and LGF-2 summarize the receipts and disbursements for highways by local governments, including toll facilities. See Table LGF-21 for general note on local series. Local government reporting is on a biennial basis with even-numbered years optional. This table is compiled from the reports of State and local governments.

2/ Excludes proceeds from the sale of short term issues (notes). See Table LGB-2 for additional information on local government debt for roads and streets.

3/ See Table LDF for gross receipts and distributions of highway-user revenues, including local toll receipts.

4/ Estimated by FHWA.

5/ Although most local roads and streets are under State control, local governments may raise and expend money on these roads and streets. State expenditures on these roads and streets are included in State Highway Finance Table series.

1/ This table summarizes the change in status of the highway obligations of local governments including toll authorities. See Table LGF-21 for general note on local highway finance series. Local government reporting is on a biennial basis with even-numbered years optional. This table is compiled from the reports of State and local governments.
2/ Any difference between amount outstanding at beginning of the year and the amount outstanding at the end of the previous year may have resulted from accounting adjustments.

changes in reporting year, rounding, etc.
3/ Estimated by FHWA.
4/ Although most local roads and streets are under State control, local governments may raise and expend money on local roads and streets. State expenditures on these roads and streets are included in State Highway Finance Table series.

1/ This table summarizes the debt status of publicly owned toll facilities operated by local governments, local road and bridge districts and specially created authorities. Only facilities with outstanding bonds are included.

2/ Lee County Bridges consists of the Cape Coral Bridge, the Midpoint Bridge, and the Sanibel Bridge and Causeway.

3/ Facility is also responsible for approximately \$3.0 billion of bonds issued for mass transit purposes.

4/ Harris County Toll Facilities consists of the Harris County Toll Road and the Jesse Jones Memorial Toll Bridge.

5/ The opening debt balance for 1996 is \$2,350,000 less than the closing balance reported on the 1995 LGB-2T. The amount remaining on a Federal loan (\$2,650,000) was removed, and the amount remaining on a bridge revenue bond for construction of an administration building (\$300,000) was added in.

1/ This table summarizes the receipts for publicly owned toll facilities operated by local governments, local road and bridge districts and specially created authorities. See Table LGF-21 for general note on local highway finance series. This table is compiled from reports of local authorities.

2/ Tolls removed on September 30, 1995, and facility freed.

3/ Lee County Bridges consists of the Cape Coral Bridge, the Midpoint Bridge,

and the Sanibel Bridge and Causeway.

4/ Miscellaneous income shown includes \$13,520,750 in State aid and a \$14,062,854 subsidy from New York City.

5/ Toll data estimated by FHWA.

6/ Harris County Toll Facilities consist of the Harris County Toll Road and the Jesse Jones Memorial Toll Bridge.

	Grand Total	830,206	82,769	222,213	86,227	1,286	265,937	154,344	451,529	2,094,511	3,934,530

1/ This table summarizes the disbursements for publicly owned toll facilities operated by local governments, local road and bridge districts and specially created authorities. See Table LGF-3B for names of operating authorities. See Table LGF-21 for general note on local highway finance series. This table is compiled from reports of local authorities.

2/ Includes direct expenditures for nonhighway purposes and transfers to other State and local agencies for both highway and nonhighway projects.

3/ Tolls removed on September 30, 1995, and facility freed.

4/ Lee County Bridges consists of the Cape Coral Bridge, the Midpoint Bridge,

and the Sanibel Bridge and Causeway.

5/ Transfers shown include amounts used for maintenance, operations and debt service of the New York City Transit Authority, the Metropolitan Transportation Authority and the Triborough Transportation Project.

6/ Toll data estimated by FHWA.

7/ Harris County Toll Facilities consist of the Harris County Toll Road and the Jesse Jones Memorial Toll Bridge.

Section V

ROADWAY EXTENT, CHARACTERISTICS, AND PERFORMANCE

This section contains data on the physical, operational, usage, extent, and performance characteristics of public roads existing in the United States as of December 31, 1997.

IMPACTS OF DATA REPORTING PROCEDURES

The current data are based on the Highway Performance Monitoring System (HPMS). The HPMS is a combination of sample data on the condition, use, performance and physical characteristics of facilities functionally classified as arterials and collectors (except rural minor collectors); and system-type data for all public road facilities within each State. When a State does not provide current year data (or complete current year data), various means are used to present information that is reasonably current. This may include estimates based on State provided aggregate totals or other estimates based on prior year(s) data. Footnotes have been included where appropriate to explain missing data or data which have been estimated from previously available data. Readers are advised to read all the footnotes as well as this text prior to using data in this section.

ORGANIZATION OF TABLES

Almost all tables in this section contain rural and urban breakouts where urban may be further broken down into small urban (5,000 to 49,999 population) and urbanized ($\geq 50,000$ population).

An urbanized area is an area with 50,000 or more persons that encompasses at a minimum the land area delineated by the Bureau of the Census. The Bureau of the Census establishes urbanized area boundaries based on the density of the population (1,000 persons per square mile). The adjusted Census urbanized area boundary reflected in this publication is usually enlarged to include such additional areas as airports, satellite cities/towns, strip development adjacent to high-use roadways, and other areas and facilities that are important to or serve the urbanized area. In some cases, the adjusted urbanized area includes land that will become urban in some predetermined amount of time (such as 3-5 years). These boundaries are decided upon by State and local officials with the approval of the FHWA.

The tables in this section have been organized into seven general areas:

1. Public Road Length—Tables HM-10, HM-12, HM-16, HM-18, and HM-20.
2. Federal-Aid Highways—Tables HM-14, HM-15, HM-30, HM-31, HM-33, HM-35, HM-36, HM-37, HM-39, HM-42, HM-47, and HM-48.

3. Functional System—Tables HM-50, HM-51, HM-53, HM-55, HM-57, HM-59, HM-60, and HM-65.
4. Urbanized Areas—Tables HM-71 and HM-72.
5. State Highway Agency-Administered Public Roads—Tables HM-80 and HM-81.
6. Highway Usage and Performance—Tables VM-1, VM-2, VM-3, VM-4, TC-3, HM-61, HM-63, HM-64, and FI series.
7. Metric—Tables HM-10M, HM-12M, HM-14M, HM-15M, HM-16M, HM-18M, HM-20M, HM-30M, HM-36M, M-50M, HM-60M, VM-1M, VM-2M, VM-3M, and FI-1M.

EXISTING LENGTH

All length tables in this publication, except table HM-30, include only centerline length classified as public roads in accordance with 23 Code of Federal Regulations 460. These include existing roads that are open to public travel and maintained by a public authority. Where a highway route comprises more than one roadway, the centerline length is the average of the independent directional roadways measured along their respective centerlines. Other existing roads and trails generally not publicly maintained or private or restricted from use by the general public are excluded. Table HM-10 contains the total public road length in the United States, classified by jurisdiction. Table HM-12 contains length by type of surface and jurisdiction and functional system (national level only). Table HM-15 contains length of Federal-aid highways and is in the same format as its companion travel table—VM-3 and lane length table—HM-48. Table HM-16 is a nationwide aggregate table which contains length of Federal-aid highways by jurisdiction. Another nationwide aggregate table, HM-18, contains length of Federal-aid highways by functional system. The latter two tables also include small urban and urbanized area summaries as well as total urban. Table HM-20 contains all public road length by functional system and is in the same format as table VM-2. Table HM-60 is also in the same format and contains the lane length. Table HM-30 contains length of roads that are open to the public as well as those intended to be built within the next few years.

The increase in public road length by construction is relatively small each year. Most construction is for the improvement of existing public roads, such as paving, resurfacing those previously surfaced, widening facilities, adding lanes, reducing grades, minimizing curves, eliminating grade crossings, and other improvements that provide safer, more efficient public roads having greater traffic and load-bearing

Text

capacities. Most new length falls in the local functional system category that serves residential or business uses. Decreases in public road length do occur. In recent years, this has been due to the removal of some timber, forest access, and natural resource roads from general public use.

Except for minor amounts of Federal public road length under the U.S. Forest Service, Bureau of Reclamation, Bureau of Indian Affairs, National Park Service, Fish and Wildlife Service, and military, the rest of the public roads in the United States are owned by the State, county, town or township, Indian tribe, municipal or other local government, or instrumentality thereof with public authority. Public roads in Federal forests and reservations may be part of the State and local jurisdictional systems and are included with the lengths reported for those systems. Length of public roads by jurisdiction are identified in tables HM-10, HM-12, HM-14, HM-16, and HM-50.

The designation of a public road as a Federal-aid highway does not alter its ownership or jurisdiction as a State or county road or city street. A Federal-aid highway simply means that, because of its service value and importance, it has been made eligible for Federal-aid construction and rehabilitation funds.

Surface types

The surface classification used in the tables identifies only the visible surface types on the traveled portion of the roadway. Many highways, either by original design or because of reconstruction, consist of more than one major type of construction material. No data relative to vertical composition are presented, except for the composite pavement type where the reporting agency has indicated that a concrete roadway has been overlaid with one or more inches (25 or more millimeters) of compacted bituminous material.

FEDERAL-AID HIGHWAYS

The Federal-aid highways are basically segments of State and local systems length eligible for Federal aid. Except under special circumstances (i.e., connectors on the National Highway System and bridges), this excludes roads that are functionally classified as rural minor collector or rural and urban local.

The Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991 eliminated the historical Federal-aid Systems and created the National Highway System (NHS) and other Federal-aid highway categories. The National Highway System Designation Act of 1995 approved the NHS established under ISTEA. (For purposes of this publication, the NHS excludes any nonroadway routes, i.e., ferry boat routes.) The NHS was prepared in consultation with appropriate local officials and was submitted to and approved by the United States Congress. The NHS consists of the highway routes and connections to transportation facilities depicted on the maps submitted by the Secretary of Transportation to the Congress

Road Extent, Characteristics, and Performance

on May 24, 1996. Highways designated as part of the Interstate System are included in the NHS.

All historical tables linked to the superseded Federal-aid systems have been changed to reflect the NHS and other Federal-aid highways, as applicable. These include tables HM-14, HM-15, HM-16, HM-18, the HM-30 series, HM-42, HM-47, HM-48, VM-3, and the FI series. About 2,000 miles of NHS intermodal connectors are included in these tables as NHS.

Interstate System

The Eisenhower National System of Interstate and Defense Highways was originally established by the Federal-Aid Highway Act of 1944. The Federal-Aid Highway Act of 1956 and the companion Highway Revenue Act of 1956 further defined the purpose and extent of the system and, as subsequently amended, dedicated a group of Federal excise taxes on motor fuel and automotive products to support Federal-aid highway activities. By law, the Interstate System is limited to 43,000 miles (69,202 kilometers) plus other incorporated routes that are logical additions or connections and meet Interstate System design standards. The Interstate System in Alaska and Puerto Rico is to be designed in accordance with geometric and construction standards as are adequate for current and probable future traffic demands and the needs of the locality of the highway.

The Interstate System connects, as directly as practicable, the Nation's principal metropolitan areas, cities, and industrial centers; serves the National defense; and connects at suitable border points with routes of continental importance.

Length related characteristics

Within this section, Federal-aid highways are classified according to system, surface type, lane width, traffic lanes, access control, and traffic volume in tables HM-31 through HM-39. The categories for a given data item vary within each table to provide representation of the characteristics of the particular Federal-aid highway category. Tables HM-30, HM-42, and HM-47 classify length of NHS according to open and not open to traffic, volume-service flow ratio, and measured pavement roughness, respectively.

FUNCTIONAL SYSTEMS

The functional systems used in tables HM-50 through HM-80 result from the grouping of public roads according to the character of service they are intended to provide. Because most travel involves movement through a network of roads, individual public roads do not serve travel independently in any major way. Functional classification defines the role that a particular public road plays in serving the flow of trips through a highway network. The functional systems are: (1) arterial highways, which generally handle the long trips; (2) collector facilities, which collect and disperse traffic

between the arterials and the lower level; and (3) local roads, streets, and other public ways, which serve the land access function to the residential areas, businesses, individual farms and ranches, and other local areas. The functional system lengths are identified by jurisdiction, surface type, lane width, traffic lanes, access control, and traffic volume in tables HM-50 through HM-59.

Lane length

Table HM-60 contains estimated lane length by functional system. FHWA assumes two lanes for the rural minor collector and rural/urban local functional systems lane length estimate. A companion table, HM-48, is similar except the lane length is for the Federal-aid highways.

Count of structures

Table HM-65 contains a count of the bridges and other structures greater than or equal to 20 feet (32 meters) in length from the Structure Inventory of the Nation's Bridges by functional system.

Urbanized areas

Table HM-71 contains length and daily travel data by functional system for the adjusted Census urbanized areas having a population of 50,000 or more persons. The daily travel contained in this table times 365 days (366 days for leap years) equals annual travel. Table HM-72 contains characteristic type data and rates that are based on the State-reported mileage, travel, population, and net land area aggregate data for the same urbanized areas. An estimate of freeway lane length (including the Interstate System) in each urbanized area is also provided; it is based primarily on the HPMS universe data. Where urbanized areas cross State boundaries, the tables contain information for the entire area without regard to State boundaries. Both tables are in sort by current urbanized area population.

State highway agency-administered public roads

State highway agency-administered (jurisdiction) public road data by functional system, based on the HPMS universe data, is contained in table HM-80. Lane length, daily vehicle travel, and annual average daily traffic per lane estimates are provided in the companion table HM-81. As with the HM-71 and HM-72 tables, the daily travel may be made to equal annual travel by multiplying by 365 (366 for leap years). These estimates are derived from the HPMS universe information.

HIGHWAY USAGE AND PERFORMANCE

Table VM-1 contains the estimated travel for passenger cars, motorcycles, buses, and trucks for the rural Interstate System, other rural arterial roads, other rural public roads, urban

Interstate System, and other urban public roads. The rural and urban travel values are based on a summary of the highway functional systems contained in table VM-2. The vehicle types are based on a summary of vehicle distributions as shown in the table VM-4. These distributions are normalized to account for temporal variation. The other rural arterial roads category includes all other principal and minor arterials, excluding the Interstate System. The other rural roads category includes the collector and local functional systems. All urban systems, except the urban Interstate System, are included within the other urban public roads category.

Table VM-1 for each vehicle type contains the number of vehicles registered, total fuel consumption, and average fuel consumption. Also included by vehicle type are the calculated annual average distance traveled and average distance traveled per gallon. The highway use of motor fuel and the motor-vehicle registrations contained in tables MF-21 and MV-1 are used to obtain the related items of average distance traveled per vehicle, average fuel consumption per vehicle, and average distance traveled per gallon of fuel consumed. In addition, table VM-1 contains FHWA's estimate of distance traveled per person based on the most current information from the *Nationwide Personal Transportation Survey*, the *Truck Inventory and Use Survey*, and the *National Transportation Statistics* report.

Table VM-2 contains a summary of the States' estimated highway travel based on traffic counts taken along selected highway sections which are grouped into functional systems, according to the character of service they provide. It is a companion to table HM-20.

Table VM-3 contains the estimated highway travel carried by Federal-aid highways. It is a companion to the length table HM-15 that reflects the approved NHS as indicated at the front of this section's text.

Table VM-4 presents a distribution of travel activity by vehicle type for arterial functional systems. Data in some cases may exclude motorcycles, combine some vehicle types, and/or be limited in count duration and seasonal coverage. Analysts are cautioned to refer to the individual table footnotes in using these data. Also, refer to the *Traffic Monitoring Guide* for vehicle descriptions and sampling guidelines.

Table TC-3, along with the graph, contains a percentage distribution of Interstate System traffic volumes and loadings historically. The table shows the interrelationship among vehicle types, volumes, and axle loadings. The data, which are from the *Truck Weight Study*, are collected by the States from weigh-in-motion systems.

The graph, Comparison of Growth in Volumes and Loadings on the Rural Interstate System, portrays the rapid growth in loadings relative to volumes. The data points on the graph are 3-year moving averages.

Volume-service flow ratio

Table HM-61 contains the length for each rural and urban arterial and collector (except rural minor collector) functional system by State for various ranges of volume-service flow ratio. These data are expanded from the traffic volume and peak service flow (capacity, as defined by the 1994 Highway Capacity Manual) data reported on or calculated from other data in the HPMS sample sections, and are a useful measure of traffic congestion existing on the States' functionally classified facilities. A companion table, HM-42, is similar except the lengths are for the NHS.

Present serviceability rating (PSR)

Table HM-63 contains mileage that uses the PSR, as reported in HPMS, to group the data into various ranges for the rural major collector, urban minor arterial, and collector systems. The PSR is a numerical value ranging from zero to five, reflecting poor pavement condition at the lower end of the scale and very good pavement condition at the higher values. Users of these data are advised to see the discussion of PSR in the section "General Limitations In Use of Data."

Measured pavement roughness

Table HM-64 contains ranges of lengths of measured pavement roughness for all principal arterials and rural minor arterials. A companion table, HM-47, is similar except that the roughness ranges of lengths are for the NHS. Measured pavement roughness is an objective equipment-based rating reported in the HPMS as the International Roughness Index (IRI) in inches per mile (meters per kilometer). Users of these data are advised to see the discussion of IRI in the section "General Limitations In Use of Data."

Injury highway crashes

The FI series contains the total fatal and nonfatal injury crashes along with the total number of fatalities, most seriously injured persons, total nonfatal injuries, and corresponding rates for all highways in each State. Fatality data are based on the 30-day definition; i.e., only crash victims who die within 30 days of their crashes are counted as fatalities. The tabulations contain numbers and rates [per 100 million vehicle-miles (vehicle-kilometers)] of crashes and casualties by functional system and Federal-aid highway categories.

METRIC TABLES

Readers are provided several of the length and travel tables in metric. These tables are marked with an "M" at the end of the table number. A soft conversion from English to metric has been made of 1 mile = 1.609344 kilometers for the individual values; however, the totals are the sum of the individual converted values and may not agree with the equivalent English-based tables.

GENERAL LIMITATIONS IN USE OF DATA

Information included in the HPMS data base is the result of a cooperative effort between the FHWA and State and local governments. All HPMS data are provided to the FHWA through State Departments of Transportation and are usually obtained from existing State or local government data bases or transportation plans and programs, including those of Metropolitan Planning Organizations (MPOs). Typically, the existing data bases and record keeping systems of these State and local governmental units are designed and are maintained to meet their specific, individual business needs; most items in their data bases are not specifically designed to meet Federal reporting purposes. Some data required for the HPMS are not collected by all the States in their own data bases, and some State data base adjustments may have been made in order to meet the requirements of the HPMS.

As a result, data quality and consistency of HPMS information are dependent upon the programs, actions and maintenance of sound data bases by numerous data collectors, suppliers and analysts at the State, metropolitan, and other local area levels. In general, specific data items that are used by the collecting agency are likely to be of better quality than data items which are collected or estimated solely for the use of the FHWA. Data quality and consistency are also dependent upon the nature of the individual data items and how difficult they are to define, collect, or estimate. Particularly in recent years, limitations on staff and financial resources at the State and local levels have seriously impacted many of the data collection programs that feed the HPMS data base.

HPMS data are collected in accordance with the *Highway Performance Monitoring System Field Manual for the Continuing Analytical and Statistical Data Base*. This document contains standard collection, coding, and reporting instructions for the various data items to be reported with the objective of creating a uniform and consistent data base. The degree to which these instructions are followed by the reporting agencies has a direct impact on the quality and consistency of the data and, therefore, on the utility of these data as an indicator of the condition, performance, and usage of the Nation's highway systems. State reported HPMS data are reviewed by FHWA for completeness, consistency, and adherence to reporting guidelines. Where necessary, data are adjusted to improve completeness, consistency, and uniformity among the States. The review and adjustment process is accomplished in close working relationship with the data suppliers.

The HPMS data base is constructed primarily to facilitate national level analyses of the condition, performance, and usage of the Nation's highway system. Users of the HPMS data, as reported in *Highway Statistics* and in other media, should not necessarily expect to find consistency among all States for all data items, due to State-to-State differences in the way the data are defined, collected, or estimated. Even when data are consistently collected and reported, users need

to recognize that HPMS information may not be comparable across all States due to inherent State differences such as size, population density, degree of urbanization, extent of system, administrative responsibility, climate, etc. When making State level comparisons, therefore, it is inappropriate to use these statistics without recognizing and accounting for the differences that may impact comparability.

Pavement ratings

The FHWA currently uses two pavement rating systems. One is a subjective rating system based upon the Pavement Serviceability Rating (PSR) or equivalent data adapted from a State's pavement serviceability index (PSI), sufficiency ratings, or ratings from a pavement rating table contained in the HPMS Field Manual. The second is an objective measure, the International Roughness Index (IRI). Both may be reported in HPMS and are used as indicators of pavement condition, although only one is required and IRI is preferred. Pavement rating data are not reported for local or rural minor collector functional systems.

Present serviceability rating

The indices of PSR and other subjective measures use a numerical value ranging from zero to five, reflecting poor pavement condition at the lower end of the scale and very good pavement condition at the higher values. These indices provide a judgement of pavement condition based upon an assessment of ride and pavement condition by a panel of road users. PSR and PSI were adapted from the American Association of State Highway (Transportation) Officials Road Tests conducted in the late 1950's and early 1960's. Since they are subjective, ride quality based rating schemes and because of the various methodologies used by the States to collect these data, the ratings may not be consistent or comparable among the States. If a State's PSR, PSI, or other subjective rating process has been carefully constructed and executed, it should provide a useful basis for rating roadways within a State. However, because of the subjectivity of the rating process and because of State-to-State differences in pavement types, traffic, weather, soil conditions, and other influencing factors, comparisons of pavements based on these indices may not be valid.

In general, PSR, or equivalent subjective pavement rating data, are reported to the HPMS on an annual basis where IRI is not reported. The data are subject to variability given the subjective nature of the evaluation process and, FHWA believes, may be more likely to be estimates. PSR data are not manipulated by FHWA; that is, they are reported by FHWA as they are input into the HPMS data base by the States. Sampled PSR data are expanded using the sample expansion factors in HPMS to represent the functional systems for which they are reported. Although PSR is primarily a measure of current ride quality, PSR data are used by FHWA in national level models to predict pavement deterioration, deficiencies,

needs and investments. IRI is converted to equivalent PSR values when PSR is not provided for HPMS sample sections.

Measured pavement roughness

Measured pavement roughness is an objective equipment-based rating reported in the HPMS as IRI in inches per mile (meters per kilometer). These ratings are collected by various mechanical devices, some of which may require calibration through correlation to "known profiles" established via precise measurements. The IRI is a numerical value that is an accumulation of the inches (meters) of vertical movement of a vehicle over a roadway surface, adjusted to reflect a rate per mile (kilometer). Low values indicate a smooth riding quality, while higher values are indicative of a rough road. Because IRI is a more objective, mechanically measured index, IRI should be more consistent between and among States when similar pavement types and surface textures have been measured using devices that have been properly calibrated.

Variability in IRI measurements reported to HPMS can arise from a number of sources. Some sources of variability include differences in the type of pavement surface being rated (i.e., concrete vs. bituminous), differences in the equipment used to measure IRI, and differences in the measurement protocols used. While the FHWA does not specify a particular type of equipment, it does specify a particular measurement protocol—namely that the measurement be provided for the right wheel track of the right most lane. Other guidelines are also provided; however, the FHWA is aware that not all States follow these protocols for all cases of IRI measurement, which diminishes to some extent the consistency of the reported data. Improvements to measurement equipment and instrument standardization for the most part rely upon Federal and State research activities such as those carried out by the Road Profiler User Group.

While IRI data may be more suitable for comparative purposes than PSR data, the user needs to consider and account for the variability introduced by these and other factors when making any comparisons. IRI data are required for Interstate, other principal arterial, and rural minor arterial functional systems, although IRI is recommended for all functional systems other than the local or rural minor collector systems. The IRI data are collected on a universal basis for the NHS and principal arterial systems and on a sample basis for the rural minor arterial system. Sampled data are expanded using the sample expansion factors in HPMS to represent the complete functional systems for which they are reported.

The FHWA believes that the IRI data, which for the most part are available from State pavement management systems, are of reasonably good quality. IRI data are disseminated by FHWA without further manipulation or adjustment. Although IRI is a measure of ride quality, the IRI data are also used by FHWA in national level models to predict pavement deterioration, deficiencies, needs and investments. As additional protocols for IRI equipment and measurement techniques,

Text

such as filtering, measurement intervals, sensor use, lane location, speed, etc., become available and are developed and adopted by the States, FHWA believes that IRI data consistency should continue to improve.

Finally, it should be noted that, to have a comprehensive assessment of pavement condition, additional measures of pavement distress such as rutting, cracking, and faulting are needed. Provisional standards for these measures are being developed by AASHTO, and States will be encouraged to include them in their pavement management systems.

Public Road Length

Beginning with this issue of *Highway Statistics*, the FHWA has instituted a new method for creating mileage based tables derived from HPMS data. Previously, adjustments to tables developed from sampled data were made using area wide mileage data provided by the States; these adjustments are now being made using the universe totals from the HPMS data set. In addition, rounding and expansion related differences were spread across table cells so that all table-to-table mileage totals on related tables matched precisely. While this cosmetic step makes all functional system table totals match, an unintended result is that the tables are not reproducible from the data set by any other users. As a result, FHWA made a decision to discontinue the spreading process, and users may note minor differences in table-to-table mileage totals. For record purposes, FHWA considers the mileage totals from Table HM-20, Public Road Length, Miles by Functional System to be the controlling totals should a single value be required. FHWA is open to comments on this change from the user community; please direct any comments on this change to jim.getzewich@fhwa.dot.gov.

Lane length

The FHWA currently develops lane length as a primary measure of roadway area available for vehicular travel on the Nation's highway systems. The number of through lanes are the prevailing number of lanes in both directions carrying through traffic in the off-peak period. It excludes lanes used for parking, turning, collector-distributor operations, weaving, service ramps, bus pullouts, short truck climbing channels, and vehicle run away ramps, etc.

The lane length is a computed value that is a product of the centerline length and the number of through lanes. In the HPMS, the number of lanes is required to be reported for all principal arterials, other NHS, and all standard samples. In addition, some States report lane information for all minor arterials and collectors. As a result, lane length can be computed for the Interstate, other principal arterials, and NHS on a 100-percent basis.

For minor arterials, rural major collectors, and urban collectors, the lane length is calculated based on the standard sample sections using the reported number of through lanes, length of

Road Extent, Characteristics, and Performance

section, and expansion factor. Using the expanded sample, a check is made that the accumulated total expanded centerline length for the State's functional system matches the universe functional system length (Table HM-20). If not, a correction factor of the universe length to the deficient expanded total centerline length is applied to the applicable State's functional system lane length.

For the rural minor collectors and the rural/urban locals, the number of lanes is assumed to be two. Thus for these latter systems, the lane length is the product of the functional system centerline length times two.

Highway vehicle travel

The FHWA currently uses daily vehicle-miles of travel (DVMT) [daily vehicle-kilometers of travel(DVKT)] as the primary measure of travel activity on the Nation's highway systems. The daily travel times 365 days (366 days for leap years) equals annual travel.

In concept, travel is a calculated value that is a product of the annual average daily traffic (AADT) and the centerline length of the section for which the AADT is reported. In the HPMS, travel can be accumulated for each universe section to develop appropriate totals for the higher functional systems. AADT is required to be reported for each section of Interstate, NHS, and other principal arterial; as a result, travel can be computed for these functional systems on a 100-percent basis. For minor arterial, rural major collector and urban collector systems, travel is calculated from samples using the AADT, centerline length reported for each sample section and the HPMS sample expansion factor for each section. The DVMT will be adjusted for the functional systems where sample data are used if the universe and expanded sample length do not equal. Travel for the NHS on all functional systems is computed from the universe AADT data.

For the most part, travel for the rural minor collector and rural/urban local functional systems is calculated by the States using unknown methods. For these systems, travel values are developed by the States using their own procedures and are provided in HPMS (via areawide data). Some States use supplemental traffic counts outside of the HPMS procedures; others employ estimating techniques, such as fuel use, to determine travel on these systems. In general, these methods are used in both rural and urban areas, including the donut areas of nonattainment areas for purposes of meeting EPA travel monitoring requirements.

Travel estimates reported via the HPMS should be of reasonable quality particularly for the higher order functional systems. AADT and travel data are edited by the HPMS software for unusual values and for unusual changes to previously reported values. FHWA routinely works with State data providers to modify reported AADT values that do not appear to be reasonable before incorporating them into a final master file. Although AADT is required to be updated

annually in HPMS, counts are only required to be updated on a 3-year cycle. For any reporting year, AADT for uncounted sections is to be derived by factoring the latest year's count for those sections. States that follow the HPMS sampling instructions in developing traffic counting programs (Appendix K in the HPMS Field Manual) and the standard practices advocated in the *Traffic Monitoring Guide* have adequate counting and classification tools to prepare quality AADT and travel estimates for HPMS. The consistency of the sampling and counting procedures should also provide comparable State-to-State traffic data.

In practice, FHWA is aware that not all States rigorously follow the recommended sampling, counting, and estimating procedures contained in the *Traffic Monitoring Guide*. Reporting of AADT based on actual traffic counts, on all Interstate and principal arterials on a 3-year cycle, is a required but not necessarily followed protocol for HPMS reporting. The calculation and application of various adjustment factors to 24- or 48-hour coverage counts to enable them to represent AADT is as much art as science. Classification counts, which are needed to adjust pneumatic tube counts collected for three or more axle vehicles as well as for other HPMS items, are difficult to collect and to apply on a state-wide basis. Equipment used to obtain count information is only accurate within certain limits and can suffer from malfunctions and breakdowns, factors which can affect the reliability of traffic counts. The user must recognize the shortcomings of the data collection and traffic estimation processes when using HPMS travel data. The degree to which recommended procedures are followed can impact the accuracy and consistency of the travel estimates in HPMS. These differences in State and local practices need to be taken into account when attempting to make valid State level comparisons.

FHWA uses reported AADT to conduct congestion, needs, performance, and impact analyses and for modeling. Areawide travel reported through the HPMS as well as calculated universe and expanded sample travel for selected areas can also be used by the EPA to benchmark nonattainment urbanized area travel and to monitor growth of travel over time in nonattainment areas. This provides EPA another means to track whether or not air quality nonattainment areas are meeting highway travel reduction goals of State clean air implementation plans.

Congestion

The FHWA currently uses traffic volume-service flow ratio (V/SF) as the primary measure of congestion on the Nation's highway systems; however, FHWA also makes use of volume per lane (AADT/lane) and hours of delay/1,000 VMT as congestion measures for some purposes.

The V/SF is a computed numerical value based upon traffic volume information and roadway capacity as calculated from HPMS data. It is one among many measures that has been and

is being actively considered to measure congestion. As a measure of congestion, V/SF has many legitimate uses; however, other measures of congestion, such as AADT/lane, may be more or less suitable depending upon the purpose for which the measure is being used. The objective of this discussion is not to develop a treatise on the most appropriate measure of congestion; however, the user of these data has a responsibility to assure that the application of V/SF or AADT/lane from HPMS is suitable to the purpose for which the congestion analysis is being conducted. Note that these values are indicators of recurring congestion only; they are not useful in evaluating non-recurring congestion.

In general concept, the V/SF is calculated for each sampled section of roadway included in the HPMS. The calculation uses the AADT, the design hour volume as represented by the 30th highest hour volume, the directional factor for all urban and rural multilane facilities, and the peak hour capacity of the roadway section. All of these values are reported in the HPMS, with the exception of capacity which is calculated by the HPMS software using procedures outlined in the 1994 *Highway Capacity Manual* (HCM). While traffic data are reported to the HPMS in a 100-percent basis for principal arterials and NHS (and on a sampled basis for the other regular sampled systems), the design hour volume and directional factors are available only on a sample basis. In addition, the calculation of peak hour capacity introduces additional complexity into the process of calculating V/SF. The calculation of the peak hour capacity is done in accordance with an estimating process contained in the HCM, which was developed by the Transportation Research Board. The estimating procedures use many additional HPMS data items relating to roadway characteristics such as geometry, speed, signalization, facility type, and facility location, among others. For the most part, the additional information needed to estimate peak hour capacity from the HPMS data is also sample based.

Since V/SF is the product of a complex estimating process, it is more susceptible to State-to-State variability than a measured congestion parameter such as travel time or AADT/lane might be. Some areas of variability that should concern the user of V/SF as a congestion measure include the applicability of the generalized HCM procedures to the particular case under analysis and the completeness and accuracy of the various data elements used to compute the V/SF if State level comparisons are attempted. At a national level, the desire for consistency for planning purposes mitigates for the use of uniform procedures, as represented in the HCM. Since AADT/lane does not need to use calculated capacity values, it is less encumbered by these estimating shortcomings and may be a better choice for some purposes.

Note that, beginning with 1993, the major decrease in the percent of congested travel (chart "Urban Interstate System Congestion Trends") is an artifact of the change in capacity calculation procedures based on the *Highway Capacity Manual*. A revised HCM was issued in 1994 and subsequent

Text

calculations of capacity have been based on the revised procedures. The change in procedures was based on research that showed that drivers were willing to follow each other more closely and at higher speeds than previously. Although this change in driving habits occurred over a period of years, the change in procedure occurred abruptly. These trends have been back cast to 1993 using the 1994 HCM procedures for users convenience in comparing more recent congestion trends. FHWA is exploring the use of AADT/capacity as an additional measure of congestion.

Summary

For the most part, the HPMS provides a generally uniform, consistent, statistically valid, and credible national level data base built from State-provided data. The HPMS is the most comprehensive and accurate data base available on the extent and performance of the Nation's highways. Users need to recognize that the HPMS data and the tables generated from the HPMS files in this publication must be used with full understanding of the data reporting and estimating processes and a recognition of their shortcomings. When making State-to-State comparisons, the user must be keenly aware of the differences that exist between the States being compared; it is inappropriate to use these statistics without recognizing, and accounting for, the major differences that may impact comparability.

1/ Includes State highway agency, State park, State toll and other State agency roadways.

2/ Includes mileage not identified by ownership. Contains mainly municipal mileage for urban summaries.

3/ Mileage in Federal parks, forests, and reservations that are not part of the State and local highway systems.

4/ 1996 data.

1/ Includes the 50 States, the District of Columbia and Puerto Rico. 1996 data used for Georgia and Maryland.

2/ Unpaved mileage includes the following categories: Unimproved roadways using the natural surface and maintained to permit passability; Graded and Drained roadways of natural earth aligned and graded to permit reasonably convenient use by motor vehicles and which have adequate drainage to prevent serious impairment of the road by normal surface water—surface may be stabilized; and Soil, Gravel, or Stone, a graded and drained road with a surface of mixed soil, gravel, crushed stone, slag, shell, etc.—surface may be stabilized.

3/ Paved mileage includes the following categories: Low Type, an earth, gravel, or stone roadway which has a bituminous surface course less than 1" thick—suitable for occasional heavy loads; Intermediate Type, a mixed bituminous or bituminous penetration roadway on a flexible base having a combined surface and base thickness of less than 7"; High-Type Flexible, a mixed bituminous or bituminous penetration roadway on a flexible base having a combined surface and base thickness of 7" or more—also includes brick, block, or combination roadways; High-Type Composite, a mixed bituminous or bituminous penetration roadway of more than 1" compacted material on a rigid base with a combined surface and base thickness of 7" or more; High-Type Rigid, a Portland Cement Concrete roadway with or without a bituminous wearing surface of less than 1".

4/ Includes State highway agency, State park, State toll and other State agency roadways.

5/ Totals for rural minor collectors and rural and urban locals are shown separately below.

1/ Includes State highway agency, State park, State toll and other State agency roadways.
2/ Includes mileage not identified by ownership. Contains mainly municipal mileage for urban summaries.

3/ Mileage in Federal parks, forests, and reservations that are not part of the State and local highway systems.
4/ 1996 data.

FEDERAL - AID HIGHWAY LENGTH - 1997

MILES BY TRAFFIC LANES AND ACCESS CONTROL 1/

1/ Traffic lanes: reflects the prevailing number of lanes (excluding parking and turning lanes) carrying through traffic during the off-peak period.
 Access control: Full Access Control - preference has been given to through traffic movements by providing interchanges with selected public roads and by prohibiting direct driveway connections. Partial Access Control - preference has been given to through traffic movement. In addition to possible interchanges there may be some crossings at grade with public roads, but direct private driveway connections have been minimized.
 2/ Although the Interstate System is part of the National Highway System, its mileage is shown separately.
 3/ Includes 3-lane roadways, one-way streets, undivided 4-lane highways, etc.; for Interstate, includes some 2-lane roadways.
 4/ 1996 data.
 5/ Some differences from other tables may be noted because these are estimated from sample data.

1/ Includes the 50 States, the District of Columbia, and Puerto Rico. 1996 data were used for Georgia and Maryland.

2/ Access control: Full Access Control - preference has been given to through traffic movements by providing interchanges with selected public roads and by prohibiting direct driveway connections. Partial Access Control - preference has been given to through traffic movement. In addition to possible interchanges,

there may be some crossings at grade with public roads, but direct driveway connections have been minimized.

3/ Although the Interstate System is part of the National Highway System, its mileage is shown separately.

4/ Some differences from other tables may be noted because these are estimated from sample data.

1/ Table does not include unpaved mileage.

2/ Data are reported as the International Roughness Index (IRI) in inches per mile. Reference: World Bank Technical Paper Number 46, 1986. Lower IRI represents smoother riding roadways. To obtain a comprehensive assessment of pavement condition, additional measures of pavement distress are needed.

3/ Although the Interstate System is part of the National Highway System, its mileage is shown separately.

4/ 1996 data.

FUNCTIONAL SYSTEM LENGTH - 1997 MILES BY JURISDICTION - RURAL

1/ Includes State highway agency, State park, State toll and other State agency roadways. Includes other Local Government mileage: Illinois 8 miles, Maryland 7 miles, New York 2 miles.
2/ Includes mileage not identified by ownership. Contains mainly municipal mileage for urban

summaries.
3/ Mileage in Federal parks, forests, and reservations that are not a part of the State and Local highway systems.
4/ 1996 data.

1/ Traffic lanes: reflects the prevailing number of lanes (excluding parking and turning lanes) carrying through traffic during the off-peak period. Access control: Full access control — preference has been given to through traffic movements by providing interchanges with selected public roads and by prohibiting direct driveway connections. Partial access control — preference has been given to through traffic movement. In addition to possible interchanges there may be some crossings at grade with public roads, but direct

private driveway connections have been minimized.

2/ Includes 3-lane roadways, one-way streets, undivided 4-lane highways, etc; for Interstate it includes 2-lane roadways.

3/ 1996 data.

FUNCTIONAL SYSTEM LENGTH - 1997

1/ Includes the 50 States, the District of Columbia and Puerto Rico. 1996 data were used for Georgia and Maryland.

2/ Access control: Full Access Control — preference has been given to through traffic movements by providing interchanges with selected public roads and by prohibiting direct

driveway connections. Partial Access Control — preference has been given to through traffic movement. In addition to interchanges there may be some crossings at grade with public roads, but direct private driveway connections have been minimized.

1/ In 1995, updated capacity (service flow) calculation procedures were instituted in the HPMS data reporting process. The procedures are based on the Highway Capacity Manual, Third Edition, 1994, published by the Transportation Research Board.

2/ 1996 data.

URBAN INTERSTATE SYSTEM CONGESTION TRENDS

PERCENT OF MILEAGE AND PEAK PERIOD TRAVEL WITH $V/SF > OR = 0.80$

1/ Updated capacity (service flow) calculation procedures based on the Highway Capacity Manual, Third Edition, 1994, published by the Transportation Research Board have been used in computing values from 1993 on.

AVERAGE DAILY VEHICLES PER LANE

1/ The "Present Serviceability Rating" (PSR) is a subjective, primarily ride-based rating system adopted from the "AASHTO ROAD TESTS" conducted in the late 1950's and early 1960's. Reference: Highway Research Board Special Report 61E, 1962. The PSR values range from 0.1 to 5.0; higher PSR values represent smoother riding roadways.
2/ 1996 data.

1/ Data are reported as the International Roughness Index (IRI) in inches per mile. Reference: World Bank Technical Paper Number 46, 1986. Lower IRI represents smoother riding roadways; to obtain a comprehensive assessment of

pavement condition, additional measures of pavement distress are needed.

2/ 1996 data.

Total, All 402 Urbanized Areas																			
			11,760	7,948	41,467	70,867	67,860	478,122	678,044	950,307	418,427	918,363	728,033	312,584	526,183	3,853,897			

1/ A "Federal-aid Urbanized Area" is an area with 50,000 or more persons that at a minimum encompasses the land area delineated as the urbanized area by the Bureau of the Census. Areas are in sort by population.
2/ The travel data collection methodology for the Chicago urbanized area has been changed and comparisons of vehicle-miles of travel (VMT) to previous years may not be valid.
3/ Some urbanized area data are inconsistently reported; for example, the Pennsylvania portion of Wilmington, Delaware

is reported with Philadelphia; portions of Bristol, Connecticut are reported with Hartford or Waterbury; Kissimmee, Florida is reported with Orlando; and the Illinois portions of Aurora, Danville, Elgin, Crystal Lake, Joliet and Round Lake Beach are reported with Chicago. Other anomalies may exist.
4/ 1996 data used for all urbanized areas in Maryland and Georgia and their portions of shared urbanized areas.

1/ A "Federal-aid Urbanized Area" is an area with 50,000 or more persons that at a minimum encompasses the land area delineated as the urbanized area by the Bureau of the Census. Areas are in sort by population.
2/ "DVMT" stands for "Daily Vehicle-Miles of Travel."
3/ Lane miles estimated by FHWA.
4/ The travel data collection methodology for the Chicago urbanized area has been changed and comparisons of vehicle-miles of travel (VMT) to previous years may not be valid.

5/ Some urbanized area data are inconsistently reported; for example, the Pennsylvania portion of Wilmington, Delaware is reported with Philadelphia; portions of Bristol, Connecticut are reported with Hartford or Waterbury; Kissimmee, Florida is reported with Orlando; and the Illinois portions of Aurora, Danville, Elgin, Crystal Lake, Joliet and Round Lake Beach are reported with Chicago. Other anomalies may exist.
6/ 1996 data used for all urbanized areas in Maryland and Georgia and their portions of shared urbanized areas.

STATE HIGHWAY AGENCY-ADMINISTERED PUBLIC ROADS - 1997 1/ ESTIMATED MILES BY FUNCTIONAL SYSTEM

1/ The 50 states and the District of Columbia report travel by highway category, number of motor vehicles registered, and total fuel consumed. The travel and fuel data by vehicle type and stratification of trucks, as well as related data, are calculated by the Federal Highway Administration (FHWA). Entries for 1996 may have been revised based on the availability of more current data. Estimation procedures include use of the 1992 Census of Transportation Truck Inventory and Use Survey (TIUS) and independent analysis of light truck travel.

2/ Other 2-Axle 4-Tire Vehicles which are not passenger cars. These include vans, pickup trucks, and sport/utility vehicles.

3/ Single-Unit 2-Axle 6-Tire or More Trucks on a single frame with at least two axles and six tires.

4/ Urban consists of travel on all roads and streets in urban places with 5,000 or greater population.

5/ Stratification of the truck figures is made by the FHWA based on State-supplied data and the 1992 TIUS. Combination trucks represent approximately the number of tractors with semi-trailer(s) and a majority of heavy single-unit trucks used regularly in combination with trailer(s).

6/ As estimated by the FHWA using the 1995 Nationwide Personal Transportation Survey (NPTS).

7/ Total fuel consumption figures are derived from state fuel tax records and reflect latest available data. Distribution by vehicle type is estimated by the FHWA based on miles per gallon for both diesel and gasoline powered vehicles using State-supplied data, the 1992 TIUS, and other sources as a baseline.

1/ Data are based on State highway agency estimates reported for this functional system.
 2/ Other 2-Axle 4-Tire Vehicles which are not passenger cars. (includes vans, pickups, SUVs)
 3/ Single-Unit 2-Axle 6-Tire or More Trucks on a single frame with at least two axles and six tires.
 4/ Motorcycles included with passenger cars.
 5/ 2-Axle 4-Tire Vehicles included with passenger cars.
 6/ Buses included with passenger cars or with Single-Unit 2-Axle 6-Tire or more trucks.
 7/ Data not available.
 8/ Data from a previous year.
 9/ State has no roads within this functional classification.

PERCENTAGE DISTRIBUTION OF TRAFFIC VOLUMES AND LOADINGS ON THE INTERSTATE SYSTEM 1/

1/ Based on data from the Truck Weight Study which are collected by the States for varying time periods each year and are not adjusted to typify annual averages. Loadings are based on equivalent axle loads which are the damage to a pavement caused by a vehicle axle relative to an 80 kN (18,000 lb) force which represents a standard single axle.

<p>1/ Pedestrians injured are included. Most serious injuries are those categorized as incapacitating. Reporting System (FARS) as of August 24, 1998.</p> <p>2/ 1996 nonfatal injury information is shown for Arkansas, District of Columbia, Florida, Iowa, Maryland, Missouri, Puerto Rico, New York, Rhode Island, Tennessee, Utah, and Washington because of incomplete reporting prior to this publication. Illinois and West Virginia data are 1995. Most serious injuries were not submitted by the District of Columbia, Georgia, Massachusetts, New Hampshire, Puerto Rico, and Vermont.</p> <p>3/ Fatal crash and fatality numbers have been adjusted to agree with State totals obtained from the Fatality Analysis Reporting System (FARS) as of August 24, 1998.</p> <p>4/ Per 100 million vehicle-miles of travel.</p> <p>5/ Includes data for non-Interstate facilities, but excludes crash data for about 935 miles of locals and collectors.</p> <p>6/ Includes urban minor arterial and collector and rural minor arterial and major collector functional systems.</p> <p>7/ The category Total Federal-Aid Highways includes Other Federal-Aid Highways and Total National Highway System.</p> <p>8/ Includes local roads and rural minor collectors that are not part of the NHS.</p>

1/ July 1, 1997, estimates from U.S. Bureau of Census.

2/ Number of driver licenses shown in Table DL-1C.

3/ Number of total motor vehicle registrations shown in Table MV-1 including motorcycles.

4/ Rate in thousands.

5/ 1996 nonfatal injury crashes, nonfatal injured persons, most serious injured, and pedestrians injured data used.

6/ Most serious injury data not submitted.

7/ 1995 nonfatal injury data used.

1/ Annual average daily traffic.
 2/ Pedestrians injured are included. Most serious injuries are those categorized as incapacitating.
 3/ Fatal crashes and fatality numbers have been adjusted to agree with State totals obtained from the Fatality Analysis Reporting System (FARS) as of August 24, 1998.
 4/ Per 100 million vehicle-miles of travel.
 5/ 1996 nonfatal injury crashes, nonfatal injured persons, most serious injured, and pedestrians injured data used.
 6/ Most serious injury data not submitted.
 7/ 1995 nonfatal injury data used.

MOTOR VEHICLE TRAFFIC FATALITIES AND INJURIES - 1997

TOTAL - RURAL

1/ Annual average daily traffic.
 2/ Pedestrians injured are included. Most serious injuries are those categorized as incapacitating.
 3/ Fatal crashes and fatality numbers have been adjusted to agree with State totals obtained from the Fatality Analysis Reporting System (FARS) as of August 24, 1998.
 4/ Per 100 million vehicle-miles of travel.
 5/ 1996 nonfatal injury crashes, nonfatal injured persons, most serious injured, and pedestrians injured data used.
 6/ Most serious injury data not submitted.
 7/ 1995 nonfatal injury data used.

1/ Annual average daily traffic.
 2/ Pedestrians injured are included. Most serious injuries are those categorized as incapacitating.
 3/ Fatal crashes and fatality numbers have been adjusted to agree with State totals obtained from the Fatality Analysis Reporting System (FARS) as of August 24, 1998.
 4/ Per 100 million vehicle-miles of travel.
 5/ 1996 nonfatal injury crashes, nonfatal injured persons, most serious injured, and pedestrians injured data used.
 6/ Most serious injury data not submitted.
 7/ 1995 nonfatal injury data used.

MOTOR VEHICLE TRAFFIC FATALITIES AND INJURIES - 1997

1/ Annual average daily traffic.
 2/ Pedestrians injured are included. Most serious injuries are those categorized as incapacitating.
 3/ Fatal crashes and fatality numbers have been adjusted to agree with State totals obtained from the Fatality Analysis Reporting System (FARS) as of August 24, 1998.
 4/ Per 100 million vehicle-miles of travel.
 5/ 1996 nonfatal injury crashes, nonfatal injured persons, most serious injured, and pedestrians injured data used.
 6/ Most serious injury data not submitted.
 7/ 1995 nonfatal injury data used.

1/ Excludes crash data for about 577 miles of collectors and locals.
 2/ Annual average daily traffic.
 3/ Pedestrians are included. Most serious injuries are those categorized as incapacitating.
 4/ Fatal accident and fatality numbers have been adjusted to agree with State totals obtained from the Fatality Analysis Reporting System (FARS) as of August 24, 1998.
 5/ Per 100 million vehicle-miles of travel.
 6/ 1996 nonfatal injury crashes, nonfatal injured persons, most serious injured, and pedestrians injured data used.
 7/ Most serious injury data not submitted.
 8/ 1995 nonfatal injury data used.

1/ Excludes crash data for about 358 miles of collectors and locals.
 2/ Annual average daily traffic.
 3/ Pedestrians are included. Most serious injuries are those categorized as incapacitating.
 4/ Fatal accident and fatality numbers have been adjusted to agree with State totals obtained from the Fatality Analysis Reporting System (FARS) as of August 24, 1998.
 5/ Per 100 million vehicle-miles of travel.
 6/ 1996 nonfatal injury crashes, nonfatal injured persons, most serious injured, and pedestrians injured data used.
 7/ Most serious injury data not submitted.
 8/ 1995 nonfatal injury data used.

HIGHWAY STATISTICS (MOST CURRENT YEAR) FOR PUERTO RICO AND THE TERRITORIES 1/

1/ Some entries were estimated by FHWA because of inconsistencies in reported data. Data shown is most current year available.												

Section VII

INTERNATIONAL

This section contains transportation and related data for selected countries. Basic socioeconomic data is provided to establish a framework for the transportation indicators that follow. These include information about each country's network of roadways, ownership and use of roadway vehicles, including the fatalities attributable to those vehicles, and fuel prices. Topics were chosen to correspond with major topics presented elsewhere in this volume. Except as noted, data is for the calendar year 1996, which is the most recent year in which it is available for many countries.

The availability of reliable information was a major consideration in selecting topics; therefore, some useful areas were not covered because of the unavailability of complete and comparable data from an array of countries that could readily be converted to meaningful indicators. Countries were selected, as other developed countries and/or major U.S. trading partners, for comparisons with the U.S. system. Japan, four European countries and our North American Free Trade Agreement (NAFTA) trading partners were chosen as examples of these. In addition, for the first time this year Chile was included, with the data from that country supplied by the National Commission on Traffic Safety of Chile. Most U.S. data came from *Highway Statistics 1996* or directly from other Federal Highway Administration sources.

Table IN-1 sets forth indicators of social and demographic status for each country, including population, land area, population density, gross domestic product (GDP) and the amount of total transport by roadway. These are shown for 1996 in order to correspond with the transportation data. The GDP and GDP per capita dollar amount estimates for each country are stated in terms of purchasing power equivalents. This method involves the use of dollar price weights applied to the quantities of goods and services produced by the economy. With this method of conversion, a given sum of dollars in the U.S. will buy the same amount of goods as that same amount, converted to the local currency, will buy in the other country. While population, land area, population density, and GDP vary greatly among the countries, GDP per capita varies only slightly among seven of the eight countries. Mexico is less economically developed than the others and varies from them in all important indicators. The percent of passenger travel and freight transportation on highway modes show very different patterns between the North American and European countries. In the U.S. and Canada passenger transportation is almost exclusively by highway modes while only a small percentage of freight moves that way. The pattern in Europe is somewhat different as passengers are less and freight more likely to use highway transport.

Table IN-2 provides information on roadway systems. Expressways and other main roadways are grouped together under "major roads" while all others are considered "secondary roads." These are only general categories, as the definitions and data collection processes vary from country to country. The tables and accompanying charts show the inverse relationship between the previously displayed population density and miles per population unit for all roads. The correlation with major roads is somewhat less pronounced.

Table IN-3 shows the numbers of several types of vehicles and vehicles per capita. Some countries count only selected populations of trucks, and possibly use varying methods for counting other vehicle types as well. Although all known variations between data are noted in footnotes, it is possible that some were not apparent from the original data sources and so are not noted. The data on automobiles per population unit clearly show the disparity between Mexico and Chile and the more developed countries.

Table IN-4, together with the miles-traveled data, presents a display of the intensity of vehicle usage. While the U.S., as a large populous country, is far ahead in total kilometers, the differences in kilometers per vehicle are much less.

Table IN-5 shows fuel costs and the contribution to the economy of the transportation and related sectors. Fuel prices vary widely between countries and reflect full costs including applicable taxes. More than 50 percent of gasoline prices in the European countries can be attributed to taxes. While diesel fuel taxes are less than those on gasoline they are substantial by comparison with those imposed in the United States. The contribution of the transport, storage and communication sectors to the economies is surprisingly uniform for all countries except Mexico and the employment portion for the United States.

Table IN-6 provides fatalities and fatality rates for each country. Because travel data (Table IN-4) is unavailable for some countries, the rate data is also unavailable.

USE OF DATA

The data in this section came from reliable published sources which are noted with the individual tables. Ultimately all data came from the source countries. Data collection methods, definitions of terms, and basic political and economic infrastructures vary from country to country. These differences will manifest themselves in many ways within the

data items and may not always be apparent. All data in this section should, then, be used with great care and only for general comparisons.

Section VIII

1995 NATIONWIDE PERSONAL TRANSPORTATION SURVEY (NPTS)

The 1995 NPTS is the most recent in the series of personal travel surveys which collect data on trips made by residents of the United States. Previous NPTS data collection occurred in 1969, 1977, 1983 and 1990; this series provides a unique look at trends in household and personal travel over time. The 1995 NPTS is a rich data source of information about travelers and their characteristics, household composition, the amount and type of trips that people take every day, and selected information about household vehicles. It contains data on all household trips, by all modes, and all purposes.

BACKGROUND

The 1995 NPTS was a national random-digit dialing sample which yielded interviews from over 95,000 people living in 42,000 households throughout the United States. The 1995 NPTS interviews were conducted using Computer-Assisted Telephone Interviewing (CATI) to collect data on trips made by all people five years of age or older in the household. Any person 14 years of age or older were interviewed directly, with a household adult reporting for children ages 5 to 13. The survey was conducted for the U.S. Department of Transportation by Research Triangle Institute.

SPONSORS

The 1995 NPTS was managed by FHWA and sponsored by the following Department of Transportation agencies:

Federal Highway Administration
Bureau of Transportation Statistics
Federal Transit Administration
National Highway Traffic Safety Administration

CONTENT

Information was collected on all trips taken by household members during a designated 24-hour period known as "Travel Day." This trip information was expanded to calculate annual estimates of trips and miles of travel. The 1995 NPTS also collected information on the demographic characteristics of household members, characteristics of household vehicles, estimates of annual driving, information on workers, and detailed data on land use characteristics at the residence location.

GRAPH AND TABLES

Trip Chaining

One of the most important trips that people make every day is the trip to work. For many people the trip to work becomes the organizing principle of their day—more and more stops are linked to that basic trip. This linking of trips is called a trip chain. The side trips made on the way to or from work include dropping off and picking up passengers such as children at day care or school. They also include trips to fulfill family needs such as shopping and errands. Women make these types of trips more than men and account for a large portion of this growing type of travel.

Charts NPTS 1A and 1B show that people, both men and women, are less likely to stop on the way from home to work than on the way from work to home. Less than one out of five men and about one out of three women report stopping for any reason on the way to work. However, the majority of women (61.2 percent) do make at least one stop after work, and almost thirty percent (28.3 percent) make two stops or more (Charts NPTS 2A and 2B). Just under half of men stop on the way home from work, and about one out of six (17.7 percent) make two stops or more. These analyses are for adult men and women traveling on a weekday.

Of the people who do make stops, the side trips are made for all reasons. Stops to take another person somewhere and family or personal errands are most common on the way from home to work. On the way from work to home, stops for shopping are the most common (see Chart NPTS 3A and 3B).

Trips to take another person somewhere are very commonly linked to the work trip. The top five reasons account for eighty-five percent of all such trips (Chart NPTS 4). Women make the majority (64 percent) of these trips to escort another person somewhere—these trips can be made by any mode, such as walking, transit or private vehicle. They make just over 70 percent of the trips to pick up or drop off someone at school, 68 percent of trips to pick up or drop off someone for other family and personal business, and approximately 60 percent of trips to take or pick up someone from other social and recreational activities. Trips to drop off or pick up someone from work are equally divided between men and women.

Chart

Vehicle Ownership

One of the most significant growth factors over the last two decades has been in household vehicle ownership. The data from the 1995 survey indicate that the household vehicle ownership is beginning to stabilize. A separate question is whether having more vehicles than drivers in a household adds substantially to travel. Charts NPTS 5A and 5B show the annual person trips and the annual person miles of travel per licensed driver for households with the same number of vehicles as drivers and for households with more vehicles than drivers. Households with no vehicles were not included in this analysis. This graph shows that although the additional vehicles do not add much to the number of trips, the annual person miles of travel increases with increasing income in households with more cars than drivers.

Use of Older Vehicles

The households with more cars than drivers often include older cars. The average age of the vehicles in households with one car or less per licensed driver is between 7 and 8 years, whereas for households with more vehicles than drivers the average vehicle age (all vehicles) is between 10 and 11 years. As Chart NPTS 6 shows, over half (51.9 percent) of the households with more than one vehicle per licensed driver have a car 10 years or older, whereas less than 1 in 5 of the households (17.2 percent) with exactly one car per driver have a vehicle that old.

Younger drivers and older drivers use older cars—40 percent of the drivers in each of these age groups (16 to 19 years and 60 and older) are driving cars ten years old or older, whereas just 12 percent are driving cars less than

Nationwide Personal Transportation Survey

two years old. On the other hand, over forty percent of drivers ages 20 to 59 are driving cars 5 years old or newer (see Chart NPTS 7).

Annual Miles of Travel by Driver's Age

The 1995 NPTS included odometer readings taken approximately three months apart to estimate annual vehicle miles of travel. Graph NPTS 8 shows that driver miles peak at 14.6 thousand miles per year on average for drivers in their twenties, stays at about 13,000 for those in the 30- to 49-year age group, and declines only slightly to 11,000 for those in their fifties. Once drivers reach the age of 60 years or older they average only 7,500 miles per year.

REPORTS AND PRODUCTS

Written reports and detailed explanation of the data collection can be found on the Web at:

<http://www-cta.ornl.gov/npts>

The website includes an interactive table maker, which allows the user to develop their own analysis variables and run the results.

A copy of 1995 NPTS CD-ROM which contains SAS, DBASE, ASCII data, as well as the Users Guide can be ordered directly from the FHWA Technology and Research Center at (301) 577-0818, or FAX (301) 577-1421. Other 1995 NPTS products such as the *1995 Data Volume Book* and the *Summary of Travel Trends* will also be available from the Report Center.

1/ This table shows Federal Highway Administration estimates of gasohol use. The gasohol volumes shown include both the ethanol and the gasoline components. The Energy Policy Act of 1992 expanded the definition of gasohol effective January 1, 1993. Prior to the Act, gasohol was defined as a blend of gasoline and at least 10 percent, by volume, fuel alcohol. Under the Act, three types of gasohol were defined: (1) 10-percent gasohol, which corresponds to the definition before the Act; (2) 7.7-percent gasohol, which contains at least 7.7 percent alcohol but less than 10 percent; and (3) 5.7-percent gasohol, which contains at least 5.7 percent alcohol but less than 7.7 percent.

2/ The amount of ethanol used in gasohol is estimated from gasohol tax collections, refunds, and credits reported by the Internal Revenue Service, U.S. Department of the Treasury.

3/ For most States, the figures shown for 10-percent blends are State data.

4/ 7.7-percent gasohol is generally used to meet the requirements for oxygenated fuel to reduce winter carbon monoxide emissions.

PUBLIC ROAD LENGTH - 1997 KILOMETERS BY JURISDICTION 1/

1/ Due to conversion from English to metric units and to rounding, individual cell values may not agree with corresponding mileage table cell values.

2/ Includes State highway agency, State park, State toll and other State agency roadways.

3/ Includes roadways not identified by ownership. Contains mainly municipal roadways for urban summaries.

4/ Roadways in Federal parks, forests, and reservations that are not part of the State and local highway systems.

5/ 1996 data.

Grand Total				2,491,825						4,011,891	6,827,870

1/ Includes the 50 States, the District of Columbia and Puerto Rico. 1996 data used for Georgia and Maryland. Due to conversion from English to metric units and to rounding, individual cell values may not agree with corresponding mileage table cell values.

2/ Unpaved length includes the following categories: Unimproved roadways using the natural surface and maintained to permit passability; Graded and Drained roadways of natural earth aligned and graded to permit reasonably convenient use by motor vehicles and which have adequate drainage to prevent serious impairment of the road by normal surface water— surface may be stabilized; and Soil, Gravel, or Stone, a graded and drained road with a surface of mixed soil, gravel, crushed stone, slag, shell, etc.—surface may be stabilized.

3/ Paved length includes the following categories: Low Type, an earth, gravel, or stone roadway which has a bituminous surface course less than 1" thick—suitable for occasional heavy loads; Intermediate Type, a mixed bituminous or bituminous penetration roadway on a flexible base having a combined surface and base thickness of less than 7"; High-Type Flexible, a mixed bituminous or bituminous penetration roadway on a flexible base having a combined surface and base thickness of 7" or more—also includes brick, block, or combination roadways; High-Type Composite, a mixed bituminous or bituminous penetration roadway of more than 1" compacted material on a rigid base with a combined surface and base thickness of 7" or more; High-Type Rigid, a Portland Cement Concrete roadway with or without a bituminous wearing surface of less than 1".

4/ Includes State highway agency, State park, State toll and other State agency roadways.

5/ Totals for rural minor collectors and rural and urban locals are shown separately below.

1/ Due to conversion from English to metric units and to rounding, individual cell values may not agree with corresponding mileage table cell values.
2/ Includes State highway agency, State park, State toll and other State agency roadways.
3/ Includes roadways not identified by administrative authority. Contains mainly municipal roadways for

urban summaries.
4/ Roadways in Federal parks, forests, and reservations that are not part of the State and local highway systems.
5/ 1996 data.

1/ Includes the 50 States, the District of Columbia, and Puerto Rico. 1996 data were used for Georgia and Maryland. Due to conversion from English to metric units and to rounding, individual cell values may not agree with corresponding mileage table cell values.

2/ Traffic lanes: reflects the prevailing number of lanes (excluding parking and turning lanes) carrying through traffic during the off-peak period. Access Control: Full Access Control - preference has been given to through traffic movements by providing interchanges with selected public roads and by prohibiting direct driveway connections. Partial Access Control—preference has been given to through traffic movement. In addition to possible interchanges there may be some crossings at grade with public roads, but direct private driveway connections have been minimized.

3/ Although the Interstate System is part of the National Highway System, its length is shown separately.

1/ Due to conversion from English to metric units and to rounding, individual cell values may not agree with corresponding mileage table cell values.
 2/ Includes State highway agency, State park, State toll and other State agency roadways.
 3/ Includes roadways not identified by ownership. Contains mainly municipal roadways for urban summaries.
 4/ Roadways in Federal parks, forests, and reservations that are not a part of the State and local highway systems.
 5/ 1996 data.

1/ The 50 states and the District of Columbia report travel by highway category, number of motor vehicles registered, and total fuel consumed. The travel and fuel data by vehicle type and stratification of trucks, as well as related data, are calculated by the Federal Highway Administration (FHWA). Entries for 1996 may have been revised based on the availability of more current data. Estimation procedures include use of the 1992 Census of Transportation Truck Inventory and Use Survey (TIUS) and independent analysis of light truck travel.

2/ Other 2-Axle 4-Tire Vehicles which are not passenger cars. These include vans, pickup trucks, and sport/utility vehicles.

3/ Single-Unit 2-Axle 6-Tire or More Trucks on a single frame with at least two axles and six tires.

4/ Urban consists of travel on all roads and streets in urban places with 5,000 or greater population.

5/ Stratification of the truck figures is made by the FHWA based on State-supplied data and the 1992 TIUS. Combination trucks represent approximately the number of tractors with semi-trailer(s) and a majority of heavy single-unit trucks used regularly in combination with trailer(s).

6/ As estimated by the FHWA using the 1995 Nationwide Personal Transportation Survey (NPTS).

7/ Total fuel consumption figures are derived from state fuel tax records and reflect latest available data. Distribution by vehicle type is estimated by the FHWA based on miles per gallon for both diesel and gasoline powered vehicles using State-supplied data, the 1992 TIUS, and other sources as a baseline. Kilometers and liters are calculated using SI metric conversion factors.

1/ Data are based on State highway agency estimates reported for the various functional systems and are subject to revision pending further FHWA review. Due to conversion from English to metric units and to rounding, individual cell values may not agree with corresponding vehicle-miles table cell values.

2/ Data estimated by FHWA.

3/ Preliminary estimate.

1/ Travel for all systems other than Interstate are FHWA estimates based on HPMS and other available data.
 Due to conversion from English to metric units and to rounding, individual cell values may not agree with corresponding vehicle-miles table cell values.

2/ Although the Interstate System is part of the National Highway System, its travel is shown separately.

3/ Data estimated by FHWA.

4/ Preliminary estimate.

1/ Pedestrians injured are included. Most serious injuries are those categorized as incapacitating.
 2/ 1996 nonfatal injury information is shown for Arkansas, District of Columbia, Florida, Iowa, Maryland, Missouri, Puerto Rico, New York, Rhode Island, Tennessee, Utah, and Washington because of incomplete reporting prior to this publication. Illinois and West Virginia data are 1995. Most serious injuries were not submitted by the District of Columbia, Georgia, Massachusetts, New Hampshire, Puerto Rico, and Vermont.
 3/ Fatal crash and fatality numbers have been adjusted to agree with State totals obtained from the Fatality Analysis Reporting System (FARS) as of August 24, 1998.
 4/ Per 100 million vehicle-miles of travel.
 5/ Includes data for non-Interstate facilities, but excludes crash data for about 935 miles of locals and collectors.
 6/ Includes urban minor arterial and collector and rural minor arterial and major collector functional systems.
 7/ The category Total Federal-Aid Highways includes Other Federal-Aid Highways and Total National Highway System.
 8/ Includes local roads and rural minor collectors that are not part of the NHS.
